Leisure ruled that ''the loss of individual customers is clearly compensable by monetary damages should UPI succeed on the merits of this action and be able to show that the loss of those customers was directly related to the loss of the Reuters service.''

Last week UPI filed for arbitration of a claim that Reuters has deprived UPI of revenues by supplying former UPI customers with the Reuters photo service.

In its request to the International Chamber of Commerce Court of Arbitration in Paris, UPI said Reuters is obligated to reimburse UPI for any revenues it loses as a result of UPI subscribers switching to Reuters' photo service.

UPI is seeking damages of more than $600,000 in the claim.

CAPE TOWN, SOUTH AFRICA (MARCH 13) UPI - More than 11,000 people were murdered in South Africa last year, or one every 46 minutes, Law and Order Minister Adriaan Vlok told Parliament Tuesday.

Vlok, in an annual review of crime statistics, also reported 20,458 rapes, or one every 26 minutes; 128,887 serious assaults; 58,298 auto thefts; 50,636 robberies and 187,946 housebreakings in 1989.

The minister, who is responsible for police affairs, blamed unemployment, poor socio-economic conditions and an understaffed police force for the high crime rate.

''We will do everything in our power to try and change the situation,'' he said.

ORLANDO, FL. (MARCH 13) UPI - The NFL awarded Phoenix Super Bowl XXVII in 1993, giving the Arizona city its first league championship.

In a close battle with Super Bowl veterans Los Angeles and San Diego, the 28 club owners needed five ballots before awarding the Super Bowl to Phoenix, which has been an NFL city since 1988.

''We're elated,'' said Bill Shover, chairman of the Phoenix coordinating committee. ''To be in competition with two cities that have hosted successful Super Bowls brought us into the big time.''

The Los Angeles area has been the site of six Super Bowls. Super Bowl XXII was played in San Diego in 1988. The next two Super Bowls will be in Tampa and Minneapolis.

NFL Commissioner Paul Tagliabue and Philadelphia owner Norman Braman, chairman of the Super Bowl site selection committee, said all three cities made equally strong presentations.

No city received the 21 votes needed for election on the first four ballots. A simple majority is needed from the fifth ballot on.

Super Bowl XVII will be played at 72,000-seat Sun Devil Stadium in suburban Tempe, home of the Phoenix Cardinals. Los Angeles wanted the game for the 103,000-seat Rose Bowl in Pasadena. San Diego's Jack Murphy Stadium holds 60,750.

''All three cities presented extremely attractive proposals,'' Tagliabue said. ''It was a very difficult decision for the owners.''

Braman said Cardinals owner Bill Bidwell was a big part of Phoenix winning the Super Bowl.

''Phoenix is a new city in the NFL,'' Braman said. ''Bill Bidwell has been in the league many years and he's made a major effort to turn the franchise around.''

Bidwell, who moved his team from St. Louis, said he had been trying to convince owners for months on the merits of Phoenix.

''We did a little lobbying, both in the last few days and on the telephone prior,'' he said. ''Also at the last Super Bowl in New Orleans. But so did everybody else.''

MILFORD, CT (MARCH 13) UPI - An extra-alarm blaze Tuesday forced the evacuation of the 90-store Connecticut Post Mall and left two people injured, authorities said.

The fire began at about 11:10 a.m. in the basement, which is undergoing renovations as part of the mall's expansion, Mayor Fred Lisman said. The fire was brought under control in about two hours, he said.

One person was overcome by smoke inhalation before firefighters reached the scene and another civilian was stricken by a heart attack, a fire dispatcher said. Both of the injured were taken to Yale-New Haven Hospital he said.

Their conditions were not available.

''The fire started in the basement area where they were doing a lot of renovation work, went up an air duct and then up onto roof,'' Lisman said.

The mayor said damage from the flames was not severe, but there was extensive smoke damage.

He said the mall, which has 90 stores but is expected to add 56 new shops after the renovations, likely would remain closed until Wednesday morning.

The cause of the fire was under investigation.

#90072u2365 03/13/1990 ~United Press International

(MARCH 13) UPI - Oil prices ended mixed Tuesday with a tepid rally based on profit-taking losing ground as the market's overall recent downward trend reasserted itself.

The benchmark West Texas Intermediate crude for April delivery eased down 2 cents to $20.22 a barrel on the New York Mercantile Exchange after trading as high as $20.55 a barrel.

Prompt delivery WTI remained unchanged at $20.25 a barrel on the U.S. Gulf Coast cash market.

Unleaded gasoline for April delivery gained 0.54 cent to 54.57 cents a gallon on the Merc, considerably below its high on the day of 56.10 cents a gallon. May delivery contracts, however, eased down 0.08 cent to 59.48 cents a gallon.

On the New York Harbor cash market, unleaded gasoline edged up 0.30 cent to 52.65 cents a gallon.

April delivery heating oil slipped 0.02 cent to 53.51 cents a gallon on the exchange while gaining 0.20 cent on the harbor cash market.

Prices opened higher on the Merc - following through on Monday's late rally based on traders taking profits on short positions previously staked out in anticipation of the recent decline in prices.

''There was short-covering most of the day,'' said Bill Hinton of Stotler

& Co., New York.

The initial upward movement was given a slight boost early from the London market, which had risen on news that a big North Sea Brent platform was being taken out of production, he said.

But the rally waned toward the end of the day.

''As the day wore on, it seemed the market couldn't generate any momentum. ... In a pretty solid down trend, a rally is seen as a selling opportunity '' said Tom Bentz, director of trading services at United Energy Inc. in New York.

Crude prices have been under pressure recently with demand skackening as refiners move into their maintenance turnarounds from heating oil to gasoline production.

As a result, traders have been expecting crude inventories to increase. But after the Merc closed, the American Petroleum Institute reported the nation's crude supplies rose a surprisingly large 7 million barrels last week.

The unexpected rise may place additional downward pressure on crude prices in the coming sessions.

API also reported gasoline stocks dropped for the first time in nine weeks - by 2.6 million barrels last week, while heating-oil supplies dropped 4.2 million barrels.

Gasoline prices have fallen as supplies rose by than 33 million barrels over the previous eight-week period and may now begin to level off.

''I have a kind of a feeling that gasoline has seen as much of a hit as it's going to see,'' Bentz said.

On the European spot market, Britain's widely traded Brent crude slipped 10 cents to $18.35 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - stayed unchanged at $15.80 a barrel.

#90072u2383 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - The administration asked the Supreme Court Tuesday to reinstate the anti-flag burning law enacted last year - a measure passed in anger over a high court ruling but struck down last month by a U.S. district judge.

The Justice Department, in legal papers filed with the court, urged the justices to hear and resolve the case this year - meaning it would be heard on an emergency basis with a shortened time for the filing of legal arguments.

If the court grants the motion, the government suggested the case could be argued April 25, the last day of oral arguments for the 1989-1990 term, and decided before the court's summer recess in late June or early July.

The court could act on the government's appeal as early as Monday. However the court is not required to grant oral arguments in the case and may summarily rule on the matter in a short decision - possibly based on the

very court ruling that pushed flag burning into the national limelight.

The high court ruled in June 1989 in a Texas case that burning the flag as a political protest is a constitutionally protected form of free speech. The 5-4 ruling sparked a controversy that saw President Bush push for an amendment to the Constitution.

Instead, Congress passed the Flag Protection Act of 1989, although backers of the amendment warned a law would not protect the flag.

That argument gained strength Feb. 21 when a federal judge in Washington state struck down the new law in a case that involved an October 1989 protest outside a post office in Seattle that included flag burning.

In its filing Tuesday, the government said the flag burning in Seattle was ''expressive conduct'' normally protected by the First Amendment. But they said that should not ''doom the act's constitutionality.''

''In this case, the district court overvalued, for purposes of the First Amendment, the narrow category of expressive conduct at stake, and undervalued the compelling governmental interest - expressly identified by both the Congress and the president - that lies at the core of the statute: the preservation of the flag as the unique symbol of our nation.

''When reviewed from the proper constitutional perspective, the Flag Protection Act fits within the bounds of the First Amendment.''

In last year's case, two of the court's most conservative members, Justices Antonin Scalia and Anthony Kennedy, joined with three of the most liberal to rule against the Texas law.

Coming on the heels of Bush's flag-waving presidential campaign and an art display that urged viewers to stand on the flag, the ruling set off a wave of protests by politicians eager to align themselves with protecting Old Glory.

The makeup of the court has not changed since the Texas ruling, meaning that to win the case the government must persuade one member to change his vote less than a year after the ruling.

The new law states, ''Whoever knowingly mutilates, defaces, physically defiles, burns, maintains on the floor or ground, or tramples upon any flag of the United States shall be fined under this title or imprisoned for not more than one year, or both.''

The case puts the Bush administration in the odd position of defending a law it argued was inadequate. Bush and his aides said the only way to effectively ban flag burning was a constitutional amendment, and after the

Seattle ruling, several lawmakers said they would renew that effort if the high court strikes down the new flag law.

To amend the Constitution, two-thirds of both houses of Congress must approve the language and three-fourths of the state legislatures must ratify it.

ATLANTIC CITY, N.J. (MARCH 13) UPI - Born-again Miss America Debbye Turner has been told to stop performing Christian rap music during appearances in public schools, the pageant said Tuesday.

Turner has agreed to the instructions, issued by pageant chairman Leonard Horn after a Jewish group objected that the religious song she wrote was inappropriate in the secular setting of tax-supported schools, Horn said.

Horn said Turner had ''rarely'' performed her Christian rap during her school appearances, which are intended to motivate schoolchildren to aspire to excellence. She performed the song only when asked by the audience, the pageant chairman said.

''It was never her intention to convey that unless you believe in the Christian belief, you can't achieve your goals,'' he said. ''But that can be misinterpreted when you are talking to public school children and you are doing a rap song.

''In order to avoid any possible confusion, we agreed with the (Anti-Defamation League of B'nai B'rith) and told her to stop,'' Horn said. ''She has no problem with that at all.''

Turner, 24, the former Miss Missouri, last September became the first Miss America to be given the opportunity by the pageant to concentrate her yearlong reign on a issue of social importance.

Turner chose as her project motivating youth to excellence. She has spent the six months since the pageant bringing her inspirational message to schools and youth groups across America.

Turner performed her Christian rap at a news conference the morning after she was crowned, leading to requests at appearances since then for repeat performances. Horn said.

The rap concludes, ''If you want the best, don't settle for less. Put your trust in Christ. He'll pass the test.''

The ADL wrote to Horn after seeing a newspaper article describing Turner's performance of Christian rap at a Southfield, Mich., public school, complaining that she was using her position to proselytize in public schools.

''While Christianity may be essential to Ms. Turner's personal theme of self-achievement, it is inappropriate for her to use a public school platform to suggest to children that they will not realize their goals without a similar religious commitment,'' said the Feb. 12 letter from Jeffrey Sinensky, director of the ADL's Civil Rights Division.

#90072u2439 03/13/1990 ~United Press International

NEW YORK (MARCH 14) UPI - The nation's gasoline supplies fell last week for the first time in nine weeks and crude stocks rose by a surprisingly large 7 million barrels, the American Petroleum Institute reported Tuesday.

For the week ended March 9, gasoline supplies slipped 2.7 million barrels to 243.7 million barrels from 246.4 million barrels in the prior week and were above year-ago levels of 241.6 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also fell, to 185.5 million barrels from 187.0 million barrels a week earlier, but they remained significantly higher than year-ago levels of 163.6 million barrels.

Wholesale gasoline prices have fallen markedly with gasoline supplies risingmore than 33 million barrels in the previous eight weeks as refiners

went all out to replenish inventories depleted after the December freeze that damaged several large refineries.

Gasoline production eased down to 6.9 million barrels daily from 7.1 million barrels a day in the previous week but was higher than year-ago output of 6.6 million barrels daily.

Gasoline imports increased substantially to 361,000 barrels daily from 241,000 barrels daily in the previous week and were well above year-ago imports of 277,000 barrels daily.

Operation of U.S. refineries dropped to 83.7 percent of capacity last week compared with 86.4 percent a week earlier, but was greater than the 81.3 percent of a year ago.

As a result, crude oil inventories rose 6.9 million barrels to 350.8 million barrels from 343.9 million barrels in the prior week and were higher than year-ago levels of 332.2 million barrels.

Crude oil inventories usually rise at this time of year as refiners begin their maintenance turnarounds from heating oil to gasoline production. Oil analysts had expected an increase but not one this large.

Crude oil imports remained steady at 6.0 million barrels a day, the same level as the previous week but were substantially higher than year ago imports of 4.5 million barrels a day.

Imports of refined products slipped to 1.6 million barrels daily from 1.8 million barrels daily in the preceding week and were less than year-ago imports of 2.2 million barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - fell seasonally to 110.1 million barrels from 114.4 million barrels a week earlier but were substantially above year-ago levels of 101.0 million barrels.

Distillate production was 2.7 million barrels daily, the same output as in the preceding week and in the year-ago week,,.

Distillate imports climbed to 349,000 barrels a day from 227,000 barrels a day in the previous week but were much higher than year-ago imports of 220,000 barrels a day.

#90072u2473 03/13/1990 ~United Press International

PORTLAND, ME (MARCH 13) UPI - A tanker truck overturned before dawn Tuesday, spilling about 2,000 gallons of muriatic acid, closing Route 295

for more than 10 hours and forcing the evacuation of more than 250 residents, authorities said.

Muriatic acid is the commercial term for hydrochloric acid, a powerful cleaning agent often used on masonry. Its vapors can cause serious respiratory problems.

The truck driver and a passer-by suffered minor injuries. No one else was injured, but more than 250 people were evacuated from area homes, businesses and a state school for the deaf as a precaution while firemen and other workers cleaned up the spill.

The northbound and southbound laned leading into Maine's largest city were closed for 10 1/2 hours, snarling rush hour traffic.

State police said the driver of the truck, Cynthia McCallum, 28, told them she apparently fell asleep just before 5 a.m. as the truck crossed the line into Portland from Falmouth.

The truck, owned by Road and Sea Transportation Co., swerved sharply to the right and then overturned, skidding into a guardrail.

McCallum and Jon Bickford, a passer-by who helped McCallum from her rig, suffered minor injuries. Both were treated at Maine Medical Center and released.

Police who rushed to the scene immediately closed down the highway in both directions and also closed nearby Routes 1 and 9. Firemen said a cloud of vapor from the acid led them to evacuate a number of homes and businesses in the area.

''So far we've been lucky,'' said Deputy Chief Donald Brown as he supervised crews as they spread soda ash to neutralize the acid. ''The (vapor cloud) has tended to stay out over the water.''

#90072u2479 03/13/1990 ~United Press International

BOSTON (MARCH 13) UPI - Charles Stuart's mother testified Tuesday before the grand jury investigating her daughter-in-law's killing but refused to waive the attorney-client privilege that prevents her dead son's lawyer from speaking out on the bizarre case, her lawyer said.

Dorothy Stuart of Revere arrived at the Suffolk County Courthouse at midafternoon and appeared before the special grand jury investigating the October 1989 killing of Carol DiMaiti Stuart and the eventual death of her prematurely born son.

The victim's husband, Charles Stuart, emerged as the prime suspect in the nationally publicized crime a day before he jumped to his death from a Boston bridge on Jan. 4.

Investigators now believe the Boston furrier killed his pregnant wife and then wounded himself in an elaborate scheme to collect on lucrative insurance policies.

Details of the private grand jury proceeding were not disclosed. ''Mrs. Stuart appeared and testified before the grand jury,'' Stuart family lawyer Richard Clayman said. ''She was there approximately for an hour. Many, many questions were put to her, and responses were made.''

The grand jury meeting was the seventh since investigators said they believe Stuart had been perpetrating a hoax.

Dorothy Stuart, who is the administrator of her son's estate, did not waive the lawyer-client privilege between her late son and his attorney, Clayman said. The Suffolk County district attorney's office wanted her to do so in order for the grand jury to question lawyer John Dawley about his talks with Charles Stuart the day before Stuart's suicide.

Earlier in the day, lawyers for Dorothy Stuart, her husband and another relative, lawyer Robert Corbett, asked a Superior Court judge to quash their grand jury subpoenas.

Charles and Carol Stuart were shot Oct. 23 after they left a birthing class at a Boston hospital. Stuart, who called authorities for help over his car phone, told police the attacker was a black gunman.

Stuart jumped from the Tobin Bridge to his death in Boston Harbor on Jan. 4 as police were about to arrest him after his brother, Matthew, went to police with incriminating evidence.

Investigators now believe Charles Stuart shot his wife in the head, killing her, and, it would turn out, their son - who was delivered by emergency Caesarean section but died 17 days later - then shot himself in the abdomen to divert suspicion.

With the exception of Matthew Stuart, all of Charles Stuart's brothers and sisters have appeared before the grand jury. Corbett reportedly advised Matthew Stuart before he went to police.

#90072u2484 03/13/1990 ~United Press International

CAPE CANAVERAL, FL (MARCH 13) UPI - The shuttle Atlantis, bolted to the back of a 747 jumbo jet, returned to the Kennedy Space Center Tuesday

after a delayed two-day trip from California, where the ship landed March 4 to wrap up a military flight.

The ungainly looking jet-shuttle combination touched down at the spaceport's 3-mile long shuttle runway at 5:51 p.m. EST, bringing the second of nine 1990 shuttle flights full circle.

Next up for NASA: launch of the shuttle Discovery April 12 to ferry into orbit the $1.5 billion Hubble Space Telescope, the most powerful such instrument ever built to operate above Earth's obscuring atmosphere.

If all goes well, Discovery, mounted atop a mobile launch platform, will be hauled from NASA's Vehicle Assembly Building to launch pad 39B on Thursday, starting at 8 a.m., for final work to ready the ship for blastoff.

Atlantis's five astronauts brought their mission to a successful conclusion March 4 with a picture-perfect touchdown at Edwards Air Force Base, Calif., closing out a secret Pentagon mission to launch what is believed to be a new spy satellite.

The $2 billion spaceplane then was mounted atop NASA's 747 transport jet for the flight back to the Kennedy Space Center, but bad weather in the Southwest forced NASA to delay takeoff from Saturday to Sunday.

The shuttle then was flown to Biggs Army Air Field at Fort Bliss, Texas, and - after another day on the ground because of more stormy weather - the piggy-back flight continued on to Florida Tuesday after a refueling stop at Columbus Air Force Base, Miss.

Engineers planned to remove the 100-ton shuttle from its transport jet late Tuesday and to tow it to a nearby hangar where it will be processed for launch in July on another military flight.

#90072u2494 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - A senior Treasury Department official has expressed the administration's concern about a plan to curb computerized stock trading and vowed to fight the legislation, it was disclosed Tuesday.

"We continue to strongly oppose provisions of this type as overly broad and potentially harmful," Robert Glauber, undersecretary for finance, said in a letter to the House Commerce Committee. Legislation to place restrictions on "program trading" is being considered by the House.

Program trading is the practice of using computers to profit on price differences between stocks and stock-index futures. The practice is used

mainly by institutional investors, such as pension funds. The trading was blamed in part for the October 1987 stock market crash and has triggered other surges in market activity.

"As we have said many times, we share concerns that have been expressed about problems associated with excessive market volatility," Glauber said in the letter, made available to reporters.

"But we continue to believe that the blunt approach of government intervention to stop program trading is an inappropriate way to address these problems," he wrote.

The Treasury Department official, writing on behalf of the Bush administration, also suggested alternatives. "Rather than attempting to restrict particular trading strategies, it would be fare better to focus on the mechanisms of individual markets and the inconsistency of intermarket regulation," Glauber wrote. "This should be done separately from this legislation," he said.

For example, Glauber noted, the President's Working Group on Financial Markets is currently examining the issue of program trading.

MIAMI (MARCH 13) UPI - A co-defendant in the drug trafficking and conspiracy case against deposed Panamanian dictator Manuel Noriega was released from prison Tuesday on $1 million bond.

Daniel Miranda was released from Metropolitan Correctional Center after posting bond, which included $30,000 in cash, with the balance made up of property put up as collateral by his relatives.

U.S. District Judge William Hoeveler also ordered Miranda to sign a waiver of extradition calling for his voluntary return to the United States of he flees to Panama.

Miiranda's release was made possible when U.S. Magistrate Peter Palermo set bond in January, over the objections of prosecutors, who immediately appealed to Hoeveler. On Feb. 23 Hoeveler upheld Palermo's ruling.

Miranda is charged with flying $800,000 in drug profits from Fort Lauderdale Executive Airport to Panama in 1986. Pilot and co-defendant Eduardo Pardo, who was also on the plane, pleaded guilty last month and faces a maximum penalty of five years in prison and a $10,000 fine when Hoeveler sentences him April 25.

Defense attorney Michael O'Kane, who represents Miranda, does not dispute

that the drug money was on the plane. He contends that his client did not know it was on board.

Miranda, Noriega and Pardo are among 16 people named in a 12-count indictment returned in February 1988 by a federal grand jury in Miami. It accuses Noriega of using his position as the leader of Panama to make money off of smugglers who used his country as a way station between Colombia and the United States between 1981 and 1986.

Noriega was brought to the United States Jan. 3 after surrendering to U.S. troops during the military invasion to capture him. If convicted, he faces a maximum penalty of 145 years in prison and a $1.1 million fine.

Other defendants awaiting trial include Panamanian Lt. Col. Luis del Cid and accused Colombian cocaine smuggler William Saldarriaga, and suspected Miami drug dealer Brian Davidow, who has been out on bond for about a year.

Noriega also is named in a marijuana smuggling indictment returned by a federal grand jury in Tampa on the same day as the Miami indictment.

#90072u2528 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Stricter limits on subsidy payments to farmers are an option for Congress in its hunt for budget savings, administration officials said Tuesday, but they would be a problem-plagued unfruitful choice.

The White House wants Congress to trim crop subsidy spending by $1.5 billion in fiscal 1991 but has refused to recommend how to do it. Instead, it has listed three areas, including payment limitations, that could be considered.

Despite that, Agriculture Department officials said there are pitfalls to the payment limitations, which could take the form of cutting off crop support payments to large-scale farmers. The other major options are reducing so-called target prices or limiting the number of acres eligible for payments.

Agriculture Secretary Clayton Yeutter said payment limitations were unlikely to save much money unless there was ''a major retargeting'' of benefits to farmers - a highly controversial idea.

''There are two variables that provide major opportunites for cost savings. Those are target prices and acreage bases,'' Yeutter said. ''It should be quite obvious to Congress very soon that that's precisely where the savings will have to arise.''

The comments were the strongest yet by Yeutter, although he made no recommendation.

Sources have suggested that payment limitations were included on the administration list at the behest of the White House budget office.

Deputy Undersecretary John Campbell told reporters that a focus on payment limits could derail the idea - popular in Congress - of writing a new farm policy law that continues the direction of the 1985 law. Instead, he said, there could be a debate whether federal assistance should be directed to some, but not all, farmers.

At present, farm program benefits are available to any farmer who enrolls although there is a $50,000 limit on crop subsidy payments to an individual and a $250,000 limit on all types of farm program benefits.

''It's always tough to slice a shrinking pie,'' Campbell said before holding up a copy of a 10-year-old report that advocated the ''targeting'' of benefits to family farms. ''We're basically back to some of these issues - either continue the direction of the '85 farm bill or start asking some of these hard questions.''

During testimony before a House Agriculture subcommittee, Campbell repeated the administration position that payment limits were ''an option for this committee to consider.''

''We have (no) specific road map for this Congress to follow,'' Campbell said.

Assistant Agriculture Secretary Bruce Gardner told senators last week that payment limits would be ''the most difficult and controversial'' tool for reducing spending.

''Aside from the fact that it would alienate farmers, agreement on how to design and administer the test would be difficult, to say the least,'' Gardner said. ''And we know from experience that is difficult to achieve actual savings ... in this way.''

There have been complaints about farmers subdividing their operations in order to evade the $50,000 limit.

Some congressmen, acting with different motivations, have expressed interest in creating an ''eligibility standard'' that would be based on a farmer's income or sales.

Rep. Dan Glickman, D-Kan., has said an eligibility standard might be more palatable than the two other budget choices. Those are reducing target prices or limiting the number of acres eligible for federal payments.

Rep. Richard Armey, R-Texas, advocates a cut-off point on grounds it is wasteful to aid large-scale farmers.

During an impromptu session with reporters, Campbell said that if the cut-off point is set too low, it would discourage farmers from enrolling in the farm program and reduce the program's effectiveness in boosting crop prices.

Farm-state congressmen have cited those possibilities, too, as well as saying proposals based on sales levels ignore agriculture's low profit margins.

''I think we are going to have to address'' the payment limit, Rep. Charles Stenholm, D-Texas, said during the subcommittee hearing.

After pointing to the possibility a farmer could get up to $500,000 in payments under the current system, Stenholm said tighter rules would be needed just to maintain public support for the farm program.

Crop subsidies are estimated to cost $11.7 billion in fiscal 1991 if Congress makes no changes.

#90072u2531 03/13/1990 ~United Press International

LOS ANGELES (MARCH 13) UPI - The city attorney announced Tuesday he intends to revive a lawsuit accusing the U.S. Commerce Department of failing to establish adequate guidelines aimed at ending the undercount of minorities and the poor in the census.

''The Commerce Department is guilty at best of bad faith,'' City Attorney James Hahn said, ''and at worst of engaging in an active conspiracy to manipulate the census in order to undercount minorities and people living in poverty. This has become the biggest civil rights issue facing the nation today.''

Hahn made his announcement after his office analyzed final guidelines released Monday by the Commerce Department for its new census procedure, which involves conducting a random survey of 150,000 minority households nationwide after the traditional mail census is completed April 1.

The survey is designed to boost population counts to compensate for people who census takers may have missed.

A failure to make such adjustments, the plaintiffs said, could lead to the loss of millions of dollars in federal aid to cities, counties and states, and to changes in the boundaries of congressional and state legislative

districts.

But Hahn contended that, under the new guidelines, the Commerce Department may still reject the post-census survey, even if it produces a more accurate count.

''With this show of incredible bad faith on the part of the Commerce Department, we are left with no choice but to go back to court,'' Hahn said.

The guidelines were established as part of a settlement last year to a lawsuit filed by Los Angeles, New York City, Houston, Chicago, Dade County Fla., the states of New York and California and several prominent minority rights groups.

In the lawsuit, the cities and other plaintiffs sought to overturn a 1987 decision by the Ronald Reagan administration barring adjustments to undercounts in the census despite the continuing failure to adequately count blacks, Hispanics, the homeless and other minority groups.

During the 1980 tally of Los Angeles residents for instance, Hahn said blacks were undercounted by 9.1 percent, Hispanics by 9.8 percent and Asians by 7.3 percent.

In agreeing to settle the dispute with the cities, the Commerce Department said it would issue the new methods and, if an adjustment were necessary, correct any census undercount by July 15, 1991.

Michael Darby, an undersecretary of commerce who oversees the Census Bureau, said the guidelines were designed to ensure the 1990 census ''is the most accurate population count that can be practically produced.''

But New York Mayor David Dinkins said the guidelines were nothing more than a ''continuation of the Commerce Department's longstanding hostility to the idea of correcting the almost certain undercount.''

''Under these biased, unconstitutional rules, there is virtually no likelihood that the Census will be adjusted and, as a result, virtually every certainty that the people of New York will be undercounted, underrepresented and underserved by their federal government in the decade ahead just as we were in the decade past,'' Dinkins said Monday night.

Hahn's press secretary Mike Qualls said attorneys representing Los Angeles and New York have discussed the revival of the lawsuit and planned to send a letter Wednesday to U.S. District Judge Joseph McLaughin in Brooklyn, N.Y., asking for a conference to discuss a contempt-of-court motion against the Commerce Department.

The census is required by the Constitution and is conducted once every 10 years. It is to begin when questionnaires go into the mail March 23 to an estimated 106 million households. Census takers will go out later for interviews with those who do not return the mail forms.

LOS ANGELES (MARCH 13) UPI - Actor Corey Feldman, already facing charges of possession of heroin for sale, was charged Tuesday with a new count of possession of cocaine for sale.

Deputy District Attorney Kathleen Gentry said the additional count was filed against Feldman, 18, after lab tests determined that the narcotics he allegedly had in his possession included cocaine.

Feldman was charged with the heroin count Monday. He remains free on bail and faces an arraignment in Municipal Court April 4.

Each of the drug charges is punishable by up to four years in state prison.

Feldman, who is probably best known for his role in the movie ''Stand by Me,'' was arrested Friday evening after police stopped him for a traffic violation in downtown.

Prosecutors allege that officers found 25 balloons containing heroin and cocaine in his car.

Feldman began his acting career as a child, appearing in commercials and television series, including ''Eight is Enough'' and ''Mork and Mindy.'' He went on to act in movies, appearing in ''The Lost Boys'' and ''Friday the 13th.''

#90072u2565 03/13/1990 ~United Press International

(MARCH 13) UPI - Soviet lawmakers are to hold a significant vote either later today or tomorrow to officially fill the post of the new, more powerful president. The Soviet Congress earlier voted to establish the new presidential system and abolish the Communist Party's monopoly on rule. The vote overwhelmingly in favor of the super presidency is seen as a sure sign that Mikhail Gorbachev will get the post.

President Bush is proposing steps for what he calls the ''great and historic'' need to support democracy in Nicaragua. Bush this morning announced the lifting of a five-year-old trade embargo against the Central American country and proposed 500-Million dollars in aid over two years. The funds would go toward rebuilding Nicaragua's war-torn economy.

President Bush says he doesn't ''live by the polls.'' Bush responded in Washington today to criticism that he follows only the popular course of action. He cited his unpopular attempts to improve relations with China following the Tiananmen Square massacre, and his recent trip to the drug summit in Colombia.

President Bush says there's some good things and some bad things about a Democratic plan to balance the budget. Bush says he welcomes the plan to eliminate the federal deficit in five years because it was presented- in his words- ''without rancor, without rhetoric.'' But the president says he's still opposed to tax increases.

Nelson Mandela... on the second day of a five-day visit to Sweden... told reporters in Stockholm today that he wants the international community to intensify sanctions against South Africa. Mandela also called on countries to severe all diplomatic ties because NOTHING has changed in South Africa.

#90072u2600 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - The trend toward fewer, bigger meatpackers deserves careful monitoring by government, Agriculture Secretary Clayton Yeutter said, but he declined Tuesday to endorse a proposal to block further industry consolidation.

The National Cattlemen's Association recently released a task force report that recommended "no more mergers or acquisitions of beef slaughter facilities by the Big Three packers be allowed."

The three largest meatpackers, according to an industry yearbook, are: IBP Inc. of Dakota City, Neb.; ConAgra Inc. of Omaha, Neb.; and Excel Corp. of Wichita, Kan. Some producers have been worried that consolidation of the packing industry into a few dominant firms could distort prices.

"My view is we should all take a careful look at that (industry consolidation) as time goes on and observe how well competition is working in this sector," Yeutter said at a meeting of the National Association of State Departments of Agriculture.

"I wouldn't want to draw any conclusions now as to whether to preclude any further consolidation ... But I do believe that we're nearing the point where we really can't afford to lose much more competition in that industry.

"We're down to a relatively small number of firms operating there today. And, I believe we have a healthy competition among them. It's certainly worthy of careful observation," Yeutter said.

#90072u2625 03/13/1990 ~United Press International
NEW YORK (MARCH 13) UPI - USX Corp. Chairman Charles Corry said Tuesday that rising crude oil and natural gas prices could add more than $80 million to his company's operating profit this year.

Corry also told a meeting of the New York Society of Security Analysts that he is ''cautiously optimistic'' that higher steel prices could make up for projected lower volumes in 1990 sales.

He said that for each $1 increase in the average price of crude oil, USX's Marathon Oil Co. subsidiary realizes an additional $60 million in

operating income.

For each 10-cent increase for a thousand cubic feet of natural gas, Marathon adds about $20 million to operating income, he said.

''Our current expectation for 1990 is that oil prices will average $1 to $1.50 per barrel more than last year, and that gas prices will be up about 15 to 20 cents per (thousand cubic feet),'' Corry said.

Marathon had an operating income of $862 million in 1989, an increase of $356 million over 1988.

The name of U.S. Steel Corp. was changed to USX Corp. after 1982 when it bought Marathon and became a steel-energy conglomerate.

''While steel continues to be an important part of our business mix, and we hold a pre-eminent position in that industry, we do believe that energy will remain the key to our future,'' Corry said.

He said it currently represents 65 percent to 70 percent of USX's business.

The chairman said he expected USX steel shipments to fall to between 10 million and 11 million tons in 1990 against 11.5 million tons last year.

However, Corry told analysts and reporters, ''We are cautiously optimistic. I think there's a lot of price leverage there.''

He noted that for every $10 a ton increase in the price of steel, which averages about $500 a ton, the company realizes a $100 million increase in its operating income.

Corry said USX was projecting ''a rather slow-growth economy in 1990'' and U.S. steel sales of about 78 million tons, compared to the 84 million tons racked up in 1989 and 1988.

USX's steel segment reported an operating income of $430 million in 1989, compared to $501 million in 1988, and $125 million in 1987.

Overall USX net consolidated income for 1989 was $965 million, compared to $756 million in 1988.

Shareholders will vote at the company's May 7 annual meeting on a proposal to sell off the steel properties made by corporate raider Carl Icahn, USX's largest individual stockholder.

''We will provide the reasons in detail (in the company's proxy statement) why we do not think that resolution is a good idea,'' Corry said in reply to an analyst's question.

The company hopes to have the proxy statement out in seven or eight days, he said.

The company borrowed heavily to buy Marathon, and Corry said reducing this debt is still a major concern occupying USX's management.

The annual cost of servicing this debt has declined from $950 million in 1984 to $618 million in 1989 and is expected to drop to $450 million in 1990, the chairman said.

''Excess cash flow should allow us to reduce financial obligations substantially in 1990,'' Corry said.

He said USX had excess cash flow of $1.5 billion in each of the last two years and is projecting about $1 billion for 1990.

After the debt-servicing cost drops to about $400 million, perhaps in 1991 USX will be able to address the question of using its excess cash flow to reduce the number of shares outstanding, or raise the stockholder's dividend, Corry said.

''We can live with a debt expense level of about that rate,'' he said.

Corry said USX would still try to sell its titanium manufacturing segment when market conditions warrant.

The company's offer was withdrawn in October when the aircraft market for the material softened.

#90072u2647 03/13/1990 ~United Press International

(MARCH 13) UPI - Greyhound agreed Tuesday to resume negotiations with striking drivers in hopes of ending a stalemate in the 12th day of a bitter contract dispute marked by violence and accusations of union-busting.

P. Anthony Lannie, Greyhound's executive vice president and chief labor negotiator, said talks with the Amalgamated Council of Greyhound Local Unions will resume Saturday in Phoenix.

Lannie said the talks were scheduled after a request from the Federal Mediation and Conciliation Service in Washington.

In Chicago, meanwhile, a departing Greyhound bus was hit by sniper fire early Tuesday, the third such incident in less than 36 hours in the 12-day-old strike.

A gunman fired at least four shots into the front of the bus that was leaving Chicago for Memphis, Tenn., missing a passenger by ''just inches '' authorities said.

No injuries were reported among the 13 passengers and replacement driver aboard the bus in the 1:30 a.m. ambush, which came one day after union officials met with federal mediators in Washington, D.C., and one day before a similar meeting scheduled with Greyhound representatives.

''One round believed to be a 9mm slug was recovered from the bus,'' Sgt. Steve Reilly said.

The driver reported hearing between six and seven shots fired in rapid succession, with four bullets hitting the bus - two in the front, one in the front door and one in a window next to the front door.

Police said the bullets apparently were aimed at the driver, but one shot that went through a window barely missed a passenger.

''It would have hit him (the passenger) right in the head,'' state police special agent Richard Klimes said. ''It was just inches that it missed him.''

Police said they were not positive the incident was related to the strike. ''Things get shot at all the time up here,'' Reilly said.

The shooting was only the latest incident in the increasingly violent strike. Company spokesman George Gravley said there have now been seven shootings at Greyhound buses.

No injuries were reported in a shooting Monday in Farmington, Conn., but seven passengers were slightly injured when their bus was hit by gunfire near Jacksonville, Fla.

Bernard DeLury, director of the Federal Mediation and Conciliation Service met Monday in Washington with union officials in hopes of re-starting negotiatons. DeLury said officials of the Amalgamated Transit Union ''indicated to us their willingness to return to the bargaining table as soon as possible.''

Until Tuesday, the chances for resumed talks between the two sides seemed remote, with Greyhound Chairman Fred G. Currey last week saying the strikers will be irrelevant by April 1 because Greyhound is hiring permanent replacements.

He also boasted that the company has a multimillion-dollar war chest with which to weather a long strike.

The strike began March 2 after negotiations broke off on a new three-year contract for about 9,000 Greyhound employees represented by the union, including drivers, baggage handlers, mechanics, ticket agents and reservation clerks.

Greyhound, based in Dallas, carried 22 million passengers last year and is crucial to low-income travelers who live in smaller communities and as a carrier of emergency medical supplies.

Violent clashes, including one that led to the death of a man on a picket line March 3 in Redding, Calif., and a series of sniper attacks on buses have marred the walkout.

According to company records, 1,800 union employees have returned to work despite the strike, including 358 drivers. The company also has hired 700 replacement workers.

The union says the hiring of replacement workers is illegal, and that actually only about 400 union members have crossed picket lines, with fewer than 100 union drivers returning to work.

Greyhound employees took pay cuts of 7.8 percent in 1983 and 23 percent in 1987.

Late last year, Greyhound offered the union a new contract that included what the company described as a 6.9 percent increase in wages and benefits in the first year of the three-year contract. The union rejected that offer but has refused to disclose its demands.

The company has accused drivers, who now average $24,700 a year, of asking for wage hikes that could be financed only through fare increases that Greyhound says it refuses to implement.

#90072u2676 03/13/1990 ~United Press International

ANCHORAGE, AK (MARCH 13) UPI - Two defense alcohol experts testified Tuesday that Exxon Valdez skipper Joseph Hazelwood would have had to consume more than a dozen shots of vodka and would have been staggering drunk if he had as much to drink before his tanker hit the rocks as the prosecution maintains.

But prosecutor Brent Cole suggested that perhaps Hazelwood consumed a dozen vodkas in six double shots - prosecution testimony is that Hazelwood had five vodkas - and that Hazelwood had become an expert at masking his intoxication.

The two defense witnesses both hit at the core of the prosecution's

intoxication evidence, rejecting a theoretical calculation of Hazelwood's blood alcohol content at the time of the grounding and spill last year.

University of Washington physiologist Michael Hlastala called the prosecution calculation impossible.

The Exxon Valdez hit Bligh Reef early March 24, 1989, and more than 10 1/2 hours later the only tests taken after the accident showed Hazelwood's blood alcohol level at 0.061.

Prosecution toxicologist Richard Prouty of Oklahoma used a backwards extrapolation to estimate Hazelwood's blood alcohol level at 0.14 or higher at the time of the grounding, above the state legal limit of 0.10.

Hlastala said Prouty's extrapolation ''was very much the subject of debate'' among scientists and that ''most experts are hesitant at extrapolating backward over such a long period of time.''

''Once you're beyond a few hours, it's impossible to make any sense out of an extrapolation,'' Hlastala said. ''It's virtually impossible to go back and get anything meaningful about what the blood alcohol was at the time.''

Prosecutors want jurors to use Prouty's calculations to convict Hazelwood of operating the Exxon Valdez while intoxicated. They said Prouty gave Hazelwood the benefit of the doubt by estimating his alcohol content at its lowest conceivable level at the time of the accident and it was still illegal.

Another defense alcohol specialist, Thomas Burr of Minnesota, acknowledged under cross-examination that he, too, had used backwards extrapolations when he worked for the St. Paul police, but he said he worked back only a few hours and rejected lengthy reverse calculations like the prosecution's.

Hlastala and Burr both said that based on prosecution calculations Hazelwood would have needed to drink more than a dozen vodkas while ashore March 23 to register the level of alcohol he had in his blood so long after the wreck.

Based on average rates of alcohol absorption and elimination, Hazelwood would have had to drink 21 one-ounce shots of vodka, in order to have a 0.61 blood alcohol level 14 1/2 hours after he left his last Valdez bar, Hlastala estimated.

Burr said Hazelwood would have manifested obvious signs of drunkenness and perhaps been staggering if he had had that much to drink.

Not a single witness has testified that Hazelwood exhibited signs of impairment, even as he negotiated the tricky gangway to the tanker.

Burr acknowledged that some individuals develop a tolerance to alcohol and can mask the symptoms of intoxication - the prosecution contention in Hazelwood's case.

Cole inferred that Hazelwood was a heavy drinker who developed a tolerance for alcohol, allowing him to perform as a tanker captain without those around him realizing that he consumed considerable alcohol. Hazelwood's history of drinking problems has not been disclosed to jurors.

Prouty theorized that alcohol in Hazelwood's stomach had been absorbed and he was eliminating alcohol at a predictable rate, allowing computations back to his probable alcohol level at the time of the midnight wreck. Hlastala said too many variables existed for accurate backward estimates over that time.

If Hazelwood had alcohol on the ship after the wreck, then alcohol estimates for the time of the wreck are invalid, but there has been no testimony Hazelwood drank anything aboard except non-alcoholic beer.

Besides the intoxication charge, Hazelwood is accused of reckless endangerment, negligent discharge of oil and criminal mischief. The 43-year-old Huntington, N.Y., mariner faces up to seven years, three months in jail and a $61,000 fine if convicted.

The Exxon Valdez grounding on Bligh Reef broke open the tanker and caused nearly 11 million gallons of oil to spread out into Prince William Sound in the biggest spill in U.S. history.

#90072u2703 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - China has placed the United States at the top of a secret list of the country's enemies, CBS News reported Tuesday.

The network said it obtained the transcript of a secret telegram dictated by Deng Xiao Peng that tells communist party officials throughout the country to ''expect more U.S. pressure on human rights.''

''We must have no illusions about the United States,'' CBS quoted the telegram as saying. The telegram also places the United States at the top of a secret list of countries considered enemies of China, CBS said.

News of the telegram comes as the Bush administration continues to take a soft approach to dealing with Beijing, despite the bloody crackdown last June of pro-democracy demonstrators in Tiananmen Square in which hundreds and possibly thousands were killed.

CBS said the telegram also reveals a deep ideological rift with the Soviet Union, where President Mikhail Gorbachev is attempting to reform the system of government.

The telegram accuses Gorbachev of deviating from Marxism, CBS said, but urges party officials to avoid a break with Moscow and not to attack Gorbachev by name.

#90072u2746 03/13/1990 ~United Press International

ATLANTIC CITY, N.J. (MARCH 14) UPI - New Jersey's 11 casinos reported $207.6 million in gross revenues last month, a 1.8 percent increase over the $203.9 million recorded in February 1989, the state Casino Control Commission said Tuesday.

The February figure marked the first month since October that the gaming industry posted an increase in gross revenues over the previous year. Nine casinos posted revenue gains during February from the previous year.

Caesars Atlantic City had the biggest monthly revenue increase with $23.2 million, up from last year's $21.5 million. Harrah's Marina came in second with $23 million, up from last February's $21.6 million.

Also reporting increases were: Bally's Park Place, $21.9 million, up from $19.5 million; Trump Castle, $21.5 million, up from $18.5 million; TropWorld, $20.5 million, up from $18.4 million; Showboat, $19.4 million, up from $18.6 million; the Sands, $16.8 million, up from $15.2 million; Bally's Grand, $15.2 million, up from $14 million, and Claridge, $10.8 million, up from $8.9 million.

Casinos with lower revenues were: Trump Plaza, $19.6 million, down from $23.9 million, and Merv Griffin's Resorts, $15.5 million, down from $17 million.

Gross revenues represent the amount of money the casinos retain after all bets have been paid off but before operating costs, taxes and other costs have been paid. Gross revenues do not represent profit.

Thus far this year, the casinos have tallied $420.1 million in revenues, compared with $422.4 million by this date in 1989, a drop of less than one percent.

#90072u2758 03/13/1990 ~United Press International

LOS ANGELES (MARCH 13) UPI - Investor Harold Simmons, in a new move in his proxy battle to replace the board of Lockheed Corp., said Tuesday he

would add a representative of the company's Employee Stock Ownership Plan to the board if he is successful in the takeover fight.

''We believe the employees in the Lockheed ESOP deserve board representation,'' Simmons said.

Lockheed's ESOP shares, created last April as part of an extensive restructuring, constitute about 18.9 percent of the company's outstanding stock - about the same percentage as that held by Simmons.

The restructuring was announced the day after Simmons disclosed he had acquired a 5.2 percent position in the defense contractor.

In response to Simmons' announcement, Lockheed spokesman Robert Slayman said:''Lockheed's board of directors acts on behalf of all Lockheed shareholders,ESOP members and will continue to do so.''

Analysts regard the ESOP shares as more likely to back management's slate of directors at Lockheed's annual meeting, scheduled for March 29 in Los Angeles.

#90072u2826 03/13/1990 ~United Press International

ANAHEIM, Calif. (MARCH 14) UPI - Rockwell International Corp. said Tuesday that it has been awarded a $134.9 million contract to produce guidance systems for two U.S. Air Force intercontinental ballistic missile programs.

The three-year contract calls for Rockwell's Autonetic ICBM Systems Division to produce 50 inertial measurement units for the Peacekeeper ICBM and small ICBM programs.

The Rockwell unit said the contract covers the Air Force fiscal year 1989-90 purchase of Peacekeeper IMUs.

Lt. Col. Barry Glickman of the Air Force Systems Command said Rockwell was chosen over Northrop Corp. for the award. Northrop has already been awarded contracts for 134 of the units, while Rockwell's previous sole award was a $61 million contract for nine of the units.

Hardware deliveries are scheduled to begin in June 1991 and continue through February 1993.

#90072u2927 03/13/1990 ~United Press International

(MARCH 13) UPI - President Bush lifts Nicaraguan trade embargo and calls for massive aid to Central America... Gorbachev gets sweeping presidential powers... Poindexter defense goes after North testimony.... and Haiti gets a civilian president. U-P-I has it all, next:

President Bush says- quote- ''the American people are determined to help the people of Nicaragua''... and today he took steps to help fulfill that wish.

Bush held a White House news conference this morning where he announced

the lifting of a five-year-old trade embargo against Nicaragua. He also proposed a 500-Million-dollar aid plan.

The aid would be given over two years... with an initial gift of 300-Million dollars, followed by a request for 200-Million dollars next year.

The money would go toward rebuilding Nicaragua's war-torn economy and would be coupled with a previously requested 500-Million dollars in aid for Panama.

There also is a 70-Million-dollar request for Nicaraguan refugees... all of which would come from the defense budget.

The president called on Congress to act on the first stage of the combined ''Fund for Democracy'' by April 5th. But House Speaker Thomas Foley rejected Bush's imposition of a deadline, saying Congress would deal with the request promptly.

The Pentagon has come up with suggestions of some military programs that could be cut to pay for an initial 300-Million dollars in aid for Nicaragua.

The Pentagon proposes that 83-Million dollars of the funds come from savings achieved through the civilian personnel hiring freeze Defense Secretary Cheney imposed for fiscal 1990.

It says another 81-Million dollars could be raised by deferring construction at military bases that are being studied for possible closure. NO specific construction sites or bases were named.

The military's plan calls for another 11-Million dollars to be taken from money set aside for the repair of the gun turret aboard the battleship U-S-S Iowa. The Iowa... scene of a severe explosion that killed 47 sailors last year... is slated to be mothballed in the fiscal 1991 budget.

The Pentagon also suggested a number of other programs that could be cut to come up with the money.

-30- 2394

#90072u3048 03/13/1990 ~United Press International

(MARCH 13) UPI - New changes introduced in the Soviet Union today reduce the power of the Communist Party and increase that of Soviet President Mikhail Gorbachev.

The Congress of People's Deputies today voted to end the Communist Party's monopoly on power and establish a new presidential system that would give

Gorbachev sweeping new powers.

Before this morning's vote, Gorbachev told the Soviet lawmakers that they were- quote- ''about to take one of the most fateful steps in the history'' of the Soviet government.

The vote in favor of the super presidency was a personal triumph for Gorbachev, who rejected claims it would give him too much power.

He's expected to win the new presidential post in a vote either later today or tomorrow.

Earlier, Gorbachev won a round of applause from the Soviet Congress when he rejected the idea of independence talks with Lithuania and Estonia.

The Soviet leader directed a special commission to settle the status of the Baltic neighbors.

Although Soviet President Gorbachev won expanded powers today, President Bush says he is staying out of the internal affairs of the Soviet Union.

Bush offered NO analysis of the approval by the Soviet Congress of broader powers for its leader. Bush did say he supports reform in the Soviet Union has a good relationship with Gorbachev and will continue to work with him.

Bush made his comments in Washington at a news conference to announce an 800-Million-dollar aid package for Nicaragua and Panama.

Bush also said the United States is NOT ready to give diplomatic recognition to Lithuania because he wants to see the peaceful ''evolution'' of the control of its territory. Lithuania declared itself independent from Moscow on Sunday.

The president also denied that he is overly sensitive to public opinion, saying he doesn't ''believe much in polls.'' He cited his unpopular overtures to China after the pro-democracy massacre in Beijing .

Bush welcomed the tone of a new Democratic plan to balance the budget. But he repeated his opposition to tax increases.

-30- 2263

#90072u3066 03/13/1990 ~United Press International

(MARCH 13) UPI - Defense attorneys in John Poindexter's Iran-Contra trial have begun a damage control operation aimed at blunting the testimony of retired Marine Lieutenant Colonel Oliver North.

The lawyers also took steps to change the prosecution's portrayal of

Poindexter as a mastermind of the arms-for-hostages scandal.

Defense attorney Richard Beckler used North's own congressional testimony to show that many people... including President Bush... knew about the secret attempt to aid the Nicaraguan Contras.

Beckler sought to distance Poindexter from North by showing that the former national security adviser also was in charge of many other people and projects... and was NOT a central player in the scandal.

The lawyer also tried to pin much of the blame for the Iran-Contra scandal on Poindexter's predecessor, Robert McFarlane. McFarlane has already pleaded guilty to withholding information from Congress.

A Supreme Court Justice of Haiti was sworn in today as the Caribbean country's interim president.

The ceremony in Port-Au-Prince ended four years of chaotic military rule.

Interim President Ertha Trouillot said she accepts her new role ''on behalf of Haitian women.'' She pledged with the help of the army to quickly hold elections.

Army Chief of Staff Herard Abraham told the new president that the Army is at her command. He added that the army will stay in its barracks and will guarantee the security of the people.

Abraham had held power since dictator Prosper Avril resigned on Saturday.

Some 400 people watching at the national palace included Haitian businessmen and politicians, military officers, foreign diplomats and journalists.

Trouillot called the installation of a civilian government the first step to save Haiti. She spoke in both French and the Creole more widely understood by Haiti's poor majority.

Outside, a crowd of some 10-thousand cheered.

JACKSON, Mich. (MARCH 13) UPI - About 50 to 75 people tossed baseball mementos into a bonfire in a city park Tuesday night to vent their feelings toward the major league baseball lockout.

Jerry Wright, news director at WKHM radio, said he organized the event to show the team owners and players that baseball fans are fed up with the

lockout, which threatens to delay the start of the regular season.

Wright said fans threw baseball paraphernalia, including about 200 baseball cards, 26 baseball hats representing all the major league franchises and mementos from the 1984 World Series.

''What gave me the idea was we've been getting so many phone calls about the baseball situation,'' Wright said. ''I just thought this would be a good way for fans to send a message to everyone involved. A bonfire sounded like a good way to show our feelings.''

Wright said the fans represented all ages. ''One young boy even brought his Little League baseball bat to throw in the fire.''

MANAGUA, NICARAGUA (MARCH 14) UPI - Nicaragua's outgoing Sandinista government welcomed President Bush's announcement Tuesday that he would lift a U.S. trade embargo as ''an act of justice too long delayed.''

Vice President Sergio Ramirez said the embargo against Nicaragua - in place since 1985 - ''should have been lifted long ago.'' He added the Sandinista government ''cannot but welcome'' Bush's promise of a $300 million aid package for President-elect Violeta Chamorro's government.

President Daniel Ortega, in Santiago, Chile, for the inauguration of President Patricio Aylwin, called Bush's actions ''a triumph for the Nicaraguan people.''

''With this culminates a great struggle of the Nicaraguan people for the defense of its rights,'' said Ortega, who has vowed to peacefully transfer control of the government on April 25 to Chamorro.

''We believe the lifting of the economic embargo is an act of justice which was already too long delayed,'' Ramirez said.

Ramirez also defended his government against accusations that Sandinista state workers are looting and stealing state property in advance of Chamorro's inauguration.

Leaders of Chamorro's National Opposition Union, which defeated the ruling Sandinista Front in elections Feb. 25, have accused Sandinista officials of signing over cars, houses and other state property to supporters, and of pushing through an amnesty law which in effect gave advance forgiveness of political crimes and corruption.

Ramirez said he had asked the Sandinista-controlled National Assembly

Tuesday to change the amnesty law so that it could go into effect Tuesday instead of several weeks from now, thus setting Tuesday as the cutoff date for crimes covered by the amnesty. The original law stated that all crimes committed ''until this law takes effect'' would be covered.

''We do not want to give any space to the belief that we were pardoning crimes in advance,'' Ramirez said. He said the amnesty, which covers political crimes both by Sandinistas and by U.S.-backed Contra rebels, was intended ''to create the climate necessary for peace and national reconciliation.''

Also Tuesday, the Defense Ministry said the Contras had attacked Sandinista troops eight times in the last five days in spite of a government cease-fire decreed last week by Ortega.

The ministry said a lieutenant in the Sandinista Popular Army died in one of those attacks.

(MARCH 13) UPI - Israeli Prime Minister Yitzhak Shamir fired Labor Party Chairman Shimon Peres from the Cabinet today, jeopardizing the coalition government.

10 Labor ministers... almost half the Cabinet... resigned in response to the firing.

The split between Shamir's right-wing Likud Party and the Labor Party caps a month-long crisis over a U-S peace plan calling for Israeli-Palestinian talks.

The debate is over whether to allow Palestinian delegates to consult with the Palestine Liberation Organization and over the role of East Jerusalem Arabs in the peace process.

Shamir said he dismissed Peres because he- quote- ''acts and acted to break up and undermine the government.'' Peres repeatedly threatened that Labor might leave the government if Likud did NOT approve the U-S peace proposal.

Shamir said he could NOT tolerate a minister who wants to topple the coalition government.

The dismissal and the resignations do NOT take effect until Thursday, giving some time for compromise.

A Greyhound bus leaving Chicago was hit by sniper fire early today... the

third such incident in less than 36 hours.

Police say a gunman fired at least four shots into the front of a bus leaving Chicago for Memphis, Tennessee, early this morning, missing a passenger by ''just inches.''

NEITHER the replacement driver NOR his 13 passengers were injured in the pre-dawn ambush. Police are NOT sure the shooting is related to the 12-day-old strike against Greyhound, noting that there are many shootings in the area.

NO end to the strike is in sight, despite a meeting yesterday between the striking union and a federal mediator.

Tomorrow, Greyhound representatives are to meet the mediator.

#90072u3746 03/13/1990 ~United Press International

(MARCH 13) UPI - President Bush today lifted a five-year-old trade embargo against Nicaragua. The decision comes on the heels of the February 25th election of Violeta Chamorro as president. Her democratic government next month will replace more than a decade of Marxist-led Sandinista rule marked by civil war. Citing a ''great and historic'' need to support democracy, Bush also proposed 500-Million dollars in aid over two years to help rebuild Nicaraugua's war-torn economy.

The United States is offering 80-Million dollars in food and loans to Romania... but only if the interim government holds free elections and works toward a free economy. The U-S Agency for International Development plans to ship butter and grain to Romania within six weeks. The aid also will include 29-Million dollars in loans for animal foodstuffs. This is the first time the United States has had an agreement to aid Romania.

Wisconsin Representative Les Aspin says the military and political changes in the Soviet bloc mean NATO and U-S forces do NOT need to rely on the threat to use nuclear weapons. The comments from the chairman of the House Armed Services Committee are based on a new classified threat assessment prepared by the Pentagon. Aspin's remarks are likely to increase pressures for major cuts in the military spending.

Though his main international rival grew more powerful today, President Bush is holding his tongue. The Soviet parliament today expanded Mikhail Gorbachev's presidential powers. But Bush says he doesn't meddle in Moscow's internal affairs... and he plans to keep working with Gorbachev. Bush said he isn't granting Lithuania diplomatic recognition because he wants a peaceful transition of power there.

-30- 1898

#90072u3770 03/13/1990 ~United Press International

(MARCH 13) UPI - Critics of the U-S policy on Central America today called for a march to mark the death of Salvadoran Archbishop Oscar Romero. A coalition of church, labor, and student groups said the protest will take place in Washington March 24th. It will end with mass civil disobedience as people kneel to pray in the street in front of the White House. The march comes despite today's announcement of U-S aid for Panama and Nicaragua.

A survey conducted for the Department of Housing and Urban Development

asked Americans to separately rate their homes and neighborhoods on a scale of one-to-10. The Census Bureau reports about seven of 10 households gave high marks to the quality of their homes and neighborhoods, with one-third of the respondents issuing perfect scores of 10. But owners liked both their homes and neighborhoods better than renters... and blacks were somewhat less enthusiastic.

Union leaders for West Virginia teachers met today with state Governor Gaston Caperton to try to resolve their six-day-old strike. NO progress was reported. The union... called the West Virginia Education Association... scheduled a mass rally for Wednesday... three hours before Capertown gives a ''major education address'' over statewide television. The teachers' strike is illegal under West Virginia law.

U-S Forest Service officials say protesters are spiking trees with three-and-a-half-inch nails in North Carolina's vast Pisgah National Forest. The practice makes the timber unuseable at sawmills. The Forest Service received anonymous letters saying the spiking will continue unless officials stop clearing large sections of the forest for harvest. One ranger in the area labels the dangerous practice ''environmental terrorism.''

#90072u3886 03/13/1990 ~United Press International

(MARCH 13) UPI - --refiling with proper customcode-

President Bush lifts Nicaraguan trade embargo and calls for massive aid to Central America... Gorbachev gets sweeping presidential powers... Poindexter defense goes after North testimony.... and Haiti gets a civilian president. U-P-I has it all, next:

President Bush says- quote- ''the American people are determined to help the people of Nicaragua''... and today he took steps to help fulfill that wish.

Bush held a White House news conference this morning where he announced the lifting of a five-year-old trade embargo against Nicaragua. He also proposed a 500-Million-dollar aid plan.

The aid would be given over two years... with an initial gift of 300-Million dollars, followed by a request for 200-Million dollars next year.

The money would go toward rebuilding Nicaragua's war-torn economy and would be coupled with a previously requested 500-Million dollars in aid for Panama.

There also is a 70-Million-dollar request for Nicaraguan refugees... all of which would come from the defense budget.

The president called on Congress to act on the first stage of the combined ''Fund for Democracy'' by April 5th. But House Speaker Thomas Foley rejected Bush's imposition of a deadline, saying Congress would deal with the request promptly.

The Pentagon has come up with suggestions of some military programs that could be cut to pay for an initial 300-Million dollars in aid for Nicaragua.

The Pentagon proposes that 83-Million dollars of the funds come from savings achieved through the civilian personnel hiring freeze Defense Secretary Cheney imposed for fiscal 1990.

It says another 81-Million dollars could be raised by deferring construction at military bases that are being studied for possible closure. NO specific construction sites or bases were named.

The military's plan calls for another 11-Million dollars to be taken from money set aside for the repair of the gun turret aboard the battleship U-S-S Iowa. The Iowa... scene of a severe explosion that killed 47 sailors last year... is slated to be mothballed in the fiscal 1991 budget.

The Pentagon also suggested a number of other programs that could be cut to come up with the money.

(MARCH 13) UPI - --refiling with proper customcode-

New changes introduced in the Soviet Union today reduce the power of the Communist Party and increase that of Soviet President Mikhail Gorbachev.

The Congress of People's Deputies today voted to end the Communist Party's monopoly on power and establish a new presidential system that would give Gorbachev sweeping new powers.

Before this morning's vote, Gorbachev told the Soviet lawmakers that they were- quote- ''about to take one of the most fateful steps in the history'' of the Soviet government.

The vote in favor of the super presidency was a personal triumph for Gorbachev, who rejected claims it would give him too much power.

He's expected to win the new presidential post in a vote either later

today or tomorrow.

Earlier, Gorbachev won a round of applause from the Soviet Congress when he rejected the idea of independence talks with Lithuania and Estonia.

The Soviet leader directed a special commission to settle the status of the Baltic neighbors.

Although Soviet President Gorbachev won expanded powers today, President Bush says he is staying out of the internal affairs of the Soviet Union.

Bush offered NO analysis of the approval by the Soviet Congress of broader powers for its leader. Bush did say he supports reform in the Soviet Union has a good relationship with Gorbachev and will continue to work with him.

Bush made his comments in Washington at a news conference to announce an 800-Million-dollar aid package for Nicaragua and Panama.

Bush also said the United States is NOT ready to give diplomatic recognition to Lithuania because he wants to see the peaceful ''evolution'' of the control of its territory. Lithuania declared itself independent from Moscow on Sunday.

The president also denied that he is overly sensitive to public opinion, saying he doesn't ''believe much in polls.'' He cited his unpopular overtures to China after the pro-democracy massacre in Beijing .

Bush welcomed the tone of a new Democratic plan to balance the budget. But he repeated his opposition to tax increases.

(MARCH 13) UPI - The gasline explosion that flattened half of a small upstate New York town this morning has claimed one life. Hospital officials say one of six people injuried has died. The blast destroyed 10 homes and numerous cars and set fire to treetops and a hill. The explosion occurred in the Texas Eastern Products pipeline in North Blenheim. Officials speculate leaking propane formed a gas cloud that exploded.

Nicaraguan President Ortega hailed as ''a triumph'' today's lifting of the five-year-old U-S trade embargo against his country. In making the announcement in Washington, President Bush also proposed 500-Million dollars in aid to the Central American nation. The actions follow last month's election of Violeta Chamorro, whose democratic government is about to replace more than a decade of Marxist-led Sandinista rule.

Soviet President Gorbachev today ruled out talks with the republics of Lithuania and Estonia, but he directed a special commission to settle the

status of the two Baltic states. Estonia is demanding talks on independence, while Lithuania already has declared itself independent of the Soviet Union. Gorbachev calls Lithuania's declaration ''illegal and invalid.'' The president of the Lithuanian legislature briefed lawmakers on Gorbachev's statement... but offered NO reaction.

In Washington, Oliver North was on the witness stand again today in the Iran-Contra trial of John Poindexter. He testified he worked on the secret U-S plan to sells arms to Iran with former national security adviser Robert McFarlane... even after McFarlane left the government. U-S District Judge Harold Greene expressed astonishment that McFarlane played a top national security role as a private citizen. Defense lawyers for Poindexter... McFarlane's successor... are trying to show North worked behind Poindexter's back.

-30- 2027

#90072u4056 03/13/1990 ~United Press International

(MARCH 13) UPI - Greyhound agreed today to resume negotiations with striking drivers in hopes of ending a stalemate in the 12th day of a bitter contract dispute marked by violence and accusations of union-busting. Anthony Lannie, Greyhound's executive vice president and chief labor negotiator, says talks with the Amalgamated Council of Greyhound Local Unions will resume Saturday in Phoenix. Lannie said the talks were scheduled after a request from the Federal Mediation and Conciliation Service in Washington.

The Bush administration today asked the Supreme Court to reinstate the anti-flag burning law. The high court last year ruled flag burning as a political protest is a constitutionally protected form of free speech. After the controversial ruling, Congress passed the Flag Protection Act of 1989. But last month, a federal judge in Washington state, hearing a protest case involving flag burning, struck down the law.

Former President Carter says Western hostages in Lebanon will only be freed when Iran is good and ready. Speaking in Cairo, Carter says Iran plays an important role in how long the hostages will be held... but will work for their release only when it's in Iran's best interests. Carter says Syrian President Assad has worked to free the hostages but has minimal influence with their captors.

A fire swept a low-income apartment unit in Wisconsin early this morning, killing five young children. Authorities in the town just south of Madison believe the fire was caused by a lighted kitchen stove burner. The bodies of the five children, ages five months to nine years, were found in their upstairs bedrooms. Police say the mother apparently was NOT home at the time of the fire.

A tanker truck overturned today in Portland, Maine... spilling two-thousand gallons of muriatic acid and forcing the evacuation of more than 250 residents. Muriatic acid is the commercial term for hydrochloric acid, a powerful cleaning agent. It can cause serious respiratory problems. The spill closed Route 295 for more than 10 hours. The truck driver and a passer-by suffered minor injuries.

#90072u4229 03/13/1990 ~United Press International

(MARCH 13) UPI - President Bush lifts embargo against Nicaragua and offers economic aid... details of that story and other top news of the day coming up next from U-P-I.

President Bush today lifted a five-year-old trade embargo against Nicaragua in the wake of last month's election Violeta Chamorro . Bush also proposed 500-Million dollars in aid over two years to help rebuild the Nicaraguan economy torn by a decade-long civil war.

Chamorro's democratic government on April 25th will replace the Marxist-led Sandinista rule of out-going President Daniel Ortega . The United States for years made efforts to topple Ortega, who calls the proposed aid a ''a triumph'' for his people.''

The aid to Nicaragua will be added to a previously requested 500-Million dollars for Panama and 70-Million dollars for refugees... proposals now stalled on Capitol Hill.

The president says the 870-Million dollars would come from the defense budget and he is asking Congress to act by April 5th on this combined ''Fund for Democracy.''

-30- 1198

#90072u4247 03/13/1990 ~United Press International

(MARCH 13) UPI - Lawyers for John Poindexter are trying to limit damage from Oliver North, who is testifying at the retired admiral's Iran-Contra trial.

The 53-year-old Poindexter is accused of five felony counts of lying to Congress and obstructing its investigation of secret arms sales to Iran. The money was transferred to the Nicaraguan Contras when U-S aid was banned.

Defense attorneys argued today North worked behind Poindexter's back in the worst scandal of Ronald Reagan's presidency.

Poindexter's attorney, Richard Beckler, took aim at the former Marine's

dealings with Robert McFarlane, who preceded Poindexter as national security adviser. North testified McFarlane worked on the secret plan to sell arms to Iran even after he left the White House. North testified he continued to work with McFarlane, sometimes without Poindexter's knowledge.

The prosecution is portraying Poindexter as a mastermind of the scandal. Beckler has tried to blunt that argument with a legal strategy placing much of the blame on McFarlane, who has pleaded guilty to withholding information from Congress.

-30- 1277

#90072u4312 03/13/1990 ~United Press International

(MARCH 13) UPI - Soviet President Gorbachev today said documents declaring Lithuania's independence are ''illegal and invalid.''

Gorbachev ruled out negotiations with the republic. Yet he directed a special commission to settle the status of Lithuania and another Baltic state- Estonia.

The Communist Party-dominated Congress of People's Deputies in Moscow burst into applause when Gorbachev emhasized the Soviet Union talks only with ''foreign states.''

Gorbachev said the full Soviet position will be spelled out ''in the near future.''

The Congress convened today and granted Gorbachev much wider powers as president.

In Lithuania, the president of the Lithuanian legislature... Vytautas Landsbergis... said there was a demonstration in the city of Svieckus. The city is mostly inhabited by Russians, who demanded annulment of the declaration of independence.

The United States today granted a multi-Million-dollar food and loan package to Romania in the first-ever aid agreement between the two nations.

Philip Christenson, representating the U-S Agency for International Development, signed the agreement in Bucharest. But Christnson says the package will be frozen if Romania's new government does NOT hold free elections and work toward creating a market economy.

The United States wants to help Romania's beleaguered agricultural sector by providing tons of grain and butter. The pact also provides a 29-Million-dollar low-interest loan for animal foodstuffs to be paid back over 25 years.

Christenson says the aid reflects the world's admiration for the ''courage of the Romanian people,'' who last December toppled ''vicious and dictatorial regime'' of Nicolae Ceausescu.

#90072u4344 03/13/1990 ~United Press International

(MARCH 13) UPI - Greyhound agreed to resume negotiations with striking drivers on the 12th day of a bitter contract dispute marked by violence and accusations of union-busting.

Anthony Lannie, Greyhound's executive vice president and chief labor negotiator, says talks with the union will resume Saturday in Phoenix. Lannie says negotiations were scheduled following a request from the Federal Mediation and Conciliation Service in Washington.

In Chicago early today, a departing Greyhound bus operated by a replacement driver was hit by sniper fire... the third such incident in less than 36 hours. Authorities at least four shots were fired into the front of the bus, missing a passenger by ''just inches.''

Officials now report at least seven shootings at Greyhound buses since the start of the strike by nine-thousand employees against the Dallas-based bus company.

Authorities say one person was killed and half a small town wiped out today by a propane explosion in upstate New York.

The blast occurred this morning at a Texas Eastern Products pipeline in North Blenheim, a town of 100 people 40 miles southwest of Albany.

Company officials suspect a leak in the pipe formed a puddle which gave rise to a huge white cloud of mist. The cloud exploded, and the flames set off a second explosion.

The blast destroyed 10 homes. It burned out cars, set trees ablaze with flames leaping 60 feet into the air, and blackened road signs.

Hospital officials say 43-year-old Richard Smith suffered second- and third-degree burns over his entire body and later died.

A 53-year-old man was burned on 90 percent of his body and is listed in critical condition. Four others were also injured.

Town supervisor Robert Shaffer immediately declared a state of emergency and asked New York Governor Mario Cuomo for assistance.

#90072u4429 03/13/1990 ~United Press International
(MARCH 13) UPI - Early returns from today's parliamentary elections in Grenada show the United Labor Party of former Prime Minister Sir Eric Gairy leading in two districts. The general elections are the Caribbean nation's second since the 1983 U-S invasion.

Political leaders in Colombia demand an explanation as to why, two days after Sunday's legislative and municipal elections, only 10 percent of the total vote has been counted. The delay is apparently due to computer problems.

Voters in Texas went to the polls today to cast ballots in the Lone Star State's gubernatorial primary. Three Democrats are running neck-and-neck for the chance to oppose the Republican nominee... likely to be flamboyant Millionaire Clayton Williams.

Authorities in a town south of Madison, Wisconsin, say an early morning apartment fire that killed five children apparently began with a kitchen stove burner that had accidentally been left on.

Officials in Milford, Connecticut, say an extra-alarm fire forced the evacuation of the 90-store Connecticut Post Mall today. Two people were injured. The cause of the blaze is under investigation.

Hospital officials in New York City say a 28-year-old doctor is in serious but stable condition after being shot in the chest while visiting with her brother in Central Park. Police have NO clues as to the identity of the shooter or where the bullet came from.

-30- 1571

#90072u4589 03/13/1990 ~United Press International

(MARCH 13) UPI - An afternoon wave of tornadoes swept the Plains today... destroying homes and farm buildings. Officials in Harvey County, Kansas, say one person was killed when a twister flattened a home in the town of Burrton, 30 miles northwest of Wichita. South-central Nebraska, northeastern Iowa and an area north of Lindsay, Oklahoma, also were hit by tornadoes.

An explosion ripped through a parking garage attached to a Greyhound bus depot in Tacoma, Washington, today. About 15 cars were damaged, but NO one was injured. Firefighters say the blast apparently stemmed from a leak in a pump connected to gasoline storage tanks in the underground garage.

The contract dispute against Greyhound... now in its 12th day... may be closer to a resolution. The national bus line agreed today to return to the bargaining table. Negotiations are to resume Saturday in Phoenix.

Congress is reacting to today's proposal by President Bush for 500-Million dollars in aid for Nicaragua. Bush called on Capitol Hill to act on the plan by April 5th. House Speaker Thomas Foley appeared to reject Bush's deadline and said only that Congress would ''deal with it promptly.'' Republican Representative Duncan Hunter of California worries that the ruling Sandinistas will steal some of the aid before they give up power next month.

A news report says China has placed the United States at the top of a secret list of its enemies. The network says it obtained the transcript of a secret telegram dictated by Chinese leader Deng Xiaoping, telling communist party officials throughout the country to- quote- ''expect more U-S pressure on human rights.'' The telegram also reveals a deep ideological rift with the Soviet Union, accusing President Gorbachev of deviating from Marxism.

-30- 1956
#90072u4601 03/13/1990 ~United Press International
(MARCH 13) UPI - More than 100 people demanding speedy passage of civil rights legislation for the disabled were arrested in Washington today. The protestors- most in wheelchairs- were charged with demonstrating within a Capitol building. The protest was organized by an activist group pushing for passage of the Americans with Disabilities Act. The measure was approved by the Senate but currently is bogged down in the House.

The Arab League meeting in Tunisia appealed to the United States to ''respect international rules'' and halt its ''threats against Libya.'' The statement backs Libyan leader Moammar Gadhafi in his dispute with the United States. Washington claims chemical weapons are being produced at a plant about 60 miles from Tripoli. Libyan authorities say the plant produces only medicines.

An Egyptian diplomatic source says his country would like to see an Israeli leader like former Prime Minister Menachem Begin take charge of the Mideast peace process. The foreign ministry official would NOT comment on today's firing of Cabinet member Shimon Peres, the Labor Party leader. But he says some authoritative figure must represent Israel and- quote- ''stick it out until the end.''

Miss America, Debbye Turner, has agreed to stop performing Christian rap music at public schools. Pageant chairman Leonard Horn says he ordered Turner to stop rapping, agreeing with a Jewish group... the Anti-Defamation League of B'nai B'rith... that the song was inappropriate for tax-supported schools. He says Turner... a born-again Christian... has ''NO problem'' with the order.

SCOTTSDALE, AZ (MARCH 14) BUSINESS WIRE - Interactive Media Technologies Inc. (NASDAQ:IMTX) Wednesday announced the formation of a nationwide network of manufacturers' representatives to market and sell the IMTX 8000 IMT's desktop video/media integration system which will be unveiled April 10, 1990 at MACWORLD in San Francisco, according to R. Glenn Williamson, IMT's chairman, chief executive officer and president.

''We are pleased to announce that we have contracted with the premier sales organizations in computer and A/V-related fields in the United States,'' Williamson said. ''Our network will have in excess of 170 sales reps calling on 1,400 dealers that sell Apple and IBM, as well as other industry standard equipment. This is a potential sales force of more than 8,000 personnel.''

Williamson also noted that ''IMT looks forward to the opportunity to work with these organizations in delivering IMT's revolutionary technology to the marketplace.''

The sales organizations in place as of this date are: Computer Marketing Group, Leonia, N.J. R.O.M. & Associates, Norcross, Ga. ProActive Marketing Minneapolis Miller & Associates, Richardson, Texas Martec, Torrence, Calif. WESCO, Tempe, Ariz. Incom Marketing, Columbus, Ohio Integrated Marketing, St. Petersburg, Fla. SmartStuff, Chesterfield, Mo. Intelligent Products Marketing, San Ramon, Calif. Schreyer Associates, Salt Lake City

Interactive Media Technologies is a full spectrum communications corporation specializing in computer-based interactive multimedia video products which include proprietary hardware and software systems.

CHANDLER, AZ (MARCH 14) BUSINESS WIRE - ShareData Inc. (''the company'') Wednesday announced that it has signed a letter of intent with Action Products Inc. to engineer, for and on behalf of Action, a NASCAR racing and Stock Car racing video game which is compatible with the Nintendo Entertainment System.

Action's current plan is to bundle these race car cartridges with their Racing Champions line of micro-cars. Under the letter of intent, Action shall act as technical adviser to the company on the racing aspects of the vehicle, the race cars, race tracks and races to make the game as authentic as possible.

Action will supply license agreements from four race car drivers, from their exclusive license agreements with over 130 drivers. Action also has solid working relationships with a variety of sponsors for a number of different race car driving teams.

Action intends to market these games to the promotional and retail field and will have the exclusive rights to these games. Action, within the context of the letter of intent, expects unit cartridge sales of approximately 200,000 for the initial race car game, however, there can be no guarantee as to the number of units that can be sold.

Depending on volume, end-user demand, game development expenses and order quantities, ShareData expects to ship finished game cartridges to Action at a price of $16 to $20.

The company is not a licensee of Nintendo. The company's cartridge- based games are not designed, manufactured, sponsored or endorsed by Nintendo. Nintendo and the Nintendo Entertainment System are trademarks of Nintendo of America Inc.

ShareData Inc., designs, develops and markets computer software programs for microcomputers, including IBM, Apple, Commodores and the Nintendo Entertainment System.

The Business Systems Division produces easy-to-use office productivity software and is currently marketing INTO, an integrated office system for PC-based local area networks. ShareData is located at 7400 W. Detroit St. Suite C-170, Chandler, Ariz. 85226. Telephone number: 602/961-7519.

#90073b0018 03/14/1990 ~Business Wire

DENVER (MARCH 14) BUSINESS WIRE - CREDO Petroleum Corp. reported Wednesday that for the first quarter ended Jan. 31, net income increased 20 percent to $126,000, or 4 cents per share, on revenues of $476,000, compared with net income of $105,000, or 3 cents per share, on revenues of $362,000 last year.

Cash flow from operations increased 38 percent to $281,000 compared to $204,000 last year.

James T. Huffman, president, said that record first quarter results reflect the combination of improved gas production and increased oil prices. Gas production increased primarily due to enhanced production at the company's Bear Creek and San Arroyo Fields and a new market for gas from the company's southwest Kansas wells.

Gas production increased 26 percent to a record 82 million cubic feet in 1990 compared to 65 last year. Oil production increased 11 percent to 9,900 barrels compared to 8,900 barrels last year.

Gas prices received during the first quarter increased 9 percent to $1.52 per thousand cubic feet compared to $1.40 last year. Oil prices increased 39 percent to $18.84 per barrel compared to $13.58 last year.

At first quarter-end, working capital totaled $3,456,000, up $549,000, or 19 percent, from $2,907,000 last year. Total assets were $8,929,000 including cash and temporary cash investments of $3,387,000. Shareholders' equity was $8,100,000 and the company had no debt.

Full scale water injection is expected to start on the west Texas waterflood property in early April, Huffman said. Although the waterflood is targeted at the Yates Sand, drilling on the property has disclosed the presence of productive intervals in the deeper Queen Sand which will be developed for primary oil production.

The company's annual shareholders' meeting will be held on March 22 at 2:30 p.m., in the Forum Room of the United Bank of Denver located at 1700 Broadway in downtown Denver. All shareholders and interested parties are invited to attend.

CREDO Petroleum Corp. is a publicly traded independent oil and gas company based in Denver. The company's stock is traded on the NASDAQ System under the symbol CRED and is quoted daily in the ''NASD Bid & Asked Quotations'' section of the ''Wall Street Journal.''

RESTON, VA. (MARCH 13) BUSINESS WIRE - US Sprint Wednesday announced that its subsidiary, Sprint International, has signed a preliminary agreement with two Soviet organizations to form a telecommunications joint venture company in the Soviet Union.

Signing the agreement were Central Telegraph of the Soviet Ministry of Posts and Telecommunications, and the Institute of Electronics and Computer Science of the Latvian Academy of Sciences. The new company, called Telenet USSR, will undertake a variety of telecommunications activities in the Soviet Union.

Initially, it will own and operate a switching center in Moscow to be interconnected with the SprintNet(sm) International data network, provide

SprintMail(sm) electronic messaging service domestically and internationally and distribute Sprint International's Telenet(R) product line of data communications equipment in the Soviet Union.

''As the perestroika process unfolds and economic bridges between East and West are built, modern telecommunications will become even more important '' said Paolo Guidi, president of Sprint International, which provides international voice, data and videoconferencing services and products for US Sprint. ''We are delighted to participate in this process.''

''This joint venture will bring Sprint International's global communications capability to the USSR, and enable us to meet expanding needs in our country,'' said Viacheslav Rubtsow, general manager of Central Telegraph.

Details of the joint venture, including financing and business plans, will be finalized by mid-1990. Telenet USSR operations are expected to begin in late 1990, subject to registration by Soviet government authorities and receipt of U.S. export licenses.

Central Telegraph provides international and intercity public telex, telegram and low-speed data communications services in the USSR. Some 120,000 domestic telex subscribers and 4,000 international customers use its services.

The Institute of Electronics and Computer Science specializes in computer networking technology, and has developed software and hardware systems for packet switched data communications.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

RESTON, VA. (MARCH 13) BUSINESS WIRE - US Sprint Wednesday announced it is participating in planning for the construction of an Asian fiber-optic cable system to serve the major markets of the Pacific Basin.

The 4,500-mile-long Asia-Pacific Submarine Cable (ASPAC), linking Japan, China, Hong Kong and Singapore, will interconnect with several transpacific cable systems serving the United States and Canada.

The ASPAC agreement calls for a 560 Mbps link between Tokyo, Shanghai,

Hong Kong and Singapore The cable will be able to handle 30,000 simultaneous telephone calls.

The principal parties in the estimated $260 million project are International Digital Communications (IDC) of Japan, the Telecommunications Authority of Singapore, Cable & Wireless (Hong Kong) Ltd., and Mercury Communications Ltd., of the United Kingdom.

US Sprint is participating as the initial U.S. party for planning of the system, which will provide an important supplement to the Hong Kong-Japan-Korea (H-J-K) Submarine System planned to begin operations in mid-1990.

Completion of ASPAC's construction is expected by mid-1993. US Sprint and other international carriers will purchase capacity on the system as part of a consortium to be formed later this year.

''ASPAC will further extend the reach of the US Sprint fiber-optic network into the fast growing Asia-Pacific region,'' said Paolo Guidi, president of Sprint International, the private networks and international telecommunications subsidiary of US Sprint.

''With the link to the People's Republic of China, it will bring US Sprint's goal of a global fiber-optic network one step closer to reality.''

US Sprint co-owns the PTAT-1 transatlantic fiber-optic cable with Cable & Wireless and also owns and operates the largest all-fiber network in the continental United States.

''ASPAC will provide much needed capacity in the Pacific Basin,'' said Bill Burgess, Sprint International vice president for telecommunications services. ''Because the H-J-K cable is forecast to be filled to capacity by 1994, the ASPAC cable will be ready just in time to meet the increasing demand for voice, data and video services in the region.''

US Sprint is a unit of United Telecommunications Inc., a diversified telecommunications company headquartered in Kansas City, Mo.

CHICAGO (MARCH 13) BUSINESS WIRE - Illinois Tool Works Inc. announced Wednesday that it has acquired the Akron Standard division of Eagle-Picher Industries.

Akron Standard is a worldwide leader in the manufacture of tire uniformity machines, designed to test and correct defects in tires at production line rates. Other products include wheel testing machines, tire wheel assembly testing machines and tire balancing machines. Annual sales are approximately $40 million.

In making the announcement, ITW said Akron Standard will fit well with ITW's Micro-Poise tire and wheel testing equipment unit. Micro- Poise and Akron Standard are complementary in terms of product lines, marketing and geography, and the combination will provide more effective products, technology and service to customers of both units throughout the world, the company said.

ITW is a multi-national company with sales of more than $2.2 billion annually in two segments, engineered components and industrial systems and consumables.

MOUNTAIN VIEW, CA (MARCH 14) BUSINESS WIRE - Canon U.S.A. Wednesday announced the availability of a controller which includes a PostScript interpreter from Adobe Systems Inc. (NASDAQ:ADBE) for the Canon Color Laser Copier 500 Imaging System.

With the new controller, the copier can be connected to a wide variety of computers to create color hard-copy output of PostScript language files at 400 by 400-dot-per-inch resolution.

The Color Laser Copier 500 prints up to ledger-size (11 by 17) pages, in four colors or monochrome, at three to 10-pages-per-minute, depending on the complexity of the page. The copier comes with 12 megabytes of RAM, expandable to 24 megabytes. An extra hard disk for storing typeface software is also available.

The controller with the PostScript Interpreter for the Color Laser Copier 500 will be available in the second half of 1990 from authorized Canon dealers worldwide.

''We are excited about the new Canon Color Laser Copier 500 because it gives users all the functionality of existing color printers, but is a step up in both performance and resolution,'' said Dr. John Warnock, chairman and chief executive officer, Adobe Systems Inc. ''The Canon copier is a powerful new tool for artists, designers, publishers and corporate communications.

''Users can produce very accurate proofs of color PostScript lanuage files by connecting it to their personal computer, then can use the same PostScript language file to make color separations of their compositions on a high-resolution PostScript typesetter.''

Adobe Systems Inc., founded in 1982 by Warnock and Dr. Charles Geschke, has headquarters in Mountain View. Adobe is the developer of PostScript, the industry-standard page description language for electronic printing and publishing, and Display PostScript, a device-independent graphics software component for computer displays.

In addition, the company develops and markets application software products, including the award-winning Adobe Illustrator 88 and Adobe Type Manager, the Adobe Type Library and Adobe Photoshop. Revenues for 1989 were over $120 million.

SAN FRANCISCO (MARCH 14) BUSINESS WIRE - Pacific Gas and Electric Co. announced that a special assistance program helped more than 28,000 customers in 1989 with their utility bills.

REACH -- Relief for Energy Assistance through Community Help -- is a PG&E

program offering one-time payments for customers who are in a financial crisis.

Since the program began in 1983, more than 138,000 families have received assistance and almost $20 million has been raised. Last year, $4.3 million was distributed to those in need, averaging $153 per grant. REACH is open to customers living in the company's 48 county service area.

It is funded by contributions from customers, employees and shareholders of PG&E, and is administered by The Salvation Army. No customer rate funds are involved.

''The program is designed for people who find themselves in an immediate financial crisis,'' said Frank Bell, director of REACH for the Salvation Army. ''PG&E refers these individuals to us, and we sit down with them and try to help them become self-sufficient again.''

Costs to administer the program are paid from interest accrued in the REACH account, with supplemental funds provided by PG&E if needed.

REACH is recognized as the oldest and most successful energy assistance fund program sponsored by an investor-owned utility, and has become a model for similar programs nationwide.

RICHARDSON, TX (MARCH 14) BUSINESS WIRE - Rockwell International Corp.'s Collins Defense Communications (CDC) has been awarded a $16 million subcontract from the Raytheon Co. for Low Rate Initial Production (LRIP) of MILSTAR equipment.

The U.S. Air Force Systems Command's Electronic Systems Division has awarded LRIP prime contracts to Rockwell and Raytheon. The LRIP requires that the two contractors delivr MILSTAR equipment designed by both companies. CDC's $16 million award is for production and spare quantities of Rockwell's hardware, which is required to meet Raytheon's responsibility under their prime contract.

With the addition of this award CDC has received $209 million for LRIP of MILSTAR terminals and associated equipment.

The MILSTAR satellite communications system will provide secure and survivable, jam-resistant communications capability for the strategic and tactical forces of all U.S. military services. The system uses extremely

high frequency (EHF) and other state-of-the-art technologies to withstand electronic warfare and attack.

The equipment will be used in airborne command post aircraft, Air Force ground command posts and at tactical warning and attack assessment sites. The MILSTAR system is scheduled to be operational through the 1990s.

Work on the program will be performed at CDC's facilities in Richardson and in Cedar Rapids, Iowa.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

PALO ALTO, CA (MARCH 14) BUSINESS WIRE - Lotus Development Corp. is providing development support to Hewlett-Packard Co. so that LOTUS 1-2-3, Release 2.2, will run under HP NewWave, both companies announced Wednesday.

HP NewWave is a software applications environment that makes it easier for computer users to move and update information among different applications and to schedule routine tasks to be done automatically by the computer.

The LOTUS 1-2-3 browser facility, originally developed by HP, will continue to be shipped and supported as part of the standard HP NewWave product. A ''browser'' is a shell that surrounds an existing MS-DOS application and enables it to be used in the HP NewWave environment.

The browser facility allows HP NewWave users to access and update LOTUS 1-2-3 spreadsheets, which can then be sent electronically to other users.

Under HP NewWave, computer users can move, update and integrate information from LOTUS 1-2-3 spreadsheets with other PC applications and can schedule routine tasks involving LOTUS 1-2-3 spreadsheet data to be done automatically by the computer.

HP NewWave has enjoyed considerable momentum and success since HP introduced the product in 1987.

These applications include development tools, database programs, charting/graphics, datacommunications, electronic-mail, word- processing, full-motion video, office accessories, computer-aided design, and

search-and-retrieval capabilities.

Headquartered in Cambridge, Mass., Lotus Development Corp. is the leading developer of applications software for personal computers and information services delivered on CD-ROM.

HP NewWave is a component of HP NewWave Office. HP NewWave Office, an integrated office system, has more than 15 products and capabilities that make it easier for people to get the information they need and to act on it. It is based on the client-server computing model and incorporates existing applications, protecting customers' financial and training investments in their current software applications and hardware platforms.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

RESTON, VA (MARCH 14) BUSINESS WIRE - Sprint International and Elektrisk Bureau (EB) of Oslo Wednesday announced the formation of a Norwegian joint venture company to sell and distribute data communications products and systems in Scandinavia.

The joint venture company, EB Telenet AS, will have offices in Oslo, Stockholm and Copenhagen. EB, the second largest privately owned corporation in Norway with revenues of almost $2 billion, has been a distributor of Sprint International's Telenet(R) products since 1981. It is part of the Swedish-Swiss multinational group, Asea Brown Boveri.

Telenet(R) packet switches, data networking products and electronic messaging systems are used in the public telecommunications networks in Norway, Denmark and Finland, as well as by leading insurance firms and banks in Norway and Finland.

The Scandinavian alliance is the latest development in Sprint International's expansion efforts. It has recently signed contracts to build or expand public and private data networks in South Korea, Kenya, Norway, Switzerland, the United Kingdom and Canada.

Sprint International, based in Reston, is a subsidiary of US Sprint, which is a unit of United Telecommunications Inc., a diversified international

telecommunications company based in Kansas City, Mo.

#90073b0113 03/14/1990 ~Business Wire

REDMOND, WA (MARCH 14) BUSINESS WIRE - The U.S. Circuit Court of Appeals in Washington D.C. has ruled that Nintendo may sue retailers who sell unauthorized cartridges manufactured by Atari Games/Tengen Inc. for use with the Nintendo Entertainment System (NES) and which Nintendo asserts infringe its patents.

This decision vacates a preliminary injunction previously granted to Atari Games by the U.S. District Court in Northern California, which enjoined suits against retailers who deal in infringing cartridges pending the outcome of litigation between Nintendo and Atari Games/Tengen Inc.

Nintendo has consistently asserted that the manufacture and sale of unlicensed video game cartridges by Atari Games violated a number of Nintendo's rights, including certain patents Nintendo has obtained on its Nintendo Entertainment System and associated game cartridges.

Howard Lincoln, Nintendo's senior vice president, said this new ruling means that Nintendo has a full range of legal options it may use to protect Nintendo's patents.

Last February, Atari Games obtained a preliminary injunction preventing Nintendo from suing Atari Games' dealers for patent infringement, by arguing that Nintendo had improperly monopolized the videogame marketplace by asserting its patent rights and by supervising the production of game cartridges for its Nintendo Entertainment System.

The Court of Appeals found ''nowhere does the district court make a finding that Atari could probably prove its allegations. The district court has not referred to a factual basis for its granting of the preliminary injunction against Nintendo and this court cannot find one.''

The appeals court stated that ''. . . the record fails to reflect that Atari came forth with any evidence. . . to prove that Nintendo was enforcing its patent in bad faith, or expanding its patent rights beyond their proper scope.''

Furthermore, the court said, ''This court cannot find, either in the district court's opinion, or anywhere in the record, specific factual findings, or the basis for any findings, concerning Nintendo's licensing

agreement running afoul of the antitrust laws . . .'' In fact, the court said, ''Many of the restrictions Nintendo places on its licensees are not, as a matter of law, antitrust violations.'' Nintendo of America Inc. is the largest subsidiary of Kyoto, Japan-based Nintendo Company Ltd. Tengen Inc. is a wholly owned subsidiary of Atari Games Corp., a privately held company partly owned by Namco Inc. of Tokyo. Atari Games is not affiliated with publicly traded Atari Corp. of Sunnyvale, Calif.

PORTLAND, OR. (MARCH 14) BUSINESS WIRE - More than 500 communications and graphic design industry professionals will meet in Portland Mar. 22-23 at ''The Creativity Forum: Communications Tools for the 1990s,'' to explore how technology can enhance creativity and their respective businesses.

The 1-1/2-day forum, presented by Apple Computer Inc. at Montgomery Park in Northwest Portland, features a distinguished list of speakers and participants from a range of professions, including advertising, marketing communications, public relations, graphic design, illustration and publishing.

Participants will hear from leaders in their fields who already use computers to produce award-winning advertising, graphics and publications,

such as Robert Chandler, creative director and senior vice president of BBDO, Los Angeles.

Among other headliners are Bruce Mowery, director of marketing information and communications for Apple Computer and executives from a number of Portland and Pacific Northwest firms, including: Steve Beaudry, creative automation focus, Boeing, Seattle; Steve Sanders, marketing manager and adminstrator, L. grafix; Glenn Mitsui, art director and principal computer graphics designer/illustrator, M Design, and Hilary Cambron and Peter Hallinan, vice president of sales and marketing and president respectively, Integrated Arts, Portland.

In addition to seminar sessions, the forum also offers exhibits and hands-on technology workshops that showcase Macintosh and specific applications, from desktop publishing to the latest in multimedia technology.

The Portland Advertising Federation and AD2 have endorsed The Creativity Forum.

The forum runs from 8:30 a.m. until 5:15 p.m. Thursday, Mar, 22. On Friday Mar. 23, workshops start at 8 a.m. and conclude at 12:45 p.m. There is no charge for participation, but advance registration is required.

SANTA ANA, CA (MARCH 14) BUSINESS WIRE - Tricare Inc. (NASDAQ:TRCR), a leading occupational health care services company in California, announced record results of operations for its third quarter and nine months ended Feb. 28, 1990.

For the three month period, the company's net revenues increased 16.4 percent to $5 million from $4.3 million for the like period a year ago. Net income was $319,000, or 10 cents per share, a 23 percent increase over net income of $259,000, or 9 cents per share, reported in the third quarter of fiscal 1989.

For the nine months ended Feb. 28, 1990, Tricare's net revenues increased 16.5 percent to $14.9 million from $12.8 million for the like period a year ago. Net income was $1,079,000, or 36 cents per share, a 21 percent increase over net income of $892,000, or 31 cents per share, reported for the like period a year ago.

The company completed its initial public offering in late January, 1990.

Announcing the results for the third quarter, Steve Bullock, president and chief executive officer of Tricare, said, ''We are pleased with the results and the continued progress of the company towards its goal of being the leader in the occupational health care services industry in California.''

Larry Wasserman, chief financial officer of Tricare, said: ''The company is continuing its geographic expansion in California in the medical/legal evaluation services industry for injured workers. We are also in the process of expansion into other related services to injured workers.''

In addition, Bullock said, ''The company is continuing to identify acquisition candidates involved in the treatment and vocational rehabilitation of injured workers in California.''

SALT LAKE CITY (MARCH 14) BUSINESS WIRE - Grand Valley Gas Co. (OTC:GVGC) is pleased to announce the opening of an office in Denver.

The objective of the Denver office is to provide Rocky Mountain natural gas producers with increased opportunities to sell their gas in the Pacific Northwest, Rocky Mountain, Midwest and West Coast regions.

Grand Valley Gas Co. is also pleased to announce that Russell K. Boone has joined the company as manager of gas supply. Boone will be responsible for the establishment and operation of the Denver office.

Boone brings to Grand Valley 13 years of gas and oil experience with extensive expertise in Rocky Mountain gas supply. He most recently served as assistant vice president/gas supply for Trigen Resources Corp., where he initiated its entry into the Denver area and secured gas supplies throughout the Western and Midwestern regions.

Prior to that position, Boone worked for Koch Industries as a manager in the Rocky Mountain area, where he evaluated and implemented gas gathering, compression, processing and treating projects. Boone is a graduate of the University of Northern Colorado.

''The Denver office is staffed with the expertise necessary to provide Rocky Mountain producers with both a valuable administrative service and an alternative gas market. Because of Grand Valley's commitment to the

Western United States, we are increasing our natural gas purchasing personnel and resources,'' said Grand Valley President Jeff J. Fishman.

''As a purchaser of natural gas we will continue to demonstrate our ability to provide producers with competitive and secure markets while minimizing their administrative burden and expenses.''

Fishman predicts, ''Grand Valley will further enhance the gas market alternatives for Rocky Mountain producers through our current needs for spot, intermediate and long-term gas supplies.''

Grand Valley is one of the largest purchasers of natural gas in its regions of operation. It also provides gas supplies and administrative services to local distribution companies and industrial end users.

SACRAMENTO, CA. (MARCH 16) BUSINESS WIRE - American Recreation Centers Inc. (NASDAQ:AMRC) announced record third quarter operating revenues of $12,609,000 for the quarter ended Feb. 28, an increase of 18 percent over last year's comparable revenues of $10,718,000.

Revenues for the nine months ended Feb. 28 totaled $33,783,000, an increase of 30 percent over last year's comparable revenues of $25,956,000.

Third quarter net income of $976,000, or 20 cents per share, was up 12 percent over comparable net income of $873,000, or 18 cents per share, for the third quarter last year. Last year's third quarter income was favorably effected by a pre-tax gain on sale of assets totaling $804,000 compared to $142,000 in pre-tax gains during the current quarter.

For the nine months ended Feb. 28, net income of $1,044,000, or 21 cents per share, represents an 84 percent increase over last year's net income of $566,000, or 12 cents per share. Included in last year's results is the pre-tax gain on sale of assets totaling $1,481,000 which compares to this year's pre-tax gain of $468,000 on sale of assets.

American Recreation Centers Inc. is the largest publicly held corporation in the country devoted primarily to the operation of bowling centers. The company operates 27 bowling centers, 22 in California and 5 in Texas, with an aggregate 1,126 lanes.

American Recreation Centers Inc.'s wholly owned subsidiary, The Right Start Catalog Inc. is a nationwide direct marketer of high-quality

products for infants and children.

The company is also active in the development and management of commercial real estate. Real estate activities include conversion of bowling centers to more profitable uses as well as development of other properties.

HALIFAX, NOVA SCOTIA (MARCH 14) BUSINESS WIRE - The Stratas Corp. Ltd. announced Wednesday a joint venture agreement with RIM Associates of Mystic, Conn.

The U.S. group will provide innovative technology for a new generation of marine sensing equipment. Stratas will provide manufacturing and assembly capabilities in Port Hawkesbury, Nova Scotia. Stratas manufactures diverse specialty products, ranging from marine vessels to specialty fabrication.

''This joint venture will accelerate our commitment to effectively utilize Port Hawkesbury's potential,'' said Edmund L. Dunn, the Stratas company director, ''and enhances our existing hybrid submarine project.''

The software/hardware configuration to be produced by the joint venture, to be called Stratas Sphere TM, will provide surface and undersea vessels with the ability to detect the characteristics of their environment and to generate responses to changes in that environment. Future developments of marine sensing technology can be incorporated to preclude obsolescence of the system.

The revolutionary configuration will be available within a year for the underwater phase of the project, leading to potential sales of $1 million monthly under present production schedules.

Dunn advised, ''with over 10,000 military and commercial vessels capable of being refitted for this product, Stratas Sphere should generate $50 - $100 million sales within three years.''

The Stratas Sphere's sensing machine's adaptation to a submarine will utilize existing hull sensors to collect data and identify all natural and man-made material objects. Additional sensors may be required to address intangibles such as thermal layers.

The submarine will be at the center of this environmental sphere aware of all potential hazards. The advantage to installing the sensor collector

in the Stratas hybrid submarine project is the elimination of the towed sonar array presently used to detect hazards aft of the propeller, thus giving submersibles complete freedom of movement and speed.

Robert W. Innes, a RIM Associates spokesman, advised that ''the joint venture to produce this new technology was entered into to be a part of a quality submarine program. Additionally, the sensing unit would have applicability in metal fatigue testing, assisting Stratas in its marine overhaul and new construction program at Port Hawkesbury.''

''RIM personnel are impressed with Port Hawkesbury's potential-- the deep water port, providing access to world markets; the existing facility to reduce manufacturing startup time; the enthusiastic, hard-working attitudes expressed by Stratas management and the Nova Scotians.''

''The Nova Scotians and all our contacts with the Canadian government have been extremely positive. RIM has the technology of the 21st century and this area wants to be included in our plans.''

SAN FRANCISCO (MARCH 14) BUSINESS WIRE - Wells Fargo & Co. this week introduced a new healthcare plan called ''SelectCare'' to its employees.

The new plan will become effective Jan. 1, 1991.

The new managed healthcare plan will include a network of physicians and facilities somewhat similar to a health maintenance organization. Wells Fargo employees who participate in SelectCare choose a primary care physician from a network, but may also select physicians not in the network.

Wells Fargo has contracted with The Travelers Companies to create and manage the SelectCare network.

Employees will also have the option to enroll in one health maintenance organization -- Kaiser Permanente.

''Wells Fargo is committed to providing the very best in health care for our employees,'' said Stephen A. Enna, executive vice president and personnel director. ''Our continuing challenge is to find new ways to

offer quality healthcare that is affordable for employees and the company at a time when healthcare costs are rising dramatically,'' he added.

Under SelectCare, Wells Fargo employees who choose healthcare providers in the network will pay no annual deductible fee and will pay only $10 a visit for office visits including diagnostic x-ray and lab services, immunizations and well baby care, and for a physical examination, pap smear and mammogram each year.

Employees' share of the costs of hospital services will be limited to 10 percent of room and board charges, newborn care and nursery charges, private duty nursing, as well as 10 percent of the charges for use of an extended care facility, home healthcare and hospice care.

When employees choose to select physicians and healthcare providers outside of the network, the plan operates like a traditional indemnity plan, requiring employees to file claims for reimbursement of a portion of their medical costs.

Currently, Wells Fargo offers several healthcare options for employees: the WF Health Plan with deductibles of $200, $300 and $400, and a choice of several HMOs in various geographic regions.

The company self-insures the Wells Fargo Health Plan; that is, Wells Fargo pays all claims under the plan and the plan is administered by The Travelers Companies.

Employees pay a share of the costs of healthcare, ranging from $27.04 per month up to $60.33 depending on their choice of a plan. Those opting to cover one or more dependents pay higher monthly premiums.

Wells Fargo will continue to self-insure the new plan.

''Our employees will be hearing a great deal more about SelectCare in the months ahead before our regular open enrollment period next fall,'' Enna said.

Wells Fargo currently has about 15,000 staff members and their families enrolled in its various healthcare plans. The company and its insured employees together pay more than $70 million per year for healthcare.

DENVER (MARCH 15) BUSINESS WIRE - U S WEST Wednesday announced the

appointment of Gerald Gaines as president of U S WEST Service Link, effective March 16, 1990.

U S WEST Service Link provides local and long distance operator services (expect directory assistance) within U S WEST's 14-state region. The unit also provides hotel and motel billing services and nationwide calling-card billing validation for a number of long distance companies.

Gaines, 33, was formerly vice president-Development for the U S WEST Diversified Group. Previous assignments included vice president of Planning and Business Development for the U S WEST New Vector Group and director of market strategy for the company's Strategic Marketing group.

He also held a variety of positions with General Electric and Procter & Gamble. Gaines holds an MBA from the Harvard Business School and a B.S. from Case Western Reserve University.

He replaces Lois Schmidt, who recently retired.

U S WEST owns U S WEST Communications and other companies involved in communications, marketing services, financial services and data solutions.

LOUISVILLE, CO (MARCH 14) BUSINESS WIRE - On Friday, March 9, Toen Group Inc. acquired all stock of Sunbelt Media Group Inc., according to Todd Ficken, the company's former chief executive officer.

In consideration for the sale, Toen issued new stock to William J. Kitchen in the amount of 278 million shares, resulting in Kitchen's ownership of 80 percent of Toen.

In conjunction with the sale, the board of directors of Toen has resigned and a new board was elected. The new board is comprised of William J. Kitchen, Todd Ficken, Joel Ripmaster, and Don Walford. William Kitchen was elected as chairman and chief executive officer.

Kitchen announced that Toen (Sunbelt Media) will begin implementation of its new business plan immediately. The current operating plan calls for Sunbelt to build and operate a network of low power TV stations, which will be programmed by Video Jukebox Network Inc. of Miami.

Video Jukebox programs the stations with a unique format of music videos, which can be programmed by the viewer calling in on a touch-tone telephone.

Toen/Sunbelt expects to have the first of many stations in operation within 90 days.

DALLAS (MARCH 14) BUSINESS WIRE - Officials of Texas Instruments Inc. and Toppan Printing Company Ltd. Wednesday signed a definitive agreement to establish a jointly owned U.S. company that will acquire TI's internal photomask operation in Dallas.

This agreement formalizes the understanding that was first announced in December 1989, when TI signed a letter of intent with Toppan. The sale is expected to be finalized at the end of March.

In addition to serving as a major supplier of photomasks to TI, the new firm, Toppan Printronics (U.S.A.) Inc., will supply other semiconductor manufacturers in North America and Europe. The company will employ TI's current photomask workforce, which totals about 160 people.

The operation is expected to remain in TI facilities for the next two to three years, with any future relocation planned for the Dallas area. When the transaction is concluded, Toppan will own 85 percent of the new company, and TI will have a 15 percent ownership interest.

Kazuo Suzuki, president of Toppan Printing, will be chairman of the new company. Jim Lewis will join Toppan Printronics as president, drawing on his long experience in semiconductor manufacturing at TI.

Toppan Printing Company Ltd., with headquarters in Tokyo, is one of the world's largest printing companies, with 1988 revenues of about $5.6 billion. Toppan initially entered the U.S. semiconductor market in 1979 with an integrated circuit layout design center in Orange County, Calif.

Toppan began supplying locally produced photomasks to semiconductor companies in the United States in 1988. Overall, Toppan has operations in 11 U.S. locations including a multilayer printed wiring board factory in San Diego.

Texas Instruments Inc., with headquarters in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries.

TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems, industrial automation and control systems, electrical controls, metallurgical materials and consumer electronics products.

#90073b0287 03/14/1990 ~Business Wire

BREA, CA (MARCH 15) BUSINESS WIRE - Color Dreams Inc. of Brea, Calif., was formed after the suit between Nintendo and Tengen (Atari Games Corp.) was filed and is an independent developer and publisher of non-infringing Nintendo compatible software games.

Its specific goal was to establish a source of non-infringing games for the Nintendo Entertainment System. Information from the suit enabled Color Dreams Inc. to successfully create software games and game cartridges that do not infringe Nintendo's patents, trademarks and copyrights. After close scrutiny by its own corporate counsel and more than one independent patent counsel, Color Dreams Inc. produced games that are free of infringement.

Color Dreams appears to be the only company producing and licensing technology which permits the creation and sales of non-infringing Nintendo compatible software.

Color Dreams conducted intensive investigation into the patents asserted by Nintendo against Tengen and determined that the Tengen games did, in fact, infringe the Nintendo patents. It therefor elected to use its own independently developed method to totally avoid the Nintendo patents. Although Color Dreams believes that the Nintendo "lock out" patent is invalid and is against public policy, it has not confronted Nintendo by using the patented technology. Hence, although it has distributed six games thus far, it has not been sued by Nintendo.

Color Dreams provides assurance to all its customers that its games are legitimate and free of infringement. This can be done, because the cartridge design was specifically analyzed for patent infringement by more than one patent counsel. The patents involved are the subject of the suit between Tengen and Nintendo. They deal with a "lock-out" chip design used in the cartridges, as well as the physical configuration of the cartrige itself.

The lock-out chip is covered under U.S. Patent No. 4,799,635. The lock-out and key chips use an authenticating program which generate random numbers which are exchanged by those chips. Patent counsel have verified that the method used by Color Dreams does not utilize this technology and it in no way infringes the Nintendo patent.

The outcome of the suit between Nintendo and Tengen has resulted in Color Dreams and the licensees of its technology becoming the only significant independent source of Nintendo compatible games in the United States.

Color Dreams intends to fully exploit its position.

CONTACT: Color Dreams Inc., Brea

SAN FRANCISCO (MARCH 15) BUSINESS WIRE - Sierra Capital Cos., a San Francisco-based sponsor of real estate investment trusts (REITs) Wednesday announced annual independent real estate appraisals and preliminary net assets values for each of its REIT property portfolios at year-end 1989.

Sierra Capital Cos. and its affiliates currently manage approximately $600 million in real estate assets on behalf of 43,000 investors.

 Sierra Capital Realty Trust VIII Co.

Sierra Capital Realty Trust VIII, a finite-life equity REIT with common and preferred shares of stock, still in its property acquisition phase, reports that 1989 appraised value of its real estate portfolio acquired during late 1988 and 1989, totalled $84,331,984, vs. the cost of the property of $83,544,019.

Property values for purchases in 1989 (66 percent of total portfolio) are reflected at acquisition costs. Trust VIII also reports a preliminary Net Asset Value (NAV) of $9.61 per share. The Trust's fully audited financials including final NAV will be available March 31, 1990.

Trust VIII acquired five properties for $55,113,984 in 1989 and one property in 1990 for $10,675,000, bringing the portfolio's total to eight light industrial and retail commercial properties, representing 2.2 million square feet of space. The properties are 97 percent occupied and are located in California, Tennessee, Illinois, Kansas, Nevada, Michigan and Mississippi. Sierra Capital Realty Trust VII Co.

Sierra Caiptal Realty Trust VII, a finite-life equity REIT with common and preferred shares of stock (ASE:SZG and ASE:SZGPr) reports that the 1989 appraised value of its real estate portfolio totalled $144,187,112 vs. the cost of the property of $141,616,924 (including value added capital improvements of $4,613,144).

Trust VII also reports a preliminary net asset value (NAV) of $9.41 per share. The Trust's fully audited financials, including NAV, will be available March 31, 1990.

Trust VII acquired two properties in 1989, bringing the portfolio's total to 15 commercial properties, representing 2.4 million square feet of

space. These light industrial and retail properties are 93 percent occupied and are located in California, Alabama, New Jersey, Washington, Texas, Georgia, Michigan, Nevada and Arkansas. Sierra Capital Realty Trust VI Co.

Sierra Capital Realty Trust VI, a finite-life equity REIT with common and preferred shares of stock (ASE:SZF, SZFPr), reported that the 1989 appraised value of its real estate portfolio totaled $94,554,106, vs. the cost of the property of $86,585,599. Trust VI also reports a preliminary net asset value (NAV) of $8.82 per share.

The trust's fully audited financials, including final NAV, will be available March 31.

Trust VI purchased one property in 1989 bringing the portfolio's total to nine commercial properties, representing 2.2 million square feet of space. These light industrial and retail properties are 96 percent occupied and are located in Illinois, New Jersey, Washington, California, Tennessee, Texas and Alabama. Sierra Capital Realty Trust IV Co.

Sierra Capital Realty Trust IV Co., a finite-life equity REIT with common and preferred shares of stock (ASE:SZD), completed its property acquisition phase in 1988 and reports that 1989 appraised value of its real estate portfolio acquired, totaled $104,705,000, vs. the cost of the property (including value added capital improvements of $453,836) of $102,974,648.

Trust VI also reported a preliminary net asset value of $7.94 per share. The trust's fully audited financials, including final NAV, will be available March 31.

Trust IV's portfolio consists of 17 light industrial and retail properties which are 95 percent occupied and are located in Illinois, California, Arizona, Tennessee, Georgia and Texas, representing approximately 2.6 million square feet of space.

Sierra Real Estate Equity Trust '84, a finite-life equity REIT with common shares of stock (NASDAQ/NMS:SETC), reported that the 1989 appraised value of its real estate portfolio acquired from late 1984 through mid-1985, totalled $71,590,000, vs. the cost of the property (including value added capital improvements of $10,714,100) of $65,222,205. Sierra Capital Realty Trust '84 Co.

Trust '84 also reported a preliminary net asset value (NAV) of $7.44 per share. The trust's fully audited financials, including final NAV, will be available March 31.

Trust '84's portfolio is 90 percent occupied and consists of six light

industrial and retail properties in California and Arizona, representing 1 million square feet of space. Sierra Capital Realty Trust '83

#90073b0347 03/14/1990 ~Business Wire
BOISE, ID (MARCH 15) BUSINESS WIRE - Micron Technology Inc. (NASDAQ/NMS:MCRN) Wednesday reported revenues for the second fiscal quarter of 1990, ended March 1, of $77.5 million, compared with revenues of $113.8 million for the second quarter of fiscal 1989.

Revenues for the first six months of fiscal 1990 totaled $144.0 million, compared with revenues of $224.2 million for the first six months of fiscal 1989.

Nominal net income was realized in both the second quarter and first six months of fiscal 1990, compared with net income of $29.2 million, or 77 cents per share, in the second fiscal quarter of 1989 and net income of $61.4 million, or $1.65 per share, for the first six months of fiscal 1989.

The results for the quarter and six months ended March 1, 1990, reflect the continued effects of downward price pressure on the company's principal products, the ongoing transition to the 1-Meg DRAM and production ramp-up of Fab III.

Despite current market conditions, the company intends to continue its efforts to reach full utilization of its facilities and to accelerate product and process development.

Micron Technology Inc., based in Boise, manufactures and markets DRAMs, SRAMs, VRAMs and memory-intensive and enhancement products for workstations and personal computers. The company's common stock is traded on the over-the-counter market and is quoted on the NASDAQ National Market System under the symbol MCRN.

NEW YORK (MARCH 14) BUSINESS WIRE - Stroock & Stroock & Lavan announced that Michael H. Mobbs, a former assistant director of the U.S. Arms Control and Disarmament Agency (ACDA), has joined the firm's Washington, D.C. office as a partner, effective March 12.

This brings to seven the number of lawyers concentrating in international matters in Washington and to 13 firmwide.

Mobbs, most recently a partner in the Washington D.C. law firm of Feith and Zell, P.C., served as assistant director (strategic programs) of the U.S. Arms Control and Disarmament Agency, with the rank of Assistant Secretary, from 1985 to 1987. There, he had senior policy-making responsibility for all U.S./Soviet negotiations involving nuclear arms and space systems.

Prior to that, Mobbs served as special counsel to the head of the U.S. delegation and as the representative of the Secretary of Defense to the Negotiations on Nuclear and Space Arms in Geneva in 1985.

From 1982 to 1985, he served as the Secretary of Defense's representative and as a member of the delegation to the Strategic Arms Reduction Talks.

Before serving in government, Mobbs was an associate in Stroock's Washington office (1977-1982).

As a part of Stroock's repidly growing international practice, Mobbs will concentrate primarily on international commercial transactions, including all aspects of corporate and administrative law as they relate to international business, and international trade and regulation, including export and import controls.

Stroock/Washington is planning to increase its seven-lawyer international staff to eight shortly, with the addition of an associate, Marek Kaszubski formerly a civil judge in Poland.

A native of Florence, Ala., Mobbs received his undergraduate degree from Yale University, (B.A., 1971), where he graduated summa cum laude with exceptional distinction in Russian studies and was elected to Phi Beta Kappa. He recieved his J.D. degree from the University of Chicago Law School (1974).

Founded in 1876 and headquartered in New York City, Stroock, with 350 lawyers, is among the top 35 law firms in the nation. In addition to New York, the firm has offices in Los Angeles, Miami, Washington, and Budapest.

SCOTTS VALLEY, CA (MARCH 14) BUSINESS WIRE - E-mu Systems Wednesday announced the appointment of Charles Askanas, 54, to president and chief executive officer.

Askanas joins E-mu from Versatec, a Xerox subsidiary specializing in computer graphics systems, where he was president and CEO. Prior to Versatec, Askanas founded Datastream Communications, a data communications company which was acquired by Lee Data in 1985. Askanas subsequently became president of Lee Data.

E-mu Systems, recently recognized by INC magazine as one of America's 500 fastest growing privately-held companies, was founded in 1972, and has been responsible for numerous breakthroughs in the field of electronic musical instruments.

In 1981, the company introduced the first dedicated musical instrument employing ''digital sampling,'' a technique that allows any sound to be recorded into computer memory, then played back from a standard music keyboard or computer control.

E-mu's Proteus, a 16-bit digital sound module that contains the sounds of hundreds of instruments, was recently named by Keyboard magazine as ''technological innovation of the year.'' Proteus' success is responsible for E-mu's current record fiscal year.

E-mu recently entered into a licensing agreement with the multi-billion dollar Matsushita Electric Company Ltd. of Osaka, Japan, which markets its products under the ''Panasonic,'' ''National,'' ''Quasar,'' and ''Technics'' brand names.

Before his presidency at Versatec and Lee Data, Askanas started Quantor Corp., a manufacturer of computer peripherals, which was sold to NCR in 1979. Prior to that, Askanas was at Fairchild Semiconductor from 1962 to 1970 where he advanced from engineer to general manager.

E-mu Systems is an internationally-recognized designer and manufacturer of high-quality instruments with a commitment to the development of breakthrough musical and sound technology. E-mu's instruments offer serious musicians the optimal combination of superior performance capability, accessibility and bottom-line value.

E-mu Systems employs approximately 100 people, and is located at 1600 Green Hills Road, Scotts Valley, Calif., 95066; telephone 408/438-1921. Its wholly owned subsidiary, E-mu Systems Limited, is based in the United Kingdom.

NEW YORK (MARCH 14) BUSINESS WIRE - Metro Mobile CTS Inc. (AMEX:MMZ.A MMZ.B) Wednesday announced that its board intends to declare a 3-for-1 stock split payable as a stock dividend of two shares of Class B common stock for each outstanding share of its Class A or Class B common stock.

The distribution would be subject to certain conditions including amending Metro Mobile's certificate of incorporation to increase the number of shares of Class B common stock that Metro Mobile is authorized to issue and to reduce the par value per share of Class A and Class B common stock from 10 cents per share to 3-1/3 cents per share.

Metro Mobile intends to file preliminary proxy materials Wednesday with the Securities and Exchange Commission for a special meeting of stockholders at which the holders of each class of common stock will vote on the charter amendment. The special meeting is expected to be held by May 24. The charter amendment must be approved at that meeting by each class of stockholders. Metro Mobile's board set April 11 as the record date for stockholders entitled to notice of, and to vote at, that meeting.

The Metro Mobile board will formally declare the stock split-stock dividend and the record date therefor once it knows when the proxy materials will be mailed and what the actual date will be for the stockholders meeting. The distribution is expected to be made the first business day after the special meeting.

The special meeting proxy materials, when final and mailed to Metro Mobile stockholders, will provide specific details regarding the proposed charter amendment and the stock split in the form of a stock dividend.

NEW YORK (MARCH 14) BUSINESS WIRE - Regency Cruises Inc. (NASDAQ/NMS Symbol: SHIP) Tuesday announced revenues and earnings for the fourth quarter and fiscal year 1989.

Revenues for the fourth quarter ended December 31, 1989 were $21,728,000 compared to $18,545,000 for the fourth quarter ended December 31, 1988. The Company posted a net loss of $1,240,000, or $.05 per share compared to a loss of $1,650,000 or $.07 per share recorded in the previous year's fourth quarter.

Revenues for fiscal year ended December 31, 1989 increased to $120,014,000 from $87,738,000 for the year ended December 31, 1988. Income from operations increased to $3,594,000 from $3,311,000 recorded in the previous year. Income Taxes for the year were $2,017,000 as compared to $1,981,000 in 1988.

Net income was $4,222,000 or $.18 per share for the year ended December 31 1989 versus net income of $3,955,000 or $.17 per share for the year ended December 31, 1988.Commenting on the fourth quarter results, William Schanz Chairman and CEO of Regency Cruises Inc., said, ''Passenger occupancy and results of operation were negatively impacted by several events. In September, Hurricane Hugo caused severe damage to many Caribbean islands, including three on our itineraries -- Puerto Rico, St. Thomas and St. Croix. The extent of the damage to St. Croix caused us to cancel all calls to that island indefinitely and demand for cruises including San Juan and St. Thomas dropped sharply. The extensive publicity given to these problems left an unfavorable impression that carried over to all Caribbean destinations. And, while travel to the Caribbean historically

drops in the fall, the downturn was exacerbated by the hurricane, resulting in lower than expected load factors in the fourth quarter.

CALABASAS, CA (MARCH 14) BUSINESS WIRE - Jack Lin, president of National Technical Systems Inc. (NASDAQ:NTSC) announced Wednesday that the company has been awarded a three-year, $2.8 million test-support contract for the U.S. Navy's Weapon Center at China Lake, California.

The contract contributes to the increases in the company's current backlog to $15.6 million from $9.9 million at the end of last year, an increase of 57 percent.

Lin noted that the program involves providing environmental and qualification testing for the Center in support of its development of a wide variety of new weapons programs. Lin said, ''We are very pleased to be selected for this important project, and we are delighted to establish what we hope to be a growing relationship with the U.S. Navy at China Lake.''

China Lake is the largest development center for new weapons systems for the U.S. Navy. Much of the activity on behalf of this contract will occur at the company's Saugus, California, facilities.

Lin said: ''We are pleased that our core business of defense and aerospace, which has grown over 14 percent this last year, will provide a foundation to pursue large-scale integration testing, and continue our penetration of the broader commercial, automotive and nuclear spare parts markets.

''As the complexity of large-scale operating systems continue to increase, we feel that we are in an excellent position to utilize our space age technology to participate in the wide variety of safety and reliability testing that is required for the numerous critical components and systems which comprise these industries.''

National Technical Systems, with operations in California, Virginia, Massachusetts and Michigan, is the largest independent aerospace testing organization in the United States. The company provides testing services to a wide range of industries, principally aerospace, defense,

communications, automotive and nuclear power generation.

SINGAPORE (MARCGH 14) BUSINESS WIRE - Singapore Telecom announced this week that it has purchased a third 5ESS (R) digital gateway switch from AT&T Network Systems.

The contract is valued at $19 million and includes expansion of two existing 5ESS gateway switches. When the third gateway switch is placed in service in November it will expand the number of international circuits from 4,500 to 10,000.

In July, 1988, Singapore Telecom became the first telecommunications authority to use an AT&T 5ESS gateway switch to handle all voice and voice-band data communications with other countries. In early 1989, Singapore installed a second 5ESS gateway switch.

The total value for earlier contracts was about $40 million and included Digital Access and Cross Connect Systems (DACS), associated software for centralized testing and maintenance of international circuits, and a

training center for Telecom's personnel.

The AT&T digital gateway switches enable Singapore Telecom's customers to use advanced communications services and features, contributing to the country's growth as a major regional trade, commercial and financial center.

Services available include toll-free calling from the United States. Singapore Telecom offers the service through AT&T International 800 service, giving Singapore-based companies a U.S. presence without the expense of an overseas office.

Singapore Telecom also uses AT&T's Internat+onal Operator Services Position (IOSP) system, incorporating Integrated Services Digital Network (ISDN) technology.

ISDN combines voice and data over the same line, efficiently delivering network information to operators who work at specially-designed video terminals.

The 5ESS switch is the world's most advanced digital switch. More than 40 million lines of the AT&T 5ESS switch are in service around the world.

#90073b0648 03/14/1990 ~Business Wire

SANTA ANA, CA (MARCH 14) BUSINESS WIRE - EECO Inc. (ASE:EEC) Wednesday said it is engaged in preliminary discussions with a potential buyer regarding the possible sale of part or all of the company's U.S.-based Maxi-Switch division, which manufactures computer keyboards.

If the sale is consummated as currently planned, the division will continue to operate under the Maxi-Switch name. However, no assurance can be given at this time that an agreement will be reached. The EECO Maxi-Switch division has headquarters in Tucson, Ariz., and has a production facility in Caborca, Sonora, Mexico. The company's keyboard operations in the United Kingdom are not part of sale discussions.

The Maxi-Switch division concurrently has undertaken a major restructuring program to reduce costs in order to improve its position in the highly competitive market for computer keyboards. The restructuring will involve the layoff of some personnel.

The company also announced that the company's primary lender has agreed to

an amendment of its credit agreement with the company in which the bank agreed to lend the company up to an additional $500,000. The bank will also extend the maturity of the indebtedness owed under the credit agreement until the earlier of (a) March 31, 1990, (b) the date on which the bank determines that negotiations for sale of the Maxi-Switch division or negotiations for other potential sources of working capital are not proceeding to the bank's satisfaction, or (c) the date on which the bank determines that there has been a default under the credit agreement.

At maturity, the bank could require that EECO repay the entire outstanding amount of its indebtedness.

That requirement would have a material adverse effect on the company's operations. In such event, the company would be forced to immediately attempt to secure other sources of funding, which may not be available due to the company's current financial condition. The company has retained an investment adviser to explore additional sources of working capital and prospective buyers for the Maxi-Switch division.

EECO Inc. manufactures and markets computer keyboards, electronic keypads, electromechanical switches and hotel computer systems worldwide.

BURBANK, CA (MARCH 14) BUSINESS WIRE - Vidcom Post Inc. announced Wednesday that its wholly owned subsidiary, F.J.C. Corp., has acquired substantially all of the assets of Polytel Communications Inc., formerly known as Polycom Group Inc.

The assets include a high-end computer graphics and digital production system that incorporates Harry, Paint Box, Encore and D-1. The purchase price was a combination of cash and stock of Vidcom Post.

The president of Polytel Communications, Joe Hassen, has agreed to join F.J.C.'s staff to be in charge of sales and marketing for the new digital post and graphics department.

Frank Celecia, president of Vidcom Post, and F.J.C., expects that the acquisition of the assets will increase F.J.C.'s ability to service its existing clients and will broaden the base for new clients. The company expects that its new capabilities will increase sales over $1 million annually.

CHATSWORTH, CA (MARCH 14) BUSINESS WIRE - Datametrics Corp. (ASE:DC) announced that the company has been awarded two contracts totaling $8.2 million of a negotiated $13 million contract, the signing of which constitutes the largest single procurement in the company's history.

The contracts, which are with Raytheon and Rockwell International, are for the engineering and production of printers for the U.S. Air Force's MILSTAR Navitgation Program. According to the terms of the contracts, Datametrics will supply 52 units, with signficant production follow-on contracts anticipated.

Sidney E. Wing, president and chief executive officer, said, ''We are extrememly pleased to have been selected to play a role in the implementation of this major program after completing the phase-one development for Raytheon.

''This contract underscores our recognition as the pre-eminent contractor for military high-performance image-processing products and capitalizes on our special expertise in the increasingly important communications, command and control segment of defense.''

Datametrics is a 27-year-old producer of computer peripherals for aerospace, defense and industrial markets. The company's products include mil-spec and ruggedized high-speed, non-impact printers, printer/plotters, teleprinters, high-density cartridge tape recorders, facsimile products and keyboards, all of which meet stringent requirements for operating under extreme variations in temperature, moisture, radiation, vibration and shock.

#90073b0651 03/14/1990 ~Business Wire

NEW YORK (MARCH 14) BUSINESS WIRE - Millicom Inc. (NASDAQ:MILL) announced

Wednesday that its subsidiary, Millicom International Holdings Ltd., has been awarded a license to establish and operate a trunked mobile radio system for the French Riviera.

The license gives Millicom and its partners the exclusive right to provide mobile radio service for France's Mediterranean coast stretching from Nice to Frejus, including Cannes, and covering a population in excess of one million.

This license is one of four announced by the French authorities and is significant because it represents the first issue of competing radio telecommunication licenses in France, under the current government, since the granting of the cellular license for SFR (the second cellular license in France).

Further invitations to tender for other regional trunked mobile radio licenses are likely to be issued later this year.

Trunked mobile radio (known as specialized mobile radio (SMR) in the U.S.) is an inexpensive, private, two-way radio system that offers an efficient method of sharing voice channels and the frequency spectrum, enabling far greater network capacity by on-demand use of the non-dedicated lines.

SMR is particularly well suited to mobile businesses such as taxi and ambulance services because it enables many users to simultaneously communicate on a common frequency.

Millicom's partners in the venture are Matra Communication S.A., the French telecommunications organization and G.T.M.E., a large civil engineering and services company based in the South of France.

Millicom will retain a 34 percent interest in the operation, with Matra Communication holding 51 percent and the remaining 15 percent to be held by G.T.M.E.

Infrastructure equipment costs will be approximately 5 million French Francs and the supplier will be decided by open tender. The system will operate with the MPT 1327 signalling standard and commercial operations will start at the end of 1990.

Millicom Inc. is a diversified international telecommunications company with primary interest in cellular telephone and alphanumeric paging systems.

WALTHAM, MA (MARCH 14) BUSINESS WIRE - Aox Inc., a leading developer of bus master system upgrade boards for IBM's Micro Channel-based PS/2 microcomputers, Wednesday announced an alliance with IBM to further commercialize bus master technology for Micro Channel Architecture.

Under the alliance, Aox will work with IBM to advance Micro Channel product development. The alliance also includes a financial investment by IBM in Aox. Specific terms of the alliance and financial relationship were not announced.

''This alliance creates a powerful team for bus master product development and delivery. Aox's enhanced resources and relationship will enable our expertise in bus mastership to be fully exploited,'' said Brian Vesley, president of Aox.

Dr. Robert L. Carberry, vice president of systems for IBM's Entry Systems Division, said, ''Aox has developed advanced bus master products that offer PS/2 users effective upgrade solutions. Aox has demonstrated the benefits of bus masters and the advanced capabilities of Micro Channel architecture to our customers.''

Aox currently offers the MicroMASTER 386 and 486 bus master system upgrade boards, which enhance the full range of IBM's Micro Channel-based PS/2 family of microcomputers.

The Aox MicroMASTER bus master system upgrade boards are installed into a standard PS/2 slot, upgrading the system to a 386 or 486 level while directing the native 286 or 386 processor to low-level tasks for more efficient computing.

Aox has participated in several joint undertakings with IBM, including ongoing customer marketing at PS/2 forums in 15 cities; Aox product demonstrations at 1988 and 1989 Comdex shows; and other co-marketing activities.

In addition, IBM has ordered a substantial quantity of Aox upgrade boards for internal company use.

STAMFORD, CT (MARCH 14) BUSINESS WIRE - Erbamont N.V. announced Wednesday that it has concluded a License Agreement for CS-622 (Angiotensin Converting Enzyme (ACE) Inhibitor), with Sankyo Co., Ltd., the Japanese pharmaceutical company, which gives Erbamont exclusive rights with Sankyo to develop CS-622, primarily in European countries.

CS-622 is a new, oral ACE Inhibitor developed by Sankyo which has strong pharmacological response and a high level of safety. As a result, it is expected that good clinical efficacy can be confirmed with a very low dose along with a reduced incidence of adverse reactions. Sankyo is currently conducting trials on the drug in Japan.

Erbamont expects to start phase II clinical trials in Europe in a few months in order to file applications with several European countries by 1993-1994. In West Germany, the product will be developed jointly by Erbamont and Sankyo Europe GmbH, a subsidiary of Sankyo.

Erbamont N.V., through its subsidiaries, is a world leader in the discovery, manufacture and sale of anticancer chemotherapeutic drugs. Its ethical drugs, including Adriamycin, are sold in over 120 countries. Adriamycin is the principal ethical pharmaceutical manufactured and sold

by the Erbamont Group and is one of the largest selling anticancer drugs in the United States and Western Europe.

As a result of Erbamont's continuing commitment to improved cancer therapies, a patented anthracycline derivative, Pharmorubicin (epirubicin) has already been approved for sale in a number of countries, including the United Kingdom, Canada and Japan. Idamycin, an analog of Adriamycin, has recently been recommended for approval in the U.S. by the FDA's Oncologic Drugs Advisory Committee.

Erbamont N.V. is part of the Ferruzzi/Montedison Group. Its major business units include Farmitalia Carlo Erba S.r.l., a leading pharmaceutical company in Italy; Antibioticos Farma S.A., a leading pharmaceutical company in Spain; and Erbamont Inc. with its Adria Laboratories Division located in Columbus, Ohio. NEW YORK (MARCH 14) BUSINESS WIRE - In a first-ever arrangement between a televsion syndicator and a basic-cable network, The Nostalgia Channel and LBS Communications Inc. have signed a five-year agreement in which LBS will serve as the Channel's exclusive advertising sales representative, as well as provide marketing support.

The innovative union was announced jointly by Michael E. Marcovsky,

chairman of The Nostalgia Network, and Henry Siegel, chairman and president of LBS Communications.

LBS, pioneers in the practice of target casting (identifying a target audience, developing programming to attract that audience and delivering it to the advertiser), continues to break ground it applying this technique to the cable industry.

The only basic-cable service of its kind, Nostalgia offers a full spectrum of entertainment and lifestyle programming specifically targeted to American adults.

''The Nostalgia audience is affluent, active and hungry for entertaining and informative programming that is relevant to their lifestyles,'' said Marcovsky. ''Our programming will reflect audience demand and we are confident that together with LBS and its extraordinary broadcast-marketing expertise, The Nostalgia Channel will continue to grow and expand.''

The five-year-old Nostalgia Channel currently has more than 8.5 million subscribers nationwide.

Nostalgia will continue to expand its affiliate sales and affiliate marketing services in support of cable operators under Morgan Lambert Howe senior vice president of affiliate sales for Nostalgia.

All creative elements of Nostalgia's marketing and promotion campaigns will be executed by LBS' in-house creative services agency.

COLUMBUS, OH (MARCH 14) BUSINESS WIRE - Buckeye Financial Corp., parent of Buckeye Federal Savings and Loan Association, Wednesday announced earnings of $426,000 or 16 cents per share, for the quarter ended Dec. 31, 1989.

This compares to earnings of $1.402 million, or 51 cents per share, for the fourth quarter of 1988. Earnings during the fourth quarter of 1988 included net gains of $3.7 million from non-recurring items.

Net income was $2.219 million, or 83 cents per share, for the year, an improvement of $1.668 million compared to earnings of $551,000, or 21 cents per share, for 1988.

Buckeye Federal Savings and Loan Association has assets of $928 million

and offers a full array of commercial and consumer lending and deposit products. Buckeye Federal has 18 branch offices in central Ohio and a loan origination office in Cincinnati.

On March 1, 1990, Buckeye signed a definitive agreement to be acquired by National City Corp., parent company of BancOhio National Bank. Completion of the merger, which is subject to approval by regulatory agencies and Buckeye shareholders, is anticipated by the third quarter of 1990. National City is a $23.0 billion financial services company. Its common stock is traded on the New York Stock Exchange under the symbol ''NCC.''

KING OF PRUSSIA, PA (MARCH 14) BUSINESS WIRE - Envirosafe Services Inc. (NASDAQ:ENVI), a leading provider of hazardous waste management services, reported income from continuing operations of $3.1 million, or 81 cents per share, for the year ended Dec. 31, 1989, as compared with $1.9 million or 49 cents per share, in 1988.

The company also announced that its board of directors has approved a contract to sell its remediation business to a new company formed by members of management of the remediation unit for approximately $3.8 million in cash and notes. The sale is subject to customary conditions, including the obtaining of satisfactory financing by the purchaser.

Proceeds of the transaction will be used to fund the company's permitting efforts for new disposal sites in Texas and Pennsylvania and to reduce outstanding debt. The remediation segment is new being reflected in Envirosafe's financial statements as ''discontinued operations''.

Including discontinued operations, 1989 net income was $1.1 million, or 29 cents per share, vs. $2.7 million, or 70 cents per share, in 1988.

Fourth quarter continuing operations produced income of $1.1 million, or 29 cents per share, in 1989, as compared with $520,000, or 14 cents per share, for the last three months of 1988. Including discontinued operations, the company incurred a 1989 fourth quarter net loss of $232,000, or 6 cents per share, vs. net income of $1.2 million, or 32 cents per share, for the last three months of 1988.

1989 full year and fourth quarter results included an after-tax loss provision of $1.3 million for the anticipated divestment of discontinued operations, as well as an after-tax charge to continuing operations of $876,000 for estimated additional closure costs at an inactive disposal

site. Continuing operations for the year ended Dec. 31, 1988 reflected an after-tax charge of $271,000 for the cost of a management restructuring program.

Envirosafe Services provides off-site hazardous waste disposal services. The company owns major hazardous waste disposal sites in Oregon, Ohio and near Grand View, Idaho -- two of the 23 such sites authorized under federal law -- and is seeking to obtain permits for new facilities near Devers, Texas and Narvon, Penn.

Envirosafe Services Inc.
Financial Highlights
(In thousands, except per share data)

Notes:

(a) -- The board of directos has approved a plan whereby the company will divest its remediation and special services business. Accordingly, both periods of 1989 include an after-tax provision for estimated loss on divestment of $1,320,000, and the results of this business are reflected as discontinued operations in all periods.

(b) -- The three-month and 12-month periods of 1989 include an after-tax charge to continuing operations of $876,000 for estimated additional

closure costs at an inactive disposal site.

(c) -- Continuing operations for the 12 months of 1988 include an after-tax charge of $271,000 for the cost of a management restructuring program.

AUSTIN, TX (MARCH 14) BUSINESS WIRE - The Continuum Company Inc. (ASE: CNU) announced the signing of a six year agreement to provide data processing services from its data center in Austin, Texas, for the insurance subsidiaries of Financial Holding Corp., headquartered in Kansas City, Mo.

The customer is currently processing approximately 250,000 policies with Continuum's LIFE/70 and LIFE-COMM products. It is expected that this block of business will be transferred to Continuum's data center by June 1990.

Revenues from the agreement, based on current volumes, should exceed $15 million over the next six years. The customer has an option to terminate the agreement after three years. Ronald C. Carroll, chief executive officer, said, ''We are pleased to have formed this alliance where we will now become Financial Holding Corporation's data center, operating our products as well as their other internal systems.''

The Continuum Company is an international consulting and computer services firm based in Austin, Texas, serving the needs of life insurance and other financial services companies for computer software and services.

#90073b0684 03/14/1990 ~Business Wire

NEW YORK (MARCH 14) BUSINESS WIRE - The Navigators Group Inc. (NASDAQ: NAVG) reported Wednesday that net after tax income for the 12 months ending Dec. 31, 1989, was $9,854,000 compared to $7,637,000 for the year ending Dec. 31, 1988, an increase of 29 percent. On a per share basis, net income was $2.84 compared to $2.20.

Income before taxes included $2,375,000 and $1,022,000 in realized capital gains in 1989 and 1988 respectively. On an after tax basis, these gains added $1,568,000, or 45 cents per share in 1989 and $675,000, or 19 cents per share in 1988 to the group's net after tax income.

For the 1989 year, net written premium was $39,025,000 as constrasted to $41,115,000 the previous year, a decrease of five percent. Net earned premium was $39,097,000 compared to $36,164,000, an increase of eight percent.

Net investment income was $8,419,000 as constrasted to $6,916,000, representing a 22 percent increase. The statutory combined ratio was 95.4 percent for 1989 vs. 93.9 percent for last year.

For the fourth quarter 1989, net after tax income was $2,409,000, or 69 cents per share as compared to $2,201,000, or 64 cents per share, an increase of nine percent.

These results included $406,000 in realized capital gains for the fourth quarter of 1989 and $718,000 for the same period last year. On a per share basis these gains increased net after tax income by eight cents in the fourth quarter of 1989 vs. 14 cents in the fourth quarter of 1988.

Net written premium declined from $11,326,000 to $9,130,000, a 19 percent decrease. Net earned premium for the quarter declined 21 percent from $10,169,000 to $8,017,000, while net investment income increased 15 percent from $1,879,000 in 1988 to $2,162,000 for the fourth quarter of 1989.

The statutory combined ratio for the quartter was 95.1 percent compared to 94.3 percent last year. Shareholders' equity at Dec. 31, 1989 was $62,892,000, an increase of over 19 percent for the year. The company's return on equity increased from 15.7 percent in 1988 to 17 percent for 1989.

"We are extremely pleased with Navigators' record performance," said Terence N. Deeks, chairman of The Navigators Group Inc. "1989 was a very difficult year for the insurance industry. Premium rates remained at depressed levels while the industry was hit with record catastrophe losses."

WESTBORO, MA (MARCH 14) BUSINESS WIRE - Data General Corp. said Wednesday that it has been granted a permanent injunction against Service & Training Inc. (STI) by Judge J. Frederick Motz of the Federal District Court in Baltimore.

The injunction prohibits STI from copying, using or possessing all or any portion of Data General's proprietary MV/ADEX diagnostic software. MV/ADEX diagnostic software is employed by Data General to maintain and repair Data General's MV line of computers. STI is also enjoined from using any diagnostic program derived from MV/ADEX for any purpose.

A summary judgment was also entered in Data General's favor on STI's claim related to MV/ADEX that Data General violated the anti-trust laws. The case was filed by STI in July of 1989. Data General's copyrights ands misappropriated its trade secrets relating to the MV/ADEX diagnostic software.

This is a third case involving Data General's MV/ADEX diagnostic software. In January 1989, the Federal District Court in Boston issued a preliminary injunction against Grumman Systems Support Corp., a unit of Grumman Corp., preventing Grumman from copying, using or possessing Data General's MV/ADEX.

Data General alleges that Grumman infringed Data General's copyrights and misappropriated its trade secrets relating to MV/ADEX diagnostic software. Like STI, Grumman has filed an anti-trust counterclaim related to MV/ADEX.

One week before the Grumman decision, the High Court of Justice in London granted Data General a temporary injunction prohibiting Granada Computer Services (UK) Ltd. from possessing, using or copying the MV/ADEX diagnostic software.

The action brought by Data General Corp. and its wholly owned United Kingdom subsidiary, Data General Ltd., also related to infringement of Data General's copyright in its MV/ADEX diagnostic software. This case was settled with a judgment entered in Data General's favor.

#90073b0692 03/14/1990 ~Business Wire

NORWOOD, MA (MARCH 14) BUSINESS WIRE - Telco Systems Inc. (OTC/NMS:TELC) announced Wednesday that sales for the second quarter of fiscal 1990 increased 25 percent to $23,132,000 compared with $18,553,000 for the same period last year.

Net income for the quarter increased to $1,558,000 or 17 cents per share, compared with $407,000 or 5 cents per share a year ago. Average common and equivalent shares outstanding for the quarter amounted to 9,196,000, compared with 8,452,000 last year. The company's financial condition remained strong with increased cash and short-term investments at quarter end amounting to $18,399,000.

For the six-month period, sales increased 19 percent to $42,269,000, compared with $35,538,000 last year. Net income for six months amounted to $2,648,000, or 29 cents per share, compared with $730,000 or 9 cents per share last year.

Paul Lazay, president and chief executive officer, said second quarter results continued to reflect gains in sales and earnings in both fiber optic transmission equipment and T1 network access products, the company's two business areas.

In the network access products area, second quarter sales increased 60 percent from last year as interexchange carrier demand continued strong for the company's DCB-24 and ROUTE-24 network access multiplexers. In the fiber optic transmission equipment area, sales continued ahead of last year with increased profitability due to improved gross margins and lower operating expenses.

Lazay said Telco has established an important position in the T1 multiplexer market and is focusing on further broadening its market share. Additional distribution channels are being established with original equipment manufacturers (O.E.M.'s) and independent distributors to supplement Telco's present direct sales efforts.

In addition, several important features are being added to its intelligent ROUTE-24 multiplexer and its MUXVIEW network management system. A new CEPT-compatible multiplexer for the U.S. and European markets is also planned for introduction by year end.

In the fiber optic transmission product area, Telco continued to achieve good success in meeting Bell Operating Company (BOC) needs for cost-effective fiber-hubbing products in the local loop. Several BOC customers and other independent telephone companies are presently evaluating our ''FOX'' fiber optic extension system and T-HUB for local loop needs in metropolitan area networks.

BOC investment in the local loop is expected to increase significantly as businesses demand more efficient fiber optic services. During the quarter, Telco introduced its new FOX-2XTra (extended temperature range and alarm) fiber distribution system.

The new system extends the operational performance of the FOX-2 and

greatly reduces the cost of extending fiber-based service to residential and office park customers. Shipments of the new system are planned for the fourth fiscal quarter of 1990.

Lazay said the market outlook for the two telecommunications areas it serves remains good and offers an excellent opportunity for Telco Systems to continue growth in sales and earnings.

Telco Systems Inc., based in Norwood, Mass., designs and manufactures high-speed digital fiber optic transmission terminals, digital multiplexing equipment for telephone and other applications, and access multiplexers for the customer premise T1 market.

ANAHEIM, CA. (MARCH 14) BUSINESS WIRE - TRW Real Estate Information Services (NYSE:TRW) and Mead Data Central Inc. (NYSE:MEA) have reached an agreement whereby TRW's property records from all 58 California counties will be made available on Mead's LEXIS/NEXIS information services.

More than 10 million property records in TRW's data base will be instantly retrievable by subscribers of Mead Data Central's LEXIS/NEXIS information services.

Each record in TRW's data base includes ownership, property tax and sales information, as well as property characteristics such as use codes, zoning square footage, lot size, building age, number of bedrooms and baths, and other information.

''We believe Mead Data Central will be an ideal distributor of our California data base,'' said Edwin Setzer, vice president and general manager of TRW Real Estate Information Services.

''One of their strongest customer bases is the legal community, which is a market we expect will be very interested in the full-text, fully searchable property records,'' he said.

David Berger, vice president and general manager of Legal Information Services for Mead Data Central, said the TRW information will be introduced on-line in the second half of 1990.

Mead Data Central Inc. is the world's largest provider of full-text on-line information services, products and systems to the legal and business markets. The company is a wholly owned subsidiary of the Mead Corp., a leader in forest products. Both parent and subsidiary are headquartered in Dayton, Ohio.

TRW Real Estate Information Services, located in Anaheim, Calif., provides real estate-related information services, products and systems to the title insurance, real estate and financial industries. The company is a division of Cleveland-based TRW Inc.

HOUSTON (MARCH 13) BUSINESS WIRE - Battle Mountain Gold Co. (NYSE:BMG) Wednesday announced that it has purchased for $5 million an option to acquire a 51 percent joint venture interest in Crown Resources Corp.'s gold project near Buckhorn Mountain, Washington.

The project consists of approximately 9,000 acres of land in northeastern Washington state, including the Crown Jewel gold orebody. The Crown Jewel orebody, as currently defined, has been estimated by independent consultants to contain uncut, open pit mineable reserves of approximately 5.5 million tons, containing 580,000 ounces of gold at a grade of 0.106 ounces per ton gold.

BMG Chairman Douglas J. Bourne said the option runs through Jan. 4, 1991. The company would pay an additional $5 million upon the exercise of the option.

In addition, Battle Mountain would be obligated to fund further costs of exploration, evaluation and development of the property through commencement of commercial production to acquire the 51 percent undivided interest. BMG is operator of the project and would expect to construct and manage a facility to treat at least 3,000 tons of ore per day.

The independent engineering firm of James Askew Associates Inc., has estimated that total uncut geologic gold resources on the property are approximately 8.3 million tons grading .102 ounces per ton, or about 840,000 ounces of gold.

To date, only 50 acres of the 2,000 acres of very prospective skarn geology have been drill tested. An aggressive drilling program, detailed metallurgical testing and environmental studies are planned.

Bourne noted that the Crown Jewel orebody, if fully developed, would strengthen the company's North American reserve and production base by the mid 1990s.

Battle Mountain Gold common stock trades on the New York Stock Exchange, the Australian Stock Exchange Limited, the Frankfurt Stock Exchange, the Swiss Stock Exchanges and the Toronto Stock Exchange, under the symbol BMG.

SAN ANTONIO (MARCH 14) BUSINESS WIRE - Datapoint Corp. (NYSE: DPT) Wednesday announced its VISTA/36 system, offering up to 8.7X performance

improvements for existing IBM System/34/36 applications - with minimal conversion effort and no user retraining.

Not only will users be able to avoid an upgrade and preserve their investment in System/34/36 applications and training, but they also have the option of running industry-standard PC applications on the Datapoint VISTA/36 system.

"With the VISTA/36, users of an IBM System/3x who have run out of storage space or performance no longer face the prospect of an expensive, difficult conversion to an IBM AS/400," noted Jean F. Raffestin, Datapoint's director of special projects. "With VISTA/36's automatic system generation software, it's possible to have a new system up and running in about an hour."

VISTA/36 uses an innovative approach to replicating - and greatly enhancing - the System/34/36 environment. Instead of all applications running in a multi-user, shared-logic minicomputer, supporting dumb terminals at the users' desks, VISTA/36 uses PC-based "diskless-workstations" connected to a file server on an ARCNET (Attached Resource Computer) local area network.

#90073b0728 03/14/1990 ~Business Wire

EAST HARTFORD, CT (MARCH 14) BUSINESS WIRE - Lufthansa, the West German national airline, has chosen the V2500 engine to power its new fleet of Airbus A321s.

The airline has placed an order for 20 aircraft with an option on a further 20 with the first deliveries in 1994. The powerplants and spare engines will be worth over US$500 million.

Lufthansa, one of the world's premier airlines, undertook a full technical and economic evaluation of the competing powerplants for the A321 before selecting the V2500.

''We believe that the V2500 is an excellent machine, it is technically, operationally and environmentally the best engine on the A321,'' said Nick Tomassetti, president of International Aero Engines (IAE). ''The V2500 uses less fuel to produce the thrust the A321 requires, it is reliable, extremely quiet and has very low levels of pollution.''

Dick Nelson, VP Marketing at IAE commented, ''Lufthansa is one of the most respected airlines in the world. For them to have completed a detailed technical evaluation and selected the V2500 is praise indeed and a

justification for all the work that IAE and its shareholders have put in to make the V2500 program a success.''

Lufthansa will be the first airline to fly the A321 powered by the V2500. Lufthansa's decision brings the V2500 order book to 1,300 engines valued at more than US$6.5 billion. These engines will power 555 aircraft (86 A321s, 229 A320s and 240 McDonnell Douglas MD90s) which are firmly ordered or optioned by 14 customers.

IAE is a five-nation consortium managing the V2500 program on behalf of its shareholders - Pratt & Whitney (a division of United Technologies Corporation) of the USA; Rolls-Royce of Great Britain; Japanese Aero Engines Corporation; MTU of West Germany and Fiat Aviazione of Italy.

The V2500 was certificated by the Federal Aviation Administration in June 1988. The Airbus A320 with the new engines entered service in May last year. Since then, the V2500s have completed more than 35,000 hours of airline service.

NORRISTOWN, PA (MARCH 14) BUSINESS WIRE - General Devices Inc. (NASDAQ: GDIC), an international engineering service and temporary help company located in Norristown, announced Wednesday the settlement of the six year EPA litigation concerning the GDI owned King of Prussia, Pa., site.

The settlement agreement is with Ciba-Geigy and other responsible generators, who had previously agreed with the federal court to be responsible for the complete costs of the cleanup.

The settlement satisfies GDI's liability to the settling generator defendants for all contribution cost incurred in the past present, and future.

The settlement completely releases GDI from additional cleanup costs and responsibility. Terms of the agreement provide for a $250,000 payment over a 30 month period which can be reduced to $150,000 by an early payment before Feb. 1, 1991.

GDI intends to make the earlier payment and lower the settlement cost. GDI's insurance carrier contributed $35,000 toward the settlement cost.

The net settlement cost of $115,000 will be capitalized into the cost of the land pending an appraisal of the 5.7 acre site.

Theodore A. Raymond, president and CEO, said today, ''We are pleased and relieved that after six years of litigation GDI has settled this issue without serious injury to the company.''

HUNT VALLEY, MD (MARCH 14) BUSINESS WIRE - McCormick & Co. Inc. (NASDAQ:MCCRK), Wednesday reported a 35 percent increase in earnings per share from food and packaging operations for 1990's first quarter, ended Feb. 28.

Earnings per share increased to 23 cents ($9.9 million) from 17 cents ($7.5 million).

Net sales were $301 million, an eight percent increase over the $278 million reported for the same period last year.

Commented Charles P. McCormick Jr., chairman of the board and chief executive officer, ''The first quarter resulted in improved profitability and returns on our continuing businesses. Our consumer and industrial products businesses experienced a strong quarter. The recently announced joint venture with Rudolf Wild of Heidelburg, West Germany, increases our ability to distribute and sell fruit flavors in the U.S. market. We continue to focus on international operations and our commitment to improved global performance.

''Margins continued to improve during the first quarter, and we are pursuing strategies to strengthen further our food and packaging operations. Overall, the quarter met out expectations, and we are confident that 1990 will be another successful year.''

MIAMI (MARCH 14) BUSINESS WIRE - General Development Corp.'s board of directors announced Wednesday that it has elected Charles J. Simons as chairman and president of the Miami based community development firm.

Simons last week was named chairman of the company's Executive Committee and chief executive officer. Simons formerly was vice chairman and executive vice president of Eastern Airlines. He has been a member of General Development's board of directors since the company went public in 1985.

The board of directors also announced that the company's former chairman, David F. Brown and the former President Robert F. Ehrling have resigned as directors and officers of the company. Brown and Ehrling had announced last week they were relinquishing their operating responsibilities.

The board of directors also announced that Charles M. Andolsek, senior vice president and chief financial officer of General Development has been elected a director of the company. Andolsek joined the company in February and was previously executive vice president and chief financial officer of Vintners International Co. Inc. in New York.

BELTSVILLE, MD (MARCH 14) BUSINESS WIRE - John Hanson Savings Bank, F.S.B. Wednesday announced the recent opening of its computer recovery ''hotsite''.

John Hanson's new disaster recovery center is designed to assist those institutions with Unysis hardware to manage their operation's costs. The center is a fully dedicated, disaster back-up facility staffed 24 hours a day.

The center, opened in January, has already signed two clients and is currently negotiating with three more.

''We expect that, with the size of our facility and the experience of our staff, we should be able to provide disaster recovery services to between 30 and 40 institutions quite comfortably,'' said Arthur Hooper, senior vice president of information and administrative services for the bank.

''Our center is centrally located in the Northeastern Corridor and is ideally suited to those clients interested in working with a facility that is federally examined on a yearly basis,'' he said.

John Hanson Savings Bank, F.S.B., has 15 branch offices and is headquartered in Beltsville. The bank's stock is traded on the National Association of Securities Dealers' Automated Quotation (NASDAQ) National Market System under the symbol ''JHSL''.

NANUET, NY (MARCH 14) BUSINESS WIRE - Executive TeleCard Ltd. (NASDAQ:EXTL; PHLX:XTL) announced Wednesday an agreement with Hickory Travel Systems Inc. for the distribution of the World Direct calling card.

The World Direct calling card is available from every telephone in 45 countries back to the U.S., within the U.S., and from the U.S. to everywhere in the world. Calls will be charged to any major credit card.

Operators are available to connect calls in 6 foreign languages. In addition, the World Direct calling card enables a caller to leave a one minute message in their own voice and have the message delivered every 15

minutes for four hours. A number of other enhancements will be announced when the World Direct card is distributed in late March.

Hickory Travel Systems is a $3.5 billion, Saddle Brook, N.J. based corporate travel agency network with members throughout the world. Its purpose is to give associated travel agencies a competitive edge in acquiring and retaining business in the highly volitile travel industry while maintaining their independence and local identity.

Hickory is one of the largest corporate travel consortia with a network of 61 member agencies, maintaining more than 500 offices worldwide.

L. William Chiles, president and chief executive officer of Hickory Travel Systems said that ''the World Direct calling card will eliminate the need for travelers to carry pockets full of foreign coins or pay inflated hotel surcharges for phone calls. Making sure our clients know about this service, which saves them money and makes their lives easier, is part of the superior customer service for which Hickory Travel Systems prides itself.

''This is the kind of program which makes us true travel management consultants. Hickory Travel Systems agencies know that their job does not end when their clients walk out the door, ticket in hand.''

Robert Roach, president of Executive TeleCard Ltd., said that ''he was excited about the addition of Hickory Travel Systems and their member agencies to the World Direct calling card program, and the opportunity to provide their customers with an efficient and economical method of making international telephone calls from any telephone.''

PISCATAWAY, NJ (MARCH 14) BUSINESS WIRE - Unitronix Corp. (NASDAQ:UTRX) announced Wednesday the signing of a distribution agreement with Advanced Computer Systems - a division of Wyse Technology.

Under the terms of the agreement, Unitronix Corp. becomes the distributor for the Metropolitan New York region. Unitronix is one of five value-added resellers (VARS) selected nationwide to market Wyse's new Series 5000i and Series 9000i multiuser UNIX computers and peripherals.

Wyse is one of the largest independent sellers of ASCII terminals and personal computers.

Frank Zimmer, president, said, ''The terms of this agreement, which provide for protected marketing rights in the Metro New York, New Jersey, Pennsylvania and Delaware, provide Unitronix with an important addition to our distribution line, which already include NCR Corp. and Unisys.

''The Series 5000i and high performance Series 9000i, the flagship of the new Wyse line, offers configurations that will range in price from $35,000 to $200,000. These machines form the basis for a new strategy for WYSE, now seeking to enter the multiuser market in the rapidly expanding supermicrocomputer market.''

Unitronix Corp. distributes computer equipment and markets the PRAXA proprietary application software, for manufacturing and distribution companies.

NEPTUNE BEACH, FL (MARCH 14) BUSINESS WIRE - Family Steak Houses of Florida Inc. (NASDAQ:RYFL), Wednesday reported revenues and earnings for the fourth quarter of 1989 and for the 12 month period ended Jan. 3.

Fourth quarter 1989 sales rose 21.4 percent to $11,370,900 from $9,365,800 for the like period in 1988. Earnings from operations, which exclude revenues from sources other than sales and interest expense, for the fourth quarter 1989 decreased 27.0 percent to $730,700, from $1,011,500 for the fourth quarter of 1988.

Net earnings for the fourth quarter were $116,200 compared to $354,000 for the like period in 1988, a decrease of 67.2 percent. Net earnings per share for the quarter were one cent on 10,792,000 shares, compared to three cents on 10,774,000 shares for the like period in 1988.

For the 12 months ended Jan. 3, sales increased 35.7 percent to $45,771,600 from $33,731,000 for the comparable period in 1988. Earnings from operations for the 1989 fiscal year increaseed 17.6 percent to $4,036,600 from $3,433,500 for the 1988 fiscal year.

Earnings for the year, before the effect of a change in accounting for deferred income taxes, were $1,056,900, compared to $1,533,000 for 1988, a 31.1 percent decrease.

Net earnings for the year were $1,056,900 compared to $1,679,500 for the like period a year earlier, a 37.1 percent decrease. Earnings per share, before the effect of the change in accounting for deferred income taxes, were 10 cents on 10,804,000 shares, compared to 14 cents on 10,833,000 shares for the comparable period in 1988.

Net earnings per share decreased 37.5 percent to 10 cents, from 16 cents for the comparable period in 1988.

Included in net earnings were the impact of two unusual events that occurred during the fourth quarter. Durning the fourth quarter the company had an after-tax gain of $146,800 from the sale of land and a one-time after-tax expense of $53,000 for financial and investment banking services.

Eddie L. Ervin Jr., president and chairman of the board of Family Steak Houses of Florida Inc. said, ''While we are pleased with the revenue increase generated by our adding four restaurants during 1989, we are obviously displeased with the decline in both earnings from operations and net earnings.

''The earnings decline resulted primarily from a decrease in sales in restaurants opened prior to 1989 and a substantial increase in interest expense.''

Fourth quarter 1989 earnings were also negatively impacted by a $83,600 after-tax loss in the Rustic Inn Joint Venture, which arose primarily as a result of expenses incurred in opening and operating losses of a new Rustic Inn in Orlando in November 1989.

Ervin continued, ''We attribute the decline in sales to increased competition in the restaurant industry and, at least with respect to the fourth quarter, in part to the impact of severe winter weather in Florida during Christmas week that required some of our restaurants to close and made it difficult for our customers to dine out during what is normally a busy period.

''Our net earnings were further eroded by substantial increases in interest expense - a $159,400 increase for the fourth quarter and

$1,462,300 increase for the year. This increased interest expense was the result of our increased borrowing that was used to finance growth and of an increase in interest rates. We are focusing on all of these problem areas.

''For example, we have structured our construction schedule so that we do not anticipate borrowing any additional funds during 1990 to meet our expansion plans for a total of three new restaurants this year.''

Ervin also stated that, ''Family continues to work with its investment banking firm, PaineWebber Inc., to determine the extent of any interest of third parties in acquiring Family. PaineWebber is continuing its discussions with parties that have expressed interest in the Company. It should be understood, however, that no decision has been made concerning whether Family should or would be sold.''

The company owns and operates 25 Ryan's Family Steak House Restaurants in Florida, as the exclusive Florida franchisee of Ryan's Family Steak Houses Inc. of Greer, S.C.

MIAMI (MARCH 14) BUSINESS WIRE - Cruise America Inc. (AMEX:RVR) Wednesday announced revenues of $10,099,000 for the third quarter ended Jan. 31, a 15 percent increase over the $8,783,000 for the like period a year ago.

Revenues for the nine months ended Jan. 31 increased 11 percent to $55,618,000 from $50,159,000 a year earlier.

Leading the growth in revenues was rental vehicle sales (sales of vehicles retired from the rental fleet) which increased 29 percent to $5,299,000 from $4,120,000 a year ago. Creative marketing and aggressive pricing was the driving force behind the increased volume.

Rental vehicle sales for the nine months ended Jan. 31 were $17,812,000

compared to $11,537,000 for the nine months ended Jan. 31, 1989, a 54 percent increase.

Rental revenue increased 10 percent to $3,778,000 for the quarter ended Jan. 31 from $3,425,000 in 1989. The rental revenue increase was accomplished because of a concerted effort to increase market share during the off season. Rental revenue for the nine months ended Jan. 31 increased 14 percent to $33,751,000 from $32,533,000 a year ago.

Sales and service continued its decline reflecting an industry-wide slowdown in new vehicle sales due to high interest rates, uncertainty about the economy and high consumer debt levels. Sales and service for the quarter was $1,022,000, a 17 percent decrease from the $1,238,000 for the quarter ended Jan. 31, 1989.

Sales and service for the nine months ended Jan. 31 was $4,055,000, down 33 percent from $6,089,000 for the nine months ended Jan. 31, 1989.

The company announced a seasonal net loss for the quarter ended Jan. 31 of $3,169,000, or 57 cents per share compared to a net loss of $5,387,000, or 97 cents per share for the quarter ended Jan. 31, 1989.

A pretax charge of $4,092,000 for a contested liability was booked in the quarter ended Jan. 31, 1989. The company's pretax loss excluding the unusual or infrequent item were $4,396,000 for the quarter ended Jan. 31, compared to $4,561,000 for the like period a year ago, a four percent improvement.

The company reported net earnings for the nine months ended Jan. 31 of $1,194,000, or 22 cents per share compared to a net loss of $958,000, or 17 cents per share.

Commenting on the company's third quarter results, Robert A. Smalley, chairman stated, ''Our continued success selling rental vehicles retired from our fleet at a time when industry sales are in a slump underscores our commitment to offer the most current rental fleet to our customers.

''Improvements were seen this quarter in profit margins and reductions in expenses were achieved. Although sales and service is expected to remain slow for the next several quarters, rental revenue and rental vehicle sales should grow for the foreseeable future.''

The company's business is seasonal, with profits in the first and second quarters and losses in the third and fourth quarters. The driving force behind the seasonality is the rental business which peaks in the summer when the majority of families take vacations.

Cruise America Inc. is the largest company in North America specializing

in the rental and sale of recreational vehicles.

SOUTHAMPTON, NY (MARCH 14) BUSINESS WIRE - John F. Kidd, president and chief executive officer of Hamptons Bancshares Inc., announced Wednesday that the organization had adjusted its 1989 year end earnings from $900,404 to $440,404, and that the 1989 earnings per share was consequently adjusted from $1.09 to 54 cents.

According to Kidd, recent joint consultation with the company's outside auditors and federal regulators indicated that added provisions for reserve for loan losses and loan charge offs were prudent at this time. He emphasized that the additional provisions did not reflect any significant new situations not previously identified but merely accelerated actions expected to have been taken later in 1990.

Hamptons Bancshares Inc. is traded on the NASDAQ National Market under the symbol ''HBSI''. A one bank holding company, Bancshares owns the Bank of the Hamptons N.A., a commercial bank with seven branches on Long Island's South Fork. The company has received approval for two additional branches in Westhampton Beach and Bohemia, N.Y., and expects to open both in 1990.

The company has three other subsidiaries, Leasehampton Corp., Hamptons Mortgage Corp. and the Appraisal Center Inc.

ST. LOUIS (MARCH 14) BUSINESS WIRE - The King of Beers has added to its court.

Anheuser-Busch Inc. (NYSE:BUD), brewer of Budweiser, the top-selling beer in the world, announced Wednesday the national rollout of the newest member of the Budweiser ''family,'' Bud Dry.

Bud Dry, the company's first premium-priced dry beer, will be available to consumers across the United States beginning April 2. Bud Dry is currently distributed in Texas, Washington, Oregon and Colorado, as well as original test-market cities Minneapolis St. Paul and Sacramento.

''Bud Dry has achieved an average market share of 2.5 percent in the limited time it has been available in our test cities and early rollout markets,'' said Bud Dry Senior Brand Manager August A. Busch IV. ''That's a very encouraging acceptance level, and it dictated that we make Bud Dry available nationally.''

''In addition to its unique taste, we think Bud Dry benefits from the power of its affiliation with the best-selling beer in the world, as well as the strength of the dry beer category,'' Busch said.

''Finally, we think consumers have discovered that Bud Dry has an exceptionally low calorie content for a 'regular-strength' beer.''

A 12-ounce serving of Bud Dry contains approximately 4.9 percent alcohol by volume and 130 calories. The calorie content of other non-light beers typically ranges from 145 to 160.

In the century-old tradition of its namesake, Bud Dry is brewed using only the finest natural ingredients. Bud Dry is cold filtered for smooth draft taste, and because it is brewed using Anheuser-Busch's unique DryBrew+ method, Bud Dry has no aftertaste.

Bud Dry is the third member of the Budweiser ''family'' of beers. Budweiser, the world's best-selling beer, was introduced in 1876 as America's first national beer brand. Bud Light, the third-largest selling beer in the United States, was rolled out in 1982.

Bud Dry was introduced into six test markets in April 1989: Austin, Midland/Odessa and Corpus Christi, Texas; Spokane, Wash.; Sacramento, Calif.; and Minneapolis/St. Paul.

Distribution was expanded throughout the states of Texas, Washington and Oregon in July of 1989, and in Colorado in September. A variety of national and local advertising will support Bud Dry's national rollout. DDB Needham Worldwide of Chicago is the advertising agency for Bud Dry. Sosa and Associates of San Antonio is the Hispanic ad agency for Bud Dry.

In addition to the Budweiser family of beers, Anheuser-Busch brews Michelob Dry, Michelob, Michelob Light, Michelob Classic Dark, Anheuser Marzen, Busch, Busch Light, Natural Light, and LA beers, O'Doul's non-alcoholic brew, and King Cobra Malt Liquor. The company also distributes Carlsberg, Carlsberg Light and Elephant Malt Liquor, imported from Denmark.

TAMPA, FL. (MARCH 14) BUSINESS WIRE - Eastern Environmental Services Inc. (NASDAQ:EESI) Wednesday announced that its wholly-owned laboratory subsidiary has opened an office in Manassas, Va. to serve the asbestos abatement industry in Maryland, Virginia, Washington and North Carolina.

The Virginia location was selected because the laboratory subsidiary has experienced a 400 percent increase in sales in the Mid-Atlantic region over the last six months. Randall W. Skuba, EESI's president, stated that he anticipates the new office will expand EESI's market share in the Mid-Atlantic region.

EESI is an established environmental company serving the asbestos abatement industry with subsidiaries engaged in asbestos removal, landfill operations, laboratory services, and waste hauling throughout the Northeast, Mid-Atlantic and Midwest United States.

BURLINGTON, MA (MARCH 14) BUSINESS WIRE - Dynatech Corp. (NASDAQ:DYTC) Wednesday announced that its board of directors has amended its shareholder rights plan, which was initially adopted in February 1989.

The terms of the rights plan have been modified so that the rights will separate from Dynatech's common stock and become exercisable after a person acquires beneficial ownership of, or makes a tender offer that would result in ownership of, 15 percent or more of Dynatech's common stock, rather than 20 percent as previously stipulated.

A new provision has also been added which would cause the rights to separate from the Dynatech common stock and become exercisable should the board of directors determine that a person who holds 10 percent or more of Dynatech's common stock intends to, or is likely to act in a manner adverse to, the interests of Dynatech and its shareholders.

A further amendment provides that, under certain circumstances and at the option of the board of directors, Dynatech may exchange each right for Dynatech common or preferred stock.

With reported fiscal 1989 sales of $400 million, Dynatech Corp. is a diversified high technology company supplying products and systems to a range of niches in the communications, scientific, automotive, aviation and medical markets. Headquartered in Burlington, Dynatech sells its

products worldwide through subsidiaries located throughout North America, Europe and Asia.

CINCINNATI (MARCH 14) BUSINESS WIRE - Manhattan National (NYSE:MLC) Wednesday announced fourth quarter and 1989 financial results for the Cincinnati-based insurance, investment and pension services holding company.

Fourth quarter consolidated net loss was $1,324,000, or 16 cents per share compared with income of $18,000, having no per share impact, for the final quarter of 1988.

For the year ended Dec. 31, 1989, consolidated net operating loss was $2,768,000, or 33 cents per share compared with income of $1,014,000, or 12 cents per share, in the prior year.

Consolidated net loss for 1989 was $2,768,000, or 33 cents per share, compared with income of $1,051,000, or 12 cents in the same period last year.

Results for the fourth quarter 1989 included nonrecurring charges aggregating $1,635,000 on an after tax basis comprised primarily of a realized loss of $1,440,000 on the sale of Manhattan National Life Insurance Co. and $1,801,000 ($149,000 after tax and policyholders' share) in transition costs in the life insurance division.

Total revenue for the quarter ended Dec. 31, 1989 was $33,469,000, compared with $38,291,000 for the same period a year earlier. Insurance revenues of $13,248,000 were relatively unchanged from the same period a year ago.

Total assets of Manhattan National Corp. declined to $682,668,000 as of Dec. 31, 1989, from $960,885,000 on Dec. 31, 1988; $213,215,000 of the decrease was attributable to the sale of Manhattan National Life Insurance Co. Shareholders' equity decreased $2,813,000 during 1989 to $77,557,000, or $9.16 per share, based on 8,465,000 shares outstanding at year-end.

Commenting on financial results, Larry R. Pike, chairman of the board, president and CEO of Manhattan National Corp. stated, ''The year just closed and the one beginning has been a very eventful time for our company. The self tender for the two million shares was successfully completed and had the effect of increasing shareholder book value per

share to $9.72 from $9.16, based upon year end values. With the sale of Manhattan National Life Insurance Company, the company may now concentrate its life insurance activity in the Manhattan Life Insurance Company.''

Manhattan National Corp. is a holding company with major subsidiaries in life insurance, investment services and pension administration services.

CINCINNATI (MARCH 14) BUSINESS WIRE - Cincinatti Microwave Inc. (NASDAQ:CNMW) Wednesday announced that it has acquired approximately 10 percent of the stock of Cellular Data Inc., a privately held, development-stage company, for $2 million.

In addition, James L. Jaeger, Cincinnati Microwave's chairman, has acquired approximately 5 percent of the stock of Cellualr Data Inc. for $1 million. Cellular Data Inc. has pending patent applications relating to a technology which, if successful, would permit the transmission of data over the cellular telephone systems without using any voice-channel capacity.

The technology would serve a wide range of data transmission applications, including credit card verification, monitoring services, and home and office terminals, more quickly and more economically than alternatives. The company is currently working under contract to develop remote cellular transceiver units to be used in testing the efficiency of the Cellular Data Inc. technology in actual cellular telephone networks.

The company also announced that Paul M. Allen, a vice president active in its Radar Division, will be leaving the company to start a marketing and product development business. As a consultant, Allen will continue to advise the company on marketing and product development relating to radar warning receivers and will report to John D. Horning, general manager of the Radar Division.

Cincinnati Microwave Inc. and its subsidiaries manufacture and market a variety of electronic products. Cincinnati Microwave Inc.'s common shares are traded in the NASDAQ National Market System under the symbol CNMW. For additional information please contact Shareholder Relations, Cincinnati Microwave Inc., One Microwave Plaza, Cincinnatti, Ohio 45249, 513/489-5400.

	12/31/89	12/31/88	12/31/89	12/31/88
Revenues	$6,869,000	$ 7,641,000	$29,262,000	$31,299,000
Income (loss) from operations before provision for income taxes and cumulative effect of accounting change/a/b	$1,760,000	$(2,236,000)	$ 5,758,000	$(2,688,000)
Net income (loss) before cumulative effect of accounting change/a/b/c	$1,050,000	$(3,065,000)	$ 3,414,000	$(3,322,000)
Net income (loss) /a/b/c	$1,359,000	$(3,065,000)	$ 3,723,000	$(3,322,000)
Income (loss) per common equivalent share before cumulative effect of accounting change	4 cents	(95 cents)	14 cents	$ (1.96)
Income (loss) per common equivalent share	5 cents	(95 cents)	15 cents	$ (1.96)
Average of common equivalent shares outstanding			24,059,000	1,699,000

	Year Ended	
	12/31/89	12/31/88
Current assets	$25,172,000	$17,621,000
Property plant & equipment	72,992,000	62,278,000
Other assets	1,072,000	6,475,000
Total assets	$99,240,000	$86,374,000
Current liabilities	$ 6,139,000	$11,429,000
Long-term obligations	21,960,000	32,142,000
Stockholders' equity/d	71,141,000	42,803,000
Total liabilities & stockholders' equity	$99,240,000	$86,374,000

(a) Income (loss) before provision for income taxes and net income (loss) for the fourth quarter and year ended Dec. 31, 1988, includes a one time non-cash charge of $4,309,000 relating to debt conversion expense with respect to Financial Accounting Standard Board Statement No. 84.

(b) The company changed its accounting method for gas imbalences from the sales method to the entitlement method in the fourth quarter of 1989.

(c) Includes the effect of a non-cash charge to operations of $870,000 and $2,370,000 for the three months ended Dec. 31, 1989, and for the year ended Dec. 31, 1989, respectively, for a provision in lieu of income taxes for financial reporting purposes only. Because of the company's quasi-reorganization in 1986, the offset to such charge is to increase paid-in capital.

(d) The stockholders' equity of the company increased $28,338,000 during 1989, resulting from (1) the receipt of $21,230,000, net of expense, from the company's common stock rights offering, (2) adjustments relating to restatement of assets and liabilities of $1,015,000 and (3) the operations of the company of $6,093,000, including the benefit of $2,370,000 relating to provision in lieu of income taxes as a result of the company's quasi-reorganization in 1986.

NASHVILLE, TN (MARCH 14) BUSINESS WIRE - Saturn Corp. announced Wednesday that Nelson E. Bowers II has been awarded the Saturn franchise for the Nashville/Middle Tennessee Marketing area, succeeding Lee A. Beaman.

Beaman, who has made a significant contribution to Saturn through the critical development stage of the company and in developing marketing plans for the Nashville area, will concentrate on other family business interests.

''Now I can focus my attention on our existing Beaman dealerships, the development of the auto park at Hickory Hollow, and my family's Pepsi-Cola and Seven-Up businesses,'' Beaman said.

''This is beneficial to both parties,'' Beaman added. ''Nelson Bowers wants to invest in the Saturn business in middle Tennessee because it expands his Saturn franchise area so he can benefit from economy of scale and be even more competitive in the marketplace.''

Bowers, a Nashville native who resides in Chattanooga, Tenn. already has the Saturn franchise for the Chattanooga area. He also operates several other dealerships and businesses in east Tennessee.

''I feel Saturn represents a significant business opportunity, and I think Nashville and middle Tennessee is an outstanding growth market,'' Bowers said. ''Our first two sites for Saturn dealerships here will be near Rivergate and another in the auto park at Hickory Hollow.''

Bowers said that he had purchased from Beaman a three-acre site for a Saturn location in the Mid-South Auto Show at Hickory Hollow. Terms of the transaction were not disclosed.

WASHINGTON (MARCH 14) COMTEX - The 8-K report filed at the SEC shows in a letter dated March 2, 1990, the auditors of Arthur Young & Co. resigned from their employ as the independent accountants of Faircom Inc. In the letter, they stated that their status of independence was compromised by

Faircom's failure to pay pay fees for previous work done by the firm.

For both of Faircom's two most recent fiscal years, ended Dec. 31, 1989 and 1988, Arthur Young included an explanatory paragraph stating their doubts as to the ability of Faircom to continue as a going concern.

For the previous two years, audits performed by Arthur Young were not modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

WASHINGTON (MARCH 14) COMTEX - The 8-K report filed at the SEC shows on Feb. 16, 1990, Dale Hubbard, Pamela Jo Hubbard and Robert Baker were elected by shareholders at a special shareholders meeting to serve as the company's directors. At that same meeting, stockholders voted to change the company name to Gemini Marketing Inc.

Previously, on Dec. 4, 1989, Dale Hubbard entered an agreement with American Holdings whereby Dale Hubbard agreed to make filings required by the company and to put forth his "best efforts" to build value into American Holdings. In exchange, for the sum of one dollar, Hubbard received 11.875 million shares of American Holdings. Upon completion of the agreement, Hubbard would own 36.5% of the company's stock.

As of Feb. 28, 1990, American Holdings Inc. and Gemini Marketing Inc., a Washington corporation, were negotiating a transaction that would bring American Holdings into the business of marketing public domain computer software. Dale Hubbard's status as president of both Gemini and American Holdings presents a potential conflict of interest.

On Jan. 21 and 22, 1990, respectively, Steve Shelgren and Clavin Tadema resigned from American Holding's board. On Dec. 4, 1989, both Clifford Tadema and Bill Lynch declined to stand for reelection to the company's board.

The executive office of American Holdings is located at 200 1st Avenue, Duvall, WA 98019-0640, and its telephone number is (206) 746-7671.

WASHINGTON (MARCH 14) COMTEX - The 8-K report filed at the SEC shows on Feb. 26, 1990, Daine Industries Inc. acquired substantially all business and assets of Lite King Corp. Those assets include operating equipment,

facilities, inventory, accounts receivable, and a non-compete agreement with the shareholders of Lite King.

Daine Industries paid $740,000, plus an agreement to engage the principal shareholder and president of Lite King as a consultant to Daine for six months for aggregate fees of $36,000.

Lite King will become a wholly owned subsidiary of Daine Industries via the merger. Through an employement contract running through Dec. 31, 1995, Arthur Seidenfeld will become president and CEO of that subsidiary. Mr. Seidenfeld is currently president and CEO of Daine Industries.

Lite King is engaged in the business of manufacturing and assembling wire harnesses, cord sets and lampholders. No material relationship existed between the two companies prior to the sale.

The executive office of Daine Industries is located at 461 Beach 124th Street, Belle Harbor, NY 11694, and its telephone number is (718) 474-6568.

WASHINGTON (MARCH 14) COMTEX - The 8-K report filed at the SEC shows on Feb. 22, 1990, Republic Waste Industries acquired all issued and outstanding shares of Russ Fetrow Engineering through its wholly owned subsidiary, Republic Acquisition Corp. The previous sole shareholders of Russ Fetrow, Russell H. Fetrow, Jr. and Sharyn K. Fetrow, received an aggregate 816,250 shares of Republic Waste class A common stock in exchange for their company.

Russ Fetrow, based in Salem Oregon, is an integrated civil engineering and geologic consulting firm that specializes in landfill design, waste source reduction, recycling, and waste-to-energy efforts. Russ Fetrow became a wholly-owned subsidiary of Republic Waste upon completion of the merger.

The executive office of Republic Waste is located at 11032 Quail Creek Road, Suite 200, Oklahoma City, OK 73120, and its telephone number is (405) 752-5050.

WASHINGTON (MARCH 14) COMTEX - The 8-K report filed at the SEC shows on Feb. 22, 1990, the three sole shareholder of Action Mining Services Inc., Jim V. Humble, Michael C. Glenn and Nancy Glenn, received, in aggregate, 1.5 million shares of Norsul Oil & Mining common stock. This was in exchange for all outstanding stock of Action Mining Services. Norsul common stock was previously unissued.

Action Mining Services is engaged in the business of providing miners in the U.S. and elsewhere with assay laboratory analysis and ore testing, feasibility studies and other mining services, as well as equipment and a mining magazine. Norsul intends to continue the operations of Action Mining Services and to expand the business into the mining of minerals in the U.S.

The executive office of Norsul Oil & Mining is located at 526 Pine Avenue, P.O. Box 603, Albany, GA 31702, and its telephone number is (912) 436-3100.

#90073c0057 03/14/1990 ~Comtex
WASHINGTON (MARCH 14) COMTEX - In a clear victory for Rep. Edward J. Markey (D-Mass.), the House Energy and Commerce Committee has approved a stock market reform bill which would give the Securities & Exchange Commission authority to curb program trading.

Markey, as chairman of the House panel's subcommittee on telecommunications and finance, has long advocated program trading measures in any new market reform package. When he introduced the program trading provision last fall, there was heated debate within his own subcommittee over key phrases, specifically what defined "disruptive" market practices. Following continued consultations with the SEC, securities industry officials, and the stock exchanges, the section on program trading was redrafted to satisfy requirements of the subcommittee and full commmittee.

The provision allows the SEC to enact rules to prevent market volatility and then grants the SEC power to halt program trading when such regulations are violated.

Markey said the bill is not intended to cut off program trading. "This is an important provision which grants the SEC new authority to address market volatility," he said. "The bill grants the SEC the ability to prohibit or constrain, during period of extraordinary volatility, those acts or practices which have contributed to such levels of volatility in the past."

A common form of program trading is known as index arbitrage involving the stock markets in New York and index futures based in Chicago. Program traders use computers to spot price discrepancies between the stocks and index futures and attempt to profit by the momentary price differences between the two markets. This triggers heavy computer buy or sell programs which critics claim add volatility to the stock market.

This is the first major piece of market reform legislation to go before Congress since the October stock market crash in 1987. A similar bill pending in the Senate omits any provision on program trading.

The Treasury Department opposes any legislation authorizing the SEC to restrict program trading. Such a provision "could itself be disruptive by applying it only in the stock market," Treasury Secretary Nicholas Brady said in a letter last week to Sen. Christoper Dodd (D-Conn.). Dodd is the chairman of the Senate securities subcommittee, which oversees legislation dealing with the SEC.

Markey's program trading amendment applies only to the stock markets, not the futures markets. In addition, the bill expands the SEC's ability to act in a market emergency, requires large trader reporting, and enhances the SEC's power to monitor the financial condition of holding companies of brokerage firms.

#90073c0077 03/14/1990 ~Comtex

WASHINGTON (MARCH 14) COMTEX - The registration statement filed at the NASD shows Granite Construction Inc. announced that it proposed to

commence an initial public offering of stock consisting of 1.5 million shares offered by the company coupled with 750,000 shares offered by selling shareholders. The company will not profit from sales of the selling shareholders. The estimated initial public offering price is between $15.00 and $17.00 per share.

Granite Construction is one of the largest heavy construction contracting companies in the U.S., focusing primarily on infastructure projects (roads, dams, etc.) in the West and Southwest, both for public and private clients. Its backlog of Dec. 31, 1989, was 377.5 million, its highest to date.

Underwriters for the proposed initial offering include Smith Barney, Harris Upman & Co. as well as Wertheim Shroder & Co.

The executive office of Granite Construction Inc. is located at 585 West Beach Street, Watsonville, CA 95076, and its telephone number is (408) 724-1011.

#90073c0078 03/14/1990 ~Comtex

WASHINGTON (MARCH 14) COMTEX - The registration statement filed at the NASD shows Western Slope Ventures Inc. announced a proposed initial public offering of 500,000 units at a price of $0.10 per unit.

Each unit is proposed to consist of one common share and one each of A,B and C class warrants. Each of the warrants is good for the purchase of one common share for a period of twelve months following the effective offering date. The price per share with each warrant will be $0.25, $0.50 and $1.00, for the class A, B, and C warrants, respectively.

This is a blind pool/blank check offering in that neither the use of the proceeds nor the business of the company is specified.

The executive office of Western Slope Ventures Inc. is located at 1025 Ridgeview Drive, Suite #400, Reno, NV 89509, and its telephone number is (702) 827-6300.

WASHINGTON (MARCH 14) COMTEX - The registration statement filed at the NASD shows Resources Recycling Technologies Inc. announced a proposed offering of 1 million shares of common stock in a secondary sale. Of the sale, 900,000 shares will be offered by the company. The remaining 100,000 shares will be offered by Mutual Life Insurance Co. of New York, from which sales Resource Recycling will not benefit.

Resource Recycling is a diversified waste materials management company. Its Deposit Legislation Division provides accounting, data collecting and scrap processing services to beverage container retailers and wholesalers in New England. Its Municipal Recycling Division designs, constructs and operates recycling facilities.

The company hopes to use assets from the sale to form a Plastics Division.

The proposed public offering is being underwritten by Ladenburg, Thalmann & Co. Inc.

The executive office of Resource Recycling is located at 300 Plaza Drive, Birminghamton, NY 13903, and its telephone number is (607) 729-9331.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 10

ANNOUNCEMENT:

On March 9, 1990, the amended complaint consolidating the Behrens, Lepow Equities and Weinberger actions was served upon the defendants, including Brae Acquisition.

The complaint alleges that the $6.25 offer price is grossly unfair and seeks recission of the 1988 Equity Investment and the divestiture of monies and profits received from the investment.

PURPOSE:

For acquisition.

LONDON (MARCH 14) - British foods group Hillsdown Holdings said Wednesday its taxable profit rose 29.6 percent last year over the 1988 level to 195.6 million pounds (326 million dollars).

Turnover was up four percent at 3.68 billion pounds, and final dividend was fixed at 5.4 pence, giving a total for the year of 7.2 pence, up from six pence.

The results were in line with the most optimistic market forecasts, which had predicted profits of between 195 million and 200 million pounds, and Hillsdown shares were unchanged at 253 pence in mid-morning trading in London.

#90073d0150 03/14/1990 ~French/German News Agency

LAGOS (MARCH 14) - Nigeria Wednesday launched a three-week campaign for debt service reduction in four creditor countries, a finance ministry official said here.

A delegation led by Finance and Economic Development Minister Chief Olu Falae will visit Italy, West Germany, Britain, Japan and and also pursue its campaign at a development aid conference in Fiji, the official said.

Reduction in external debt service and foreign investment in the West African nation would top the agenda when the Nigerians meet officials in Rome, Bonn, London and Tokyo.

In Suva, the Nigerians will attend a meeting of the European Economic Community (EEC) and the African, Caribbean and Pacific nations (ACP) on trade and development aid on March 24.

Nigeria's foreign debt is estimated at 29 billion dollars.

RIYADH (MARCH 14) - British Defense Secretary Tom King met here Wednesday with Saudi Foreign Minister Prince Saud al-Faysal for talks on strengthening bilateral cooperation, officials said.

Mr. King, who arrived Monday, stressed the importance to the two countries of a 15 billion pound (25 billion dollar) defense contract signed in July 1988 whereby Saudi Arabia would purchase more than 100 Tornado combat planes and helicopters from Britain.

He met his counterpart Prince Sultan ibn Abd al-Aziz on Tuesday, the Saudi Press Agency reported.

SEOUL (MARCH 14) - Thirteen South Korean students staged a sit-in inside a U.S. military base here Wednesday to denounce U.S.-South Korean military exercises before being arrested, police said.

The 13 walked inside the base through a gate manned by a single guard and sat down displaying signs for about 10 minutes before being arrested by South Korean police, a U.S. military spokesman said.

The students blocked traffic at the gate of the Yongsan base, the headquarters of the U.S. Eighth Army, but the demonstration was largely peaceful, police said.

"They were also protesting the presence of the U.S. troops" in South Korea, said the U.S. spokesman.

They demanded to see General Louis Menetrey, commander of the U.S.-South Korea Combined Forces Command and the U.S. Forces Korea, to give him a protest letter calling for an end to the military exercise, code-named "Team-Spirit."

No damage was done to the base during the short incident, U.S. military authorities said.

The protest came as the Team-Sprit Exercise involving some 200,000 South Korean and U.S. soldiers started in earnest with a landing operation on South Korea's eastern coast on Wednesday.

North Korea has called for the stoppage of the exercise, denouncing it as offensive and a nuclear war game.

South Korean dissidents and radical students demand that the exercise be stopped because they claim it hightens tension on the Korean Peninsula and thus hampers dialogue with the North.

BERLIN (MARCH 14) - The government of Hungary intends to reduce its armed forces by about 35 per cent by 1992, Hungarian Defence Minister Ferenc Karpati told the East German daily newspaper Der Morgen on Wednesday.

Mr. Karpati said that Hungary did not have serious problems "either with its neighbours or with other peoples, and does not therefore have to maintain big military forces".

After the army had been cut by 35 per cent, "new steps in the same direction can be envisaged if negotiations in Vienna lead to a result," he said.

This was a reference to the Vienna negotiations on the reduction of conventional forces in Europe.

The minister said: "We want to spend less for military ends. Armoured artillery and missile units must be reduced. Offensive weapons must be eliminated."

On the unification of Germany, he said that while this was a matter foremost for the Germans, it also concerned the peoples of Europe.

"One hears certain promises that never again will war be waged from German soil, but West Germany has big military forces in NATO (the western North Atlantic Treaty Organisation). It will have to be decided whether a united Germany could remain in NATO," he said.

#90073d0360 03/14/1990 ~French/German News Agency

BEIJING (MARCH 14) - The head of China's Moslem-majority Xinjiang region has called for tight religious control, saying foreign-backed forces were engaged in sabotage aimed at promoting separatism, reports seen here Wednesday said.

The chairman of the regional government, Tomur Dawamat, issued a scathing attack on the "scum of our nation" engaged in unspecified sabotage aimed at splitting Xinjiang from China, the official Xinjiang Daily reported in its March 8 issue.

He blamed foreign forces for stirring up separatism and religious fervor in the nominally autonomous northwest region, which borders Moslem-dominated Pakistan and the volatile Soviet Central Asian republics.

Mr. Tomur Dawamat said such activities would be "smashed."

"We must maintain high vigilance to be strictly on guard against the religious infiltration of hostile forces from abroad," he said without naming any countries.

He called for "strong measures against the tiny minority of people carrying out reactionary propaganda to ... sabotage the unity of nationality and stability of society under the cloak of religion."

Foreign visitors returning from Xinjiang said last month they saw Shiite Moslems handing out religious pamphlets in China's westernmost city of Kashgar.

Xinjiang is one of China's most politically important ethnic minority regions. The majority of its 15 million people are profoundly faithful Moslems, about half of them Uygurs of Turkic descent.

A separate article in the paper quoted Mr. Tomur Dawamat's 1990 government work report as saying that "all illegal religious activity should be stopped."

The report, which was announced in the regional capital Urumqi earlier this month, did not specify what the activities were but said that the government must strengthen its control over religion.

"Religion can't interfere in state administration, the administration of justice, education, marriage, culture and health," Mr. Tomur Dawamat said. "It is not allowed to restore religious privilege and exploitation which have already been wiped out."

Observers here took that to mean that Moslem fundamentalism had been seeing a resurgence in the region.

Since the early 1980's, China has allowed more religious freedom, suppressed after the communists came to power in 1949.

Troops along Xinjiang's border have recently been reinforced and foreign reporters have been denied access to the region, where a French journalist and her translator were expelled for "unlawful newsgathering" early this month.

The official China Daily meanwhile reported here Wednesday that to better develop the country's backward minority regions, appropriate birth control needed to be practiced.

China's ethnic minorities are exempt from the "one-child" birth control policy and have been encouraged instead to control population growth in line with "flexible" family planning, the English-language daily said.

The paper quoted State Family Planning Commission Minister Peng Peiyun as saying that some women in Xinjiang no longer want to have many children.

Other reports have said that people in the region have killed family planning officials. Many Moslems do not practice birth control.

The minister said governments in China's autonomous regions were "authorized to decide their own specific population policies, according to their local conditions."

CAPE TOWN (MARCH 14) - South African Finance Minister Barend du Plessis introduced a budget of 72.932 billion rand (28.2 billion dollars) for 199091 here Wednesday, aimed at wealth creation so that "an increasing number of South Africans may raise their standard of life."

The total, including a one billion rand contingency fund, was 11.8 per cent up on the revised estimate of expenditure for 1989-90 of 65.181 billion rand (25.2 billion dollars), some 3.2 per cent below the official inflation rate.

Mr. Du Plessis announced that a third of the six billion rand surplus on

the 198990 budget, generated by higher-than-expected tax revenue, would be used to set up a Social Fund to redress socio-economic backlogs which have left the voteless black majority with poor housing, poor education and poor health care.

SRINAGAR, India (MARCH 14) - Indian security forces used tear gas Wednesday to disperse tens of thousands of Moslem women who tried to march on the United Nations office here to protest alleged police atrocities in connection with the status of Kashmir.

Troopers of the paramilitary Central Reserve Police (CPRF) fired shots into the air and lobbed tear-gas grenades into knots of women outside the U.N. Observers' office as the black-shrouded women came to demand the withdrawal of security forces from Srinagar.

At least three of the women fainted and witnesses said troopers beat back male demonstrators with rifle butts and ordered the men to stand with their hands on their heads.

Later, a government spokesman said some 10 women were injured, one seriously, during the clashes, which he said took place in six separate locations in the city.

The protest rallies organised by the Dakhtarane Millet (Daughters of Faith) flared immediately after the authorities relaxed a standing curfew for seven hours, and officials said hundreds of demonstrations flared across Srinagar, the hub of a militant-led campaign against Indian rule of Kashmir.

Millet president Aasiyeh Andrabi said some 200 women were injured during the rallies.

Organisers said some 200,000 women had come onto the streets to protest a report that paramilitary troops had molested girls during a house-to-house search for pro-independence militants.

Lagos (MARCH 14) - The Nigerian National Petroleum Corporation (Nnpc) will soon allot new concessional fields to oil-producing companies with a view to increasing the nation's oil production capacity, an official of the corporation announced Wednesday.

The official said the allocation would serve to meet the nation's target of

increased daily oil production capacity from 1.8 million to 2 million barrels and the reserve base from the present 16 billion to 20 billion barrels in the next five years.

He said the new oil fields list had already been completed, awaiting allocation.

TOKYO (MARCH 14) - Japan Air Lines (JAL) and the Soviet Union have set up three committees to begin aviation and tourism talks this month, JAL officials said Wednesday.

The committees will discuss opening new air routes between Japan and East Europe via Moscow, improving Soviet accommodation facilities to attract Japanese tourists, and how to market tours of the Soviet Union in Japan.

The officials said that the agreement came between a JAL delegation who visited Moscow recently and the Soviet Ministry of Civil Aviation, Soviet flag carrier Aeroflot and the Soviet Tourism Bureau.

The committees will first meet in Tokyo this month, the officials said.

#90073d1390 03/14/1990 ~French/German News Agency

VIENNA (MARCH 14) - The OECD offered here Wednesday to offer the benefit of its experience to East European countries moving towards a market economy, but warned it would take them at least 20 years to catch up with the West.

Organisation of Economic Cooperation and Development deputy general secretary Pierre Vinde said at the opening of a three-day seminar that the organisation was willing to "open dialogue" with reforming East European countries.

The OECD was also ready to "put its experience at the disposal" of Eastern Europe, Mr. Vinde told the seminar uniting representatives of the 24-country OECD and Eastern European countries wanting to introduce a market economy.

Mr. Vinde said that the Eastern European countries would have to re-introduce ideas such as competition, market mechanisms based on realistic pricing and free play of the law of supply of demand, along with trade liberalisation.

But he warned that even if the reforms succeeded and the Eastern European

countries managed to achieve six per cent annual growth, they would take "20 to 25 years to catch up with Western Europe."

For East Germany alone, "it will take annual foreign investment of 40 to 80 billion dollars a year for 10 years to bring it close to the level of West Germany."

Czechoslovak Finance Minister Vaclav Klaus spoke out in favour of a market economy and against the "former irrational and inhuman" planned economy system, implicitly criticising Eastern countries who wanted to base their reforms on a revised version of such a system.

"They do not understand that the market mechanism cannot be introduced as a half-measure," he said.

Ivan Angelov, economic adviser to the Bulgarian prime minister, said that the main problems of the reforms already begun in his country were price liberalisation, the reduction of subsidies and controlling unemployment with the closure of loss-making enterprises.

The three-day seminar here will enable the two sides to discuss prospects for increased cooperation with the Paris-based OECD, which last week set up a centre for such cooperation.

#90073d1480 03/14/1990 ~French/German News Agency

ANKARA (MARCH 14) - Iraq, Syria and Turkey have again failed to reach agreement on the allocation of the waters of the rivers Euphrates and Tigris,
the foreign ministry disclosed here Wednesday.

The announcement came at the end of the 15th meeting here of the tripartite commission, comprising experts of the three countries.

Iraqi and Syrian representatives rejected a Turkish proposal for joint studies to establish water requirements of the sides, insisting on the acceptance of their declared needs at their face value.

Foreign ministry sources said Turkey favoured the ''just, rational and optimum'' use of the region's water resources collectively, whereas Baghdad and Damascus demanded specific quotas for each side.

''They not only decline to discuss such possible criteria as population or the distances the rivers traverse in each country, but the declared requirements amount to three times the available resources,'' the sources said.

They blamed the ''Siberia model'' Soviet technology of the Syrian dams, needing abundant water to generate energy, and the traditional irrigation systems of Syria and Iraq for the waste of resources.

Turkey, the sources said, was using superior technology in its Southeast Anatolia Project - incorporating 21 dams and 17 power stations - and the spraying it envisages was a more economic method of irrigation.

The sources said the furore over the one-month interruption of the Euphrates' flow earlier this year was unjustified, as the technical reasons for the move had been explained well in advance.

They said the fears of a dry-out were baseless in view of Ankara's guarantees to let through at least 500 cubic metres of water per second into Syria without any further interruption.

#90073d1610 03/14/1990 ~French/German News Agency

PARIS (MARCH 14) - France could be left with a million tonnes of wheat on its hands after selling it to Moscow because the Soviet Union is having trouble providing ships to transport the grain, an official said here Wednesday.

France sold the Soviet Union two million tonnes of soft wheat in January at

a price estimated by various sources of around 148 dollars a ton.

Delivery was to be made during the first quarter of this year, but so far only half of the consignment has been loaded.

Daniel Tournay, president of the National Interprofessional Grain Office (ONIC), said that the Soviet side was having trouble sending ships to pick up the rest of the wheat because of organisational problems.

The ships were expected to arrive in April, he said.

But this will leave France with a problem. The sale benefitted from European Economic Community export subsidies, but on condition that the wheat left the country by the end of March.

Asked what would now happen to the million tonnes of wheat still in France, Mr. Tournay said he hoped that the EEC Executive, the European Commission, would extend the expiry of the subsidy certificates, but this was by no means sure to happen.

The Commission is likely to consider that the failure of the Soviet ships to arrive on time is part of normal commercial risk, and not force majeure.

Lack of flexibility by the Commission on the issue could discourage traders from dealing with Moscow in future, he warned.

"A disappointed client will go elsewhere" to sell, he said.

#90073d1660 03/14/1990 ~French/German News Agency

MOSCOW (MARCH 14) - Soviet Foreign Minister Eduard Shevardnadze will visit seven African countries during a trip climaxing with Namibia's independence celebrations on March 21, an Africa department spokesman in his ministry said Wednesday.

Mr. Shevardnadze will leave Moscow on March 18 for 10 days, going to Angola, Zambia, Tanzania, Nigeria, Mozambique and Zimbabwe as well as Namibia, said the spokesman, Boris Asayan.

In Windhoek, the foreign minister will have talks with President-elect Sam Nujoma and other Namibian leaders, along with officials from other countries attending the ceremonies marking independence from South Africa, including U.S. Secretary of State James Baker.

Mr. Asayan stressed that Namibian independence was of capital importance after what he called a 30-year struggle.

For more than two decades, guerrillas of Mr. Nujoma's South West Africa People's Organization (SWAPO) fought South African-led troops and security forces in the former German colony, which was occupied by Pretoria during World War I.

Mr. Asayan added that Mr. Shevardnadze would meet African leaders to discuss developments in southern Africa, where Angola and Mozambique have both been ravaged by civil war since Marxist governments took power on independence in 1975, as well as bilateral relations.

CAIRO (MARCH 14) - A huge fire at a carpet depot in Alexandria 220 kilometers (137 miles) north of here caused some two million dollars worth of damage but left no casualties, press reports said Wednesday.

The blaze, brought under control late Tuesday after four hours, was the fourth major fire in Egypt in the last two weeks.

In the most serious incident, 17 people perished when the Sheraton-Heliopolis hotel north of Cairo went up in flames March 1.

Another fire at Shepherd's Hotel in downtown Cairo broke out a week later but was extinguished without serious injuries.

On Tuesday, firefighters battled a blaze at the nearly completed new foreign ministry building on the Nile River, caused by an electrical short-circuit, ministry officials said. There were no reported injuries.

#90073d1730 03/14/1990 ~French/German News Agency

LUSAKA (MARCH 14) - President Kenneth Kaunda on Wednesday told a national convention of Zambia's single ruling party that changes in East Europe would have no repercussions for the country's political and economic structure.

"I see no such adjustment in sight," said Mr. Kaunda, who has ruled this southern African country since independence from Britain in 1964 and heads the sole legal United National Independence Party (UNIP).

"We can safely say that both economically and politically, perestroika and glasnot are moving those for whom this is new thinking to a position where Zambia stands already," he added.

Responding to Zambians who have called for a multi-party state, Mr. Kaunda said the country cherished humanism, which was "socialist-oriented" and

chosen by the people.

"The need for that does not arise at all," he said of multi-party politics. "Humanism is a socialist program which from the beginning has unique Zambian characteristics."

Some 1,500 people were attending the UNIP convention, the fifth of its kind, held mainly to review one-party rule and economic policies in view of moves away from communist domination and ideology in East Europe.

The participants to the three-day session, included party leaders and former leaders, trade unionists and members of the diplomatic corps accredited to Zambia.

The convention, which ends Friday, will be followed by an extraordinary UNIP national council meeting which will review its deliberations.

Mr. Kaunda said that after the national council's meeting, members of the UNIP central committee would meet to determine whether there was a need for change.

#90073d1830 03/14/1990 ~French/German News Agency

BANGKOK (MARCH 14) - The United Nations expressed deep concern Wednesday over the "apparent involuntary" evacuation by the Khmer Rouge of Cambodian refugees from camps in Thailand to "unsafe" sites inside Cambodia.

The United Nations Border Relief Operation (UNBRO) in a statement here urged "all concerned authorities to respect human rights of the Khmer (Cambodian) civilians in all U.N.-assisted and other border camps."

"Civilians must be able to exercise free choice in any future movement back to their country of origin," the statement said.

UNBRO was referring to reports that the Chinese-backed Khmer Rouge, the dominant group in a guerrilla coalition fighting Cambodia's Vietnam-installed government, was returning thousands of refugees to Cambodia from camps in Thailand.

About 300,000 Cambodian refugees live in camps in Thailand administered by the three guerrilla factions and receiving assistance from UNBRO and other aid agencies.

That includes about 60,000 refugees in three U.N.-assisted Khmer Rouge-administered camps at O'Trao, Site 8 and Site K.

But tens of thousands more are believed to have been housed in secret Khmer

Rouge camps known as the "hidden border" where the U.N. and other relief agencies have no access.

A Khmer Rouge official who identified himself as Mit (Comrade) Chouk told reporters Tuesday that his faction had returned 20,000 refugees to Cambodia from "secret" camps since February and planned to return more.

#90073d1960 03/14/1990 ~French/German News Agency

LONDON (MARCH 14) - Coffee and cocoa futures prices have hit their highest levels in five months in London this week, due to concern over unrest in Ivory Coast, the world's largest cocoa producer, and the weakness of the pound.

But while coffee prices are likely to keep going up, cocoa will probably reach its peak fairly soon, market analysts said Wednesday.

The situation in Ivory Coast is not the only factor pushing up coffee prices, unlike the position on the cocoa market, said Lawrence Eagles, an analyst with brokers GNI.

Coffee prices are being supported by "a very real tightness of arabicas, with a shortage in Mexico, and sentiment has also changed with the roasters," Mr. Eagles said.

Roasters see coffee prices "as historically very cheap and they are buying to rebuild stocks," he added.

Prospects of a new international coffee agreement are also supporting the market, he said, and fears of disruption of deliveries of Ivory Coast robustas due to recent unrest there only provided a "mildly supportive" factor to the picture.

But the recent firmness of cocoa prices is due almost entirely to the Ivory Coast situation, he said.

Prices began to rise during street protests in Abidjan 10 days ago and were stimulated by rumours in London on Tuesday that Ivory Coast exporters were having trouble obtaining the cocoa they needed from the planters.

"Apparently a couple of Ivorian shippers overcomitted themselves," Mr. Eagles said.

#90073d2050 03/14/1990 ~French/German News Agency

JERUSALEM (MARCH 14) - The director of Israel's largest detention center, Ketziot camp in the Negev desert, has been sacked after the escape last week of five Palestinian prisoners, military sources said Wednesday.

They said the decision was taken by General Matan Vilnai, commander of Israel's southern region where the Ketziot detention camp is located.

An unspecified number of officers serving at the camp were given suspended jail sentences ranging from seven to 10 days by a military tribunal in connection with the escape last Saturday, the sources said.

Three prisoners fled to Egypt while two were captured trying to cross the border, according to an Israeli army investigation.

A total of 4,500 Palestinians are imprisoned at Ketziot, including 1,000 administrative detainees held without trial by Israeli military authorities.

#90073d2170 03/14/1990 ~French/German News Agency

PARIS (MARCH 14) - The president of French tyremaker Michelin said Wednesday the group was determined to go through with its plan to acquire U.S. group Uniroyal Goodrich.

The U.S. Federal Trade Commission is currently studying the 1.5 billion dollar takeover and is expected to give a decision before the end of the month.

Francois Michelin said in a statement Wednesday that "I intend to use all possible means" to see that the purchase of the world's fifth largest tyremaker goes through, "whatever obstacles may present themselves."

The Canadian authorities had on Tuesday given the green light for Michelin's acquisition of Uniroyal Goodrich's Canadian subsidiary, he added.

The Canadians had "reached the conclusion that this acquisition would not lead to any lessening of competition on the North American tyre market," Mr. Michelin said.

As for the U.S. market, Mr. Michelin said he was convinced the deal "will strengthen rather than lessen competition on the tyre market."

Michelin is aiming to face up to its main rival for the position of the world's leading tyremaker, Goodyear, by capturing 15 per cent of the U.S. market (seven per cent for Uniroyal and eight per cent for Michelin).

North America represents 40 per cent of the world tyre market.

Michelin had a turnover of 8.7 billion dollars in 1988, while Uniroyal-Goodrich turnover totalled two billion dollars.

#90073d2300 03/14/1990 ~French/German News Agency

BUCHAREST (MARCH 14) - Romania's provisional government on Wednesday adopted an electoral bill setting May 20 as the date for legislative elections and for an assembly to draft a new constitution.

The vote was passed after three days of stormy debate with one voice against and two abstentions. It was not immediately clear how many members of the ruling Provisional Council of National Unity (PCNU) were present.

It followed marathon discussions on the 99 articles in the bill that turned into a new attack on the ruling Council, which has both executive and legislative power until elections are held.

Critics have repeatedly charged the PCNU with failing to enact adequate political change, following the fall of the old regime in late December.

The National Salvation Front (NSF), which formed the core leadership after Nicolae Ceausescu was ousted on December 22, was pushing for the May 20 ballot.

But the fledgling opposition groups sought to delay the elections, feeling they needed more preparation time.

The vote for the electoral bill was also carried out under changes adopted by the Council Tuesday, with backing from the NSF and its supporters. The changes effectively allow the Council to adopt proposals -- even the most important ones -- with the approval of scarcely more than one quarter of its members.

As approved Tuesday, the new motion no longer requires a qualified majority of two thirds of its members to meet, but only half of the members plus one. It said a text can be adopted by a simple majority of those present.

Observers at the Council session, which opened Saturday then resumed Tuesday, said the split between the NSF and smaller opposition parties on how to approach democracy appeared even broader.

Virgil Vita, a member of the executive bureau of the PCNU and a pro-democratic opposition leader from the city of Cluj, denounced "the hegemonic tendency" of the NSF and what he called its "recourse to totalitarian methods".

"Our hands our completely tied," he said.

After the vote on the elections bill, the Council session continued debate on various other draft decrees and laws, on foreign investments, military service and other issues.

Much of Wednesday's session degenerated into a rowdy sideline issue over a proposal to reinstate Dimitru Mazilu into the provisional leadership.

Mr. Mazilu was one of the "revolutionary" leaders of late December and

vice-president of the NSF, but resigned January 25 over NSF plans to stage a pro-government demonstration to counter growing criticism, he said.

The two sides traded insults, with Prime Minister Petre Roman taking the podium at one point to oppose Mr. Mazilu's membership on the PCNU and denounce what he called his "network of lies".

President Ion Iliescu said he "regretted this difficult discussion", before Mr. Mazilu finally left the room.

#90073d4800 03/14/1990 ~French/German News Agency

TOKYO (MARCH 15) - Japanese long-term credit banks are considering raising the long-term prime lending rate by 0.4 percentage points to 7.9 per cent a year in April, a Tokyo financial daily reported Thursday.

The Nihon Keizai Shimbun, quoting banking sources, said the margin of increase would vary depending on factors such as a possible hike in the Bank of Japan's official discount rate and bond prices in the secondary market.

But the present market conditions suggest a 0.4 percentage point increase to 7.9 percent from the current 7.5 percent.

If the prime rate should go up to 7.9 percent, it would be the highest since April 1984.

#90073d8780 03/14/1990 ~French/German News Agency

TOKYO (MARCH 14) - Mitsubishi Heavy Industries Ltd. (MHI) plans to make active efforts to develop a 75-seat passenger plane and space projects with DASA, the Daimler-Benz group's aerospace division, Kyodo News Service reported on Wednesday.

Kyodo said MHI chairman Yotaro Iida revealed the plan in an interview with the Japanese news agency on Tuesday.

He said that teams of engineers from MHI and DASA would shortly meet in preparation for the start of basic research on the development of space planes linking Japan with the United States and Europe at ultrasonic speed and on a project for utilization of space by means of satellites.

Mr. Iida was also quoted by Kyodo as saying that MHI was considering the transfer of technology for desulfurizing engine exhaust to DASA's prime mover division.

Asked to confirm the report, an MHI spokesman said that it was too early to make such a move as an accord reached between the two groups last week was ''aimed at broad-ranging cooperation in the future.''

Four companies in Japan's mammoth Mitsubishi group - Mitsubishi Corp., MHI, Mitsubishi Motors Corp. and Mitsubishi Electric Corp. - announced the cooperation accord with Daimler-Benz.

TOKYO (MARCH 14) - Japan's Suzuki Motor Co. Ltd. has agreed to supply South Korea's Hyundai Precision and Industry Co. Ltd. with engines used in golf carts from next month, a company spokesman said Wednesday.

The spokesman said sales of the engines, to be used in golf carts exported to the United States, were expected to reach up to 6,000 units in the first year and up to 15,000 units within four years.

The agreement follows an announcement by Mitsubishi Motors Corp. Monday which said it had agreed to supply the South Korean firm with tecnical assistance to produce four-wheel drive recreation vehicles.

Mitsubishi already provides technical assistance to another company in the South Korean conglomerate to produce passenger and commercial vehicles.

JAKARTA (MARCH 14) - Indonesia said Wednesday it was content with current oil market conditions and ruled out a need for the Organisation of Petroleum Exporting Countries (OPEC) to change policy to try reverse downward price trends.

Speaking on the eve of an OPEC monitoring committee meeting which starts

Friday in Vienna, Mines and Energy Minister Ginanjar Kartasasmita said any decision to change the group's policies on output or price was likely to be made in a full conference in May and not at the meeting.

"There is no pressing need for any OPEC action.... The oil price is still good," Mr. Ginanjar said, noting that it was still above OPEC's agreed reference price of 18 dollars a barrel.

World oil prices dropped this week to their lowest level since the beginning of December, but Mr. Ginanjar said this was due to seasonal factors and predicted further price falls in the next two months.

He admitted that some of OPEC's 13 members were exceeding their assigned production quotas, bringing the group's combined output to between 22.5 million and 23 million barrels per day against OPEC's ceiling of 22 million.

The Vienna meeting would review price developments and also how members implemented OPEC's output and pricing policies agreed at the last conference in November, he said.

The minister said the meeting could be turned into a conference, if members wished, to allow it to take decisions. "There's a possibility but I don't think it will happen," he said.

Mr. Ginanjar also said Indonesia planned to raise its crude output in the second half of 1990 to 1.35 million barrels per day from the current 1.32 million and against its OPEC-assigned quota of 1.374 million.

#90073d8970 03/14/1990 ~French/German News Agency

JAKARTA (MARCH 14) - Indonesia Wednesday called for a new mechanism to set world prices of mineral commodities in order to allow Third World countries to develop their mining industries.

Mines and Energy Minister Ginanjar Kartasasmita, addressing the Second Asia-Pacific Mining Conference here, said mineral prices should be determined under what he called a "transfer of resources" concept rather than being left to market forces.

Under the concept, prices should be allowed to rise to ensure a much needed flow of investment, to keep ahead of cost and inflation, to adopt environmental safeguards and to permit improvement in working conditions, he said.

"Attacking the mechanism of price setting also promises greater and more lasting success to the developing countries," he added.

The minister said the mining industry in the Asia-Pacific region had a bright prospect in the new decade but problems and challenges also laid ahead.

He cited as examples problems in environment protection, depletion of resources, high costs of energy and technology, uneven distribution of capital sources and slower growth in the demand for metals and minerals.

The greatest obstacle to developing countries however, was the low prices of the mineral commodities, he said.

NEW DELHI (MARCH 14) - India's new government has made no move to cancel or modify a contract signed with the Indian subsidiary of the U.S. soft drink giant, Pepsico Inc., a minister told parliament Wednesday.

"The government has taken no decision to modify the letter of intent," Textiles and Food Processing Minister Sharad Yadav told the lower house in a written reply, adding that part of the plant had already gone into operation.

The company, MS Pepsi Foods Pvt. Ltd., complained in January that its plant was threatened with closure because of hostility from "sections" of the new Indian government headed by Prime Minister Vishwanath Pratap Singh.

The Pepsico contract, for the setting up of a food processing and soft drinks plant in northern Punjab state, was approved under the former government of Rajiv Gandhi in March 1989 despite an all-out effort by lobbyists for the domestic soft drink industry to block Pepsi's entry into the country.

Since then the new government's railways minister, socialist Georges Fernandes, has publicly slammed the contract as "illegitimately" conceived in an apparent tug of war with Industries Minister Ajit Singh who has dubbed it "a valid international contract."

Foreign business companies here have said resolution of the controversy would be the first real signal by the V.P. Singh government of its attitude to foreign investment.

Mr. Yadav said Wednesday Pepsi's plant for processing potatoes and grain-based products was already operational and the fruit and soft drink units were in an advanced stage of implementation.

He described the 30 million dollar project, in which Pepsico has a minority

stake, as "small" and said the government was "capable of defending the country's interests."

The reference to defending the country's interest was made in response to a question from the floor on the alleged role of Pepsico in a coup in Chile.

Mr. Yadav also said the plant's foreign exchange inflow would not be less than five times the foreign exchange outflow over ten years, and said the Indian government would not permit any breach of contract by the multinational. kwbsmb

TOKYO (MARCH 14) - U.S. Commerce Secretary Robert Mosbacher called on Japan Wednesday to acknowledge the urgency of bilateral trade talks and present concrete measures to resolve structural barriers, Japanese officials said.

"Time is now important in resolving the issues under the Structural Impediments Initiative (SII) talks," Mr. Mosbacher was quoted as telling Foreign Minister Taro Nakayama at a meeting here.

Mr. Mosbacher, who arrived here Tuesday on a four-day visit, was also quoted as saying that the United States hoped the "sense of urgency" it felt towards trade issues would be shared by the Japanese private sector.

The commerce secretary said concrete action was needed in the SII talks, which began in September last year, as both sides had already spent considerable time discussing various barriers to trade and invesment.

Mr. Nakayama stressed the need for corresponding efforts by the United States and expressed hope that the two sides would reach a satisfactory settlement, the officials said.

Mr. Mosbacher was to meet International Trade and Industry Minister Kabun Muto later Wednesday, and is due to meet Prime Minister Toshiki Kaifu and Finance Minister Ryutaro Hashimoto Thursday before leaving Friday.

LONDON (MARCH 14) - The BTR conglomerate, formerly British Tyre and Rubber, on Wednesday reported 1989 pre-tax profits of 1.08 billion pounds (1.7 billion dollars) compared with 820 million pounds (1.32 billion dollars) the previous year.

The reults showed an annual profit increase of 31 percent and took the

company into a select club of British firms capable of generating earnings of more than one billion pounds.

Analysts had forecast profits of between 1.06 billion pounds and 1.1 billion pounds, and the shares lost two pence to 420 pence in early trading.

Sales totalled 7.02 billion pounds compared with 5.47 billion pounds, representing an increase of 28 percent.

Profits per share rose from 28.7 pence to 36.1 pence, showing an increase of 25 percent.

The final dividend was increased to 8.3 pence compared with an interim dividend of 6.7 pence, making a total of 15 pence for the year, representing an increase over the previous year of 25 percent.

Wiesbaden (MARCH 14) - The West German economy grew by four per cent in 1989 - the best figure for ten years, the Federal Ministry For Statistics announced here Wednesday.

The ''strong economic development'' of the gross national product (Gnp), the sum of all goods and services, was mainly due to increased investment activity, said the ministry.

Economic growth stood at 3.6 percent in 1988.

Ministry figures showed that Gnp grew by 4.4. percent in the first quarter of 1989 followed by 4.7 percent in the second quarter.

Growth dropped to 3.2 percent in the third quarter before ending the last three months of the year at 3.6 percent.

Overall equipment investment went up by 10.9 percent in the last quarter of 1989 with a 4.7 percent increase registered in construction investment.

Salaries and wages for employees went up by 4.3 percent gross in 1989 compared to an 8 percent increase in entrepreneurial and investment income.

LONDON (MARCH 14) - British Aerospace achieved a 28 percent increase in pre-tax profits to 333 million pounds (536 million dollars) in 1989 compared with 259 million pounds (416 million dollars) a year earlier, the

company said Wednesday.

Analysts had forecast profits ranging between 300 million pounds and 330 million pounds for the group which has interests in the defence, aero and auto sectors.

Sales totalled 9.08 billion pounds, showing an increase of 59 percent over the previous figure of 5.7 billion pounds.

Profits per share rose to from 62 pence to 82.8 pence to show an increase of 33.5 percent. A final dividend of 14.6 pence per share was declared, making a total of 22.7 pence for the year.

The price of shares in the company rose by nine pence to 494 pence in early trading.

Sharjah (MARCH 14) - A row has erupted between Saudi Arabia and the United Arab Emirates this week, with Saudi authorities hampering imports of goods from the Uae since Monday, the daily al-Khaleej reported here Wednesday.

It said more than 100 trucks loaded with vegetables and fruits have been waiting at the border between the two states because Saudi officials in a surprise move have demanded from the drivers the bill of goods stating the country of origin.

Another 100 trucks were on their way to the border and would also be forced to line up because they had started their journeys before being informed about the new requirements, the daily added.

It said the problem was being discussed at ''the highest level'' in the Uae and traders in the country were anxiously awaiting a solution.

Saudi state-controlled media have not yet mentioned the issue and officials in Riyadh have not commented.

The Uae, whose economy relies heavily on trade, exports goods worth about 500 million Dirham (280 million dollars) each year to Saudi Arabia. The kingdom is its second largest trading partner after Iran. Saudi Arabia and the Uae are members of the six-nation Gulf Cooperation Council.

MANILA (MARCH 14) - The Philippines will submit to the General Agreement

on Tariffs and Trade (GATT) a list of offers and requests proposing some tariff raises but also some reductions, officials said here Wednesday.

Economic Planning Secretary Cayetano Paderanga said its "offer list" to the Uruguay Round of multilateral trade talks within GATT currently under way in Geneva would ask that the Philippines be allowed certain tariff raises within ceilings.

He said the country had "the right to protect strategic industries," but did not elaborate further.

Mr. Paderanga said Manila would call on other countries to reduce their tariffs and non-tariff measures such as quotas.

He stressed however that the list, comprising 79 types of items, due to be submitted on Thursday, would be subject to negotiations before the Uruguay Round ends in December, and thus would probably be altered.

Failure to accede to a GATT agreement would force a country to deal with all of its trading partners on a bilateral basis, a system which has disadvantages for a small country like the Philippines, Mr. Paderanga said.

The offer list will show the more than 100 other member countries of the GATT what tariffs and trade measures the Philippines is willing to undertake in the years to come while the request list contains Manila's wishes from other countries.

Mr. Paderanga admitted that accession to GATT conditions would have "costs " but said "the benefits will far outweigh them," and expressed confidence that the country could trim its trade deficit under such an agreement.

The Philippines suffered a 2.6 billion dollar trade deficit last year after beginning a trade liberalization policy in 1986.

TOKYO (MARCH 14) - Hong Kong fund manager Thornton Management (Asia) Ltd. said Wednesday that the Japanese Finance Ministry had granted its Tokyo branch a licence to conduct investment advisory services in Japan.

The company, a unit of Dresdner Bank AG of West Germany, said the licence would enable the Tokyo branch to introduce new products to Japanese clients and expand its links with companies and stockbrokers in Japan.

"We hope for further private placement of funds managed outside Japan," group chairman Richard Thornton added.

Thornton's "Little Dragons Fund" posted the second-best performance of Asian funds in 1988 and 1989, increasing 218 percent during the period.

The fund invests in stock markets in South Korea, Taiwan, Hong Kong and Singapore but is more weighted towards Malaysia, the Philippines, Indonesia, Thailand and India.

-30- 1056

#90073d9790 03/14/1990 ~French/German News Agency

MANILA (MARCH 14) - The Philippines used 81.8 percent of foreign assistance available to it in 1989, up from 78.9 percent a year earlier, officials here said Wednesday.

Of the 3.998 billion dollars in loans and grants scheduled to be released to the Philippines in 1989, the government was able to avail of 3.239 billion.

In 1988, Manila took advantage of 2.985 billion of the 3.782 billion dollars in released assistance funds.

Press Secretary Tomas Gomez said this disproved "disinformation" being spread that the government was not fully using assistance funds available to it.

Prospective foreign donors have been deterred by accusations that Manila has failed to fully use assistance loans and grants, but the government has insisted that it uses the assistance available to it at a higher rate than most developed countries.

#90073d9810 03/14/1990 ~French/German News Agency

WELLINGTON (MARCH 14) - New Zealand will limit foreign ownership in the state-owned Telecom Corporation if it decides to sell off the nationwide network, State-Owned Enterprises Minister Richard Prebble said Wednesday.

He released briefing papers which outline the reasons and possible nature of the sale a day ahead of the ruling Labour Party's weekly caucus meeting which is scheduled to resume discussion on the bitterly fought sale.

A group led by former prime minister David Lange has warned in the last several weeks that they will not easily agree to the sale.

Mr. Prebble said the sale of Telecom would permit the government to repay "well over" 2.5 billion New Zealand dollars (1.4 billion U.S) in public debt.

"Selling the corporation will yield the government more in terms of sales proceeds than the value of the business to the government if it is retained," he said.

Mr. Prebble said if the sale went ahead the state would hold a "kiwi share" in it which would be designed to control the identity of any strategic shareholder, ensure no shareholder was able to accumulate shares beyond an aggregate limit set by the state and ensure the corporation abided by New Zealand law.

"The largest single shareholding would be limited to 49.9 per cent, so a strategic shareholder (say, an international telecommunications company) would not have a majority on the board with which to dictate how Telecom's operations should run," Mr. Prebble said.

He said in the British model of privatisation the emphasis was on widespread ownership of shares as an end in itself.

"The government's aim would be to ensure that New Zealand taxpayers get the best possible value from sale of this asset.

"We believe that a public issue of 500 million dollars (294 million U.S.) worth of telecome shares ... will be consistent with value-maximisation."

This amount of shares in New Zealand "would ensure a solid domestic shareholding base alongside any purchaser of a strategic stake," he said.

#90073e0006 03/14/1990 ~Latin America New Agency

Havana, March 14 (EFE).- Cuban leader Fidel Castro has said he would resist pressure from other Latin American leaders to reform his Communist rule and that Cuba was capable of defending its revolution from attack.

Addressing a meeting of tens of thousands of young supporters Tuesday, Castro said he was sure regional presidents would urge him to make concessions when they meet at Thursday's inauguration of Brazilian President Fernando Collor de Mello.

"Some friends, even in good faith, are going to express their condolences (for the difficult situation Cuba is going through). There will be no shortage of advice, which I know beforehand and which I know off by heart " Castro told the meeting.

"The advice will be to behave ourselves, to make concessions ... but no revolution saves itself by making concessions,+ the Communist leader continued, referring to reforms being undertaken by former communist allies in Eastern Europe.

"In Latin America a lot of people are concerned about Cuba," said Castro. He addded that he would tell counterparts, "Don't worry about us, because we're capable of defending ourselves, making the world tremble, capable of defeating imperialism if it attacks."

Referring to internal opposition to his rule, Castro told the crowds, "There are those who think it's possible to break down the (1959) Revolution... they are undercover in certain institutions and the time will come to pull their masks off but I don't want to give anything away yet."

At center-right Collor de Mello's inauguration, the Cuban leader is to join 25 heads of state and government, several of whom he said had asked to hold meetings with him.

Castro described his country's relations with Brazil as excellent and continually improving, while he said trade between the two nations was also increasing.

#90073e0007 03/14/1990 ~Latin America New Agency

MADRID (MARCH 14) - Workers at jails across Spain walked off the job Wednesday to protest their lack of security after suspected Basque separatists shot and critically wounded one of their colleagues, who has fallen into a coma.

Two youths shot prison clerk Angel Mota in the head Tuesday as he closed his family's photographic shop in the northern city of San Sebastian. Mota was carrying his 6-month-old son, who was not injured.

The attack follows warnings by the Basque separatist group ETA, 500 of whose members are in Spanish jails, that it would step up attacks against court and prision officials.

Two weeks ago Fernando de Mareo Lage, the president of the High Court, which hears terrorist cases, was seriously injured by a parcel bomb.

Union spokesmen said no staff turned up for work at Martutene jail, near San Sebastian, where Mota worked.

Strike action was also reported in at least 16 other jails across Spain.

Following the attack, the three main prison unions called a nationwide strike of Spain's 12,000 employees between 3.p.m. and 5.p.m. (1400 and 1600 GMT).

ETA has killed at least 600 people, mainly members of the security forces, since taking up arms 22 years ago for the right to independence for northern Spain's Basque region.

Last August, prison officers called a strike after the mother of a guard was killed when she opened a parcel bomb addressed to her son.

ETA Tuesday offered to open peace talks with the government. However, Socialist Prime Minister Felipe Gonzalez has ruled out negotiations until the group ends all attacks.

#90073e0010 03/14/1990 ~Latin America New Agency

MOSCOW (MARCH 14) EFE - The Soviet Union Wednesday urged Washington to use all its influence to secure the demobilization and repatriation of the U.S.-backed Nicaraguan Contras before President-elect Violeta Chamorro takes office in Managua.

In a Foreign Ministry statement, Moscow expressed its concern over "the lack of progress" to demobilize the estimated 12,000-strong guerrilla group from its bases in Honduras.

Since 1981, Washington has financed the Contras as part of its campaign to topple Nicaragua's leftist Sandinista government.

But last month's electoral defeat for Sandinista President Daniel Ortega has rid the Contras of a reason to continue their fight, which has cost some 30,000 lives.

Washington has a "special responsibility in solving the Contra problem," read the statement, adding that not just Nicaragua's future, but that of Central America, depended on the speed and manner in which this is carried out.

"Washington should take the necessary steps as soon as possible in this direction, which would be a genuine contribution on its behalf towards normalization of the situation in Nicaragua and would facilitate the search for peace in Central America," the statement read.

Any delay in the Contras' demobilization "will have serious military and political consequences," according to the ministry.

The Contras ignored a call for their demobilization by the end of 1989, as agreed by Central America's five presidents, claiming they would not hand over their arms before the election.

Since then, the rebels have said they will not disband until after the

April 25 transition and are willing to return to Nicaragua with their arms until a definitive accord regarding their future is hammered out.

They have also demanded that the 70,000-strong Sandinista Army be reduced and restructured into a non-partisan security force.

TOKYO (MARCH 14) KYODO - FOUR JAPANESE BANKS SAID WEDNESDAY THEY WILL RESUME A LOAN TO CHINA TO FINANCE THE EXPANSION OF A STEEL MILL THERE.

IT IS THE FIRST LOAN FROM JAPAN SINCE THE MILITARY CLAMPDOWN ON PRO-DEMOCRACY MOVEMENTS LAST JUNE.

THE INDUSTRIAL BANK OF JAPAN, DAI-ICHI KANGYO BANK, SUMITOMO BANK AND SANWA BANK SAID THEY WILL JOINTLY EXTEND 20 MILLION DOLLARS TO THE CHINA INTERNATIONAL IRON AND STEEL INVESTMENT CORP. IN BEIJING. THE INDUSTRIAL BANK OF JAPAN WILL BE THE LEAD MANAGER.

THE INTEREST RATE IS 0.5 PERCENT ABOVE THE LONDON INTERBANK OFFERED RATE (LIBOR). THE REPAYMENT TERM IS EIGHT YEARS, THEY SAID.

THE CHINESE CORPORATION WILL USE THE LOAN FOR AN EXPANSION PROJECT PLANNED BY THE SHANGHAI MEISHAN METALLURGICAL CORP., A STEELMAKER BASED IN THE SUBURB OF NANJING.

THE BANKS SAID THE MOVE SHOULD NOT OFFEND THE U.S. CONGRESS, WHICH HAS BEEN CALLING FOR SUSTAINED ECONOMIC SANCTIONS AGAINST CHINA, BECAUSE THE LOAN HAD BEEN AGREED ON BEFORE THE CHINESE GOVERNMENTS MILITARY CRACKDOWN.

WORLDWIDE COMMERCIAL BANKS HAVE FROZEN OLD AND NEW LOANS TO CHINA AS PART OF ECONOMIC SANCTIONS FOLLOWING THE BLOODY CRACKDOWN.

THE WORLD BANK AND THE U.S. EXPORT-IMPORT BANK PARTIALLY RESUMED NEW LOANS TO CHINA IN FEBRUARY, PARTLY DUE TO CONCERN ABOUT THE STABILITY OF CHINA'S ECONOMY.

INDUSTRY SOURCES SAID THE PLANNED LOAN IS EXPECTED TO PROMPT OTHER JAPANESE BANKS TO LIFT THEIR FREEZE ON PROMISED LOANS TO CHINA.

ATLANTA (MARCH 14) PR NEWSWIRE - M. Scott Athans has been named chief executive officer of Georgia Baptist Medical Center according to Dr. James W. Waters, chairman of the hospital commission, the governing board of the medical center.

Formerly a senior vice president and regional director for American

Medical International, Athans was responsible for 14 hospitals in six states with 8,000 employees and 3,400 beds. This southern region accounted for 40 percent of AMI's operating income.

From 1976 to 1983, Athans served as administrator of Brookwood Medical Center in Birmingham, Ala., a 586-bed acute care hospital with five ambulatory care centers.

Georgia Baptist Medical Center is a 523-bed acute care medical center owned by the Georgia Baptist Convention, which represents the 1.25 million Southern Baptists throughout the state. Founded in 1901, the medical center has more than 500 physicians on staff, employs 2,750 people in full or part time capacities and had 21,288 inpatient admissions in 1989.

As a teaching hospital affiliated with the Medical College of Georgia in Augusta, Ga., Georgia Baptist supports medical residencies in five specialities and a school and college of nursing. The medical center also manages hospitals in Jackson, Walton and Pickens counties and has affiliation agreements with Southwest Hospital and Medical Center in Atlanta and Newnan Hospital.

Athans receives his masters in Hospital Administration in 1972 from Duke University where he was a Marshall I. Pickens Scholar. He is also a Cum Laude graduate in Business Administration from Baylor University in Waco, Texas.

He is a member of the adjunct faculty of the University of Alabama in Birmingham, the Medical College of Virginia and Duke University. Athans is also a board member of the Cystic Fibrosis Foundation and a member of the American College of Healthcare Executives.

He and his wife, Sara Sue, and their two children, Melisa, 16, and Nickolas, 13, live in Sandy Springs, Ga.

CONTACT: Suzanne Bassett of Georgia Baptist Medical Center, 404-653-3553, or 404-653-4000 (beeper 630).

#90073p0026 03/14/1990 ~PR Newswire

JACKSON, MI (MARCH 14) PR NEWSWIRE - What Michigan's hibernating black bear has always known has now been discovered by home energy engineers -- there is enough heat energy in the earth to keep warm in the winter. And, going the bears one better, heating and cooling engineers have developed a process to provide summer air conditioning from cool temperatures under the earth.

This new heating and cooling system, called System:GT, an abbreviation for

geothermal, is the latest development in providing high-efficiency home space heating, water heating and air conditioning, according to home energy experts at Consumers Power Company. System:GT can replace a furnace, hot water heater and air conditioner at savings between $300 and $725 per year. People who presently heat their home with either propane or fuel oil, both of which skyrocketed in price this winter, will experience the greatest savings, according to the utility.

"Tapping into latent heat located in groundwater under the earth's surface during winter months is a simple and clean new way of heating a home," said J. Gregory Northrup, the utility's manager of marketing and sales. "This process is reversed in summer months to take advantage of cool water under the earth, which is converted to provide air conditioning," Northrup said.

Energy experts estimate that geothermal home heating and cooling systems are 300 percent more efficient, providing $3 worth of heat or air conditioning for every $1 in electricity costs. Customers installing this system are eligible for a Michigan income tax credit.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility, serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

BRADFORD-ON-AVON, ENGLAND (MARCH 14) PR NEWSWIRE - A contract worth approximately six million U.S. dollars has been awarded to Bell Avon Inc., part of the Avon Rubber Group, to produce skirt systems for the next 12 amphibious landing craft to be built for the United States Navy.

Bell Avon will manufacture and supply the skirt systems for hovercraft-type LCACs (landing craft air cushion) at its factory in Picayune, Miss.

Deliveries, including optional spares for each craft, will start in October 1990 and will continue for one year.

Bell Avon was awarded the contract by Textron Marine Systems, a division of Textron Inc. TMS will build the 12 LCACs at its New Orleans shipyard.

As a manufacturer of flexible structures, Bell Avon specializes in the fabrication of seals and components for use on both categories of air cushion vehicles (hovercraft and surface effect ships). It also has an extensive range of heavy and lightweight rubber-coated fabrics for rapid response on new contracts and for the refurbishment of existing craft.

To date, Bell Avon has supplied skirt systems for 24 U.S. Navy LCACs and is working on four craft currently under construction. The new contract will bring its total build of LCAC skirt systems to 40.

The company also manufactures static and transportable flexible tanks for the containment of fuel, liquids and powders.

LANSING, MI (MARCH 14) PR NEWSWIRE - Oldsmobile Division of General Motors has announced a $1,500 consumer rebate for the 1990 Toronado and Trofeo models. This consumer incentive program started Tuesday, March 13, 1990, and will continue through Sept. 26.

In addition, Oldsmobile's direct consumer incentive of $1,000 on 1990 Cutlass Supremes and its current incentive program which provides dealers cash back on most car lines, will continue through May 2.

In lieu of the consumer rebates on Toronados and Cutlass Supremes, consumers may take advantage of a special 6.9-percent GMAC finance rate for contracts up to 48 months.

"We believe this new incentive program on our Toronados and Trofeos will generate additional consumer interest in these all-new luxury coupe models which are showing a 33-percent sales increase for the first five months of the model year compared to a year ago," said David E. Lahti, Oldsmobile's general sales and service manager.

All 1990 Oldsmobiles also come with the "Oldsmobile Edge" customer satisfaction program that allows buyers who are not completely satisfied with their vehicle to return it within 30 days or 1,500 miles for full credit toward the purchase of another Oldsmobile. The "Edge" program also offers a 24-Hour Roadside Assistance service and Bumper-to-Bumper Plus 36-month or 50,000-mile warranty at no additional charge.

PITTSBURGH (MARCH 13) PR NEWSWIRE - J&L Specialty Products Corp. today announced that its parent company, Specialty Materials Corp., has entered into a merger agreement with Ugine ACG whereby Specialty Materials Corp. will become a wholly owned subsidiary of Ugine ACG.

Ugine ACG, headquartered in Paris, is the world's leading stainless steel producer and operates six plants in France. It is a subsidiary of Usinor Sacilor, the world's second largest steel producer.

The merger will offer J&L the benefits of Ugine's technology and international sales network. The acquisition by Ugine is in line with the company's strategy of globalization of its stainless steel operations.

"The change in ownership should have no adverse effect on our employment levels or the continued operation of J&L's steelmaking and finishing facilities," according to Claude F. Kronk, president and chief executive officer of Specialty Materials Corp. and J&L Specialty Products Corp. "A new board of directors will be appointed by Ugine ACG and J&L will continue to be headquartered in Pittsburgh," he added.

The purchase price to be paid by Ugine ACG to acquire Specialty Materials Corp. and its wholly owned subsidiary, J&L Specialty Products Corp., was not disclosed. Completion of the transaction, which is subject to the approval of various regulatory agencies, the stockholders of Specialty Materials Corp. and the board of directors of Ugine, is anticipated to occur no later than June 15, 1990.

Upon completion of the acquisition, holders of J&L's $200,000,000 of 14 percent senior subordinated notes due 1999 will have the opportunity to have J&L redeem such notes at a purchase price equal to the principal amount thereof plus accrued interest.

J&L Specialty Products Corp., with sales in fiscal 1989 of $848.7 milllion is a leading producer of stainless steel sheet, strip and plate. With nearly 1,300 employees, J&L operates steelmaking and finishing plants in Midland, Pa.; Louisville, Ohio; and Detroit.

SAN JOSE, CA (MARCH 14) PR NEWSWIRE - ICOT Corp. (NASDAQ: ICOT) today announced that in the initial public offering of VeriFone Inc. stock, ICOT sold 110,000 shares of its total holdings of 750,000 shares. This sale leaves ICOT with a balance of 640,000 shares of VeriFone common stock.

ICOT received 1,500,000 shares of VeriFone common stock in connection with the sale of its EFTPOS business to VeriFone in June 1989. Subsequent to that event, VeriFone effected a 2 for 1 reverse split, leaving ICOT with

750,000 shares.

ICOT is contractually obligated to hold its remaining VeriFone shares until September 1990. No decision has been reached by ICOT's board of directors regarding the disposition of the remaining VeriFone shares.

ICOT Corp. is a provider of data communications systems including network interfaces and gateways. The products are sold throughout the world from its corporate headquarters in San Jose, sales offices located throughout the United States and a wholly-owned subsidiary in the United Kingdom.

HAUPPAUGE, NY (MARCH 14) PR NEWSWIRE - United Guardian, Inc. (NASDAQ: UNIR), has announced that Diversey Ltd., a subsidiary of the Molson Companies Ltd. (Toronto, Montreal: MOL), has received notice from the veterinary medicines directorate of the British government that it has now authorized the issuance of a license for the use of Clorpactin WCS-90 to treat mastitis infections in dairy cows.

United-Guardian, Inc., which manufactures Clorpactin, has granted Diversey an exclusive world-wide license for the marketing of this non-antibiotic to replace antibiotics in the treatment of many types of mastitis. United anticipates that its earnings from the sale of Clorpactin for this use should exceed $3 million when Diversey has reached worldwide distribution.

"In view of the fact that so many milk samples are showing contamination by antibiotics," said Dr. Alfred R. Globus, chairman and chief executive officer, "the use of Clorpactin, which does not leave residues in the milk, could eliminate antibiotic-resistance infections in children who consume the contaminated milk."

United-Guardian is a manufacturer of pharmaceuticals and medical devices.

LONDON (MARCH 14) PR NEWSWIRE - Hillsdown Holdings PLC today released the Statement of the Chairman, Consolidated Profit and Loss Account, and Summarized Consolidated Balance Sheet as follows:

Year End Highlights -- 30 percent increase in profits before tax -- 15 percent increase in operating profit margins -- 17

percent increase in earnings per share -- 20 percent increase in dividend for the year

Statement of the Chairman
Harry Solomon, Chairman
Results

1989 was another year of excellent progress with record profits and earnings. Profits before tax rose by 30 percent to 195.6 million pounds sterling and earnings per share increased by 17 percent to 31.6 pence.

A final dividend of 5.4p is proposed, making a total of 7.2p for the full year. This represents a total dividend increase of 20 percent over the 1988 level and demonstrates our continued confidence in the future.

Operations Operating profit increased from 195 million pounds to 231.9 million pounds on turnover up by 4 percent to 3,688 million pounds. There was a further increase in operating margins from 5.5 percent to 6.3 percent reflecting the benefits of our policy of investing in our businesses and adding value to our products. These highly satisfactory profits were achieved despite difficulties in the trading environment in a number of our markets.

CONTACT: Harry Solomon, chairman of Hillsdown Holdings, in London, 011-44-1-794-0677; or Jeff Zilka or Karyn Plickert of Dewe Rogerson, in New York, 212-688-6840, for Hillsdown Holdings

#90073p0053 03/14/1990 ~PR Newswire

WASHINGTON (MARCH 14) PR NEWSWIRE - United Press International today pressed its case against Reuters on several fronts, asking U.S. District Court in New York to rescind a 1984 news photo exchange agreement between UPI and Reuters on grounds that Reuters acted fraudulently in urging UPI photo clients to shift to Reuters.

The rescission request followed a District Court hearing yesterday on a preliminary injunction to prevent Reuters' shutting off its supply of news photos to UPI pending the outcome of a trial yet to be scheduled.

Federal Judge Peter Leisure today ordered Reuters to continue supplying photos to UPI through March 19, but denied the injunction UPI sought.

UPI's request for rescission of its contract with Reuters was filed today in an amendment to UPI's previous counterclaims. Rescission would mean restoring to UPI ownership the international photo operation UPI sold to Reuters in 1984.

In June 1984 UPI and Reuters respectively agreed to supply domestic and foreign photos to one another through 1994.

Reuters halted the flow of news photos to UPI without warning for more then four hours, Feb. 16, but later restored the service. Litigation by both parties followed, with UPI asking for a temporary restraining order against Reuters' service interruptions, a request granted by the federal court, Feb. 27.

UPI charges that litigation Reuters filed Feb. 16 is a diversionary move to obscure Reuters' efforts since 1985 to compete for UPI clients without compensating UPI for $1.6 million in lost revenue.

UPI March 2 additionally filed a request for arbitration of the dispute with the International Chamber of Commerce Court of Arbitration.

UPI, founded in 1907, has nearly 200 bureaus and is represented in 90 nations. UPI is owned by Infotechnology Inc. (NASDAQ: ITCH), an information and communications company.

CONTACT: Milt Capps of UPI, 202-898-8254 or 301-772-4086 (residence).

#90073p0054 03/14/1990 ~PR Newswire

HAMILTON, Bermuda (MARCH 14) PR NEWSWIRE - Sea Containers Ltd. (NYSE: SCR) announced today on the eve of its annual meeting of shareholders that it has reached agreement with Itel Corporation to terminate the tank container business sale contract which was made on Jan. 11, 1990, prior to receiving a higher offer from Tiphook PLC (through Temple Holdings Ltd.) for these assets.

Sea Containers had agreed to pay $3.35 million to Itel in connection with this termination, part of which would have been payable in any event if the sale had not been completed.

The execution of this termination agreement removed the last impediment to acceptance of the irrevocable offer of Temple Holdings Ltd. on behalf of Stena AB and Tiphook PLC to acquire certain container and ferry assets owned by the company. The irrevocable offer was accepted today and assuming the asset sales are approved at tomorrow's annual general meeting of shareholders to be held in Hamilton, Bermuda, the asset sales should be completed on March 31, 1990.

The company advised that it had agreed to reduce the purchase price consideration for the ferry assets by $1 million due to a misunderstanding over shipyard subsidy arrangements.

The company has received the consent of the Minister of Finance of Bermuda to the proposed alteration of its Memorandum of Association, which is an integral part of the recapitalization plan to be voted on tomorrow. The alteration was necessary to permit the company to purchase its own shares.

James B. Sherwood, President, said that he has received many questions about the value of the recapitalization plan. He pointed out that the company and subsidiaries would be purchasing common shares from tendering shareholders at $70 each. If more than 7 million shares are tendered, then the company will purchase the same percentage from each shareholder and return the unpurchased shares. The maximum number of shares currently outstanding which might be tendered is 11.8 million. As to the underlying value of the remaining shares, he said that presentations would be made to investors and analysts in the coming days indicating a range of $150 - $170 per common share. He said that 1989 earnings would also be announced at the first presentation to be held in New York City on Friday, March 16 and these would be in line with earlier expectations. Earnings from operations for 1990 have been forecast at approximately $10 per common share, rising to $13 in 1991 given a continuance of stable business conditions.

LOWELL, MA (MARCH 14) PR NEWSWIRE - Wang Laboratories, Inc. (AMEX: WAN) today announced that, effective immediately, Ken Olisa, vice president for applications engineering, has been appointed vice president and general manager for Europe, Africa and the Middle East and will be responsible for all sales and marketing activities in these geographic areas. He replaces Arend Vieggeert who asked that for personal reasons he be relieved of these responsibilities.

Richard W. Miller, president and chief operating officer, said, "Ken has been assigned this important work in order to ensure this theater's profitability for the fiscal year and to establish a sound business plan for the next fiscal year. Ken has my full confidence and will be instrumental in helping both to communicate our new direction to our customers and to build the revenue we need to fuel our turnaround.

"Ken was pivotal in launching our customer-driven product strategy, 'Innovation on Standards,' and has recently completed a comprehensive presentation of this strategy to our customers around the world. As vice president for applications engineering, Ken helped build the organization that will turn our customers' needs into quality information processing

solutions. Moreover, Ken has served as district sales manager for London as United Kingdom marketing manager, and for three years as director of marketing for Europe, Africa and the Middle East, learning first-hand the unique needs of customers in this important Wang market."

In his new position, Olisa will report directly to Miller. His appointment is for at least the remainder of the fiscal year, and no decision regarding a permanent replacement of Vieggeert has been made.

The organization that had previously reported to Olisa will now report to Horace Tsaing, executive vice president for research and development.

WOBURN, MA (MARCH 14) PR NEWSWIRE - Thermo Cardiosystems Inc. (AMEX: TCA) announced today that Victor L. Poirier has been named president of the company, a position previously held by John W. Wood Jr., who will continue as chairman and chief executive officer.

Poirier has served as vice president and chief operating officer of Thermo Cardiosystems, a subsidiary of Thermedics Inc. (AMEX: TMD) of Woburn, Mass., since the company's public offering in January 1989. Poirier is also senior vice president of Thermedics Inc.

Poirier has been associated with Thermo Cardiosystems' artificial-heart program since 1966 and was instrumental in developing the initial concepts in ventricular-assist devices. He has been credited with contributing to the development of the advanced biomaterials, blood pumps, and control systems now being successfully used in patients.

"Vic has devoted more than 20 years to the development of our ventricular-assist devices," said John Wood. "His leadership and management skills, combined with his technical experience, are helping us bring Thermo Cardiosystems' products into the commercial marketplace."

Poirier is an assistant professor of surgery at Tufts University School of Medicine. He holds a B.S. in mechanical engineering and an M.B.A. from Northeastern University. Poirier holds numerous patents on components of heart-assist devices and has published over 60 papers on his research.

Thermo Cardiosystems Inc. is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the left ventricle of the natural heart for patients suffering from cardiovascular

disease. Thermo Cardiosystems is a subsidiary of Thermedics Inc. and Thermo Electron Corporation (NYSE: TMO).

#90073p0063 03/14/1990 ~PR Newswire

SOMERVILLE, NJ (MARCH 14) PR NEWSWIRE - Unimed, Inc. (NASDAQ: UMED), today reported total consolidated revenues of $1,038,000 for the first fiscal quarter ended Dec. 31, 1989, a 19 percent increase over the $873,000 reported a year earlier. Consolidated net loss for the first fiscal quarter totaled $488,000, or 15 cents per share, compared with a net loss of $387,000, or 12 cents per share, for the same period of fiscal 1989.

The increase in net loss for the 1990 first fiscal quarter was primarily attributable to research and development expenses increasing to $626,000 from $511,000 a year earlier. This increase was mostly due to the continuation and expansion of Marinol and Spiro-32 programs, based on favorable results of earlier work.

Pharmaceutical segment revenue for the first quarter of fiscal 1990 was $480,000, up 18 percent from the $406,000 in the first quarter of 1989. Marinol sales increased 16 percent and Serc sales increased 8 percent over the comparable period last year.

Chemical segment revenue in the first quarter was $480,000, a 31 percent increase from the $366,000 reported in the same quarter of fiscal 1989.

Harold J. Tenoso, Ph.D., Unimed's president and chief executive officer, commented, "Continued advances in our product portfolio, progress in negotiations for strategic alliances, and expected revenue increases in both our pharmaceutical and chemical segments, indicate our growth potential."

Unimed is a pharmaceutical company specializing in the early acquisition, development and marketing of new cancer therapeutic compounds. With its unique "technology management" strategy, the company bridges the gap between university research centers and pharmaceutical manufacturers to bring promising new therapeutics to market.

#90073p0064 03/14/1990 ~PR Newswire

HARRISBURG, PA (MARCH 14) PR NEWSWIRE - Attorney General Ernie Preate Jr. today said the Macy's department store chain will pay $10,000 in penalties and costs to settle allegations that it misled consumers through an advertised "sale" of jewelry.

"Consumers who rely on advertising to make economic decisions have a right to expect that the ads accurately state the facts," Preate said. "I'm determined to eliminate false or misleading advertising."

The allegations against Macy's are contained in an "assurance of voluntary compliance" filed today in Commonwealth Court by the Philadelphia office of Preate's Bureau of Consumer Protection.

According to the assurance, Macy's ads and signs indicated that certain fine jewelry was on sale for a limited time at reduced prices.

But the assurance alleges that the "sale" violated the state's Unfair Trade Practices and Consumer Protection Law because the advertised prices didn't "accurately reflect a bona fide reduction in price" from the chain's usual selling prices.

The assurance also alleges that the duration of the sale "was not reasonably limited."

Under terms of the agreement, Macy's denies any wrongdoing but agrees to pay the state an $8,000 civil penalty and $2,000 in costs of investigation.

The chain also promises that it won't represent that any price is a reduction from the usual selling price unless the "usual" price is one at which the goods were or are to be "openly and actively offered for sale...for a reasonably substantial period of time" prior to or following the sale.

Deputy Attorney General John E. Kelly, attorney-in-charge of the Bureau of Consumer Protection's Philadelphia office, said the assurance resulted from an investigation conducted by the bureau.

Preate said the bureau is "actively involved in monitoring the advertising practices of other retailers throughout the state."

Macy's five department stores in Pennsylvania are in Allentown, King of Prussia, Langhorne, Montgomeryville and Springfield.

WOBURN, MA (MARCH 14) PR NEWSWIRE - Thermo Cardiosystems Inc. (AMEX: TCA) today announced that it has filed an Investigational Device Exemption (IDE) application with the U.S. Food and Drug Administration for permission to implant a battery-operated ventricular-assist device (VAD) in patients whose own hearts can no longer support life. Pending the goverment's approval, the company expects the first clinical implant of this type of device to take place this summer.

"The IDE will mark the beginning of an important medical breakthrough," said Victor L. Poirier, president of Thermo Cardiosystems. "For the first time, technology will support a patient's heart without attaching the patient to a console. With our battery- operated VAD, the patient will be able to move about freely, and should even leave the hospital while awaiting a donor heart."

Initial clinical trials of the battery-operated systems will take place at the Texas Heart Institute at St. Luke's Episcopal Hospital in Houston under the direction of Dr. O.H. Frazier, director of the Institute's

Cardiovascular Surgical Reseach Laboratories and Cardiac Transplant Service and professor of surgery at the University of Texas Medical School in Houston.

Thermo Cardiosystems is currently conducting clinical trials of its air-driven VAD under a separate IDE. The air-driven device recently supported a patient's failing heart for a world record-setting 233 days.

Thermo Cardiosystems Inc. is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the left ventricle of the natural heart for patients suffering from cardiovascular disease. Thermo Cardiosystems is a subsidiary of Thermedics Inc. (AMEX: TMD) and Thermo Electron Corporation (NYSE: TMO).

#90073p0070 03/14/1990 ~PR Newswire

SHEFFIELD, AL (MARCH 14) PR NEWSWIRE - Reynolds Metals Company (NYSE:RLM) today announced it will spend approximately $112 million at its Listerhill aluminum sheet plant here over the next three years for 13 improvement projects. This brings to $400 million the Listerhill plant's capital projects designed to improve product quality and reduce conversion costs of aluminum can stock, and to increase production capacity for can end stock.

The $112 million expansion and quality improvement program announced today is in addition to a new $125 million aluminum casting facility currently under construction at the plant, and more than $150 million in other improvements. These programs are part of Reynolds continuing effort to meet the increasing quality requirements of the can making industry.

The majority of the Listerhill plant's annual capacity of more than 400,000 metric tons is dedicated to the production of coiled aluminum sheet for beverage can and can end manufacturing.

According to J. Wilt Wagner, Mill Products Division general manager, "These projects underscore Reynolds commitment to make the Listerhill plant a world class operation positioned to competitively produce can body and end stock of the very highest quality."

Included in the $112 million capital program is a major upgrade to the plant's three-stand cold rolling mill that will increase production speeds and provide improved quality through the installation of new gauge controls, drive motors, and mill entry and exit auxiliary equipment.

In addition, plans call for modifications to the hot line, including new computerized tension and speed controls for the four- stand, 120-inch hot mill and mechanical equipment improvements to the single-stand, 130-inch hot mill. Other projects are designed to improve productivity, recovery rates and production quality. Work will begin immediately with the majority of these projects scheduled for completion in 1991.

The balance of the capital is being spent on modernization of the hot line including new coolant systems, automated scheduling, temperature control and sensor systems, and furnace upgrades. In addition, the coating line for end stock is being expanded and modernized.

#90073p0071 03/14/1990 ~PR Newswire

DALLAS (MARCH 14) PR NEWSWIRE - Recognition Equipment Incorporated (NYSE: REC) announced today that it has received a notice of default under an agreement with the Federal Reserve Banks (FRB) for the supply of second generation currency systems, commonly called the Automated Currency Processing System (ACPS). Recognition's contract to provide maintenance services for first generation currency systems is not affected by this action.

Recognition and the FRB are currently in discussions concerning the status of the ACPS program. While the outcome of the discussions cannot presently be determined, if the ACPS contract is terminated, second-quarter earnings would be impacted and the company's backlog would be reduced by $10.3 million. In addition, if the termination is the result of Recognition's default, the company could be liable for substantial damages. The impact on earnings or any potential damages cannot be determined at this time.

Recognition said it believes the notice of default is inappropriate and intends to resist any termination of the contract on the basis of the alleged default.

In January 1988, the FRB awarded Recognition a contract to deliver up to 100 ACPS systems and issued an initial delivery order for 26 systems valued at $10.3 million. In October 1989, the company accrued approximately $10 million for anticipated losses in connection with the contract.

#90073p0075 03/14/1990 ~PR Newswire
LONDON (MARCH 14) PR NEWSWIRE - 1989 has been another record year for profits and turnover for British Aerospace PLC, Britain's largest manufacturer of engineering based products and one of Europe's fastest growing companies, announced today.

Sales, at their highest ever level of 9,085 million pounds sterling, included a full year of Rover sales for the first time as against four months in 1988. The year-end order book stood at 11.4 billion pounds.

With pre-taxation profits increasing to 333 million pounds after exceptional profits and costs, a final dividend of 14.6 pence per ordinary share is proposed. This amounts to 22.7 pence for the full year - an increase of 10 percent over 1988.

During 1989, 60 percent of British Aerospace sales were overseas and in the last 10 years the direct contribution to the United Kingdom balance of payments in the shape of exports from the United Kingdom was over 20 billion pounds.

Commenting on the record figures, Professor Roland Smith, chairman of British Aerospace PLC said:

"I am confident that, with further moves toward integration in Europe, particularly in the defense businesses, and with the important opportunities opening up in Eastern Europe, the aerospace businesses can continue to provide profits growth. Together with the opportunities provided by our more recent acquisitions, the business as a whole is based more soundly than for many years."

#90073p0076 03/14/1990 ~PR Newswire
STOCKHOLM (MARCH 14) PR NEWSWIRE - Net sales in 1989 of the Alfa- Laval Group, the Sweden-based supplier of industrial, food processing and agricultural plants and equipment, amounted to MSEK 15,227, up 23 percent compared with 1988. Nine percentage points of this increase are attributable to acquisitions. Order bookings in the same period rose 24 percent to MSEK 16,775.

Consolidated income after net financial items increased 34 percent to MSEK 1,412. Operating income after depreciation totalled MSEK 1,310 (43 percent higher than last year). Profit per share after full taxes was SEK 15.80, compared with SEK 11.90 a year earlier.

Return on capital employed before taxes was 20.1 percent (19.0), and return on adjusted equity capital after full taxes improved from 18.1 to 21.9 percent.

At year-end 1989, total liquid funds amounted to MSEK 4,250, compared with MSEK 3,976 at the same date a year earlier. At the same time, liquid funds were MSEK 284 higher than total external borrowing.

All Group business areas posted favorable order bookings and high capacity utilization in the production units. The average number of employees was 19,717, of whom 5,058 were in Sweden.

During the first two months of 1990, invoiced sales was 17 percent above last year. Newly acquired companies accounted for 7 percentage points of the increase. It is anticipated that the trend of consolidated net sales in 1990 will correspond to the growth objective of 15 percent. Income is expected to increase at approximately the same rate.

#90073p0077 03/14/1990 ~PR Newswire

MIDDLETON, WI (MARCH 14) PR NEWSWIRE - Agracetus, Inc., a wholly owned subsidiary of W.R. Grace & Co., and Helibioagri SRL of Giba-Rovigo, Italy, have reached an agreement to develop and market microbial products in Europe. The agreement covers biopesticides for control of major plant diseases and growth-promoting microbial products to improve yield performance of field and specialty crops.

Under terms of the agreement, Helibioagri will market products developed utilizing Agracetus' proprietary microorganisms and unique formulation and production technology. Helibioagri has begun production for sales this year, of Gold Coat(TM), a Rhizobium product for use on soybeans, and Zea Nit Plus, a microbial product that improves the yield of corn. In future years, Helibioagri is to commercialize selected Agracetus biocontrol products in European markets.

"Agracetus biocontrol products are targeted for crops where control of soilborne plant disease is a major recognized problem, and current chemical pesticides have limited effectiveness," said Dr. Robert E. Walton Agracetus' chairman. Currently, research is under way on microorganisms that control plant and seedling diseases, including those caused by Pythium, Fusarium, Rhizoctonia and Phytophthora.

"Agracetus' proprietary formulation, based on a semi-solid state production of the microorganisms in vermiculite, provided the basis for

this agreement with Helibioagri," said Dr. Alan Paau, senior scientist at Agracetus and project leader for biocontrols. "Our technology offers an improved production system which eliminates the need for large scale fermenters. The system is also efficient for production of some microorganisms that are not compatible with standard liquid-based systems " he continued. In addition, Agracetus' technology provides a versatile formulation carrier that has been tested successfully for seed coating, granular application, dusting, and as an emulsifiable concentrate suitable for spraying in furrow at planting or banding later in the season.

In Europe, Helibioagri is the leading company marketing microbial products for improving crop performance, with strength in Italy, Austria, Greece, the Benelux countries and Spain. The company plans to expand its sales into other parts of Europe and Eastern Europe in the coming years.

Agracetus, Inc. develops genetically improved crops using recombinant DNA techniques as well as biopesticide products which control major plant diseases and improve crop yields. All of Agracetus' microbial research is focused on development of products based on naturally occurring isolates rather than genetically engineered microorganisms. Agracetus is located in Middleton.

PHILADELPHIA (MARCH 14) PR NEWSWIRE - Medical researchers at Temple University in Philadelphia soon will be able to see the results of sonograph studies used to diagnose peoples' ills just minutes after tests are performed -- rather than the hour it now takes -- as a result of a first-in-the-U.S. test of a "switched megabit data service" (SMDS) by Temple and Bell Atlantic (NYSE: BEL).

The test, slated to begin in the summer of 1990, will be conducted by Bell of Pennsylvania, a Bell Atlantic Company, using optical fiber cable already in its network and metropolitan area network (MAN) switching equipment provided by QPSX Systems Inc., the U.S. subsidiary of Australian-based QPSX Communications Pty., Ltd.

Information transfer speeds are exceptionally fast using SMDS, even for sonograms and other digitized images that require millions of bits of data to be transmitted and processed to generate a single image. This means each user of the service will almost never get a "busy" signal when trying to send data -- and that the information will arrive seemingly in an instant.

Significantly, the high-speed network will use equipment from QPSX based upon the emerging international standard (A) -- a standard which, in fact, is based on QPSX's leading edge technology.

Bell Atlantic will be evaluating MAN technology from a variety of vendors; in addition to this test of QPSX technology, the company intends to test MAN equipment from AT&T, also to be built to the emerging international MAN standard (A). Bell Atlantic anticipates offering a general, commercial SMDS service by the winter of 1991-92 to a number of markets, including higher education, health care, research firms, and federal, state and local governments.

Temple University, based in Philadelphia, is a member of the Commonwealth System of Higher Education in Pennsylvania and serves a diverse population of nearly 34,000 students in 14 schools and colleges. Temple offers a baccalaureate, master's as well as doctoral and professional programs in a wide variety of disciplines including medicine, law, dentistry, pharmacology, engineering, business, biology, chemistry and physics.

New Jersey-based QPSX Systems, Inc., is the U.S. subsidiary of QPSX Communications Pty., Ltd. QPSX, a subsidiary of Telecom Australia, is a pioneer in MAN technology, having tested the world's first operating MAN.

Philadelphia-based Bell Atlantic Corporation owns and operates seven telephone companies: Bell of Pennsylvania, Diamond State Telephone serving Delaware, New Jersey Bell, and the Chesapeake and Potomac

Telephone Companies serving Maryland, Virginia, West Virginia and Washington. Bell Atlantic also owns companies that provide cellular communications, computer maintenance and financial and leasing services in national and international markets.

#90073p0082 03/14/1990 ~PR Newswire

STAMFORD, CT (MARCH 14) PR NEWSWIRE - Cognitronics Corporation (AMEX: CGN) today announced net income of $839,000, or 37 cents per share, for the year ended Dec. 31, 1989, compared to a net loss of $509,000, or 23 cents per share, in 1988. In 1989, net income includes an extraordinary credit of $273,000, or 12 cents per share, attributable to the utilization of operating loss carryforwards. Included in the net loss for 1988 was a loss from discontinued operations of $396,000, or 18 cents per share. Revenues from continuing operations were $16,576,000 in 1989, up from $14,539,000 in 1988.

Net income for the three months ended Dec. 31, 1989, was $73,000, or 3 cents per share, vs. a net loss of $28,000, or 1 cent per share, in 1988. In the 1988 quarter, the net loss includes a loss from discontinued operations of $195,000, or 9 cents per share. Revenues from continuing operations for the fourth quarter were $4,036,000 in 1989 compared to $4,670,000 in 1988.

Matthew J. Flanigan, president of Cognitronics Corporation, stated, "The most significant factor in the company's outstanding performance for 1989 was the record revenue attributable to voice processing products, which exceeded $10 million in 1989, up 52 percent from $6.7 million in 1988. Sales of voice processing products to the telecommunications industry were exceptionally strong due to the high volume of McIAS systems and Model SRA and Model 688 plug-in announcers delivered throughout 1989. All of these products should continue to provide substantial revenue well into the new decade.

"During 1989, management shifted the major focus of the company's research and development effort to voice processing equipment. With the burgeoning growth of voice processing products throughout the world, management is eager to further exploit the company's high quality, flexible and versatile McIAS product line. A substantial R&D commitment has been made for the development of new and enhanced voice processing products and technology throughout 1990. The company's stronger financial position provides the resources to fund increased R&D and marketing efforts necessary to meet the challenges of the 1990s and benefit operations in the long term."

#90073p0086 03/14/1990 ~PR Newswire

UNIVERSAL CITY, CA (MARCH 14) PR NEWSWIRE - MCA Inc. (NYSE: MCA) announced today that it had entered into a definitive agreement under which MCA will acquire Geffen Records and its related music publishing business. Geffen Records is one of the leading labels in the record business and the last major independent record company. The closing of the acquisition remains subject to the obtaining of various regulatory and legal clearances.

MCA will issue 1,000,000 shares of a new Series B Participating Convertible Preferred Stock as consideration in the acquisition. Each share of preferred stock will pay a dividend equal to ten times the dividend paid on MCA common shares and will carry one vote per preferred share.

In connection with the merger, MCA and David Geffen, chairman of Geffen Records and the sole stockholder, have entered into a stockholder's agreement which governs the terms under which the preferred shares may convert into common shares in a ratio of ten shares of common for each preferred share. The stockholder's agreement also establishes limits on the number of preferred shares which may be converted and sold during a four-year period and contains a 20-year "standstill" agreement. Geffen will also enter into a long-term employment agreement providing for his exclusive services in the music industry as chairman and chief executive officer of Geffen Records.

MCA Inc. is a worldwide leader in the entertainment marketplace with production and distribution of theatrical film and television products, theme parks, recorded music, and book publishing.

Geffen Records, previously the largest independent record company in the world, earned worldwide sales of more than $225 million in 1989. Since the company was founded in 1980 by David Geffen, it has garnered 50 records that have been certified "gold" (selling more than 500,000 units in the U.S.); 22 that have gone "platinum" (more than one million units sold in the U.S.); and nine that have been certified multi- platinum -- including one of the biggest-selling albums of the decade (Guns N' Roses' "Appetite for Destruction").

Geffen Music, originally founded in 1987 as a publishing vehicle for Geffen Records-related projects, has, in recent years, expanded into an active and aggressive music publisher. Most notable among its stable of songwriters is Stephen Sondheim. The company is headed by President Ronny Vance.

#90073p0089 03/14/1990 ~PR Newswire

MORRIS TOWNSHIP, NJ (MARCH 14) PR NEWSWIRE - Allied-Signal Aerospace Company announced today that Eastern Airlines has selected Allied-Signal's Bendix/King Traffic Alert and Collision Avoidance System for its fleet of aircraft. The value of the contract is more than $30 million.

The Eastern order calls for delivery of 215 TCAS shipsets for six different types of aircraft. They will be manufactured by Allied-Signal's Bendix/King Air Transport Avionics division in Ft. Lauderdale, Fla.

Eastern joins more than a dozen airlines around the world that have announced their selection of the Bendix/King TCAS system. Bendix/King now has commitments for more than 3,100 shipsets representing nearly 60 percent of the announced TCAS market worldwide.

"The Bendix/King TCAS is a very solid product and we're pleased that it will soon be installed in our aircraft," said Captain Bill Stephens, vice president-technical services for Eastern. "We believe this program is a very positive step toward further enhancing air safety, particularly in congested areas."

"The selection of our system by Eastern has special meaning for us since the airline is headquartered in South Florida and we are virtually neighbors," said Robert M. Handley, director of marketing for Bendix/King. "As Eastern continues to rebuild and expand its operations, we look forward to becoming their avionics partner in those ventures."

TCAS is an airborne collision avoidance system that operates independently of ground-based radar stations. It informs pilots of the location of aircraft in the vicinity, alerts them to potential threats and, if the situation warrants, advises them to either climb or descend to avoid possible mid-air collisions.

The federal government has ordered all aircraft carrying more than 30 passengers flying in U.S. airspace be equipped with collision avoidance systems by the end of 1993.

Allied-Signal Aerospace Company is a unit of Allied-Signal Inc. (NYSE: ALD), an advanced technology company with businesses in aerospace, automotive products and engineered materials.

#90073p0095 03/14/1990 ~PR Newswire
WATERTOWN, MA (MARCH 14) PR NEWSWIRE - Ionics, Incorporated (AMEX: ION) today announced results for the year and quarter ended Dec. 31, 1989. Revenues for the year were $108.9 million, up $20.7 million or 23.4 percent compared to 1988.

Net income was $3.6 million or 85 cents per share, up 44.6 percent over net income of $2.5 million or 64 cents per share in 1988.

For the fourth quarter, revenues were $30.0 million and net income was $1.1 million, or 25 cents per share, compared to revenues of $26.3 million and net income of $857,000, or 21 cents per share one year earlier. Net year-end backlog climbed to $62.2 million up 27.6 percent compared to $48.7 million one year earlier.

Commenting on the 1989 results, Arthur L. Golstein, Ionics' president and CEO noted that "revenues, net income, bookings and backlog all represented record levels for the company and that the fourth quarter results made it the tenth consecutive quarter of improving revenue and net income performance compared to the prior year." He also noted that "1989 marked

the completion of the company's five year strategic reorientation program. During the year the company's capital equipment business became rejuvinated in what appeared to be the beginning of a new capital spending cycle and several new service-related corporate projects began to contribute to earnings performance."

Ionics is a separations technology company involved worldwide in the manufacture and sale of membranes and related equipment for the purification of water, in the supply of purified water and water treatment chemicals, and in the sale of bottled water and home water purifiers.

AUSTIN, TX (MARCH 14) PR NEWSWIRE - Tracor Applied Sciences, Inc., a subsidiary of Tracor, has received a contract from the Naval Underwater Systems Center (NUSC) to provide engineering and technical services to its antisubmarine warfare advanced development programs, it was announced today. This three-year contract has a total value of $4.5 million.

K.B. Hamilton, group vice president for Tracor Applied Sciences, said Tracor will provide engineering and technical support services involving design, installation, and test of low-frequency hull-mounted and towed sources, and multiline towed arrays. This work also will include efforts associated with the Navy's USS GLOVER initiative which provides a test platform for sonar development programs.

Hamilton said that Tracor has been providing similar support to NUSC sonar programs since 1974.

The engineering services division of Tracor Applied Sciences' Systems Technology Operations, Groton, Conn., will provide the engineering and technical services. Marshall P. Hall, division vice president, announced that Armand E. Halter will serve as program manager.

Tracor, owned by privately held Westmark Systems, Inc., is an international technological products and services company with headquarters in Austin.

The company is a significant engineering and support contractor in sonar, communications and aviation; a leader in the development and production of electronic countermeasures systems and other advanced defense electronics; and a major manufacturer of analytical instruments and electrical and electromechanical components.

HADERA, ISRAEL (MARCH 14) PR NEWSWIRE - American Israeli Paper Mills Ltd. (AMEX: AIP) today reported financial results for the fiscal year ended Dec. 31, 1989.

Consolidate sales rose by 5.1 percent in 1989 and reached NIS 460.2 million (US$234.5 million), compared with NIS 437.9 million ($223.1 million) last year.

Net earnings for 1989 rose by 19.3 percent, and amounted to NIS 13.6 million ($6.9 million), compared with 1988 earnings of NIS 11.4 million ($5.8 million).

Earnings per share, both primary and fully diluted, for 1989 amounted to NIS 3.58 ($1.83), compared with earnings per share of NIS 3.01 ($1.53) for the previous year.

Sales increased this year due to both an increase in unit sales and expanded group activities in several areas. This was a significant achievement in view of the continued drop in local demand which characterized the Israeli economy during the year, as well as increased competition form imported paper and paper products.

The rise in net income was primarily attributable to the company's comprehensive reorganization program initiated at the end of 1988. Achievements of the on-going program to date include considerable reduction in manpower, cuts in other costs, and restructuring at both managerial and operational levels.

The group invested approximately $8.3 million in 1989, compared with some $22.6 million in 1988 and about $30 million in 1987. Major investments in 1989 were for the acquisition of a new boiler in the Hadera plant, and the installation of new computers and computerized process controls.

The company's board of directors declared a cash dividend for the year 1989 in the amount of NIS 0.55 ($0.27) per share. The dividend will be paid on June 4, 1990 to shareholders of record on May 8, 1990. The dollar value of the cash dividend is given at the exchange rate in effect on March 13, 1990 of NIS 2.025 to $1.00. The rate of exchange on the record date will determine the exact dollar payout.

#90073p0110 03/14/1990 ~PR Newswire

FRANKLIN, MA (MARCH 14) PR NEWSWIRE - Stuarts Department Stores, Inc. (NASDAQ: STUS) announced today that the company anticipates reporting a fourth quarter loss of approximately $350,000, or (8 cents) per share, and a loss of approximately $550,000, or (13 cents) per share, for the full fiscal year ending Feb. 3, 1990.

Sales were $49,265,000 for the fourth quarter and $150,273,000 for the full fiscal year. Final results will be available at the end of this month.

Joseph Ettore, president, stated that the reasons for the fourth quarter loss were a 1.7 percent decline in same-store sales and a substantially lower than planned gross profit margin due to heavy promotional and clearance markdowns.

Ettore commented: "The market environment during the Christmas season was unusually competitive and highly promotional. As a result, we decided to increase the breadth and depth of clearance markdowns in excess of that taken in prior years. We also elected to take additional clearance markdowns at year-end to further align inventories in connection with our updated merchandising and marketing strategy, which we began to roll out at the beginning of this month. Inventories on a same-store basis are currently below last year's levels."

Ettore joined Stuarts as its president in October 1989, replacing the previous president who had been ill for the preceeding six months. The updated merchandising and marketing strategy is the result of an extensive company-wide strategic planning process that was conducted during the

last five months of 1989.

Stuarts Department Stores, Inc. operates 23 self-service discount department stores located in Massachusetts, New Hampshire, Rhode Island, Vermont, Connecticut and Maine, 22 under the name "Stuarts" and one under the name "Harry's." The company's stores sell a wide variety of general merchandise selected to satisfy the clothing, home, recreational and convenience needs of the blue collar and middle income family.

#90073p0111 03/14/1990 ~PR Newswire

THE WOODLANDS, TX (MARCH 14) PR NEWSWIRE - Mitchell Energy & Development Corp. (AMEX: MND) today reported net earnings for its fiscal 1990 year of $30.4 million, or 65 cents per share, a 41 percent increase over the prior year's $21.5 million, or 46 cents per share.

Revenues for the year ended Jan. 31, 1990, totaled $658 million, compared with $577.2 million a year earlier.

Fourth-quarter earnings amounted to $11.3 million, or 24 cents per share, on revenues of $199.3 million. In the same period last year, the company earned $5.1 million, or 11 cents per share, on revenues of $152.7 million.

Chairman and President George P. Mitchell attributed the improved financial performance for the year primarily to higher operating earnings in all three operating divisions. Earnings from energy operations were favorably affected, in particular, by a fourth-quarter surge in natural gas and gas liquids demand following last December's nationwide cold wave, he said. Real estate operations benefited throughout the year from record-level residential lot sales and other gains at The Woodlands, the master-planned community that the company is developing 27 miles north of Houston's central business district, he added.

Prior-year earnings were affected by a number of positive and negative items -- including a gain related to a change in tax accounting methods -- that largely offset each other, Mitchell noted.

Mitchell Energy & Development Corp. is a large independent energy producer and is a major real estate developer in the Houston-Galveston region.

TORONTO (MARCH 14) PR NEWSWIRE - Health Care Products Inc. (TSE: HCP.A, NASDAQ: HCPAF) has been requested by the staff of the Ontario Securities Commission to make the following announcement:

"The Company has withdrawn all financial forecasts made by it or on its behalf with respect to its 1988, 1989, 1990 and 1995 sales and operating results. The forecasts withdrawn include those made in respect of 1989, 1990 and 1995 in the "Confidential Broker Report Volume 1, number 3 (August, 1989), the Forecast Consolidated Statement of Earnings for the year ending December 31, 1988 in the prospectus for the Company dated February, 1988, the Forecast Consolidated Statement of Earnings for the year ending December 31, 1989 in the 1988 third quarter financial statements, and the forecast for 1989 second quarter sales contained in the Chairman's Message to Shareholders included with the 1989 first quarter financial statements.

The 1988 and 1989 forecasted results proved to be significantly overstated when compared with the actual annual audited and the actual interim unaudited sales and operating results for these periods. As a result, the Company is withdrawing all forecast information either filed as part of its public disclosure record or otherwise made available to investors. The Company will not be restating the forecasts which have been withdrawn and will not issue any further forecasts without the prior approval by staff of the Ontario Securities Commission. The Company expects to release its annual audited financial statements for the year ended December 31, 1989 by May 31, 1990."

Independent of the above announcement, and in connection with the market activity of its shares, the company wishes to state that it attributes the

significant descent in the price of its shares in part to a campaign by a few individuals to discredit the company and its products.

The company reminds all of its shareholders that the anti- microbiological and safety claims of its products have been approved by, among others, the U.S. Environmental Protection Agency (EPA) and the Health Protection Branch of the Canadian Government. Health Care currently sells its products to numerous hospitals, dental facilities and industrial centers in Canada and the United States.

The company is determined to achieve its objective of becoming a highly successful operation in the health care products industry. The actions of a few will not be permitted to imperil the interests of the majority of shareholders.

AUSTIN, TX (MARCH 14) PR NEWSWIRE - Joe C. Culp has resigned as executive vice president of Communications Transmission, Inc. (CTI) (NASDAQ/NMS: CTIA) effective March 7, 1990, announced G.M. Batsche, president of CTI.

Culp advised he has decided to leave CTI and pursue a full-time career as a telecommunications consultant. CTI is naturally disappointed in Culp's decision to leave, but certainly respects his wishes. Culp plans to stay and run his consulting business from the Austin area, and has agreed to work with CTI in his capacity as a consultant. Culp will be assigned specific tasks as need arises.

CTI wishes Culp well in his activities, and are certain he will continue to contribute to CTI in his new capacity.

CTI which is headquartered in Austin, Texas, is a leading provider of sophisticated communications transmission services, leasing its transcontinental fiber optic and digital microwave network to large corporations and common carrier users.

#90073p0121 03/14/1990 ~PR Newswire

ANAHEIM, CA (MARCH 14) PR NEWSWIRE - Honeywell Test Instruments Division, Denver, is formally introducing the fastest photographic quality color printer on the market.

The new electronic imaging printer/recorder, called COLORADO(TM), will be the first to utilize 3M Corp.'s new dry silver color technology. It will be demonstrated for the first time at the National Computer Graphics Association (NCGA) trade show, March 19-22 in Anaheim.

In addition to producing prints with two-four times greater resolution than competitive technologies, Honeywell's dry silver color printer/recorder is capable of making four 8-1/2 x 11 inch color prints per minute. This is at least six times faster than most competitive color imaging processes. The printer/recorder also produces high resolution color prints at a cost of $1.50 each, approximately half the cost of hardcopies produced by other continuous-tone technologies.

The announcement of this technological breakthrough is important news to the growing number of computer graphics advocates frustrated by the inability to current color imaging devices to quickly reproduce, low-cost, photographic quality color hardcopies of computer images. Historically, the reproduction capabilities of computer printers has lagged far behind the ability of today's computers to display high resolution color images.

"Dry silver color is one of the most important new color hardcopy technologies to be introduced in recent decades," said Ira Langenthal, vice president and general manager, Honeywell Test Instruments Division. "It has made a quantum leap in closing the gap between the image displayed on the computer screen and what is reproduced in hardcopy form. And it has done so while meeting the speed and cost requirements demanded by today's industry."

In August 1988, Honeywell and 3M announced plans to develop the first dry silver color imaging system. As part of the agreement, Honeywell was given exclusive rights to develop recorders utilizing dry silver color technology for the CAD/CAM and medical imaging markets. The company will market the COLORADO(TM) recorder and dry silver color paper as a complete color imaging system.

#90073p0122 03/14/1990 ~PR Newswire

MILFORD, OH (MARCH 14) PR NEWSWIRE - Structural Dynamics Research Corporation (NASDAQ: SDRC) today announced the largest software order in its history, an order from Nissan Motor Co., Ltd. in Japan. The order was obtained through several of SDRC's Japanese distributors and included I-DEAS modules for design, analysis and test. The total value of Nissan's order to SDRC's distributors exceeded $1.5 million.

"We are delighted that Nissan has expanded its commitment to the use of our I-DEAS software," said Ronald J. Friedsam, SDRC chairman and chief executive officer. "Nissan is successfully implementing mechanical design automation throughout their engineering and manufacturing organizations, and SDRC's I-DEAS software is playing a major role in that success."

In 1989, Nissan and SDRC formed a joint venture company in Japan, called ESTECH Corporation, to provide engineering services focused on the application of SDRC's mechanical design automation technology in the design of new products. In addition, Nissan selected SDRC as its preferred vendor for mechanical computer-aided engineering (MCAE) software on a worldwide basis.

"SDRC has been supplying Nissan with software and consulting services since the mid-1970s," noted Friedsam. "This significant order for I-DEAS at Nissan is indicative of the success of our products among manufacturers who recognize the need for a cost-effective product development approach that shortens time-to-market, and optimizes product quality."

SDRC is a leading international supplier of mechanical computer- aided engineering software and engineering services used by automotive, aerospace and industrial manufacturers of the design, analysis and testing of sophisticated mechanical products. The company's products and services significantly reduce product development time and cost, and result in superior quality products by enabling customers to optimize product designs prior to production,. SDRC employs more than 800 people in 31 offices in 10 countries throughout North America, Europe and the Far East.

CLIFTON, NJ (MARCH 14) PR NEWSWIRE - Vertex Industries, Inc. (NASDAQ: VETX), today reported improved sales and net income for the second quarter and first half of fiscal 1990 ended Jan. 31. James Q. Maloy, chairman and president, said: "For the second quarter of fiscal 1990 sales rose to $994,000 from $887,000 in the second quarter of the last fiscal year, and we showed earnings of more than $17,000 compared to a loss of $135,000 in the same quarter last year. This improvement in financial performance is the result of sales of our maturing products, maintaining our improved gross margins and cost containments."

For the second quarter ended Jan. 31, 1990 net sales were $994,392 compared to $887,410 for the same period last year. Net income was $17,540, or $.01 per share, against a net loss of $135,520, or $.08 per share, for the same quarter last year.

For the first six months of fiscal 1990 sales increased to $1,872,093 from $1,761,519 for the first half of last year. The company had net income of $7,446, with no reportable per share earnings, compared to a loss of $205,731, or $.12 a share for the same period last year.

Vertex received orders for 750 of its Debit Card Systems from a major supplier of airport baggage cart services. The company also completed installation of a Debit Card System with Marriott Food Services Division, which is test marketing a new debit card type of vending program.

Vertex Industries manufactures and markets automated card readers, encoders, writers and encoders for credit and debit cards and identification badges; bar code scanners and data-collection terminals, and precision weighing equipment.

#90073p0130 03/14/1990 ~PR Newswire

JERSEY CITY, NJ (MARCH 14) PR NEWSWIRE - Cappcomm Software, Inc., developer of the PC-based electronic mail package MAIL CALL, has released a new "snap-in" module called 411 PLUS.

411 PLUS is a software module that integrates into the MAIL CALL base package to enhance the user's ability to address mail. The capability to address mail messages for All-in-1 or VMS Mail off-line on the PC is one of MAIL CALL's many features. Now with 411 PLUS, users can select and

verify the addresses against a master list of all users, or against a select group which the system manager can define.

"411 PLUS further reduces VAX overhead by allowing more of electronic mail addressing to be done on the PC," said Mike Gresh, Cappcomm's vice president of research and development. "This includes verifying an address and insuring proper delivery of mail to complicated addresses that are often found in very large networks."

MAIL CALL is a PC electronic mail front-end solution that works in conjunction with Digital Equipment Corporation's VMS Mail or All-in-1. MAIL CALL gives users the ability to create, address and manage their mail "off-line" on the PC, and use the host mail system as the engine. MAIL CALL allows users to send messages generated in a word processing package such as WordPerfect, or even a Lotus 1-2-3 spreadsheet. Once the message is complete, the user puts the message in an "out box" and designates whether the message is to be sent immediately or at a later time. MAIL CALL functions in an asynchronous or Ethernet environment for support of both remote and LAN-based users.

Stephen Fredette, vice president of sales and marketing for Cappcomm, said "The beauty of MAIL CALL is its ability to make sending electronic mail as easy as picking up the phone. Adding 411 PLUS will assist electronic mail users as much as 411 directory assistance helped phone customers."

Cappcomm Software is a solutions-oriented leader in electronic messaging on both PCs and mini-computers. MAIL CALL has been on the market for over a year, having made its debut in August 1988. 411 PLUS is available with the current release of MAIL CALL version 1.50.

The fee for 411 PLUS ranges from $440 for small sites to $4,500 for a corporate license. The MAIL CALL base package costs $1,000 for small sites, up to $30,000 for a corporate license, and is availabke fir a free 30-day evaluation. For further information, call 800-2-MAIL-2, or 201-795-1500, or write to Cappcomm Software, Inc., 26 Journal Square, Suite 1003, Jersey City, N.J. 07306.

#90073p0146 03/14/1990 ~PR Newswire

DALLAS (MARCH 14) PR NEWSWIRE - Oryx Energy Company (NYSE: ORX) will complete its first subsea gas well on East High Island Block A-370 in the Gulf of Mexico this summer, at a cost of approximately $4 million.

The No. 3 well on Lease OCS-G-2434 is expected to produce gas from two intervals with initial production estimated at five to 10 million cubic feet per day (MMcf/D), beginning in the fourth-quarter 1990. The natural gas will be processed at Oryx Energy's production platform on the same block, about one mile northwest of the subsea completion.

Subsea technology involves locating the wellhead on the ocean floor with a flowline back to a conventional platform. Control lines from the platform to the wellhead can open or shut-in the well. Subsea development allows for profitable production of reservoirs that cannot be reached from existing platforms and avoids the cost and time delay of setting a new platform. Oryx Energy's subsea wellhead on East High Island A-370 will be in 375 feet of water and may be the first installation designed to meet new API specifications for "Subsea Well and Tree Equipment." According to industry sources, there are about 560 subsea completions worldwide with some 10 percent in the Gulf of Mexico.

Oryx Energy is operator with a 68.18 percent working interest. Its partners are Enserch Exploration Partners, Ltd., with 19.5 percent; and Diamond Shamrock Offshore Partners Limited Partnership, 12.31 percent.

Dallas-based Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P. (NYSE: SLP). Oryx Energy, the managing general partner and 98-percent owner of the partnership, is the largest independent oil and gas producer in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels.

HARRISBURG, PA (MARCH 13) PR NEWSWIRE - NGK Metals Inc. was ordered to pay $300,000, including $20,000 to a local environmental group, after its representatives today entered no-contest pleas on behalf of the Berks County company to charges stemming from the illegal disposal of chemical wastes.

"This substantial fine sends a clear message that both my office and the courts of Pennsylvania are serious about punishing those who pollute the state's environment," Attorney General Ernie Preate Jr. said. Complaints filed in January by Preate's Environmental Crimes Section charged NGK with the illegal storage and disposal of chemical wastes at the company's Muhlenberg Township facility.

NGK manufactures a rare alloy, beryllium copper, for use in spark plugs

and other components.

The complaints also charged that NGK and a former employee attempted to conceal illegal discharges of waste by submitting falsified reports to the state.

A related complaint filed by the Fish Commission charged NGK with discharging waste water containing unpermitted levels of metals into Laurel Run, resulting in the destruction of aquatic life in a two-mile stretch of the stream.

Under a plea agreement approved by Berks County Common Pleas Court Judge Calvin Smith, NGK pleaded no contest to one felony violation of the Solid Waste Management Act, two misdemeanor violations of the act, one count of unsworn falsification, one count of pollution of waters and one violation of the Clean Streams Law.

NGK was ordered to pay $150,000 to the Solid Waste Abatement Fund, $100,000 to the Fish Commission's Fish Fund and $30,000 to the Clean Water Fund.

Also as part of the plea agreement, NGK agreed to make a $20,000 contribution to the Schuylkill River Greenway Association, a non-profit environmental organization.

The attorney general noted that NGK previously paid civil penalities of $225,000 to DER.

LOS ANGELES (MARCH 14) PR NEWSWIRE - ARCO chairman and chief executive officer Lodwrick M. Cook has been named one of the "Top 25 CEOs of the Decade" by California Business magazine, it was announced by magazine publisher and editorial director Michael Kolbenschlag.

The magazine's Board of Editorial Advisors described Cook as "the steady hand that has kept ARCO on track as one of the most successful energy companies in the world. Cook is the archetypal competent manager, a great organizer who has positioned ARCO as a leader in the energy sector."

According to Kolbenschlag, the CEOs were selected on the basis of their management skills, insights and invention, community involvement, and impact on California commerce during the 1980s.

Cook has been ARCO's chairman and chief executive officer since January 1986. A native of Louisiana, he joined ARCO as an engineer trainee in

1956 and worked his way through the ranks, holding key management positions including chairman of the Owners' Committee of the Trans Alaska Pipeline System, the largest private construction project ever undertaken.

ARCO is the nation's eighth largest oil company and the number one gasoline marketer in California. In 1989, the company reported record earnings of $1.95 billion (third highest in the oil industry) and record earnings-per-share of $11.26. ARCO's return on stockholders' equity for the previous 12 months was 30.6 percent.

The 25 CEOs will be honored at a black-tie gala on April 26 at the Tower at the Century Plaza Hotel in Los Angeles. Former President Ronald Reagan will be the keynote speaker.

The CEOs will also be profiled in the magazine's Silver Anniversary issue in May.

CONTACT: Marci Blaze or Elizabeth Burke, both of California Business Magazine, 213-450-6060, or Albert Greenstein of ARCO, 213-486-3384.

SOUTH BOSTON, MA (MARCH 14) PR NEWSWIRE - The board of directors of The Boston Bancorp (NASDAQ-NMS: SBOS), the holding company for South Boston Savings Bank, announced today the Richard R. Laine, currently president, CEO and general counsel of the company, has been elected chairman of the board. The board also announced that Paul A. Archibald was elected president of the company.

Laine replaces Alfred W. Archibald, who has been chairman of the board of The Boston Bancorp since its formation in 1984. Archibald remains a member of the board of directors of the company, and chairman of the board of South Boston Savings Bank, where he began his banking career in 1951.

Laine, 49, has been a director, president and CEO and general counsel of The Boston Bancorp since 1984, and has held similar positions with South Boston Savings Bank since 1978. He joined the company in 1968.

Paul Archibald, 41, joined South Boston Savings Bank in 1970. He has been a director and executive vice president of The Boston Bancorp since 1984, and has held similar positions with South Boston Savings Bank since 1981.

"The Boston Bancorp has been among the strongest savings institutions in the country over the years, and consistently ranks at or near the top of its peer group in overall financial performance," Laine said. "We can thank Alfred Archibald for establishing the policies and practices which have made this performance possible. One of the most respected

businessmen in the state of Massachusetts, we look forward to his continued guidance and contributions as a member of the board."

Laine resides in Norwell, Mass. Alfred Archibald resides in Weymouth, Mass., and Paul Archibald resides in Milton, Mass.

The Boston Bancorp is the holding company for South Boston Savings Bank, a state-chartered stock savings bank headquartered in South Boston, with other full-service offices in Dorchester, Quincy and Weymouth, Mass. As of Jan. 31, 1990, the company had total assets of $1.47 billion, and stockholders' equity of $94.3 million.

LONDON (MARCH 14) PR NEWSWIRE - Brian Beazer, chairman of Beazer PLC (NYSE: BZR), the international building materials and construction group, announced today in London and New York results for the half year period to Dec. 31, 1989 as follows:

Turnover for the period increased 9.9 percent to 1,158.2 million pounds ($1,853.1 million) from 777.3 million pounds ($1,243.7 million) last year. Pre-tax profits increased 15.6 percent to 63.0 million pounds ($100.8 million) from 54.5 million pounds ($87.2 million) in 1988. Fully diluted

earnings per share rose to 13.01 pence from 11.23 pence. Fully diluted earnings per ADR rose to $0.83 from $0.76 for the period.

The bias of the group's profitability is now towards the first six months of the year. The marked growth for this half year also reflects an improving performance from our building materials and contracting operations and the really excellent results achieved by our homes companies in very difficult market conditions.

The directors have declared an interim dividend 10 percent higher at 2.7 pence (or $0.17 net per ADR) which will be paid on June 6, 1990 to shareholders on the register on April 5, 1990. A scrip alternative will also be offered.

The exchange rate used for this translation for both periods and the projected ADR dividend was that ruling at Dec. 31, 1989 of pounds 1 to $1.60.

LA COSTA, CA (MARCH 14) PR NEWSWIRE - La Costa Hotel & Spa, the world-famous, luxury health/fitness resort, has been awarded the 1990 Mobil Travel Guide Four-Star rating.

La Costa is rated as "Outstanding...worth a special trip," according to Mobil. Only 2 percent of the 21,000 properties evaluated annually by Mobil earn the Four-Star rating.

La Costa's management was observed to be highly professional in motivating and generating staff commitment to guest satisfaction.

The luxury resort scored high marks for its unique variety of accommodations, activities and facilities. "Since we have the finest spa facility in the country, it's not so surprising. Nevertheless, we are delighted to have been recognized by the Mobil Travel Guide as Four-star quality," commented Klaus R. Ottman, senior executive vice president and managing director of the resort.

Mobil inspectors noted that La Costa Hotel & Spa far exceeds normal expectations in design, level of luxury, service, elegance and uniqueness. They also found La Costa's staff to have a sincere courtesy, knowledge and professionalism which reflected in a prevailing concern for guest comfort, convenience and enjoyment.

Carefully landscaped grounds, spotless housekeeping, superior maintenance, luxurious rooms appointed with fine soaps, shampoos and amenities were noted.

#90073p0179 03/14/1990 ~PR Newswire

YORKTOWN HEIGHTS, NY (MARCH 14) PR NEWSWIRE - IBM scientists have fabricated the world's fastest silicon-based transistors, operating at a maximum frequency of 75 billion cycles per second, nearly twice as fast as

the previous record. The experimental transistors, know as Hetrojunction Bipolar Transistors (HBTs), were built using an alloy of silicon (Si) with a small quantity of the element germanium (Ge). The transistors can be fabricated with the addition of only one new processing technique to today's well-known silicon manufacturing technology.

The transistor operating frequency is one factor in determining the speed of computer chips. Although substantial work is needed to develop these transistors fully, this IBM achievement represents a significant advance in Si-based chips for use in high-speed computers.

The HBT, first invented in the '50s, has superior speed and lower power consumption relative to conventional transistors. Although high performance HBT devices have been fabricated in a variety of materials, primarily compound semiconductors like gallium arsenide, they have only recently been fabricated in silicon. Si-based HBTs are important because they can provide a significant performance improvement for high- speed computers.

Many researchers have contributed to the continuing improvement of Si and Si-based transistors, with performance increasing from five billion cycles per second to approximately 40 over the past decade. The first implementation of the SiGe HBT was demonstrated in 1987 by IBM researchers in Yorktown. Last year, SiGe transistors operating at 40 billion cycles per second were built by researchers at IBM's East Fishkill development laboratory. IBM's most recent achievement of 75 billion cycles per second represents a very significant jump in performance and clearly points to the future use of such transistors.

IBM's record-breaking transistors were fabricated by depositing SiGe alloys with a unique process called Ultra-High-Vacuum/Chemical Vapor Deposition (UHV/CVD), which was invented at IBM. In this method, deposition occurs at lower temperatures and in a far cleaner environment than existing growth techniques. Low temperature deposition is required to keep the larger Ge atoms in place, while the UHV conditions are needed to eliminate the incorporation of contaminants which easily ruin the material quality. After the deposition of the transistor's initial structure, the IBM researchers employed a specially designed fabrication process to avoid damage to these delicate ultrathin (2 millionths of an inch thick) layers.

ORLAND PARK, IL (MARCH 14) PR NEWSWIRE - Andrew Corp. (NASDAQ: ANDW) has signed a definitive agreement to acquire Emerald Technology, Inc., it was

announced by Dr. Floyd L. English, Andrew president and CEO. Emerald is a supplier of midrange computer connectivity products and services, located in Bothell, Wash.

Cost of the acquisition, which will be accomplished through a cash merger, will be approximately $15.3 million. Emerald had sales of $11.5 million in its last fiscal year ended June 30, 1989. Subject to the satisfaction of certain conditions, the transaction is expected to close within 10 days.

"This acquisition is a key development in Andrew's continuing effort to expand its service and product offerings in the connectivity market," said Dr. English. "Emerald has a large distribution network which will provide Andrew's growing product line with a significantly increased sales channel."

"The mix of products and services dovetails nicely with existing Andrew offerings. Providing IBM System 3X and AS/400 users with gateway devices, printer products and other connectivity products is one of our highest growth business areas, up about 30 percent in 1989.

Wayne Smith, president and CEO of Emerald, said, "We are excited about the opportunities presented by combining our file transfer, communications, emulation and other connectivity products with Andrew's Network Products Group. This will enhance our ability to provide convenient, easy-to-use links between PCs and IBM midrange computers."

Andrew Corp. is a supplier of electronic communications products and systems to worldwide commercial, government and military customers. Andrew has offices in 10 countries throughout North America, Europe and the Far East, with headquarters in Orland Park, Ill.

CAMPBELL, CA (MARCH 14) PR NEWSWIRE - Bio-Care, Inc., a Campbell-based franchise company which specializes in environmentally sound bacterial solutions to waste and consumer problems, announced the appointment of a new chief executive officer, Bob Larive.

Replacing Bud McMahon as CEO of the company, Larive has joined Bio-Care with 16 years of extensive executive experience in the restaurant industry. McMahon, who founded Bio-Care in 1985, will still be involved with the company and responsible for product development.

According to McMahon, "The addition of Larive to our company will take

Bio-Care to the next stage of development. This will allow me, in turn, to be more active in developing and creating more products." Recently, Bio-Care has entered the consumer market with Septi-Save, a product which will take the hassle out of routine septic tank maintenance.

Additionally, Bio-Care is well-known in the restaurant/hotel industry for its maintenance of drainage systems using proprietary bacteria and a professionally managed service system. Bio-Care services more than 200 clients and has franchises in both the United States and internationally. In 1989, Bio-Care's growth was in the top ten percent of all new franchises.

Larive believes the Bio-Care system will grow at an even faster rate in the upcoming year. "I've seen the tremendous growth Bio-Care has had in the past six months and I expect even greater development of franchising," explained Larive. "Since the introduction of our franchising program and Septi-Save, our 800 lines have been constantly busy."

Larive has been successful in establishing company and franchise operations in the United States and Europe with such companies as Calny Inc. (Taco Bell), General Foods-Imasco (Burger Chef) and Pillsbury (Burger King).

His strengths in marketing, operations, and investor relations will be a positive addition to Bio-Care. Executive Vice President Michael Deffina and Larive will focus on franchise development and plan to make Bio-Care well-known in the business community and with consumers. Information regarding the company and its products is available by calling 800-468-5655 in California and 800-421-9740 from other states.

CHICAGO (MARCH 14) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) and its wholly owned subsidiary, Sears Receivables Financing Group, Inc. ("SRFG"), announced that the subsidiary offered for sale $500 million of Sears Roebuck Euro Accounts Receivable Select Trust 1990-1, 9.75 percent credit account pass-through certificates through an underwriting syndicate lead-managed by Credit Suisse First Boston Limited, Goldman Sachs International Limited, J.P. Morgan Securities Ltd. and Salomon Brothers International Limited. The securities have a scheduled maturity date of April 15, 1995. The securities were priced to yield 9.583 percent or 86 basis points over U.S. Treasury securities of comparable maturity on a semi-annual basis.

Sears, through SRFG, has sold a portion of its credit card accounts receivable portfolio to a trust which issued the certificates. The

certificates represent undivided ownership interests in the receivables owned by the trust. The certificates will be rated Aaa by Moody's, AAA by Standard & Poor's and AAA by Duff & Phelps.

The certificates have not been registered under the United States Securities Act of 1933 and may not be sold in the United States or to United States persons as part of the distribution of the certificates. This is the first Euro offering by SRFG which has sold $4.25 billion of credit account pass-through certificates in 10 offerings in the United States since June 1988.

YONKERS, NY (MARCH 14) PR NEWSWIRE - The National HMO Corp. (NASDAQ-NMS: NHMO) announced today that net income for the three months ended Jan. 31, 1990, was approximately $451,000 or 9 cents a share, as compared to a net income of approximately $215,000 or 4 cents a share for the three months ended Jan. 31, 1989.

Revenues for the quarter ended Jan. 31, 1990, were approximately $3,546,000 as compared to $2,985,000 for the corresponding three-month period of 1989. The increase in revenues was primarily attributable to an increase in patient fee income from Allen Health Care Services, Inc.

The company also announced that Allen Health Care Services, Inc. was granted licensure by the State of New York Department of Health for a limited life of two years. In addition, the company has negotiated a $1.5 million line of credit with interest at prime rate.

NEW YORK (MARCH 14) PR NEWSWIRE - Air Canada has introduced a special low

discounted air fare program for persons 55 years of age or over traveling between any of the 25 North American cities served by the airline.

The "Freedom Flyer" fares which heretofore have been offered to persons 62 years of age or over, reflects discounts of 10 percent off any of the lowest published fares. The fares are only effective for travel that starts between April 23 and June 15, 1990 and all travel must be completed by July 21, 1990 (minimum stay is seven days). Non-refundable tickets must be purchased at least two weeks prior to departure within three days of making reservations.

The special fares are also available to one companion of any age who must travel on the same route and flights with the quality "Freedom Fare" passenger.

The "Freedom Flyer" fares are also applicable to the 53 North American cities served by Air Canada's Connector carries, and on Air Canada scheduled flights between Canada and the United Kingdom.

Sample round-trip "Freedom Flyer" fares (weekdays): Miami-Toronto/$178; Boston-Toronto/$100; New York-Montreal/$121; New York-Toronto/$134; Tampa-Montreal/$170.

The special fare offer reflects Air Canada's continuing recognition of the importance of the senior citizen market. The airline has for years offered year-round fares to seniors (current fare is for persons 62 years of age or over).

Additional information and bookings are available through travel agents or by calling Air Canada.

ST. LOUIS (MARCH 14) PR NEWSWIRE - Edison Brothers Stores, Inc. (NYSE: EBS) sales and earnings set company records in 1989. Net income for the 53 weeks ended Feb. 3, 1990, was $56.9 million, or $2.82 per share, it was reported today by Andrew E. Newman, chairman, and Martin K. Sneider, president.

For the 52 weeks of 1988, ended Dec. 31, 1988, Edison reported net income of $36.3 million, or $1.82 per share (adjusted for the recent 2- for-1 stock split). Because of the change in the company's fiscal year the 1989 period began and ended a month later than the 1988 period.

Edison's operating earnings for 1989 were $61.2 million. However, in order to substantially reduce interest costs in future years, the company arranged for the prepayment of the mortgage on its home office building, generating an extraordinary charge of $4.3 million.

Net income for the fourth quarter of 1989 was $30.8 million, or $1.53 per share, prior to the extraordinary charge. The company reported earnings of $26 million, or $1.30 per share (adjusted), for the fourth quarter of 1988.

As previously reported, sales for 1989 were $1.07 billion, an increase of 14.3 percent over sales of $939.5 million for the comparable 53 weeks of the prior year. Sales reported for fiscal 1988 were $918.6 million.

Sales for the fourth quarter of 1989 were $367.1 million, an increase of 12.5 percent over sales of $326.3 million for the comparable weeks of the prior year. Sales reported for the 1988 fiscal quarter were $325.2 million.

During 1989 Edison Brothers opened 115 stores in existing chains, including eight converted from Fashion Conspiracy. The company acquired nine Rothschild's Big and Tall and two Dave and Buster's. The company closed 135 stores, ending the year with 2,327 units in operation. About 300 openings are planned for 1990, including about 190 Foxmoor and Fashion Conspiracy conversions.

Edison Brothers Stores, Inc. operates Jeans West, Oak Tree, J. Riggings, Coda, and Rothschild's Big and Tall men's apparel stores; 5-7-9 Shops women's apparel stores; Joan Bari accessories boutiques; Bakers, Leeds, Burts, Chandlers, Wild Pair, Velocity, and Sacha London shoe stores; Fashion Shoe departments in certain department stores; and Dave and

Buster's restaurant/entertainment complexes.

EDISON, NJ (MARCH 14) PR NEWSWIRE - Sea-Land Service Inc., a unit of CSX Corporation (NYSE: CSX) of Richmond, Va., today announced expenses related to its organizational restructuring will approximate $53 million and will be booked against Sea-Land's first quarter 1990 operating income. The worldwide reorganization effort was previously announced in December 1989. At the same time, Sea-Land announced that a voluntary special retirement plan providing higher pension benefits would be offered to eligible employees.

The restructuring, which will be substantially completed by the end of the first quarter 1990, will result in Sea-Land's removal of unnecessary management layers, reduction of overhead costs, elimination of bureaucracy streamlined decision-making and increased productivity of its work force. Sea-Land anticipates savings from the restructuring that will enable a payback on the $53 million investment in approximately 2 years.

The restructuring will result in a net reduction of approximately 300 managerial and clerical positions. In addition, as certain functions are relocated and spans of control and authority are broadened, key positions at all levels are being filled by people whose qualifications and experience match the expanded responsibilities.

As a result of these actions, Sea-Land said certain managerial employees became eligible for an enhanced severance program based primarily on years of qualified service with the company. The clerical work force reduction the company said, will be done in accordance with collective bargaining agreements.

Sea-Land Service Inc. is a world leader in international intermodal freight transportation and related trade services. Sea-Land operates more than 60 container ships and 125,000 containers in the U.S. and foreign trade and serves 80 ports in 70 countries and territories around the world.

HOUSTON (MARCH 14) PR NEWSWIRE - James L. Pate has been appointed president and chief executive officer of Pennzoil Co. (NYSE: PZL), the company announced today. Formerly executive vice president and chief operating officer, Pate replaces Randal B. McDonald, who is retiring.

As president and chief executive officer, he will be responsible for all operating divisions and corporate functions of Pennzoil Co. and its affiliates.

J. Hugh Liedtke, chairman of the board of Pennzoil, said, "Jim Pate has proven himself to be a strong leader, possessing both a thorough understanding of the operating divisions of our company and a broad background in finance."

Pate, 54, has held numerous management positions during his 14 years with the company. Prior to joining Pennzoil, Pate was appointed by President Gerald Ford to the position of United States assistant secretary of commerce. Subsequently, he was appointed a special advisor to the White House.

McDonald is retiring after a 38-year business career. For 35 of those years, he was associated with Pennzoil Co., both as a consultant and as an employee.

"During his long association with the company, Mr. McDonald made significant contributions to the growth of Pennzoil," Liedtke said.

MONTVALE, NJ (MARCH 14) PR NEWSWIRE - Mercedes-Benz of North America (MBNA) has announced several new executive assignments effective July 25.

Michael J. Jackson has been appointed to the newly created position of

senior vice president, marketing and sales.

Jackson comes to MBNA most recently as executive vice president and general manager of Euro Motorcars, Bethesda, Md., a Mercedes-Benz dealership. He served as chairman of the Mercedes-Benz National Dealer Council for two terms, 1988 and 1989. Jackson has more than 19 years of retail and wholesale experience in the automotive industry, including five years in field management for MBNA in the Washington zone.

Jackson is a graduate of Saint Joseph's University in Philadelphia. He is married and has one child.

Hans Jordan, senior vice president, marketing, has announced his retirement after 35 years of service effective Nov. 1. After this time, he will serve in a consulting capacity to Mercedes-Benz in the United States and in West Germany. Jordan will hand over day-to-day responsibilities as head of marketing on July 25 to Gerd Klauss. Klauss, currently vice president, operations, will assume the position of vice president, marketing.

"I am very pleased to announce these new assignments as they will further strengthen our commitment to our dealer organization and to customer satisfaction," noted Erich Krampe, president and CEO if MBNA. "While we will truly miss the valuable contributions and experience of Mr. Jordan, I am confident that both Mr. Jackson and Mr. Klauss will successfully help lead the Mercedes-Benz team in the years to come."

SALT LAKE CITY (MARCH 14) PR NEWSWIRE - American Stores Company (NYSE: ASC) announced today that Richard A. Scott, chairman of the board, chief executive officer and president of the company's wholly owned subsidiary American Drug Stores Inc., and a member of the board of directors of American Stores Company has tendered his resignation, effective immediately.

J.L. Scott, vice chairman of the board of American Stores Company, stated that Dick Scott has informed the company he is leaving to pursue other interests. "Dick Scott has made a significant contribution to the company," said Scott, "and we extend him our best wishes."

The company also announced that Dave Maher has accepted the position of president effective immediately. Maher will oversee all operating functions of the 675-store drug chain. He will report directly to American Stores Company President Alan Stewart.

Maher received his pharmacy degree from the University of Iowa in 1964 and has served American Drug Stores for 27 years. He began as a part-time clerk and eventually served as store general manager, district manager, regional personnel manager, and vice president of personnel and pharmacy. In December 1976, Maher was named vice president of American Drug Stores' Eastern region, a position he held until February 1985. Since that time Maher has served as vice president of the company's Intermountain region, which is based in Denver.

In accepting the position of American Drug Stores president, Maher said, "I am truly looking forward to serving in this position. American Drug Stores has the most dedicated and hard working people in the business. I know that as a company we will quickly progress through a brief transitional period and emerge with a renewed commitment toward serving our customers and our people."

Operating under the names of Sav-On Drugs and Osco Drug nationwide, American Drug Stores is the chain drug leader in providing quality merchandise and caring customer service.

In response to inquiries, American Stores Company stated it is continuing to analyze the possibility of selling certain underperforming drug and grocery assets.

#90073p0206 03/14/1990 ~PR Newswire

BASKING RIDGE, NJ (MARCH 14) PR NEWSWIRE - AT&T today said it is suing National Telephone Services Inc. (NTS) and International Telecharge Inc. (ITI). The lawsuit, filed in U.S. District Court for the District of New Jersey, charges that NTS and ITI have switched public telephones from AT&T to NTS and ITI without the knowledge or consent of the owners of the premises where the phones are located.

AT&T charged NTS and ITI with a number of deceptive practices including: deceiving business owners into believing that there is an association between NTS, ITI and the local telephone companies; claiming that AT&T is no longer providing long-distance service for a business owner's public phones; or indicating that NTS or ITI has been designated the new long-distance operator services company for public pay phones on the business owner's premises.

NTS is headquartered in Rockville, Md. ITI is headquartered in Dallas. AT&T said the deceptive practices have resulted in considerable confusion and inconvenience for business owners with public phones and may have cost AT&T millions of dollars in lost revenue.

"Business owners with public telephones deserve the right to choose their long-distance company without concern for deceptive and fraudulent business practices," said Merrill Tutton, vice president, AT&T Consumer Services.

The lawsuit against NTS and ITI asks the court to order NTS and ITI to stop making false, misleading or deceptive representations, and to stop switching AT&T long-distance business customers to NTS or ITI without authorization by the customer. In addition, it asks the court to declare void any contracts between NTS or ITI and AT&T's business customers that were entered into through NTS' or ITI's deceptive actions. AT&T has asked to be awarded damages it has suffered as a consequence of NTS' and ITI's wrongful conduct.

AT&T said it believes that thousands of business owners with public telephones who have been switched from AT&T had either never been contacted by NTS or ITI, had declined to switch when they were contacted, or didn't realize they were being asked to authorize the switch. Many business owners were initially unaware that they had been switched to another long-distance company. AT&T also said these practices have created confusion for people who make calls from public phones.

In a related action on Jan. 10, 1990, AT&T sued MCI and its telemarketing agent, Pioneer Teletechnologies, for deceptive telemarketing practices that misled consumers and for widespread switching of long-distance customers without their consent. The case is still in the early stages of litigation.

Business owners who chose AT&T long-distance for the public telephones on their properties and think their service may have been switched without their consent can contact their local AT&T account executive or call 1-800-KEEP-ATT (800-533-7288).

#90073p0214 03/14/1990 ~PR Newswire

CHICAGO (MARCH 14) PR NEWSWIRE - United Airlines said today it has received exemption authority from the United States Department of Transportation (DOT) to operate nonstop service between San Francisco and Toronto.

"The Toronto-San Francisco route is part of the aggressive international expansion program that has been underway at United," said Stephen M. Wolf, chairman and president.

"This route award follows the recent news that United has surpassed its competitors to become the number one carrier across the Pacific, according to industry figures reported to the DOT. United's Pacific traffic last month was 35 percent higher than the corresponding month in 1989.

"The new flights will be timed to mesh with our international flights at our San Francisco hub," Wolf said. United operates separate non-stop flights on a daily basis between San Francisco and each of the following five Asian cities: Tokyo, Osaka, Hong Kong, Seoul and, beginning this summer, Taipei.

"We are gratified by the prompt approval of our request for exemption authority which had been filed with the DOT just one week ago," said Wolf.

United said it plans to file with Canadian transportation authorities today for expedited approval of an operating permit in order to launch the new service May 1, 1990. The new flights will be open for sale as of Monday, March 19.

United's proposed westbound schedule will consist of a morning flight departing from Toronto at 8:15 a.m. and arriving in San Francisco at 11:02

a.m. The proposed eastbound schedule will consist of an afternoon flight departing from San Francisco at 12:55 p.m. and arriving in Toronto at 8:52 p.m.

The airline will employ on the new route Boeing 737-300 aircraft configured with eight seats in first class and 120 seats in coach on the new route.

San Francisco is both United's major international gateway and a major domestic hub for the airline. United and United Express operate 254 daily departures from San Francisco, serving more than 56 other cities. The Toronto-San Francisco route will allow United to provide single-carrier connections from Toronto to 37 cities.

#90073p0217 03/14/1990 ~PR Newswire

DANBURY, CT (MARCH 14) PR NEWSWIRE - Union Carbide Chemicals and Plastics Company Inc. (UCC&P) today announced that it has reached agreement for the sale of its primary alcohol ethoxylates (PAE) business to Hoechst Celanese Corporation. PAEs are surfactants (surface active agents) used in the formulation of household products such as laundry detergents and cleaners, and in industrial applications. The purchase price was not disclosed. UCC&P expects an earnings gain to its parent, Union Carbide Corporation (NYSE: UK), of approximately 13 cents a share, fully diluted, from the sale.

UCC&P Industrial Chemicals Division Vice-President W.E. Shackelford said the sale of its PAE business will "allow us to direct our full attention to specialty surfactants and nonylphenol ethoxylates, consistent with our strategic plan."

Dr. Ernest H. Drew, Hoechst Celanese president and CEO, said the purchase will give Hoechst Celanese an entry into the detergent raw materials business. "This addition follows our policy of expanding Hoechst Celanese in those specialty chemical segments that take advantage of the technical strength of the worldwide Hoechst AG organization," said Drew.

Hoechst Celanese's acquisition of UCC&P's PAE business will include inventories and, under licensing agreements, associated business technology. No manufacturing facilities, real property or personnel are included in the transaction.

PAEs are manufactured at UCC&P's Texas City, Texas, petrochemicals complex. UCC&P will continue to manufacture PAEs for Hoechst Celanese

under a multiyear agreement.

Hoechst Celanese, a subsidiary of Hoechst AG of West Germany, is a Fortune 100, $6-billion (sales) corporation with leading positions in chemicals, fibers and film, advanced materials, specialties and life sciences.

UCC&P is a diversified chemical company manufacturing a wide range of basic and specialty chemicals and plastics sold throughout the world.

NANUET, NY (MARCH 14) PR NEWSWIRE - Executive TeleCard, Ltd. (NASDAQ: EXTL; PHLX: XTL) announced today an agreement with Hickory Travel Systems, Inc. for the distribution of the World Direct(SM) calling card.

The World Direct calling card is available from every telephone in 45 countries back to the United States, within the U.S., and from the U.S. to everywhere in the world. Calls will be charged to any major credit card. Operators are available to connect calls in six foreign languages.

In addition, the World Direct calling card enables callers to leave a one-minute message in their own voice and have the message delivered every 15 minutes for four hours. A number of other enhancements will be announced when the World Direct card is distributed in late March.

Hickory Travel Systems is a $3.5 billion, Saddle Brook, N.J.-based corporate travel agency network with members throughout the world. Its purpose is to give associated travel agencies a competitive edge in acquiring and retaining businesses in the highly volatile travel industry while maintaining their independence and local identity. Hickory is one of the largest corporate travel consortia, with a network of 61 member agencies maintaining more than 500 offices worldwide.

L. William Chiles, president and chief executive officer of Hickory Travel Systems, said that, "The World Direct calling card will eliminate the need for travelers to carry pockets full of foreign coins or to pay inflated hotel surcharges for phone calls. Making sure our clients know about this service, which saves them money and makes their lives easier, is part of the superior customer service for which Hickory Travel Systems prides itself. This is the kind of program which makes us true travel management consultants. Hickory Travel Systems agencies know that their job does not end when their clients walk out the door, ticket in hand."

Robert Roach, president of Executive TeleCard, Ltd., said that he was "excited about the addition of Hickory Travel Systems and their member agenices to the World Direct calling card program, and the opportunity to provide their customers with an efficient and economical method of making international telephone calls from any telephone."

LAS VEGAS, NV (MARCH 14) PR NEWSWIRE - PriMerit Bank and Frontier Savings Association (NASDAQ: FRNT) announced today that they have signed a letter of intent pursuant to which PriMerit Bank would acquire all of Frontier's assets and liabilities through a merger or similar transaction. The total purchase price would be $2,341,134, or $1.00 for each share of Frontier Savings common stock. Both institutions are headquartered in Las Vegas.

Completion of the transaction is conditioned upon the execution of a definitive agreement by April 15, 1990, the receipt of appropriate state and federal regulatory approvals and required shareholder approvals.

"We are very enthusiastic about the merger of these two institutions," stated Kenny C. Guinn, chairman and chief executive officer of PriMerit

Bank. "We look forward to welcoming Frontier's customers into the PriMerit Bank family."

"Our depositors will find their banking more convenient when Frontier's four branches are added to PriMerit Bank's 17 southern Nevada facilities," noted Keith V. Thomas, president and chief executive officer of Frontier Savings.

At Dec. 31, 1989, Frontier Savings had assets of $295 million and conducted its operations from four branches in Las Vegas. PriMerit Bank, a federally chartered savings bank with assets of $2.75 billion at that date, operates 25 branches in Nevada and six branches in the Phoenix, Ariz., metropolitan area. PriMerit Bank is a wholly owned subsidiary of Southwest Gas Corporation (NYSE: SWX), a gas distribution company serving Arizona, California and Nevada.

OREM, UT (MARCH 14) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), announced today it has installed aviation maintenance training stations at Embry-Riddle Aeronautical University in Daytona Beach, Fla. The total value of the agreement is more than $100,000.

The Wicat computer-based training (CBT) systems will allow Embry-Riddle to instruct students with Boeing's 747 maintenance courseware and additional

maintenance courseware as it becomes available, said Dick Ulm, chairman of the maintenance technology department at Embry-Riddle.

"CBT is quickly becoming recognized throughout the aviation industry as today's best means of training students in the area of high technology aircraft," said Ulm. According to Ulm, Embry-Riddle plans to use this initial purchase of Wicat CBT as a foundation for expanding the use of CBT at the university.

"Embry-Riddle has established itself as a leader and innovator in the circles of aviation training," said Robert Mendenhall, Wicat's president and CEO. "Not only will Wicat's CBT significantly aid Embry-Riddle in its efforts to provide the highest quality training for flight and maintenance students, this contract will give additional credibility and momentum to an up-and-coming technology," said Mendenhall.

Wicat Systems is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

#90073p0245 03/14/1990 ~PR Newswire

DETROIT (MARCH 14) PR NEWSWIRE - Sales of Ford cars and trucks outside North America reached an all-time record of 2.42 million units in 1989, according to Louis R. Ross, executive vice president of Ford Motor Company's International Automotive Operations.

Ford's European sales of 1.55 million cars and 236,000 trucks were records in the largest-ever European vehicle industry. Combined sales of 1.79 million represented an increase of 8 percent over 1988, which was the previous record sales year for Ford in Europe.

Ford's share of the total European car and truck industry improved from 11.4 to 11.9 percent. Best-sellers were the Fiesta, which sold 478,300 (including 358,800 of the new Fiesta in only its first full year in production), the Escort (445,300), and the Sierra (387,300).

In Great Britain, Ford held its position as market leader in both cars and trucks for the 13th consecutive year, while Ford companies in France, Italy, Spain and Portugal as well as Britain posted car sales records and increased their respective car market shares. Ford car sales in Italy, for example, increased 43 percent over 1988.

Ford remained the top-selling foreign nameplate in Japan in 1989. Nearly

75,000 vehicles were sold by the Autorama dealer network which markets domestically produced and imported Ford and Lincoln vehicles in Japan, a 40-percent increase over 1988. Total sales of imports from Ford's North American Automotive Operations, primarily Ford Taurus, Ford Probe and Lincoln Continental, numbered 6,000, a 55-percent increase over the prior year.

In Australia, Ford was the overall market leader in 1989 for the eighth consecutive year, selling a total of just under 120,000 cars (5.4 percent more than in 1988) and 27,400 trucks (33.3 percent more than in 1988). The new Ford Capri convertible and Corsair family sedan were added to Ford Australia's lineup in 1989.

Autolatina, Ford's joint venture with Volkswagen, held 56 percent of the total vehicle market in Brazil and 28 percent of the market in Argentina in 1989, despite difficult business and economic conditions (very high inflation and continuing parts shortages). In Brazil, 112,000 Ford cars and 50,500 Ford trucks were sold. Appeal of the Ford car range in Brazil was enhanced by the introduction of a 1.8-liter engine in the Ford car lineup. The Ford Verona compact sedan, the first all-new vehicle introduced in Brazil by Autolatina since the joint venture was formed in 1987, was announced in late 1989 and went on sale Jan. 2.

#90073p0246 03/14/1990 ~PR Newswire

MINNEAPOLIS (MARCH 14) PR NEWSWIRE - General Mills (NYSE: GIS) today reported record third quarter earnings per share of $1.21, up 17 percent from the $1.03 per share earned by continuing operations a year earlier. Sales grew 11 percent to $1.6 billion. After-tax earnings of $99.8 million represent an 18 percent gain.

Chairman Bruce Atwater said the record third quarter earnings reflect continued strength of both Consumer Foods and Restaurants, each of which achieved a 16 percent increase in operating profits. He said the company expects the rate of earnings per share growth in the fourth quarter to be the strongest of the year.

Consumer Foods third quarter performance was led by strong gains for Betty Crocker Products, Bisquick, Foodservice and Canada Foods. Big G cereals matched the Consumer Foods profit gain for the quarter. Only Yoplait yogurt and Gorton's seafoods posted operating results materially below the prior year.

For the first 39 weeks, Consumer Foods sales and operating profits grew 12 percent and 15 percent, respectively. Domestic package food volume grew 5

percent, including a gain of 6 percent by Big G cereals. Foodservice volumes grew 11 percent.

Consumer Foods sales grew 9 percent in the third quarter. Betty Crocker volume was particularly strong, with excellent gains achieved by Hamburger Helper and various snack food lines. Bisquick's strong volume gain was led by the new Bisquick Shake 'n Pour line, which is increasing the company's penetration of the pancake mix market.

Big G ready-to-eat cereal dollar market share was 26.5 percent in the third quarter, 1.5 points higher than in last year's quarter and equal to the average share of the past 52 weeks. This market share performance reflects continuing gains by established products such as Cheerios and Wheaties, and the success of new Apple Cinnamon Cheerios and Total Raisin Bran, which completed national expansion in January 1989 with heavy marketing support.

Big G volume growth has been constrained throughout the current fiscal year by production capacity limitations, which have led to cancellation of a number of planned promotions and a delay in new product introductions. Because of these capacity constraints and the unusually strong 17 percent volume gain in last year's second half, the company expects cereal volume for the second half of fiscal 1990 will be approximately even with last year's.

General Mills' cumulative 39-week results from continuing operations totaled $3.62 per share, a gain of 16 percent above the $3.13 per share for the comparable period a year ago. Sales grew 13 percent and exceeded $4.7 billion. Cumulative earnings per share were $3.71 including a 9-cent per share gain from discontinued operations. Last year's 39-week results, including a large gain from the sales of The Talbots and Eddie Bauer, totaled $4.61 per share.

#90073p0247 03/14/1990 ~PR Newswire

DALLAS (MARCH 14) PR NEWSWIRE - T. Boone Pickens today proposed that Koito Manufacturing Co. adopt an anti-greenmail rule as part of the corporate charter to underscore Boone Co.'s continuing commitment to share in the long-term management of the Tokyo-based company.

Boone Co. is the largest shareholder in Koito. Pickens said he has sent a proposed anti-greenmail resolution to Koito in hopes that persistent "greenmail" allegations will cease and that attention can be turned to the real issues of management responsibility and shareholder rights.

At Koito's next shareholders' meeting, Pickens said he would vote all of Boone Co.'s shares for a resolution stating: "To ensure that this corporation shall not engage in any unfair discriminatory practices involving its shareholders, this corporation shall not request or cause its affiliated companies, directors, employees or any other person or entity (to) purchase, at its account(s) or this corporation's account, any of this corporation's equity shares held by any shareholder(s), unless it offers to purchase with the same terms and conditions as such purchase are made to all holders of this corporation's shares on a pro-rata basis."

"Boone Co. has been Koito's largest shareholder for a year now, and all of our actions have been forthright," Pickens said. "Koito's tactics expose to the world that Toyota's cartel wants to keep me off the board. They don't want me revealing Toyota's anti-competitive and anti-consumer practices both in the United States and Japan."

Koito, an automobile parts manufacturer, is part of the "keiretsu" or business cartel controlled by Toyota Motors (NASDAQ: TOYOY), which is Koito's largest customer for its lighting systems. Boone Co. owns 25 percent of Koito while Toyota owns 19 percent. Toyota has three seats on Koito's board, and most of Koito's management are former Toyota officials, said Boone Co.

"By its actions with Koito, Toyota is aggravating American-Japanese trade tensions," Pickens said. "Boone Co. invested in Koito to share in Japan's continued economic growth. It's becoming apparent, however, that Toyota discriminates against Americans."

"This case goes beyond just how Japanese companies keep Americans out of their markets," he said. "Toyota may be fighting in Japan in an attempt to cover up anti-trust violations by its business practices in the United States. This is not just a matter of American versus Japanese foreign investment. It goes to the heart of whether the American economy is going to be taken over by Japanese cartels."

PHILADELPHIA (MARCH 14) PR NEWSWIRE - Midway Airlines today joined the city of Philadelphia to honor Benjamin Franklin by dedicating the company's first McDonnell Douglas MD-88 aircraft to the "Spirit of

Benjamin Franklin."

"The dedication of this aircraft expresses our appreciation to the city of Philadelphia for making us feel at home. In just 112 days since our start-up, Midway has built in Philadelphia an airline and fleet size that once might have taken the company six years to develop,'' said David R. Hinson, chairman and chief executive officer. "Results like that don't just happen. We attribute this success to the efforts of our 600 Philadelphia-based employees and the support of Mayor Wilson Goode and the city's business and political leaders."

With a drum roll provided by the Old City Fife and Drum Corps, Hinson, Mayor Goode, Tom Muldoon, president of the Philadelphia Convention Bureau, and Ben Franklin in true-to-life form ceremoniously broke the bottle of champagne on the MD-88.

"We believe the MD-88, the newest of the MD-80 Series twin jets, represents our commitment to service and growth. This aircraft continues Midway's plan to modernize our existing fleet with advanced technology aircraft, enabling us to realize greater fuel efficiencies and quieter operations," said Hinson.

The aircraft is configured with 143 seats, eight in first class and 135 in coach. With a full load of passengers and baggage, range of the MD-88 is more than 2,360 statute miles. The MD-88 will be utilized for flights to Orlando and West Palm Beach, Fla., and Phoenix.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. From Philadelphia, Midway serves 18 cities with a total of 55 daily departures to eight Florida vacation spots, to six destinations in the Northeast; and to Savannah, Chicago, and Montreal and Toronto in Canada.

Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve more than 60 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

WHITE PLAINS, NY (MARCH 14) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) today announced plans to change the ownership of two of its business units effective March 16.

As part of the changes, NYNEX's two telephone companies -- New England Telephone and New York Telephone -- will assume ownership of NYNEX Materiel Enterprises Company and NYNEX Systems Marketing.

Materiel Enterprises, which provides an extensive range of integrated materials management and technical services, will be responsible to the two regulated companies and will provide, among other things, purchasing and supply services. Similarly, Systems Marketing, which is responsible for marketing telecommunications and other services to the largest of NYNEX's customer accounts, will continue to serve those customers as part of the regulated entities.

The transfer of ownership of the two companies was part of an agreement reached with the staff of the New York Public Service Commission. The full agreement, however, was recently rejected by the commission.

"By transferring these units now to the regulated portion of the business we will put an end to any false allegations or impressions about cross-subsidies that impugn the good name of NYNEX and its 95,000 employees," said William C. Ferguson, NYNEX chairman and chief executive officer. "Putting these complex regulatory issues behind us will allow the company to better focus resources on the larger task of growing and enhancing our telecommunications business and move forward in providing quality service to our customers."

#90073p0269 03/14/1990 ~PR Newswire

EDMONTON, ALBERTA (MARCH 14) PR NEWSWIRE - Numac Oil & Gas Ltd. (Toronto: NMC) of Edmonton, reports consolidated financial results for the year ended Dec. 31, 1989 as follows:

	(Millions, except per-share amounts)	
	1989	1988 (restated)
Gross revenue	$43.5	$43.2
Cash flow	$21.2	$24.0
Net earnings	$1.5	$4.4
Per common share		
Cash flow	$0.83	$0.94
Net earnings	$0.06	$0.17

Despite our optimism respecting Numac's future prospects, financial and operating results were disappointing. An improvement in crude oil selling prices was offset by lower crude oil production volumes with the result that gross revenue was virtually unchanged compared with the prior year. Cash flow and earnings were impacted by significant non-recurring costs, the effect of which was to reduce 1989 cash flow by $3.0 million and net earnings by $2.1 million. The elimination of these non-recurring items is more representative of the past year's operating results. Had these costs not been incurred, cash flow and net earnings would have been $24.2 million and $3.6 million, respectively.

Crude oil and liquids production averaged 4,647 barrels per day, a decrease of 10 percent compared with the prior year. New production volumes brought on stream during the year were insufficient to offset reservoir declines. Crude oil selling prices averaged $20.65 per barrel compared with $17.34 per barrel in the prior year. Natural gas production averaged 13.8 million cubic feet per day, an increase of 13 percent, whereas selling prices remained essentially unchanged at $1.45 per

thousand cubic feet.

Consistent with lower levels of drilling activity by our industry during the past year, Numac participated in the drilling of 60 wells, a reduction of 42 percent compared with 103 wells drilled in 1988. This much reduced drilling program resulted in 17 oil wells and 19 gas wells, a 60 percent success rate, and the discovery of 937,343 barrels of crude oil and 8.7 billion cubic feet of natural gas. Based on an assessment of additional technical information on certain properties, reductions were made to crude oil and liquids reserves booked in prior years. These revisions were more than offset by liquids reserves acquired through the purchase of an interest in the Caroline Swan Hills field and new oil discoveries with the result that proven and probable crude oil and liquids reserves increased by 7.5 percent to 20.8 million barrels. Proven and probable natural gas reserves increased by 7.8 percent to 246 billion cubic feet.

PHILADELPHIA (MARCH 14) PR NEWSWIRE - First Executive Bank has announced the appointment of Ralph J. DeMucy Jr. to the bank's management group as senior vice president and chief lending officer.

In this post, DeMucy is responsible for all of the bank's commercial lending business.

During DeMucy's 25-year tenure with Philadelphia's Fidelity Bank, he served in several capacities, beginning his career as a personal loan division interviewer, and moving on to branch manager, vice president and manager. Most recently he served as senior vice president and head of Fidelity's Small Business Loan Division. DeMucy developed and implemented the strategy which guided his division's growth from startup to more than $200 million in loan and credit line outstandings.

Zvi H. Muscal, president and chief executive officer of First Executive Bank, said, "Ralph DeMucy is one of our community's most experienced small business lending managers. He understands the special banking needs of small businesses and knows how to meet those needs. I am pleased he is joining First Executive Bank."

A graduate of Villanova University with a bachelor's degree in economics, DeMucy also attended and graduated from the Stonier Graduate School of Banking at Rutgers University. He is a resident of Brigantine, N.J.

First Executive Bank, which opened in November 1988, serves executives, professionals and small business owners in the Delaware Valley.

SALT LAKE CITY (MARCH 14) PR NEWSWIRE - GCI Industries, Inc. (NASDAQ: GCI) announced today that it had received notification from Fairway Acquisition Inc. (FAI) that it was withdrawing from the bidding process relative to the proposed merger of the company. As a result of FAI's withdrawal, the company's previously announced merger agreement with PG Acquisition Inc. (PG) will go forward with the public shareholders receiving a cash price of $2.537 for each share of the company's common stock.

Shareholders of the company will be asked to approve the merger with PG at the company's next regularly scheduled annual meeting of its shareholders expected to be held in May 1990. Closing of the merger is scheduled for May 31, 1990, unless extended by the contingencies remained in effect through the closing date of the merger, and that there can be no assurances that the merger will be consummated. GCI will provide further information regarding the merger as it becomes available.

PG is a 90 percent subsidiary of TL Enterprises, Inc., (TL) located in Agoura, Calif., which is a recreational vehicle membership club, magazine and related travel services company.

TL acquired its controlling position in PG last February in connection with providing additional equity investment in PG. C.F. Capital Corporation of Stamford, Conn., continues to serve as investment banker for PG in their transaction.

GCI's Golf Card subsidiary provides its membership, for an annual fee, the opportunity to play two 18-hole rounds of golf, without payment of green fees, at each of over 1,650 golf courses in the United States and abroad and to stay at over 360 country club golf resorts throughout the United States at special rates discounted from the resorts' regular golf packages.

#90073p0280 03/14/1990 ~PR Newswire

DETROIT (MARCH 14) PR NEWSWIRE - General Motors announced today it is conducting safety-related recall campaigns on certain 1987 through 1990 vehicles.

Affected owners are being notified by letter, and GM dealers will perform the necessary repairs free of charge. The campaigns include:

-- On approximately 84,000 model year 1987-88 Chevrolet Corsica cars, a metal pin in the upper or lower door-hinge assembly may break when the door is being opened or closed. If this happens, it may be difficult to close or reposition the door. Additionally, this condition may reduce the structural integrity of the side of the vehicle in certain accidents. Dealers will install new hinge assemblies.

-- On approximately 46,000 model year 1988-89 Chevrolet Corvette cars, the rear-wheel tie rod assemblies may fatigue and break due to high rocking torque caused by bearing deterioration. If this happens, the driver may experience a loss of vehicle control. Dealers will inspect and, if necessary, replace the rear-wheel tie rod assemblies.

-- On about 10,000 model year 1990 Buick Riviera and Cadillac Eldorado and Seville cars, the rear seat shoulder belt retractor assemblies may not have been installed properly on the rear shelf. This could cause the shoulder belt to remain in a locked position, or to travel freely without locking. Dealers will inspect and, if necessary, refit the retractor assemblies to ensure proper shoulder belt operation.

-- On nearly 6,100 model year 1987-89 Chevrolet and GMC Step Van vehicles used in commercial delivery, the seat pedestals will be replaced. Because the seat pedestals were manufactured incorrectly, they may not be strong

enough to restrain the seat and a belted occupant in certain accidents.

-- On some 1,100 model year 1990 Pontiac Grand Prix SE Turbo cars, dealers will remove the rear spring heat shield from the exhaust system. During a rear-end collision, this heat shield may puncture the fuel tank. If an external ignition source is present, this could result in a fire. Additional temperature tests have shown that removal of the heat shield will not affect vehicle durability.

RESEARCH TRIANGLE PARK, NC (MARCH 14) PR NEWSWIRE - Northern Telecom (NYSE: NT) is joining forces with the University of North Carolina Center for Health Promotion and Disease Prevention and the UNC Schools of Medicine and Business in a campaign to promote the birth of healthy babies.

The employee education program is designed to promote healthy pregnancies and prevent premature and low weight births.

The program, called New Beginnings, was kicked off with a Health Fair at Northern Telecom Plaza in Morrisville.

"This program is an important step in North Carolina's fight against infant mortality and low weight births," said Bill Cobey, North Carolina Secretary of Environment, Health and Natural Resources. "Turning this situation around will require a combined effort on every front: businesses schools, local and state government agencies and the media."

"Our research is designed to study the effects of an organized and highly visible program of reproductive health promotion," says Merry-K. Moos, Research Assistant Professor in the Department of Obstetrics and Gynecology at UNC-Chapel Hill and project director.

The education campaign will include a variety of workplace activities and materials. Health information will be delivered to the workforce through health fairs, brochures, posters, meetings and one-on-one sessions with company health personnel.

"We believe the work place is the best place for delivering this type of preventive health information," said Dr. Bruce Dalton, director of Health Safety and Environment for Northern Telecom. "Many of these situations are preventable. We want to help our 7,000 area employees and their dependents avoid the trauma and pain of an infant death or prolonged illness."

"Corporations are also concerned with turnover, absenteeism and low morale no matter what the cause," said Dalton. "Anything we can do to promote the health of our employees and their families will have a positive effect on employee availability and productivity."

As a result of the employee education program, UNC and Northern Telecom hope to see earlier entry into prenatal care, a higher distribution of birth weights, fewer caesarean deliveries and a lower incidence of repeat pregnancies within one year of delivery among women exposed to the health promotion. Researchers will also evaluate changes in levels of stress, reproductive health knowledge, job satisfaction and overall morale for the entire workforce. Over time, the program is expected to result in fewer lost work days, lower turnover and lower costs for pregnancy and neonatal care, Dalton said.

Also participating in the study are Kayser Roth Textiles in Burlington and Graham, Sara Lee Knit Products in Lumberton and Brown-Wooten Mills in Burlington.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs more than 22,000 people across the U.S.

WARREN, NJ (MARCH 14) PR NEWSWIRE - Based on extensive market research within the broadcasting industry, Chubb Group of Insurance Companies recently introduced an exclusive Insurance Program for Broadcasters which fully integrates coverage, claim and loss control services with personalized Business Continuation Planning to provide a custom tailored protection program for television and radio operations.

"Broadcasters want responsive service integrated with broad coverage in a policy written in 'broadcasting' language," said Bob Felch of Chubb's Commercial Lines Division. "This new program responds directly to the special needs, coverages and services our research proved broadcasters look for, but rarely get, in an insurance program."

Chubb interviewed a variety of operations, both broadcast and cable television as well as radio, around the country. The overwhelming concern among interviewees was the need for professional, personalized business continuation planning to prevent and/or minimize lost air time and the resulting loss of ad revenues, erosion of ratings and decreased market share. Business Continuation Planning, a Chubb exclusive in the new program, provides a personalized roadmap to follow in the event a major loss or other event disrupts station operations.

Chubb's Loss Control consultants, together with the broadcaster's agent or broker, work with the insured to create a customized program that identifies the broadcast operation's true risks, provides safeguards to prevent loss, and outlines guidelines for emergency preparedness and maintenance of market share.

In addition to the Business Continuation Plan, Chubb's Insurance Program for Broadcasters provides a comprehensive coverage package for such industry-specific exposures as:

-- Towers and antennas -- Mobile broadcasting equipment -- Broadcast media library -- Telephone equipment -- Electronic data processing facilities -- Business personal property -- Business income -- Replacement cost valuation Other special exposures can be written into the package, such as theft by employees, catastrophic injury to others, directors and officers liability special event liability and event cancellation.

For more information on the Insurance Program for Broadcasters, contact your local Chubb agent or broker or write to Gail McGiffin, Commercial Lines Division, Chubb Group of Insurance Companies, 15 Mountain View Rd., Warren, NJ 07060.

Chubb Group of Insurance Companies is managed by Chubb & Son Inc., a wholly-owned subsidiary of The Chubb Corporation (NYSE: CB). Chubb's international network includes branches and affiliates throughout the United States and Canada and in more than 100 countries worldwide.

NEW YORK (MARCH 14) PR NEWSWIRE - Shigeho Kurashina, president of Hattori Corporation of America, which markets Seiko, Pulsar, Jean Lassale, Jaz Paris, Lassale and Lorus brand timepieces, announced today that the company will be changing its name effective March 30, 1990, to Seiko Corporation of America. He indicated that this change is being made as part of a worldwide initiative of the company's parent organization, Hattori Seiko Co. Ltd. of Japan, and that on the same date the Seiko name will also be made part of the corporate names of Hattori Seiko marketing subsidiaries in Canada, Europe and Australia.

Kurashina went on to say: "There has never been a timekeeping brand with the global reach and power of Seiko. Worldwide, our group will be taking advantage of that fact with these name changes. In our own case, as Seiko Corporation of America, consumers will immediately associate us with the industry's highest standards of quality, technological innovation and styling. And we will continue to extend to all our brands the commitment to excellence in timekeeping which our corporate name will so strongly suggest."

MIAMI (MARCH 14) PR NEWSWIRE - Atlantis Group, Inc. (AMEX: AGH), the largest shareholder of Grand Rapids-based Rospatch Corporation (NASDAQ: RPCH), today announced that it has filed a civil action against Rospatch, its officers, certain of its directors and the company's lawyers, Warner, Norcross & Judd. The defendants include Joseph A. Parini, CEO of Rospatch, and certain other present members of the Rospatch Board, J. Grant Beadle, Jones Y. Pharr, Jr., Keith Vander Hyde and Paul K. Gaston, managing partner of Warner, Norcross. Also named as defendants are William

E. Malpass, Jr., chief financial officer; Eugene Harris, the former controller and two former directors.

The complaint, filed in the United States District Court in the Southern District of Florida, alleges that the defendants participated in a fraudulent scheme and conspiracy to:

-- Induce shareholders to purchase shares at artificially inflated prices.
-- Minimize and conceal financial problems of Rospatch by issuing false and misleading financial statements.
-- Provide unjustified compensation to Parini despite Parini's poor performance.
-- Provide unjustified legal fees to Warner Norcross.
-- Thwart attempts by shareholders to gain control of Rospatch and maximize its value to shareholders.

The complaint alleges that Rospatch failed to disclose material financial and operating information, misrepresented material facts, overstated earnings and assets, and failed to inform its auditors of known and contingent liabilities. The lawsuit also alleges violations of the Foreign Corrupt Practices Act and other provisions of federal law and, in addition, contains state law claims, including breach of fiduciary duty, fraud, misrepresentation and breach of trust.

The complaint seeks compensatory and punitive damages, treble damages and attorney's fees.

Atlantis discovered many of these problems during a due diligence investigation conducted last summer in connection with Atlantis' attempt to purchase Rospatch. In September 1989, Atlantis reported its findings to the Rospatch board and withdrew its offer to purchase the company. Subsequently, Rospatch reported significant asset writedowns and reserves and terminated its controller for cause.

Earl Powell, CEO of Altantis and a member of the Rospatch board since August 1989, issued the following comments: "This action was taken by Atlantis in an effort to recover substantial damages caused by Rospatch, Parini, Warner Norcross and the Rospatch directors. The facts are very apparent and we intend to vigorously pursue our legal remedies."

Rospatch, headquartered in Grand Rapids, Mich., is a manufacturer of ready-to-assemble furniture. Atlantis Group, Inc. is a diversified manufacturer of plastics and furniture based in Miami.

ATLANTA (MARCH 14) PR NEWSWIRE - Chattahoochee Bancorp Inc. has declared a regular quarterly cash dividend of 1.5 cents per share, payable April 10 to stockholders of record as of March 30, said Rodney Knowles III, chairman.

The first-quarter dividend is the 13th consecutive quarterly dividend paid by Chattahoochee Bancorp and its predecessor organization, The Chattahoochee Financial Corp. Chattahoochee Bancorp is an Atlanta-based holding company with The Chattahoochee Bank as its principal subsidiary.

At Dec. 31, 1989, Chattahoochee Bancorp's assets totaled more than $226 million, with deposits of more than $196 million. The company has approximately 3,979,000 shares outstanding.

The Chattahoochee Bank is the seventh-largest, non-affiliated bank headquartered in Georgia. It operates six Banking House locations in Fulton and Cobb counties.

Additional financial information is available from Mimi Wilson, controller Chattahoochee Bancorp Inc., 404-952-7750.

#90073p0299 03/14/1990 ~PR Newswire

LOWELL, MA (MARCH 14) PR NEWSWIRE - COMFED Bancorp Inc. (AMEX: CFK) anticipates a fiscal 1990 fourth quarter (ending March 31, 1990) loss substantially exceeding the $6.0 million loss it reported in the third fiscal quarter. COMFED is not at this time able to fully estimate the amount of the loss.

COMFED's projected loss will be caused primarily by the high level of non-performing loans which have continued to increase during the quarter. In the face of a deteriorating real estate market, the bank's commercial and residential loans on non-accruing status have risen by $29.2 million, or approximately 23 percent, since Dec. 31, 1989.

According to Jefferson F. Allen, COMFED's chairman, president and chief executive officer: "Increases in non-performing loans, which for the most part were originated two or more years ago, force COMFED to build additional loan loss reserves, preventing any possible improvement in earnings at this time."

In addition to increased loan loss reserves, the company is experiencing

an annualized loss of interest income on non-accruing loans approximating $16 million, and an estimated annual expense of $7 million related to the management of these problem assets.

Allen continued: "The most serious ramification of these increases in non-performing loans is a further erosion of the company's capital position. As a result, the bank now fails to meet the federally legislated capital requirements."

As previously announced, COMFED filed a Capital Plan with the Office of Thrift Supervision (OTS) on Jan. 8, 1990. The bank received a preliminary request for additional information related to its Capital Plan, and has subsequently filed a response to this request. As of today, the company does not know whether the OTS will accept COMFED's proposed Capital Plan. However, COMFED's future operating strategies will be more directed by regulatory actions and restrictions than at any time in the past.

COMFED BANCORP, INC. is a $1.4 billion asset holding company headquartered in Lowell, Mass. Through its principal operating divisions: COMFED Savings Bank and COMFED Mortgage Company, the bank engages in residential mortgage lending, loan servicing and retail banking. COMFED Mortgage Company maintains a network of 16 offices in five Northeastern states. COMFED Savings Bank operates 30 retail banking offices in Massachusetts and Connecticut. The bank's loan servicing portfolio currently ranks in the top 20 among thrifts nationwide.

BOSTON (MARCH 14) PR NEWSWIRE - Teradyne, Inc. (NYSE: TER) announced today that its board of directors has adopted a Stockholder Rights Plan and declared a dividend of one common share puchase right for each outstanding share of the company owned as of the close of business on March 26, 1990.

The Rights Plan, which is designed to encourage anyone seeking to acquire the company to negotiate with the board of directors before initiating such an attempt, will entitle holders of Teradyne common stock to buy one share of the company's stock for $40.00 in the event a person or group acquires 20 percent or more of the common stock, announces a tender or exchange offer which would result in its ownership of 30 percent of the common stock, or is determined by the board to be an Adverse Person, as defined in the Rights Plan. The Rights will expire on March 26, 2000.

The company can in certain circumstances redeem the Rights at 1 cent per Right.

Details of the Stockholder Rights Plan are outlined in a letter which will be mailed to all stockholders. The company stated that the adoption of the Plan is not in response to any known effort to acquire control of the company.

Teradyne is a manufacturer of automatic test equipment for the electronics industry and of connection systems. Its stock is listed on the New York Stock Exchange (symbol: TER).

ALEXANDRIA, VA (MARCH 14) PR NEWSWIRE - Technology Applications, Inc. (TAI), a professional and technical services firm headquartered in Alexandria, Va., has appointed Lee Cooper as general manager of the Applied Sciences Division.

Cooper is responsible for TAI's supercomputer operations and aerospace systems engineering and logistics support programs in the Navy and Air Force.

Cooper comes to TAI from Advanced Technology, Inc., where he most recently was corporate executive director of Air Force Programs. He received his master's degree in systems management from the Air Force Institute of Technology in 1979. He is also a 1982 graduate of the Defense Systems Management College.

Cooper is a nationally recognized lecturer on software engineering and management. He is an active member of the Armed Forces Communications and Electronics Association (AFCEA), the Institute of Electrical and Electronics Engineers (IEEE), the Society of Logistics Engineers (SOLE), and the International Test and Evaluation Association (ITEA). He is a member of IEEE's Software Engineering Standards Subcommittee Review panel and is the industry co-chair of the Air Force Software Quality Assessment/Measurements Team. In this position he represents the Council of Defense and Space Industry Association (CODSIA) in supporting the Air Force Software Management Initiative.

TAI provides information systems, supercomputer facilities management, C3I ILS, systems engineering and integration, and mission support services primarily to agencies of the Department of Defense, National Aeronautics and Space Administration, and the Environmental Protection Agency. TAI employs more than 800 people at 39 locations around the United States and overseas. Principal offices are in the Washington area; in Tidewater, Va.; in Camarillo, Calif.; and in Dayton, Ohio. For its last fiscal year TAI posted revenues of $63.6 million.

#90073p0315 03/14/1990 ~PR Newswire

MONDOVI, WI (MARCH 14) PR NEWSWIRE - Marten Transport Ltd. (NASDAQ: MRTN) today reported revenues of $73.3 million for the fiscal year ended Dec. 31 1989, compared with $67.2 million in 1988. Operating income for 1989 was $878,000, versus $4.2 million in the year-earlier period.

The company reported a net loss of $1.4 million, or 41 cents per share for the year, compared with net income of $1.6 million, or 47 cents per share in 1988. Fiscal year net income for 1988 includes the cumulative effect of a change in the method of accounting for income taxes.

The ratio of operating costs to revenues was 98.8 percent in 1989, versus 93.7 percent in 1988.

For the fourth quarter ended Dec. 31, 1989, Marten reported revenues of $19.0 million, up from $17.2 million for the same period in 1988. The company reported an operating loss for the period of $506,000, down from operating income of $1.1 million last year.

Net loss for the quarter was $950,000, or 28 cents per share, compared with net income of $270,000, or 8 cents per share, in 1988. Fourth quarter operating ratio increased to 102.7 percent from 93.8 percent in 1988.

"We concentrated on putting new systems in place during the year which affected our profitability, but we expect these operational changes to help us improve margins in 1990," said Roger Marten, chairman and chief executive officer. "We are encouraged that our revenues continue to increase despite highly competitive industry conditions, which shows greater demand for our protective service carriage. This is our niche and our strength going forward."

Marten Transport, a truckload motor carrier with nationwide operating authority, concentrates on providing protective service transportation. Customers include shippers of products that require modern temperature-controlled trailers to protect their products. Marten shares are traded on the NASDAQ national market system under the symbol MRTN.

DALLAS/FORT AIRPORT (MARCH 14) PR NEWSWIRE - American Airlines will expand its Raleigh/Durham, N.C., hub in April by adding a total of 10 nonstop flights a day in six markets, the airline today announced.

The additions include new nonstop service between Raleigh/Durham and Stewart Airport in Newburgh, N.Y., effective April 17, and the resumption of service to Bermuda on April 1 and to Myrtle Beach, S.C., on April 16.

In addition, American will add a fifth daily nonstop flight in the Raleigh/Durham-Dallas/Fort Worth market on April 1; increase its existing nonstop services by one flight a day to Norfolk, Va., also on April 1, and add a trip to Columbia, S.C., starting April 16.

The new Raleigh/Durham-Dallas/Fort Worth flight will offer convenient connections to Sydney, Australia and Auckland, New Zealand.

The increases will give American a total of 127 flights a day to 45 cities at the Raleigh/Durham hub. The carrier's regional airline partner, American Eagle, serves RDU with an addtional 52 flights a day to 17 cities.

"This is another significant step in the gradual development of the Raleigh/Durham hub," said W.R. (Bob) Hawkins, American's regional sales manager. "Each step makes the hub stronger as a gateway and increases its ability to attract commercial and economic development."

The flights to and from Stewart Airport, located about 60 miles north of New York City, will be the first commercial air service ever offered to that airport. American will serve the RDU-Newburgh route with three nonstops a day, scheduled in a convenient morning, midday and evening pattern.

American also will operate three nonstops daily between RDU and Myrtle Beach.

There will be one flight a day to and from Bermuda, one of the world's premier island resort destinations. The flight to Bermuda will leave RDU at 10:13 a.m. and arrive in Bermuda at 1:20 a.m. The return trip will leave Bermuda at 12:00 p.m. and arrive at RDU at 1:16 p.m.

The new flights for Norfolk and Columbia will give American three roundtrips a day in each of those markets.

#90073p0326 03/14/1990 ~PR Newswire

HILLSIDE, IL (MARCH 14) PR NEWSWIRE - Wallace Computer Services, Inc. (NYSE: WCS) today announced that its board of directors has adopted a Stockholder Rights Plan in which stock purchase rights will be distributed as a dividend to its common stockholders at the rate of one right for each share of common stock held of record as of the close of business on March 28, 1990.

The rights plan is designed to deter coercive takeover tactics and to prevent an acquiror from depriving stockholders of the long-term value of

their investment. Wallace's board of directors is not aware of any takeover attempt, and the rights plan has not been adopted in response to any known effort to acquire the company.

Under the plan, holders of the rights will initially be entitled to buy one two-hundredth of a share of a newly authorized Series A Preferred Stock at an exercise price of $115 for each right held. The rights will be exercisable only if a person or group acquires 20 percent or more of Wallace's common stock or commences a tender or exchange offer for 20 percent or more of the company's common stock. Until they become exercisable, the rights attach to and trade with the company's common stock. The rights will expire in the year 2000 unless earlier redeemed or exchanged by the company. The rights dividend will not be taxable to Wallace's stockholders.

If any person or group should acquire 20 percent or more of the company's common stock or if a merger or business combination with the company or certain other transactions involving a 20-percent-or more stockholder should occur, each right not owned by a 20-percent or-more stockholder or related parties will entitle its holder to purchase, at the right's then current exercise price, shares of Wallace's common stock having a value of twice the right's current exercise price.

If any person or group should become a 20 percent-or-more stockholder of Wallace, and the company should thereafter be acquired in a merger or other business combination or sell 50 percent or more of its assets or earning power, each right will entitle its holder to purchase, at the right's then current exercise price, shares of common stock of the acquiror having a value of twice the right's then current exercise price.

Additional details of the Stockholder Rights Plan will be outlined in a letter that is being mailed to Wallace's stockholders on or about March 28 1990.

CONTACT: Michael Halloran of Wallace Computer Services, 708-449-8600.

#90073p0331 03/14/1990 ~PR Newswire

CHICAGO (MARCH 14) PR NEWSWIRE - West Point-Pepperell, Inc. (NYSE: WPM) announced today that it has executed an amended and restated bridge credit agreement with its major banks for up to $1.2 billion in credit facilities. The loan consists of two facilities.

The first facility is a term loan of $550 million that matures Dec. 31, 1994. The second facility is for up to $650 million of revolving credit (subject to a borrowing base) and also matures on Dec. 31, 1994. The loans will bear interest at 1-1/2 percent over prime; these interest rates will

be automatically reduced if West Point satisfies certain financial conditions.

William Farley, chairman of West Point, stated that he "is extremely pleased with these new loan arrangements which amend the bridge facility that was to mature on March 31, 1990, and now provides the company with more permanent credit facilities."

Moreover, he stated, "These loans are at lower interest rates than West Point has been paying and will provide substantially increased working capital and stability for the company's operations. Furthermore, if there is a default by West Point's parent in its debt, such default will not cause a cross default at West Point-Pepperell."

West Point-Pepperell is a vertically integrated manufacturer and marketer of quality textiles and apparel for the home, for industry and for the apparel trade. The company's branded products are sold under such well-known names as Ralph Lauren, Martex, Lady Pepperell, Collier Campbell Gloria Vanderbilt, Eileen West, Louis Nichole, Liberty of London, Esprit, Utica and Tastemaker.

#90073p0334 03/14/1990 ~PR Newswire

ROCHESTER, NY (MARCH 14) PR NEWSWIRE - Roadway Motor Plazas, Inc. (NASDAQ: RDWI) today reported a loss of $11,155 on revenue of $32,877,250 for the fiscal third quarter ended Jan. 31, 1990, compared to net income of $3,701 on revenue of $25,992,736 for the third quarter ended Jan. 31, 1989.

John Holahan, the company president, noted that the third quarter is historically a poor quarter in terms of profits for the company due to the seasonality of its customer base. This was further impacted during the current fiscal year by sharp increases in oil prices along the eastern seaboard, resulting in higher retail fuel prices but depressed fuel margins. The end result was a negative impact on earnings. It is expected that fuel margins will return to their normal levels as they have done historically during the fourth quarter.

In addition, the company's new travel center, located in Greencastle, Pa., is proving to be an excellent addition to the core of the Roadway Motor Plazas facilities. While operating only two of the three months during the fiscal third quarter, this location contributed over four percent of the company's revenue.

SUMMARY OF RESULTS (UNAUDITED)

	Three Months Ended Jan. 31		Nine Months Ended Jan. 31	
	1990	1989	1990	1989

MUSKEGON, MI (MARCH 14) PR NEWSWIRE - The Randers Group Incorporated (OTC) today announced preliminary results for the year ended Dec. 31, 1989.

Based on preliminary results, the company expects to report record revenues of $7,313,000 compared to $5,518,000 in 1988, an increase of over 30 percent. Net income for 1989 is expected to be $228,000 compared to $310,000 in 1988. The decrease in net income is primarily attributed to two instances of increased construction costs and delays on completed 1989 work. The current backlog of work is at high record levels in both the service and construction areas of our business. First quarter 1990 revenues are expected to approximate 175 percent of the first quarter 1989 revenues. During 1989, the company opened an office in Cincinnati, became a fully reporting company with the Securities and Exchange Commission (SEC) and has filed an initial application for a NASDAQ listing.

Thomas R. Eurich, president, said "The corporate plan initiated a few years ago continues to result in substantial growth in our established markets while at the same time management remains committed to assuring control of the expanding operations."

The Randers Group of Companies represents a broad base of engineering and architectural skills. The companies provide design, consulting, project management, development and general contracting services. The majority of their work involves designing and implementing technology related projects, as well as development and design/build engagements, for industrial and commercial clients.

The annual report to shareholders containing the audited financial statements is expected to be ready by the end of March 1990.

#90073p0349 03/14/1990 ~PR Newswire
OMAHA, NE (MARCH 14) PR NEWSWIRE - To better serve its customers, Ford Motor Credit Company announced today that it will open a new centralized customer service center here this fall.

Employees of the service center will answer Ford Credit customers' questions on subjects ranging from financing information to requests for service and assistance. The center will be phased in gradually over two years. It is expected to grow to about 300 employees by the end of 1992, with most of the work force to be hired locally.

"Our primary objective is to improve the level of service we provide our customers," said Carl D. Fischer, project manager, Ford Credit. "We believe the national service center will provide us with a breakthrough toward our goal of service leadership in automotive financial services."

When the new center begins operation, customers will be given a toll-free number which will connect them daily to the center. Ford Credit has been pilot testing a centralized customer service center and, based on favorable results and improved customer satisfaction, the company decided to expand it to a national program.

Ford Credit is a wholly owned subsidiary of Ford Motor Company (NYSE: F) and part of the Ford Financial Services Group. Ford Credit provides vehicle financing for about five million retail automotive customers and more than 8,500 Ford, Lincoln-Mercury, Ford Truck, and Ford New Holland and affiliated dealers in the United States, Canada, and Australia.

The company conducts its automotive financing business in 150 branch offices in the United States and Canada.

TEMPE, AZ (MARCH 14) PR NEWSWIRE - Symbion Inc. (NASDAQ: SYMB) announced today its results of operations for the year ended Dec. 31, 1989. For the first time in its history, the company reported a net profit from operations ($4.4 million or $.57 per share). The profit recognized in 1989 was the result of unusual sales by the company of technologies and other assets. The total gain recognized on these sales in 1989 was $6.67 million.

The company's product and service sales totaled $3.1 million in 1989 compared to $5.8 million in 1988. The drop in sales is largely attributed to a decline in the number of new centers enrolling in the Artificial Heart and Acute Ventricular Assist Device implant programs sponsored by Symbion. The company also reported that sales are likely to decline further in 1990 as a result of recent actions taken by the U.S. Food and Drug Administration (FDA).

On Jan. 12, 1990, Symbion received notification from the FDA withdrawing approval of Investigational Device Exemptions for the company's Total Artificial Heart and Acute Ventricular Assist Device. The FDA's actions prevent the company from currently shipping any devices to investigational centers within the United States. Furthermore, Symbion has determined not to ship any devices internationally until the issues raised by the FDA are adequately addressed.

Symbion also reported that two members of its board of directors have resigned. Rodman W. Moorhead III, of Warburg Pincus resigned on Jan. 19, 1990. Lynne L. Jacobsen of W.R. Grace resigned on Feb. 22, 1990. Both cited other business obligations that would not allow them to continue to serve as directors. Symbion thanks them for the service they have provided.

The remaining board members are Richard W. Alder, chairman of the board, president and chief executive officer; Gary M. Cole, executive vice president; and Edward J. McKinley, Warburg Pincus. The board has determined that no additional members will be elected to the board until the next shareholder meeting.

The company also announced that its 1990 Annual Meeting of Shareholders has been scheduled for July 20, 1990, in Tempe. Shareholders of record on June 1, 1990, will be entitled to vote at this meeting.

CONTACT: Lane J. Castleton, CFO and controller of Symbion Inc., 602-831-0472.

PHILADELPHIA (MARCH 14) PR NEWSWIRE - Joseph H. Grenuk was named vice president of Comcast Corp. (NASDAQ-NMS: CMCSK, CMCSA) and president of

Comcast Cellular Communications Inc., the cellular telephone division of the company, it was announced today by Brian L. Roberts, president.

Grenuk will oversee the management of the company's cellular telephone operation which serves a population of 1.9 million and currently has more than 30,000 customers. In addition to playing an active role in the division's operations, he will participate in the company's efforts to expand its cellular operation through acquisitions.

Grenuk has more than 14 years experience in telecommunications, including eight years experience in the cellular telephone industry. He has held high-level senior management positions at LIN Broadcasting Corp., where he most recently served as vice president of operations- cellular; the Indianapolis Telephone Co., where he was vice president- finance and administration, and the GTE Corp., where he held numerous financial management and operating positions. He holds a bachelor's degree from Florida State University.

Roberts stated, "Comcast is pleased Mr. Grenuk has decided to dedicate his skills and in-depth experience in telecommunications management to our company. We are excited about our prospects for expansion in the cellular telephone industry and are confident that Mr. Grenuk will play a vital role in that effort."

Comcast Corp. is principally engaged in the management, development and operation of cable communications systems. Additionally, Comcast Corp. provides cellular telephone communications services as well as sound and music services. The Class A special common stock and the Class A common stock of Comcast Corp. are traded in the Over-the-Counter market and are reported in the National Market List under the NASDAQ symbols CMCSK and CMCSA, respectively.

BLOOMFIELD HILLS, MI (MARCH 14) PR NEWSWIRE - Core Industries Inc. (NYSE: CRI) today announced operating results for its second quarter ended Feb.

28, 1990. Net earnings amounted to $1,260,000 (13 cents a share) as compared to $1,665,000 (17 cents a share) last year. Net sales decreased slightly and approximated $55,700,000 during the current quarter.

The Electronics Group had substantially reduced earnings for the quarter. A customer has failed to perform its purchase obligations under an agreement involving the GSE/Tech-Motive product line, which action severely impacted the company's operating results. The customer is currently negotiating for a revised agreement. Should the results of these negotiations prove to be unacceptable, the company will pursue litigation.

The operating results of the Electronics Group were also affected by weakness in the machine tool electronics and disk drive test equipment markets.

The Fluid Control and Construction Products Group continued its strong performance and achieved substantially increased earnings during the quarter. The Farm Equipment Group also attained improved operating results.

Core Industries is a manufacturer of specialty products for four basic industries: electronics, farm equipment, fluid controls and construction products, and industrial products.

DALLAS (MARCH 14) PR NEWSWIRE - International Telecharge, Inc. (AMEX: ITI) today vowed that it would vigorously fight a lawsuit filed by AT&T (NYSE: T).

Ed Tagg, chairman of the board of ITI, stated: "This is an obvious attempt by AT&T to bully competitors through the use of lawsuits. AT&T had a monopoly on public pay telephone traffic in the past, and now they are desperately attacking competitors who have made inroads into their market share since last April. We will not only defend our actions, we will attack AT&T's attempts to monopolize the marketplace."

Steve Bickerstaff, ITI executive vice president of legal and regulator affairs, stated: "We have not had an opportunity to see the pleadings. We have had discussions with AT&T about their concerns, so I am surprised that they would file a lawsuit at this time. We do not believe that AT&T has a valid claim to any damages. We will investigate whether there is an anti-competitive intent in the filing of this lawsuit."

AT&T recently filed a similar suit against MCI, and also filed suit against Rockville, Md.-based National Telephone Services, Inc. (NTS).

ITI is a leading national telecommunications supplier of network- based operator and information services, primarily to hotels, hospitals, institutions, payphone owners and other interexchange carriers.

NEW YORK (MARCH 14) PR NEWSWIRE - The board of directors of The Prudential Strategic Income Fund, Inc. (NYSE: PSF) announced today that it intends to submit to stockholders a proposal to convert the fund into an open-end investment company. This proposal will be submitted to stockholders at a special meeting expected to be held in August in lieu of the fund's annual meeting of stockholders which is customarily held in May.

The board of directors took this action upon the recommendation of the fund's manager in the belief that it was in the best long-term interests of the fund and its stockholders. The board will consider at its next regular meeting on May 10 the specific terms and conditions for implementing this proposal.

The Prudential Strategic Income Fund, Inc. is a closed-end management investment company which invests in different sectors of the world's bond markets, primarily U.S. government bonds, foreign government bonds and high yielding, lower quality U.S. corporate bonds. The fund's manager is Prudential Mutual Fund Management, Inc. and investment advisory services are provided by the Prudential Investment Corporation. Additional information on the fund's assets and performance will contained in the annual report for the fiscal year ended Jan. 31, 1990, which will be available in late March. For further information on the fund, call

212-214-3334.

IRVINE, CA. (MARCH 14) PR NEWSWIRE - Century 21 Real Estate Corp. announced today that it is conducting a formal review of its national advertising program.

"While we are satisfied with the performance of our national agency, McCann-Erickson, we believe it is prudent, after seven years, to investigate alternatives," said Richard J. Loughlin, president and CEO of Century 21 Real Estate Corp.

The review is expected to last approximately 60 days. No other agencies, other than incumbent McCann-Erickson, have been as yet identified as part of the review.

Century 21 Real Estate Corp. is a wholly owned subsidiary of Metropolitan Life Insurance Co. and is the largest real estate organization in the world with more than 7,200 independently owned and operated offices. Worldwide, real estate valued at more than $65 billion was sold in 1989 by the CENTURY 21 (R) system.

HOUSTON (MARCH 14) PR NEWSWIRE - In response to a newspaper advertisement by Lockheed, J. Landis Martin, president and CEO of NL Industries (NYSE: NL), stated today: "The Lockheed proxy contest should be decided on the basis of real issues facing Lockheed, not personal attacks on Harold Simmons. As Lockheed's management knows, their advertisement uses statements quoted by a reporter from a story appearing months ago that were joking remarks by Simmons made at the end of a long interview. We said so immediately after the statement was published in the newspaper.

"As for the notion that NL or Harold Simmons views Lockheed as a 'decoy,'" Martin continued, "in the five months since the article appeared, NL has invested more than $200 million in some 5 million Lockheed shares -- while not a single member of the present Lockheed board has bought a single share."

"I also think Lockheed's current board is out of line in charging that NL's nominees are somehow unsuited to lead a national defense firm. Our slate includes Admiral Elmo Zumwalt, former Chief of Naval Operations and member of the Joint Chiefs of Staff; General Earl O'Loughlin, former head of the Air Force Logistics Command; Chancellor Hans Mark, former Secretary of the Air Force and Deputy Administrator of NASA; Senator John Tower, who chaired the Senate Armed Services Committee; and Robert Wilson, a former CEO of Collins Radio and a former executive officer of Rockwell International. These gentlemen, as well as our other nominees, are running on our slate precisely because they believe that we can revitalize Lockheed's core national defense operations. Meanwhile, the incumbent board has stated it intends to reduce reliance on government military spending and diversify into businesses like visual arts and computer graphics."

"As we go forward in the last two weeks of this proxy contest," Martin concluded, "I hope that the Lockheed management will join us in focusing on the real issues that face Lockheed. We think Lockheed's shareholders need to decide which side has the track record showing it can enhance the profitability of Lockheed's core businesses and reverse the erosion of shareholder value that has occured on the current board's watch."

#90073p0397 03/14/1990 ~PR Newswire

SUNDSVALL, SWEDEN (MARCH 14) PR NEWSWIRE - SCA Group of Sweden today announced consolidated earnings after financial items for 1989 of 2,712 million Swedish kronor (SEK), a 4 percent increase over the SEK 2,603 million reported in 1988.

SCA's shares are traded on NASDAQ in the form of American Depositary Receipts (ADRs) under the symbol SCAPY. One ADR represents one SCA share.

Fully diluted earnings per share before extraordinary items amounted to SEK 8.37 after a theoretical tax charge including a 50 percent deferred tax on appropriations, and to SEK 10.90 on the basis of taxes actually payable. This compares to SEK 7.63 and SEK 11.31, respectively, for 1988. Profits from forestry and power operations contributed earnings per share of SEK 2.55 compared to SEK 2.13 in 1988.

Including extraordinary items, earnings per share in 1989 were SEK 8.42 compared to SEK 7.67 in the year-ago period. Earnings per share this year amount to SEK 10.11 when taking into account the 30 percent standard tax rate as a result of the corporate tax reform proposed in Sweden.

"Consolidated pre-tax return on capital employed was 15 percent in 1989,

compared to 17 percent last year. During the past five years, pre-tax profitability has averaged 16 percent. It has therefore exceeded SCA's target of 15 percent for a business cycle," said Sverker Martin-Lof, president and chief executive officer.

Net sales for the SCA Group rose by 19 percent to SEK 24.9 billion, compared to SEK 20.9 billion in 1988. Comparing equivalent units, sales were 4 percent above the preceding year's level.

After-tax return on shareholders' equity amounted to 18 percent, the same as in 1988.

Dividend Increase Proposed

The board of directors will propose paying a dividend of SEK 2.90 per share compared to SEK 2.42 per share which would absorb SEK 495 million compared to SEK 410 million in 1988. SEK 1.9 billion will be at the disposal of the annual general meeting of the shareholders on May 29 in Gothenburg.

Including the increase proposed this year, the dividend has risen by an average of 20 percent over the past five years.

Business Segment Results

Sales of forest and paper products increased by 27 percent, and sales at Molnlycke, the group's health care and consumer products unit, increased by about 4 percent from the preceding year. At BAKAB, the hydroelectric power subsidiary, and SCA Packaging, sales increased by 12 percent and 78 percent, respectively. Revenues from companies acquired during the year accounted for 35 percent of SCA Packaging's increased sales.

Operating profit fell by 2 percent for the forest and paper products segment, but grew 35 percent at BAKAB. At SCA Packaging, operating profits grew by 58 percent, but increased only marginally at Molnlycke.

"International demand for forest and paper products remained good in 1989, although capacity utilization was lower due to surplus capacity in newsprint, linerboard and printing and writing paper," said Martin-Lof. "SCA's lower earnings from newsprint and linerboard have been offset by added earnings from super-calendered paper (Laakirchen) and testliner (Italcarta), which both achieved satisfactory profitability."

Capital Expenditures

Net capital expenditures on property and plant during 1989 amounted to SEK 2.6 billion, compared to SEK 1.5 billion in 1988. Capital spending on corporate acquisitions in 1989 totaled some SEK 462 million, which included the acquisition of Bowater Containers N.V. in Belgium, Givray S.A. in France, and the remaining 50 percent of Sancella Inc. in Canada.

Goodwill

Due to the group's major acquisition strategy implemented in 1988, SCA elected to write off all acquired goodwill directly against distributable shareholders' equity.

International accounting bodies, however, recommend the use of depreciation according to plan, a trend which has become more accepted in Sweden. At the beginning of 1989, SCA began to write off acquired goodwill over the useful life of the object instead of the 20-year maximum previously used.

Securities Transactions

Stock and other securities were bought and sold for a net of SEK 77 million during the year. After the end of 1989, SCA sold its remaining 25 percent stake in West German Zewawell and acquired a 5 percent stake in Feldmuhle Nobel AG of West Germany.

In 1989 and early 1990, through purchases and sales, SCA increased its holding in Industrivarden to 18.04 percent of the voting rights. An eventual exercise of options held will increase SCA's voting rights to 20 percent, allowing Industrivarden to be reported as an SCA associated company.

Financing and Liquidity

The SCA Group's cash and short-term investments fell to SEK 3.7 billion, compared to SEK 4.1 billion at the end of 1988. The group's interest-bearing liabilities, exclusive of loans assumed and assigned in connection with acquisitions and divestitures of companies, increased by SEK 1.2 billion, compared to SEK 1.5 billion in 1988.

Outlook for 1990

"General economic trends in Europe are expected to remain favorable in 1990, even if somewhat subdued compared to preceding years. Combined with a stagnated raw material market, this translates into positive trends at SCA Packaging in 1990," said Martin-Lof. "The weak raw materials market will also have a favorable impact on Molnlycke. The tough competition in the hygiene sector will be countered with additional market initiatives and capacity-related capital expenditures.

"Even if market trends for traditional forest and paper products remain favorable in Europe, the situation is complicated by weakenings in Sweden and England as well as a surplus of supply in several sectors, due in part to the weaker market in North America. The Swedish cost development also results in tighter margins for exported products. While this may translate into weaker earnings from SCA's linerboard, newsprint and pulp businesses, we envision better results for SCA's printing paper and testliner operations based in Continental Europe," Martin-Lof commented.

In 1990, SCA will complete a major capital expenditure program at its graphic paper business group, which includes decommissioning a newsprint machine this spring and commencing new light-weight-coated production just before year-end.

Despite anticipated improvements in SCA's hygiene and packaging sectors, the group's shrinking margins on the forest and paper products industry in Sweden -- combined with high interest rates and non- recurrent effects of capital expenditure projects -- will result in a decline in consolidated earnings. Based on the information now available, SCA forsees a decline of approximately 10 percent. This decline will be less if the price of pulp falls, since the group is a net purchaser of pulp.

Annual General Meeting of Shareholders
The annual general meeting of shareholders will take place on May 29, 1990, in Gothenburg, Sweden. Interim reports will be issued on May 29 and Oct. 8, 1990.

At current exchange rates, US$1 is the equivalent of SEK 6.20

SCA GROUP

NILES, OH (MARCH 14) PR NEWSWIRE - USX Corporation (NYSE: X) and Quantum Chemical Corporation (NYSE: CUE) announced today that a registration statement has been filed with the Securities and Exchange Commission relating to an initial public offering of 15 million shares of RMI Titanium Company common stock, par value $.01 per share.

The business of RMI Titanium Company is currently conducted through RMI Company, a partnership owned equally be USX and Quantum. In a reorganization to be completed concurrently with the offering, USX and Quantum will transfer their entire partnership interests into the company in exchange for 15 million shares of the common stock, all of which are being sold in the offering.

RMI Titanium Company of Niles is one of the world's leading integrated producers of titanium sponge and mill products. Titanium mill products are used principally in the aerospace industry in commercial and military aircraft, with non-aerospace applications in chemical processing equipment mesh for bridge and deck repair and medical implants.

On the 15 million shares of common stock to be offered, 12 million shares will be sold through a U.S. underwriting syndicate led by the First Boston Corporation, Morgan Stanley & Co. Incorporated, and Salomon Brothers Inc. The remaining three million shares will be sold in a simultaneous international offering managed by Credit Suisse First Boston Limited, Morgan Stanley International Limited and Salomon Brothers International.

The international public offering price is anticipated to be between $14 and $17 per share. The common shares have been approved for listing on the New York Stock Exchange.

DALLAS (MARCH 15) PR NEWSWIRE - Officials of Texas Instruments Inc. (NYSE: TXN) and Toppan Printing Co. Ltd. today signed a definitive agreement to establish a jointly owned U.S. company that will acquire TI's internal photomask operation in Dallas. This agreement formalizes the understanding which was first announced in December 1989, when TI signed a letter of intent with Toppan. The sale is expected to be finalized at the end of March.

In addition to serving as a major supplier of photomasks to TI, the new firm, Toppan Printronics (U.S.A.) Inc., will supply other semiconductor manufacturers in North America and Europe. The company will employ TI's current photomask workforce which totals about 160 people. The operation is expected to remain in TI facilities for the next two to three years, with any future relocation planned for the Dallas area.

When the transaction is concluded, Toppan will own 85 percent of the new company, and TI will have a 15 percent ownership interest. Kazuo Suzuki, president of Toppan Printing, will be chairman of the new company. Jim Lewis will join Toppan Printronics as president, drawing on his long experience in semiconductor manufacturing at TI.

Toppan Printing Co. Ltd., headquartered in Tokyo, is one of the world's largest printing companies, with 1988 revenues of about $5.6 billion. Toppan initially entered the U.S. semiconductor market in 1979 with an integrated circuit layout design center in Orange County, Calif. Toppan began supplying locally produced photomasks to semiconductor companies in the U.S. in 1988. Overall, Toppan has operations in 11 U.S. locations including a multilayer printed wiring board factory in San Diego.

Texas Instruments Inc., headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems, industrial automation and control systems, electrical controls, metallurgical materials, and consumer electronics products.

CHICAGO (MARCH 15) PR NEWSWIRE - Donald W. Phillips has joined Equity Financial and Management Co. in Chicago as executive vice president, according to Equity Financial principals Samuel Zell and Robert Lurie.

Phillips will be responsible for establishing and maintaining relationships with institutional investors, including raising funds and marketing institutional-grade investment vehicles, according to Zell. ''Mr. Phillips brings an outstanding track record and set of contracts within the industry to our organization. His expertise will enable us to both develop new products suited to the needs of major financial institutions, and to better serve our existing relationships,'' he said.

Zell cited the Zell/Chilmark fund, which is currently being marketed to institutional investors, and which seeks to invest in companies with troubled balance sheets; and the Zell/Merrill Lynch Real Estate Opportunity Partners, a fund which is investing in real estate turnaround situations, as examples of Equity's institutional products.

In addition, Phillips will be working with Zell and Lurie toward establishing a financial services group.

Previously, Phillips was chief investment officer at Ameritech, Inc., where he was responsible for the investment strategy and overall management of $12 billion in assets for the Ameritech Pension Fund and The Ameritech Savings Plan. The funds represent the largest private pension fund in Illinois and the eight largest in the United States. Prior to joining Ameritech in 1983, Phillips was with Beatrice Companies, Inc. for 10 years as director-employee benefits.

Phillips is a frequent contributor to industry publications and was selected by Institutional Investor as one of the country's top 10 pension fund managers.

Phillips serves on the board of directors of Larimer Co., a Denver-based venture capital fund, and is a member of the Board of Advisors to the Northern Illinois University School of Business. He holds an undergraduate degree from Western Illinois University and an master of business administration from Northern Illinois University.

Equity Financial and Management, Inc., is a Chicago-based private company which invests in real estate nationwide.

PITTSBURGH (MARCH 15) PR NEWSWIRE - USX Corp. (NYSE: X) and Kobe Steel Ltd., Tokyo, announced the signing today of a definitive agreement to form a joint venture to produce hot-dipped galvanized sheet products in the United States.

The new company will be called AZTEC Coating Co. The company name refers to the product's all-zinc technology.

The galvanizing plant will be constructed on a site immediately northeast of Leipsic, Ohio, a community of 2,200 residents in Putnam County in the northwestern quadrant of the state.

The partnership will construct a hot-dipped galvanized sheet products plant with a projected capacity of 600,000 net tons yearly and anticipated employment of approximately 100. Equity participation will be 50 percent for each partner. The project is expected to cost about $200 million.

The state-of-the-art plant would be designed by a joint team of technical experts from the USS division of USX Corp. and Kobe Steel. Construction would begin this summer with startup of operations projected for the third quarter of 1992.

The galvanizing line would supply highest quality coated sheets (gauges of .015 inch to .070 inch and 72 inches maximum width) to the automotive industry and other steel-consuming industries. The product line would include galvanized and galvannealed coatings for exposed automotive applications.

Master coils for the line will be supplied from three USX plants -- Gary Works in Indiana, the Mon Valley Works near Pittsburgh, and Fairfield Works near Birmingham, Ala. Marketing of the galvanized products will be handled by both Kobe Steel and USS.

Kobe Steel and USS have long been suppliers of high quality coated products to their respective markets.

Spokesmen for the two companies said the joint venture is an effective way of responding to the rapidly expanding market for coated corrosion-resistant steel.

The Leipsic site was chosen alTHI everal months of search and selection activity by USS and Kobe officials working cooperatively with representatives of the Putnam County Community Improvement Corporation and the Ohio Department of Development.

SANTA ANA, CA (MARCH 15) PR NEWSWIRE - Southland Communications Inc. (OTC: SCII) is unaware of any present or pending company development which would account for the high volume of trading and price increases in the company's stock yesterday.

As the company publicly announced on March 6, 1990, the company is commencing a private placement which is intended to raise up to $5,000,000. The private placement is being offered to a select group of foreign investors. A portion of the proceeds from the private placement is intended to be used to finance the acquisition of A+ Beepers of California Inc., with the majority of the balance of such proceeds to be used as working capital.

The company also announced on March 6, 1990, that it had reached an agreement in principle for the acquisition of A+ Beepers of California Inc., for a combination of stocks and notes. The consummation of the acquisition is subject to the execution of a definitive merger agreement and other conditions.

Southland Communications Inc. does business as National Paging, providing electronic paging services for individual and business subscribers.

DALLAS (MARCH 15) PR NEWSWIRE - Lomas Financial Corp. (NYSE: LFC) announced today that its ELLCO Leasing Corp. subsidiary has reached agreement with the lenders participating in its standstill agreement to extend to March 21, 1990 from March 14, 1990 the maturity on approximately $630 million of its non public debt outstanding.

The agreement provides for a further extension of the due date to May 31, 1990 if a signed purchase agreement for ELLCO is submitted by March 21,

1990 to the court in Lomas' Chapter 11 proceedings. ELLCO was excluded from Lomas' Chapter 11 filing.

Lomas said that it is currently in the final stages of negotiations on the sale of ELLCO and is hopeful that a definitive agreement will be reached and submitted to the court by the March 21 date.

CONTACT: Michael Sitrick or Ross Palmer of Sitrick and Co., 213-208-1108, for Lomas Financial.

MEXICO CITY (MARCH 14) UPI - More than 2 million Cubans will take part in a rehearsal this week to see how the Caribbean communist nation would cope with a U.S. invasion, the official Cuban news agency Prensa Latina said Tuesday.

The rehearsal, which is scheduled for Thursday and takes into account a possible interruption in supply of foreign goods, is known as ''Special Period in Times of Peace,'' said a Prensa Latina dispatch monitored in Mexico City.

The news agency said more than 2 million residents of the Cuban capital Havana will take part in the exercise, which was originally conceived in case of a U.S. blockade, aggression or invasion of Cuba. It said the exercise was made necessary in the face of recent political unrest in Eastern Europe.

''Our objective is to work in the most similar conditions (to a possible invasion),'' Prensa Latina quoted Jorge Lezcano, first secretary of the Cuban Communist Party of Havana, as saying.

Lezcano said that during the Thursday rehearsal, electrical supply, transportation and other services will not be altered, but that all working centers must perform their regular activities using as little energy as possible.

Lezcano said similar rehearsals have been carried out in the past.

''The main objective is to produce more efficiently and to prove how much can be done in an extremely difficult situation just like the one foreseen in the Special Period in Times of Peace,'' Lezcano said.

Cuban leader Fidel Castro, who has ruled Cuba since 1959 when his revolutionary forces ousted dictator Fulgencio Batista, said recently Cuba should be prepared in case the economic situation gets worse in the Soviet Union, which provides about $5 billion in annual aid and subsidies to Cuba.

In 1962, President Kennedy ordered a naval blockade of Cuba to prevent the arrival of Soviet missiles to the island nation, resulting in the dismantling of Soviet missile bases there.

#90073u0146 03/14/1990 ~United Press International

STINSON BEACH, CA (MARCH 14) UPI - A popular coastal eatery is serving up its homemade soups and garden salads with a side helping of politics.

Diners at the Parkside Cafe are offered 1990 federal budget ''pie charts'' along with the menus and encouraged to slice the figures to show how they would like to see the $1.15 trillion spent.

Rep. Barbara Boxer, D-Calif., called the concept ''excellent,'' and has promised to share the responses with appropriate federal agencies.

''It's one way of getting feedback to those in power on how we want our money spent,'' said cafe co-owner Barbara Scott. ''As a people, we're getting hornswaggled by special interest groups.''

Scott said the idea came from a conversation with a local surfer and some other cafe regulars who paid a visit to Boxer at her Greenbrae, Calif., office.

Web Otis, a cafe regular and a former Interior Department employee, said the federal budget figures were researched across the street at the small library and then made into the pie chart. The biggest slice, 26 percent or $300 billion, the chart shows, goes to military spending. The smallest, .22 percent, goes to the Commerce Department.

''We're being taken seriously,'' Otis said. ''People are reading the charts and interest has soared. A lot of the talk over coffee is now about the federal budget and taxes. It's incredible.''

So far, he said, the consensus of some two dozen responses is to cut the military budget and funnel the extra money to education, the environment and health care.

#90073u0157 03/14/1990 ~United Press International

SANTIAGO, CHILE (MARCH 14) UPI - Newly inaugurated President Patricio Aylwin said Tuesday the country has much greater problems than the continuation of longtime military dictator Gen. Augusto Pinochet at the head of the army.

Aylwin, who assumed the presidency Sunday after 16 1/2 years of rule by Pinochet, said the permanence of the 74-year-old general in the top army post ''is not a problem that has me worried.''

''I don't think the problem in Chile is if General Pinochet goes or stays as commander in chief,'' Aylwin told a news conference. ''We Chileans have problems a lot more important to resolve.''

Pinochet was forced to give up the presidency because of a 1988 vote against a new eight-year term. But the constitution written by the military government allows him to continue as army commander for eight years without interference from the civilian president.

Some opposition leaders have called Pinochet a threat to the re-emerging Chilean democracy and said he would try to set up a parallel government run from his army post.

But Aylwin said he was confident the armed forces would follow the constitution that does not allow their participation in politics.

The 71-year-old former leader of the opposition to the military government also said he would free 40 or so more political prisoners of the military government within a short time. Just after his inauguration, Aylwin signed pardons for some 40 other prisoners.

But he said the freeing of still others jailed for their opposition to the Pinochet government would depend on changes in the law that his administration will send to congress.

He also said he would announce a program shortly to deal with the violations of human rights that took place under Pinochet, installed in a 1973 coup d'etat.

Human rights groups say hundreds if not thousands of people were killed and tortured after the coup that ousted the government of elected Marxist President Salvador Allende.

Prosecutions of any human rights cases will take place in normal courts and will not be subject to special government commissions, Aylwin said.

The military has strongly warned against any attempts at mass prosecutions of the institutions.

#90073u0176 03/14/1990 ~United Press International

ATLANTA (MARCH 14) UPI - Pilots on an Eastern Airlines DC-9 jet bound for Florida Tuesday night detected problems with the plane's hydraulic landing gear and were forced to return home and make an emergency landing, authorities said.

The plane landed at Hartsfield International Airport in a shower of sparks because of a blown tire, and the 51 passengers and five crew members jumped down inflatable emergency slides to the runway.

Eastern Flight 129 had arrived in Atlanta from Philadelphia with 77 persons aboard and was scheduled to depart for Tallahassee, Fla. at about 10:30 p.m., an Eastern spokeswoman said.

Federal Aviation Administration spokesman Jack Barker said the flight had just left the runway in Atlanta when the pilot reported the hydraulic problem and chose to return to Hartsfield.

''He had a right system hydraulic failure, which affects the landing gear '' an Eastern spokeswoman in Miami said. ''He had to lower the landing gear manually.''

The plane blew at least one tire on landing, sending up sparks and causing the plane to skid partially off the runway. Emergency crews hosed down the front of the aircraft as a precautionary measure, but there was no fire, authorities said.

The DC-9 was unable to taxi and airport spokesman John Braden said that forced officials to close the runway where the plane landed.

''It was not a serious incident,'' Braden said.

Barker said the FAA and National Transportation Safety Board would investigate the incident.

The Eastern spokeswoman said the passengers would be put aboard another aircraft to complete their trip to Tallahassee.

#90073u0180 03/14/1990 ~United Press International
(MARCH 14) UPI - EDITORIAL SAMPLER

The Patriot-News, Harrisburg, Pa.

While the dangers of lead poisoning to children have been well known for two decades, a new report from the Washington-based Environmental Defense Fund last week raises new alarms.

The report estimates that one in six American children - and one in five in the Harrisburg area - has a blood-lead level high enough to cause a significant risk of lowering intellect. In urban areas, more than a third of white children in low-income families and two-thirds of black children in low-income families will have levels this high, the group projects.

Lead exposure causes irreversible learning disabilities and behavioral problems, the fund said. While it is a poison to any age group, young children are particularly vulnerable to the metal because their rapidly developing nervous systems are sensitive to it.

Homes in northeastern cities, generally older than the rest of the country have more lead-based paint and pose greater risks of lead exposure to young children, the group estimated. Congress banned the use of lead paint in homes in 1977. ...

For all its effects, lead poisoning is preventable. That is the objective of federally funded lead-prevention programs for children. ... The program administered by the state, is limited to those cities with local ordinances requiring landlords or homeowners to eliminate or minimize the risk of lead poisoning to children when it is found. ...

Whatever the legal requirements, the seriousness of the risks to children ought to be enough to compel any property owner to determine if a lead hazard is present and, if so, to remove it.

Kennebec Journal, Augusta, Maine

Some Romanians were beginning to think that explosives would be necessary in removing the gigantic statue of the Soviet Union's founding father, Vladimir Ilyich Lenin, which graced a main square in the capital, Bucharest.

The huge memorial was a hated symbol of communist domination which people now want to put firmly behind them.

But when they tried to remove the long-dead Soviet leader's image, it wouldn't budge.

Drilling, blow-torching and even a wrecking ball didn't have much effect

on the 7-ton piece of bronze. Finally, the statue was pried loose and removed, with a rope around its neck.

But the Lenin statue may be symbolic. There are still many obstacles to be removed before Romania can overcome the evils of its dictatorial past.

The Atlanta Constitution

After voting Thursday to affirm acceptance of the current German-Polish border, West Germany's lawmakers ought to be able to dust off their hands and say that's that: The alarm over German designs upon long-lost eastern territories should subside.

This was a crisis of confidence that need not have erupted in the first place, save for Chancellor Helmut Kohl's failure to address the issue promptly and squarely.

All he had to say was that West Germany had already acknowledged the Oder-Neisse line three times in the last 20 years, once in a treaty, once in the 1975 Helsinki security accord and once in a Bundestag resolution approved only four months ago, but if one more assurance was needed, fine. With that, he could have minimized the nervousness raised by the reunification rush.

Such hand-holding may seem a bother to Kohl, with all the busines he has to attend to in combining the Germanys and laying the ground for his own re-election next fall. He ought to realize only by the banking of nationalist fires did today's peaceful, prosperous Western Eurpoe rise from the ashes of World War II. No less statesmanship is essential now in the eastern half of the continent.

-30- 3915
#90073u0181 03/14/1990 ~United Press International

Milwaukee Journal

The assurance given by West German Chancellor Helmut Kohl that a united Germany would recognize its post-World War II borders with Poland could have been one of Kohl's finest moments.

Unfortunately, it was preceded by a period in which the West German leader appeared to be using unconscionable leverage on the Poles for his own domestic political purposes.

Specifically, Kohl had suggested that recognition of the border might be linked to an agreement by Poland not to seek reparations from Germany for World War II damages, including the use of forced Polish labor in Nazi

Germany.

Never mind that Poland already has said it would not make any such claims. The Poles had nothing to do with the border adjustment under which the conquering Soviets took Polish land for themselves and appended the German territory onto Poland as compensation.

Even if the Poles had sought reparations, the suggestion that they give up compensation for violations of human rights in settlement of a boundary dispute was repugnant.

Indeed, by finally taking the Polish border issue head-on, Kohl has been forced to take control of the reunification process without regard to secondary political considerations.

At the same time, he has distinguished himself as a leader who, after a slight bout with myopia, has stopped reacting to fast-moving events in Europe and started to take charge of them. Ultimately, the border issue may mark the time when de facto unification of the two Germanys occurred.

East German leader Hans Modrow has criticized Kohl's solo performance as being politically motivated. The weeks ahead may prove, however, that although there technically still may be two Germanys, Kohl is emerging as their single voice.

Champaign-Urbana (Ill.) News-Gazette

Homosexual activists are insisting that sexually explicit brochures are essential to control the spread of AIDS - and that they should be paid for at state expense.

Their argument is nonsense on both counts.

At issue are a variety of brochures produced by a San Francisco homosexual group. They were distributed in Illinois - and locally - through a state grant to the Gay Community AIDS Project.

We say ''were'' because State Rep. tim Johnson of Urbana blocked continued funding of the material. For his effort, he has been attacked as nothing short of a murderer.

To understand the problem, you need to understand the brochures. ... The language they use is too offensive for publication in a community newspaper.

That's not the worst. Johnson said the brochures were reaching children.

But nowhere in the brochure is there real advocacy of abstinence or

monogamy.

... Their (the gay community's) legitimate concern - that education is necessary to help prevent the sread of AIDS - is well placed. Their suggestion that this brochure is the vehicle is misguided.

... What these brochures tell us instead is how we can practice indiscrimate sex and remain at minimal risk of AIDS.

Is that the taxpayers' obligation?

Nonsense.

We think you'll reach the same conclusion.

The Memphis (Tenn.) Commercial Appeal

There are right ways and wrong ways to protect the honor and dignity of the American flag.

Lowering the fine for beating up a flag-burner to $1, as state Rep. Shelby Rhinehart has been trying to do up in Nashville, obviously is one wrong way.

Another was that taken by the United States Congress last fall when it adopted a statutory provision against flag-burning.

That action may have sounded good to some people disturbed by the torching of flags by protesters of various stripe and ilk. But it was the wrong way to assure real and lasting protection for the flag, as President Bush and others insisted at the time.

And now the proof is coming in.

Just in the last month federal judges in a couple of states have declared the flag-burning statute unconstitutional. Eventually, as Congress should have known, the U.S. Supreme Court will strike down the law.

... So what is the right way to protect the Stars and Stripes? By carving a special niche for Old Glory in the nation's basic law - the Constitution. A constitutional amendment, ratified by the states, is the only sure way to remove any doubt about this country's intention of denying the ''right'' to desecrate its best-known symbol.

It is a just cause, and the wisdom of that course will only become more obvious with the passing of time and the handing down of more court rulings.

Why wait?

-30- 4798
#90073u0182 03/14/1990 ~United Press International

SACRAMENTO (CALIF.) BEE

Operating on the commendable theory that future military forces ought to be tailored to a long-term strategy for assuring national security, Congress is eagerly awaiting the administration's 5-year defense plan before it launches into military budget-cutting. But far from having a strategy, the Bush administration is in disarray over the central question of how much the Soviet threat has diminished.

The Pentagon's tendency to see the changes in the Soviet Union and Europe as a temporary aberration look increasingly like an effort to invent threats to justify current forces. Even more suspect is recent military testimony in Congress arguing that the military capabilities of Third World nations such as India and Iraq require the United States to sustain its existing spending levels and thereby forgo a sizable peace dividend.

By failing to bring his administration together on this critical issue, President Bush risks losing his influence in shaping the nation's military future.

THE NEW MEXICAN, SANTA FE, N.M.

New Mexico, already struggling financially and facing a special legislative session to raise taxes for salary increases for teachers and state employees, could come under still more financial pressure for the new national transportation plan announced late last week by President Bush.

... If New Mexico does have to come with more of a share for road projects gasoline taxes probably would be pushed still higher to assign the increased costs to raod users. That's fair, but the cost of driving could go up considerably. Motorists would be paying higher costs directly and businesses would pass on increased fuel costs to customers as well. Toll roads might even have to be considered, something New Mexico has fortunately avoided.

The U.S. House of Representatives is considering the Bush administration's plans in formulating a 5-year highway and mass transit spending plan. The country's needs are great in this area, but Congress should bite the bullet and make the tough decisions about taxes needed to pay for a federally planned and predominantly federally funded road system. Few states have the resources to take on that financial responsibility and

still meet the demands they already face for services from their own citizens.

#90073u0204 03/14/1990 ~United Press International

(MARCH 14) UPI - Violent weather has left at least two people dead in Kansas. Authorities say the deaths occurred as a 100-mile-long band of tornadoes roared across the central and eastern portions of the state Tuesday afternoon and evening... destroying homes and farm buildings. Hundreds of people have been left homeless. Twisters were also reported in Oklahoma, Nebraska and Iowa.

In the Texas gubernatorial primaries Tuesday, State Treasurer Ann Richards and Attorney General Jim Mattox won the right to meet in an April runoff for Democratic nomination. Millionaire businessman Clayton Williams captured the Republican nod. In the race to face Republican Senator Phil Gramm in the general election in November, state Senator Hugh Parmer handily defeated Harvey Schlanger, who's affiliated with political extremist Lyndon LaRouche.

Some hope of resolving the bitter contract dispute that led nine-thousand union Greyhound workers to walk off the job almost two weeks ago. Greyhound officials announced Tuesday they'll return to the bargaining table Saturday in Phoenix. NO word on why Greyhound decided to resume talks. Just last week the company flatly refused a union request to do so.

In a bid to end West Virginia's first teachers' strike, Governor Gaston Caperton says he has offered educators a seven-point comprehensive education plan. The offer... which includes three-Million dollars in pay raises... followed 10 hours of intense negotiations Tuesday. Union officials, who left Caperton's office shortly before his announcement, had NO comment on the package... although they said that- quote- ''We're still on strike.''

-30- 1813

#90073u0211 03/14/1990 ~United Press International

(MARCH 14) UPI - The federal judge in the drug-trafficking case of ousted Panamanian leader Manuel Noriega has ordered extensive background checks for defense lawyers and anyone else who'll be privy to confidential information in the trial. The prosecution says the precautions are necessary because Noriega at times co-operated with the C-I-A, and the release of certain information could affect national security. Noriega's trial in Miami is expected to begin late this year or early next year. It could take more than a year to complete.

Also in Miami Tuesday, a co-defendant in Noriega's drug trafficking case

was released from jail on one-Million dollars bond. A federal judge also ordered Daniel Miranda to sign a waiver of extradition calling for his voluntary return to the United States should he flee to Panama. Miranda is charged with flying 800-thousand dollars in drug profits from Florida to Panama in 1986.

In Lebanon, violence erupted Tuesday on both sides of the line dividing the Moslem and Christian sectors of Beirut. Opposing Christian forces in the east attacked each other in violation of a cease-fire. In west Beirut, rival Shiite gunmen fought in a new round of accusations and gunfire. At least four people were reported killed and 19 wounded in the two sets of battles.

-30- 1470

#90073u0222 03/14/1990 ~United Press International

ASPEN, CO (MARCH 14) UPI - Mayor Bill Stirling, who led an unsuccessful fight to ban the sale of animal furs from his glitzy mountain resort town, survived a recall election Tuesday night that could have booted him from office.

Stirling, elected to a fourth term last May, held onto his post by a vote of 1,227 to 1,097. But one of the city councilmen who had backed Stirling's fur ban proposal, Steve Crockett, was recalled by a vote of 1,288 to 1,025.

Two other councilmen up for recall, Michael Gassman and Frank Peters, were narrowly retained.

Crockett had been criticized since his election because of what opponents perceived to be sarcastic treatment of his constituents. In one council meeting, Crockett passed a note describing some speakers as ''pigs.''

The four men up for recall were accused by opponents of governing by confrontation, being rude to constituents, trying to scuttle an already approved hotel project, neglecting traffic and housing problems, and promoting such causes as Stirling's proposed ban on wild-animal furs.

''This is a great sign that you can stand up for what you believe in as a public figure and still hold office,'' said an overjoyed Stirling.

The proposed fur ban was overwhelmingly defeated by Aspen voters a month ago. The voters also overrode the city council's proposal to limit the size of a 298-room Ritz-Carlton Hotel at the foot of Aspen Mountain.

Jay Ordan, who led the fight to oust Stirling and the three councilmen, said he thought the recall election ''brought out the problems that some of us have with city government.''

Mick Ireland, a lawyer and Stirling backer, said many of Aspen's longtime residents believe newcomers to town are destroying its traditions and values.

''For many years, people moved to Aspen simply to live a life that wasn't directed at career accomplishment and acquisition of material goods,'' Ireland said. ''There are people now whose sole view of Aspen is as a product.''

(MARCH 14) UPI - Don't tell Detroit Jacques Demers that he should be happy with his team's 3-3 tie Tuesday night against the Chicago Blackhawks.

Not if you want to live to see Wednesday.

The surging Red Wings rallied from three one-goal deficits to forge a tie, but may have had a victory taken away by a quick whistle.

Detroit was trailing 2-1 in the second period, when Detroit's Bernie Federko poked in a loose puck in the crease past Chicago goalie Jaques Cloutier for an apparent game-tying goal. But referee Ron Hoggarth's whistle blew, nullifying the goal and enraging Demers.

''There's no question that it was a goal,'' said Demers who argued in vain.

''Everyone knew that (Cloutier) never had the puck,'' said Federko. ''In that case don't make up a story because you didn't see the play. We're fighting for a playoff spot, and every point is important.''

The tie pulled the Red Wings, who are 4-1-2 in their last seven, even with the Minnesota North Stars for the final Norris Division playoff spot.

''If we're healthy then we have as good a chance as any team in the playoffs,'' said Demers. ''We're in much better shape now than at this stage last season.''

Winless in their past eight games, the Blackhawks trail first-place St. Louis by five points.

''We can't control St. Louis' destiny because we don't play the Blues again in the regular season,'' said Coach Mike Keenan. ''We can only control what we do. We made some mistakes that cost us goals but we played relatively hard.''

Dave Barr scored the game-tying goal late in the second period and added an assist. Rookie goalie Tim Cheveldae turned in another solid performance with 32 saves, including a crucial stop on Steve Larmer late in the third period for Detroit.

With 25 seconds left in the second period Barr rifled a cannonading blast from the right faceoff circle as Detroit blitzed Cloutier with three goals

in an 11-minute span to erase 1-0, 2-1 and 3-2 deficits.

Following a giveaway by Bob McGill in his own end the Red Wings' Steve Yzerman knotted the score at 2-2 off Barr's feed at 16:12, but Doug Wilson answered for the Blackhawks 40 seconds later with a 20-foot slap shot from the left faceoff circle.

The Blackhawks regained a 2-1 advantage at 13:40 of the period when Adam Creighton converted his own rebound to snap a personal 11-game goal-scoring drought.

Detroit forged a 1-1 deadlock on Shawn Burr's 22nd goal at 8:17 of the second period. After Jimmy Carson was thwarted from close range Burr converted an uncontested rebound for the Red Wings' first goal against Cloutier this season in 91 minutes, 43 seconds.

Denis Savard staked Chicago to a 1-0 lead with a shorthanded goal late in the first period.

With Dirk Graham serving a tripping penalty Savard skated unchecked across the slot area, faked a slap shot, then wristed a 20-footer past Cheveldae for his 23rd goal.

-- AROUND THE NHL --

Elsewhere in the NHL, New Jersey topped Minnesota 3-1, St. Louis clobbered Washington 4-1, Montreal stopped the NY Islanders 4-2, Edmonton ripped Quebec 4-1, and Hartford blanked Vancouver 1-0.

DEVILS 3, NORTH STARS 1

At Bloomington, Minn., John Maclean's 36th goal of the season 5:39 into the third period snapped a 1-1 tie and Devils goaltender Sean Burke made 34 saves to help the Devils gain their fourth straight win. Former North Star Bob Brooke scored early in the second period and added an empty net goal for New Jersey. The win moved the Devils to within six points of the first place New York Rangers in the Patrick Division.

BLUES 4, CAPITALS 1

At Landover, Md., Rookie goalie Curtis Joseph made 33 saves and Paul Cavallini had a goal and an assist for the Blues. The Capitals failed on eighth power-play opportunities, including a pair of two-man advantages. Paul MacLean scored his 28th goal and assisted on a first-period goal by Rod Brind'Amour for the Blues. Dino Ciccarelli scored Washington's lone goal.

CANADIENS 4, NY ISLANDERS 2

At Uniondale, N.Y., Shayne Corson assisted on Claude Lemieux' tying third-period goal and scored the go-ahead goal with 4:34 remaining to help the Canadiens extend New York's winless streak to 13 games (0-10-3). Corson added an empty net goal with six seconds left to put the game away. Mathieu Schneider assisted on all three of Montreal's third-period goals. Derek Laxdal scored both of New York's goals.

OILERS 4, NORDIQUES 1

At Quebec City, Glenn Anderson scored two power-play goals and set up a third to power the Oilers. The victory moved the Oilers to within four points of first place Calgary in the Smythe Division. Adam Graves and Petr Klima added Edmonton goals and Bill Ranford stopped 29 shots. The Nordiques have lost five straights.

WHALERS 1, CANUCKS 0

At Vancouver, Todd Krygier scored the lone goal and Peter Sikorkiewicz registered his first shutout of the season to give the Whalers the victory. The Canucks have been unable to beat the Whalers on their home ice in five years.

-30- 5279

#90073u0278 03/14/1990 ~United Press International

(MARCH 14) UPI - Playoff fever is having a much different effect on the Chicago Bulls and New York Knicks.

The Bulls are on a roll sending messages to possible playoff opponents they must be reckoned with come May. The Knicks just look sick.

New York, which has lost four of six at Madison Square Garden, dropped a 111-108 decision Tuesday night to the Chicago Bulls. Chicago, which faces Detroit and Philadelphia over the weekend, posted its 12th victory in its last 14 games.

''This is a playoff atmosphere,'' said Bulls guard Michael Jordan, who finished with 34 points. ''It's a great test for us, toward the end of the season you have to think of the home court advantage, so it's going to be interesting.''

The Bulls are 40-21 and have the second-best record in the East to the Detroit Pistons. The Knicks are 39-22, and though still in first place in the Atlantic Division, have dropped nine straight games to an opponent with a record above .500.

''That's not good,'' said Knicks guard Trent Tucker. ''These are teams we

are going to face in the playoffs and that gives them confidence when they play us.''

New York reduced a 10-point fourth-quarter deficit to two points twice in the final 1:46, but the Bulls still managed to post the victory.

''I thought it got a little close down the end because our offense was stagnant,'' Chicago Coach Phil Jackson said. ''But overall we played great defense and I thought that was the key to tonight's victory.''

The Bulls used a 9-2 run to build a 104-94 advantage with 5:16 remaining. Craig Hodges capped the surge with his second 3-pointer of the period.

New York scored the next eight points and cut the deficit to 104-102 with 1:46 remaining. The Bulls went scoreless for 3:48 before Bill Cartwright hit a jumper with 1:28 remaining for a 106-102 Chicago lead.

Jordan hit a pair of free throws with 1:28 remaining to give Chicago a 6-point lead. Maurice Cheeks sank a jumper with 17 seconds left, but Jordan made two more free throws to put Chicago back up by six with 16 seconds remaining.

Johnny Newman was then fouled and his attempt for a 3-point play was tipped in by Ewing, pulling the Knicks within 110-108 with 7.8 seconds remaining.

Jordan was fouled immediately and missed the second of two free throws with 5.9 seconds left, giving the Knicks one last chance to tie the score.

Kiki Vandeweghe, activated from the injured list last Saturday, threw the ball away on the inbounds play and Chicago ran the clock out.

Ewing finished with 29 points and Wilkins 26 for New York. Scottie Pippen finished with 17 and John Paxson with 15 for the Bulls.

''We had a good effort from everyone,'' Jordan said. ''We made a few mistakes down the stretch, but things worked out all right.''

-- AROUND THE NBA --

In other games, Cleveland clipped Philadelphia 119-102, San Antonio stopped Indiana 103-102, Boston beat Atlanta 112-100, Denver dumped Houston 117-114, Phoenix defeated Utah 114-106, Portland trounced Orlando 142-117, and Sacramento overran Miami 121-87.

CAVALIERS 119, SIXERS 102

At Richfield, Ohio, Mark Price scored 30 points and John ''Hot Rod''

Williams added 21 points, 13 rebounds and four blocked shots for Cleveland. Philadelphia, which has lost three straight, was led by 29 points and 10 rebounds from Charles Barkley.

SPURS 103, PACERS 102

At Indianapolis, Rod Strickland scored 15 points, including the winning free throws with two seconds remaining, to lift San Antonio. Reggie Miller scored 31 points for the Pacers, who dropped their third straight.

CELTICS 112, HAWKS 100

At Atlanta, Kevin McHale scored 26 points and Larry Bird added 22 to guide the Celtics. Atlanta was paced by Kevin Willis and Spud Webb with 19 points apiece.

NUGGETS 117, ROCKETS 114

At Denver, Michael Adams scored 25 points, including a layup with 7.8 seconds left, to give Denver coach Doug Moe his 600th career victory. The loss snapped Houston's six-game winning streak.

SUNS 114, JAZZ 106

At Salt Lake City, Kevin Johnson scored 29 points and Eddie Johnson came off the bench to lead the Suns, who have won 15 of their last 17 games. Karl Malone scored 37 points and John Stockton had 18 and 21 assists for the Jazz, who had their 19-game home winning streak snapped.

TRAIL BLAZERS 142, MAGIC 117 At Portland, rookie Cliff Robinson tied his season high of 22 points, leading seven Blazers in double figures, to help Portland to the rout, its sixth straight victory. Reggie Theus had 25 points and Terry Catledge had 19 for Orlando.

KINGS 121, HEAT 87

At Sacramento, Waymon Tisdale scored 23 points and Antoine Carr came off the bench to add 21, giving the Kings their largest margin of victory this season. Glen Rice led Miami with 18 points.

#90073u0320 03/14/1990 ~United Press International

CAIRO, EGYPT (MARCH 14) UPI - Egypt, discouraged by Israel's newest disruption of the Mideast peace process, would like to see an authoritative Israeli leader like former Prime Minister Menachem Begin take charge and ''stick it out until the end,'' a Foreign Ministry source said.

''If you look back to the time before the (1979 Egypt-Israeli peace) treaty, Begin made some obstacles, and then had the authority to do whatever was seen as being good for Israel,'' the source told United Press International in a telephone interview Tuesday.

Like Begin, Israeli Prime Minister Yitzhak Shamir has to convince hard-liners in his Likud Party that the current, U.S.-sponsored peace initiative ''offered the best hope for peace in the Middle East, and from this point of view served Israeli interests,'' the source added.

Egypt had no official comment on how the firing from the Cabinet of Labor Party leader Shimon Peres Tuesday and the looming collapse of Israel's coalition government would affect the Mideast peace process.

''Let's get one thing clear ... the developments in Israel are an internal Israeli matter and we have no comment on that,'' said one official in the administration of President Hosni Mubarak.

''But that doesn't mean we are not concerned with the peace process. We

want it to continue, and we are waiting to see what will happen in Israel now, after the vote of confidence takes place,'' he said.

A no-confidence vote that would collapse the Likud-Labor coalition is scheduled for Thursday in Israel's Parliament, the Knesset. It could mean a delay of several months in the peace process as Israel struggles to form a new government.

''We would prefer to see an Israeli leader with authority enter the peace process, and then stick it out until the end,'' the Foreign Ministry source said.

Other Egyptian government sources said Cairo had never disguised its enthusiasm for Secretary of State James Baker's third Mideast peace plan, which foresees a meeting with the foreign ministers of the United States, Egypt and Israel as a prelude to Israeli-Palestinian talks in Cairo.

''If the collapse of the Israeli coalition means that Shamir will head a new government, this may not be positive for the peace process,'' a government source said. ''It is Shamir that has stalled on the Baker plan, while Egypt has welcomed it. It is Shamir who is even backtracking on his own peace plan for elections in the occupied territories.''

Egyptian press reports have indicated that if Peres headed Israel's next government, that might boost the Mideast peace process, but Foreign Ministry sources disagree.

In contrast to Shamir, Peres has been quoted as saying that the Palestine Liberation Organization cannot be excluded from peace talks, a view shared by Cairo.

Former President Carter, who mediated the 1978 Camp David accords and subsequent Egyptian-Israeli peace treaty, was in Cairo Tuesday and agreed that a strong government is needed in Israel to advance the peace process.

''Even if the Likud should triumph and have a clear control of the Israeli government, I think this might be better for a strong mutual peace than they would have (under) a stalemated coalition government,'' Carter said.

ST. GEORGE'S, Grenada (MARCH 14) UPI - The National Democratic Congress, which came within one seat of winning an outright majority in parliamentary elections, awaited the opportunity Wednesday to form a government on the island invaded by U.S. troops in 1983.

There was no reported violence in Tuesday's plebescite, which was watched by several international observers, election officials said.

The National Democratic Congress, led by Nicholas Braithwaite, captured seven of the 15 parliamentary seats that were at stake, the officials said in announcing final results. The Grenada United Labor Party of former Prime Minister Sir Eric Gairy won four seats.

The New National Party and The National Party of Prime Minister Ben Jones took two each. Jones succeeded Herbert Blaize, who died in December.

Gov. Gen. Sir Paul Scoon was expected to call on Braithwaite Wednesday to form a government.

About 65 percent of the 59,268 eligible voters chose among the 76 parliamentary candidates, election officials said.

The six political parties concluded their monthlong campaigns Monday with rallies and motorcades throughout the tiny, English-speaking spice island north of Venezuela.

Gairy was overthrown in March 1979 by Maurice Bishop of the New Jewel Movement party. Bishop installed himself as prime minister, but was ousted

and killed by dissidents within his administration led by Bernard Coard.

Coard was removed in October 1983 when 5,000 U.S. troops accompanied by 250 police from Jamaica, Dominica, St. Lucia, Antigua, St. Vincent and Barbados invaded the island.

About 800 Cuban construction workers who were building an airstrip on Grenada left the island after the invasion.

Most of Grenada's 110,000 people are mixed descendants of white settlers, African slaves and Caribbean Indians. The dominant religions are Roman Catholicism and Protestantism.

Grenada, about 100 miles north of Venezuela at the southern end of a string of volcanic islands, is renowned for its nutmeg, cocoa and cinnamon. It is home to the American-owned St. George's University, a medical school with an enrollment of 600 students, most of them U.S. citizens.

#90073u0357 03/14/1990 ~United Press International

PANAMA CITY, Panama (MARCH 14) UPI - President Guillermo Endara ended his 13-day Lenten fast after losing 17 pounds, saying he had shared the hunger pains of the poor of his country.

Endara, who denied he stopped eating in protest to the delay in U.S. aid, ended his fast Tuesday, the same day President Bush asked Congress to come up with $500 million in assistance for Panama by April 5.

Congress has so far approved slightly more than $30 million of Bush's earlier $1 billion aid request for Panama. Legislators are debating the remainder. White House spokesman Marlin Fitzwater has acknowledged there have been delays in moving the aid through Congress.

''At the beginning of the fast, I announced it would last for an indefinite amount of time and that I would end it when my conscience tells me. I consider that the moment has arrived,'' Endara said at a news conference at the Metropolitan Cathedral, where he has lived and worked during the fast.

''No one needs to tell me what it is to suffer from hunger. I know it and I have endured it,'' Endara said.

Endara's weight dropped from 249 pounds to 232 pounds during the fast, but he said he would probably gain back the weight because of his big appetite.

Endara said the fast was to show his solidarity with the poor and to make

a sacrifice for Lent, but many believed he was trying to pressure the U.S. Congress to speed up the approval of a $1 billion aid package for Panama.

Endara said foreign aid would help bolster his country's economy, which has been crippled by two years of U.S. economic sanctions and more than $1 billion in damage during the U.S. invasion last December.

''I must clarify in the first place that this fast has had nothing to do with the United States or the Congress or the aid,'' Endara said. ''If it has sensitized the opinion of any country, including the United States, that will be an additional benefit.''

Endara's government, elected last year in balloting annulled by strongman Manuel Noriega and installed during the U.S. invasion, is also struggling to overcome 30 percent unemployment, a rise in crime and a $4 billion foreign debt.

''I know that we will (recover),'' Endara said. ''It will be faster if we receive sufficient and timely aid. It will be slower if we are not given a hand on time.''

During the fast, Endara ran the government from the cathedral, where he was attended by several nurses and doctors and his fiancee, Ana Mae Diaz. He consumed only water and, although nurses said he was in good shape, Endara appeared tired during an interview on the 11th day of his fast.

In September 1989, Endara embarked on a 20-day hunger strike to protest the naming of Francisco Rodriguez as provisional president of Panama by Noriega, who was ousted during the U.S. invasion and is being held in the United States on drug-trafficking charges.

Endara has been criticized in the local press for fasting and the National Assembly designated a commission to ask the president to end the fast, saying Endara was endangering his life.

#90073u0372 03/14/1990 ~United Press International

(MARCH 14) UPI - The bitter and sometimes violent nationwide strike against Greyhound took an unexpected turn with the bus company's announcement that contract talks will resume this weekend.

P. Anthony Lannie, Greyhound's executive vice president and chief labor negotiator, said Tuesday that talks with the Amalgamated Council of Greyhound Local Unions will resume Saturday in Phoenix.

Lannie said the negotiations were scheduled at the request of Bernard DeLury, director of the Federal Mediation and Conciliation Service in

Washington.

Union officials could not be reached late Tuesday.

In a brief statement, Greyhound did not say why it had chosen to resume the talks, leaving it unclear whether either side had softened its position on the issues. The company last week flatly refused a union request to resume the talks.

One striker has been killed since the walkout began March 2, and several buses have been shot at.

The latest trouble included a suspicious bombing of a garage adjacent to a Greyhound terminal in Tacoma, Wash., and shots fired at a bus full of passengers in Chicago. No injuries were reported in either incident.

In Chicago a departing bus was hit by at least four bullets about 1:30 a.m. Tuesday, the third such incident in less than 36 hours.

No injuries were reported among the 13 passengers and the replacement driver, but a police officer said one bullet missed a passenger by ''just inches.''

The driver reported hearing six or seven shots fired in rapid succession, with four bullets hitting the bus - two in the front, one in the front door and one in a window next to the front door.

Police said they were not positive the incident was related to the strike. ''Things get shot at all the time up here,'' Reilly said.

Company spokesman George Gravley said that as of Tuesday, there had been seven shootings at Greyhound buses.

In Tacoma, an explosion ripped through a parking garage attached to a Greyhound bus depot Tuesday. Authorities initially said they did not believe the blast was connected to the strike, but after discovering charred wood chips near the blast site, they said they could not rule out the explosion was deliberate.

Nobody was injured in the blast, which damaged more than a dozen cars. The garage is used by several businesses in the area, including Greyhound.

In the most serious strike incident, a picketing driver was crushed to death March 3 in Redding, Calif., by a bus being driven by a replacement driver. No charges have been filed in that case.

The chances that talks would resume in the near future seemed remote before Tuesday's announcement. Greyhound Chairman Fred G. Currey said last week

the strikers will be irrelevant by April 1 because Greyhound is hiring permanent replacements.

He also said Greyhound has a multimillion-dollar war chest with which to weather a lengthy walkout.

Greyhound took out full page ads in several newspapers Wednesday, including the Los Angeles Times and The Portland Oregonian, in the form of an open letter to the mayors of the cities.

It thanked the mayors and citizens ''for their support during the current work stoppage'' and said Greyhound had provided ''excellent jobs'' in the city. Despite Currey's boasts about a hefty strike fund, the letter said ''Greyhound lost $20 million in 1987-88; last year we barely broke even. The last thing our company can afford is a strike.''

The ad said the union's demands would ''slowly but surely put Greyhound out of business.''

The strike began March 2 after negotiations broke off on a new three-year contract for about 9,000 Greyhound employees represented by the union, including drivers, baggage handlers, mechanics, ticket agents and reservation clerks.

The walkout was called on grounds of unfair labor practices, rather than simple economics.

The National Labor Relations Board is reviewing a complaint by the union that Greyhound was bargaining in bad faith before the strike, and was trying to break the union.

#90073u0373 03/14/1990 ~United Press International

(MARCH 14) UPI - Violent weather ripped the nation's midsection Tuesday afternoon and evening. Two waves of twisters hit Kansas... one early in the morning and a second just before dusk. Authorities report two people killed and hundreds left homeless by the storms. Kansas Governor Mike Hayden drove to the town of Hesston Tuesday night to survey the damage. Members of the Kansas National Guard also have been called out.

Tornadoes also hit sections of Iowa, Nebraska and Oklahoma. Authorities in Lindsay, Oklahoma, say a photographer for an Oklahoma City t-v station was shot Tuesday night while covering tornado damage about 30 miles south of Oklahoma City. The station's assignment editor says four suspects were arrested by police shortly after the incident. The photographer is hospitalized in critical condition.

President Bush has taken the first tangible steps toward a restoration of economic relations with Nicaragua. At a White House news conference Tuesday, Bush announced he was lifting the five-year-old trade embargo against the Central American nation. And he proposed half-a-BILLION dollars in aid during the next two years to help rebuild the country's war-torn economy.

Nicaragua's outgoing Sandinista government said it welcomed President Bush's announcement. Its vice president called Tuesday's move ''an act of justice which was already too long delayed.''

The final results from Tuesday's general election in the Caribbean island nation of Grenada show NO party winning a clear majority in the Parliament. However, the National Democratic Congress captured seven of the 15 seats at stake. The party's leader... Nicholas Braithwaite... is expected to be called on Wednesday to form the next government.

#90073u0390 03/14/1990 ~United Press International

PORT-AU-PRINCE, Haiti (MARCH 14) UPI - Ertha Pascal-Trouillot, whose swearing in as interim president ended nearly four years of chaotic military rule, said there soon would be elections for a permanent government with the cooperation of the army.

About 400 people attended Tuesday's ceremony at the ornate national palace from which dictators have long ruled Haiti. The crowd included prominent Haitian businessmen and politicians, military officers, diplomats and Haitian and foreign journalists.

''Madame president of Haiti, the army is at your command,'' said Army Chief of Staff Herard Abraham, who has held power since dictator Lt. Gen. Prosper Avril resigned Saturday amid growing violent protests and went with his family to the United States.

''The army will stay in its barracks and will remain to serve the task of guaranteeing the security and well-being of all citizens,'' said Abraham, who then saluted the new president, removed his military cap, stepped forward and shook her hand.

''Brothers and sisters, I accept this heavy task on behalf of Haitian women,'' said Pascal-Trouillot, 44, who had been Supreme Court justice and is the first female chief executive since Haiti's West African slaves overthrew their French masters in 1804.

''With the loyal help of the army,'' she pledged to work ''most rapidly to hold elections for the definitive government that the people will choose in liberty.''

Pascal-Trouillot, a widow and mother to a 15-year-old daughter, called Tuesday's installation of a civilian government ''the first step to save a Haiti that has been humiliated, pillaged and pushed to the limit.''

Switching from French to the Creole more widely understood by Haiti's poor majority, she said she wished to ''clean the face of the nation which had become disfigured.''

Pascal-Trouillot, wearing a white suit with black trimming at the collar and carrying a white purse, spoke clearly and with great energy in her inaugural address.

Outside, a crowd estimated at up to 10,000 people cheered as she took the salute of the army while a band from the Presidential Guard played the national anthem.

Pascal-Trouillot becomes the second civilian to lead the government since the collapse of the three-decade dictatorship of the Duvalier family in February 1986. Leslie Manigat served less than five months in 1988 before he was overthrown by Lt. Gen. Henri Namphy, who had ruled following Jean-Claude ''Baby Doc'' Duvalier's departure into French exile in 1986.

The capital was busy Tuesday after more than a week of violence and strikes that led to Avril's departure. During the unrest, at least 15 people were killed in Haiti, which shares the Caribbean island of Hispaniola with the Dominican Republic. Some estimates put the death toll as high as 30.

Capt. Dieujuste Delima of the heavily armed troops at the palace said that elements of Avril's feared 1,000-man Presidential Guard were still guarding the palace because they are familiar with the security needs there.

One Haitian observer said, ''This is an extremely dangerous situation - the army is a private one of the (Tontons) Macoutes and should be dissolved.''

He referred to the notorious secret police formed by the late President-for-Life Francois ''Papa Doc'' Duvalier who began the family rule in 1957.

Jean-Claude Roy, one of the 12 civilian leaders who sparked the overthrow of the military regime and chose Pascal-Trouillot as interim president, said, ''We are happy with Trouillot because of her age, courage and willingness to assume that responsibility and because she is a woman and brings some support from women's groups.''

Louis Roy, a human rights activist who wrote Haiti's 1987 constitution and was driven into exile by Avril in January, returned to Haiti Monday and was appointed to the 19-member Council of State that will assist the president. Eight members of the Council of State have been selected.

''The Duvalierists were defeated and will have to accept it, but they won't go quietly,'' he said. ''They have to play their last card.

''The biggest problem is the security problem. The Macoutes are still in power - they have munitions and money.''

U.S. Ambassador Alvin Adams, who helped engineer Avril's departure on a U.S. Air Force plane Monday, said, ''The army has pledged to control itself and show respect for the constitution and uphold the democratic process.''

#90073u0422 03/14/1990 ~United Press International

BANGKOK, Thailand (MARCH 14) UPI - Vietnamese Communist Party leaders are holding a top-level meeting on party reform amid calls for more democracy and a purge of unqualified and pampered party cadres, official media and diplomatic sources said Wednesday.

The party plenum, which opened Monday and is expected to last about three weeks, brings together more than 100 leaders of the powerful Central Committee of the party as it celebrates its 60th anniversary this year.

''It could be a difficult session for the party. They face internal dissatisfaction and they have the spectre of Eastern Europe looming over them,'' a diplomatic source in Bangkok said in reference to communism's decline among the Warsaw Pact nations.

In the weeks leading up to the plenum, the party took the unprecedented step of publicizing the draft of party reform proposals that focus on ''mass mobilization.''

The public reaction to the vague program has been critical, and even more surprisingly, that response has been publicized by the state-run media.

''For the most part, those studying the program have, however, found it disappointing,'' a Hanoi radio analyst said in a broadcast last week. ''The program fails to correctly reflect the changes among the people of various strata in our country 15 years after their total liberation.''

It warned of ''the danger of the party alienating itself from the masses and the masses distancing themselves from the party.''

The radio report warned the party that communist parties in Eastern Europe fell because they were arrogant.

Support for the Vietnamese party, while victorious in armed struggles against the French and the United States, has eroded because of a faltering economy, restraints on political freedom and increasing abuse of privilege by party members.

Analysts in Bangkok said the public airing of dissenting views indicated uncertainty and varying opinion within the central committee on how to rebuild the party' s popularity.

A series of letters published in newspapers reflected public dissatisfaction with party cadres.

''They come to the people in shining sedans and are surrounded by assistants,'' said one letter. ''They meet the people for the mere sake of formality and do not know anything about the people's living conditions.''

Other letters complained the privileges of high position in the party are extended to family members and to the home towns of the leaders.

''Those who know they are no longer qualified for party membership should volunteer to leave the party,'' one letter said. ''Otherwise, party cells and party chapters should take resolute measures to remove those elements from the party.''

Another Radio Hanoi broadcast urged the party ''to create a democratic atmosphere for the intelligentsia to discuss issues of interest and contribute to the common cause.''

The calls and criticism stopped short of demands for a multi-party political system, something the communist leadership has regularly and forcefully rejected.

But this month it did give official status to an association of war veterans that has often been critical of the party.

Diplomatic sources said the party is searching for mechanisms to allow more democracy, more outlets for dissent and more avenues for discussion of alternative policies without threatening the party's monopoly on power.

The party has already announced it will take a less direct role in government and give more power to elected national and local assemblies.

#90073u0425 03/14/1990 ~United Press International

(MARCH 14) UPI - Ertha Pascal-Trouillot is Haiti's first female president since the Caribbean nation grew out of a revolt by black slaves against colonial French masters in 1804.

A staunch feminist who said Tuesday she would take up the presidency as a ''heavy task on behalf of Haitian women,'' she took power after dictator Lt. Gen. Prosper Avril was driven from power after a week of violent protests.

''She comes from a family of intellectuals and is a brilliant woman,'' said Jean-Claude Roy, one of the 12 political leaders who selected her to replace Avril.

Pascal-Trouillot, 44, graduated first in her class in 1971 from Gonaives Law School, 70 miles north of the capital.

Before becoming the first woman appointed to the Supreme Court in 1986, she argued cases before the high bench, specializing in labor issues and family law, according to Jean Fouchard's preface to ''The Code of Common Law,'' which Pascal-Truillot wrote with her husband, Ernst Trouillot, who died in 1986.

A tall and slender woman, she has a presence of authority and clarity of speech that evokes strength.

''In our family, although she is the youngest, she is like the oldest because she is the strongest,'' said Ludmilla Joseph, who grew up with Pascal-Trouillot. ''She also suffered a lot because she was so close to her brother ... who was shot and paralyzed in 1963.''

Pascal-Trouillot met her husband while she was a student of his in Port-au-Prince. Since he was a prominent journalist and supporter of the Duvalier family that ruled Haiti from 1957 to 1986, opposition leaders hoped this might help Pascal-Trouillot unite the nation behind her civilian government. She lives with her 15-year-old daughter Yantha.

#90073u0426 03/14/1990 ~United Press International

MOSCOW (MARCH 14) UPI - Premier Nikolai Ryzhkov, suggested as a candidate for the new powerful presidency, said Wednesday the country needs a strong leader for the office, ''be it Mikhail Gorbachev or someone else.''

The Congress of People's Deputies, which approved the new powerful office Tuesday, began the third day of debate on the far-reaching constitutional change, gearing up for a vote on who will occupy the new post.

Gorbachev will almost undoubtedly be chosen, but candidates have not even

been formally nominated.

The official Tass news agency said said the Congress, which was scheduled to end Wednesday, will be extended.

Ryzhkov, 60, the head of government, was suggested - not formally nominated - Tuesday as a candidate for the new presidential post by legislator Yuri Blokhin, representing Soyuz, an ethnic Russian bloc of delegates at the Congress.

Blokhin, specifying he was suggesting possible candidates in their alphabetical order, proposed Interior Minister Vadim Bakatin, Gorbachev and Ryzhkov.

Ryzhkov told the daily Communist Party newspaper Pravda in an interview published Wednesday, ''The party is losing its grip on power, while the executive power is still weak and has to adapt to the new system, based on changes that have taken place over the past few years.''

''This is an absolutely natural process, which has nothing to do with personalities,'' he said. ''This is a must, be it Mikhail Gorbachev or someone else. This is vitally important.''

A Soviet editor said Ryzhkov will reject any formal nominations to run against Gorbachev, who is currently president - a weak office compared with his post as party general secretary and the new presidency.

Gorbachev is president by virtue of his being chairman of the Supreme Soviet, or Parliament. Under the new system, there will be a permanent chairman of Parliament, and Gorbachev would move up to the new powerful presidency.

Yulya Drunina, a poet from Odessa and a Congress lawmaker, suggested Gorbachev for the presidency Tuesday, saying the world could not comprehend his not being chosen. She reminded delegates that Gorbachev initiated the democratization of the country.

''Without doubt, the president should be able to take the country out of a stall, which is worsening,'' she said. ''Such a person is Gorbachev. It is Gorbachev who allowed us to taste freedom, and frankly speaking, who lifted us up from our knees.

''We should not forget that he has reduced tension in the world and eliminated the threat of nuclear war. We have stopped being in the eyes of the world, 'the Russian bear' who is swinging an atom bomb in the circle of gentlemen, who regard him with fear. We have stopped being looked at as 'the evil empire.'

''We should not underestimate the fact that Gorbachev was named not only the 'man of the year,' but the 'man of the decade.'''

''It seems to me that if Gorbachev is not elected, the civilized world will consider it as a defeat of the democratic forces in the U.S.S.R. as a return to confrontations. It is necessary for us to support him in the most difficult moment of the history of the U.S.S.R., and in this way, support ourselves.''

-30- 3426

#90073u0429 03/14/1990 ~United Press International

(MARCH 14) UPI - Gusty winds and thunderstorms made a second assault Wednesday on tornado-ravaged towns in the Midwest, where twisters the day before flattened homes, hurled cars and left two people dead and hundreds homeless.

Storm clouds also circulated through the southern Plains, where the National Weather Service issued tornado warnings for Oklahoma and northern Texas, while a summerlike heat spell entered its third day along the Atlantic Coast.

The 100-mile-long band of tornadoes danced across central and eastern Kansas Tuesday, killing at least two people in Marion and Harvey counties, plowing through the city of Hesston and prompting a National Guard mobilization.

''The streets are just littered with trees and debris, and a number of houses are destroyed,'' said Charles Dix, a ham radio operator who surveyed damage in Hesston. ''I drove by where there is a Pizza Hut and a large convenience store-gas station - it was very unusual to see all those things not there,'' he said. ''There are cars that look like they've been run through a car crusher. It's just unbelievable to see something like that.''

Streets leading into Hesston were blocked by authorities, and telephones and electricity were out. He said generators brought into the city provided some power. About 300 people were left homeless but most found shelter with friends or relatives.

One person was killed when a tornado flattened a home in the town of Burrton, about 30 miles northwest of Wichita. The twister then moved on to nearby Hesston, demolishing a truck stop on Interstate 135.

Northeastern Iowa also was hammered by late afternoon tornadoes, with serious damage to homes and farm buildings reported in Dubuque, Jones and Davis counties.

Mary, Lux, a spokeswoman for the American Red Cross in Dubuque, said a response team had responded to the small community of Worthington. At least 50 people were left homeless in the community, she said.

Severe thunderstorms also struck in Oklahoma early Wednesday after spawning several tornadoes in the central and southwest part of the state late Tuesday.

The National Weather Service issued tornado watches and thunderstorm watches for north Texas and much of Oklahoma as the storm front approached Arkansas Wednesday.

A wind gust of 70 mph was reported in Clay County, Texas, near the Oklahoma border Wednesday morning amid torrential rains.

High pressure kept conditions hot and dry in the South, where record highs were set Tuesday in Columbia and Charleston, S.C., and Montgomery, Ala. Cloudiness and some fog moved into Mississippi early in the morning.

Temperatures broke records Tuesday in more than 40 cities throughout 18 states and the District of Columbia. More than 50 high temperature records were set Sunday and Monday.

New England bathed in high humidity and considerable fog Wednesday morning with temperatures rising again to record levels. Boston tied a 1946 record Tuesday when the mercury shot to 73 degrees. Providence and Hartford also broke old records at 77 and 79, respectively.

Mostly clear skies and temperatures in the 50s reigned over most of Pennsylvania and southern New Jersey early Wednesday. Lows in West Virginia ranged from the upper 40s in rural areas to the upper 50s in other parts of the state. Maryland saw lows in the upper 50s to the low 60s across the state.

-30- 3616

#90073u0437 03/14/1990 ~United Press International

SEOUL, South Korea (MARCH 14) UPI - A U.S.-South Korea combined military exercise involving about 190,000 troops went into full swing Wednesday with hundreds of marines landing on a Korean beach in a mock assault backed by navy and air force units.

In Seoul, 13 dissident students entered Yongsan Main Post, the site of the U.S. military command in Korea, and staged a brief sit-down protest that blocked traffic at a gate, a U.S. military spokesman said. Korean police removed and apprehended the protesters.

Local news reports said the youths wanted to deliver a letter to top U.S.

military officials expressing opposition to the Team Spirit exercise.

The protesters claimed that ''Team Spirit training exercise raises tension in Korea and hamper South-North Korea dialogue and Korean reunification,'' the nationally circulated daily Dong-A Ilbo said.

Invitations to send observers were sent to the Far East communist governments of China and North Korea, but neither accepted. North Korea has demanded the exercise be canceled.

The stated purpose of the exercise is to improve defense readiness of South Korean and U.S. forces through participation in combined joint operation, to include receiving, staging, employing and redeploying American forces brought in from out-of-country bases.

A total of about 190,000 troops are involved in the training exercise. They include some 60,000 Americans, including 43,000 men stationed in Korea, units brought in from overseas bases and those aboard 26 naval vessels of the 7th U.S. Fleet.

The landing operation occurred before dawn at Pohang Beach, 170 miles southeast of Seoul, military officials said. From the U.S. side, about 200 members of the 9th Marine Expeditionary Brigade participated, U.S. officials said. The number of Korean marines involved was not disclosed.

U.S. and South Korean amphibious assault vessels and transport helicopters joined in the operation to support the landing forces, the officials said. More landing operations were planned for this week, the officials said.

With the Pohang landing as the starting signal, two weeks of inland field maneuverings began in the northern areas, the officials said.

#90073u0438 03/14/1990 ~United Press International

KUALA LUMPUR, MALAYSIA (MARCH 14) UPI - Ten Vietnamese boat people returned voluntarily to Vietnam from Malaysia Wednesday after receiving financial incentives under a U.N. repatriation program.

The departures brought to 40 the number of boat people who have returned voluntarily to Vietnam from Malaysia in the last year, but still left the country struggling for a solution to the estimated 20,000 others still packed into holding camps.

The 10 returned to Ho Chi Minh City, formerly Saigon, and were to be met by government officials and representatives of the United Nations High Commission for Refugees before heading to their homes in various provinces of Vietnam.

Under the terms of the repatriation program, the commission has agreed to pay Vietnam a monthly cash allowance of $30 per returnee for one year.

Those repatriated also will be get help finding housing and employment as well as basic possessions to facilitate their reintegration.

Another 108 Vietnamese boat people in Malaysia have submitted repatriation applications, which were awaiting the approval of the Vietnamese authorities, the commission said.

The number of Vietnamese boat people seeking asylum in Malaysian holding camps is 19,200, according to government figures.

Last month, Malaysia became the first country in the Association of Southeast Asian Nations to discuss financial incentives and mandatory returns with Hanoi. Malaysia agreed in principle to offering financial assistance to Vietnam while Hanoi agreed to consider mandatory repatriation.

CORTLAND, NY (MARCH 14) UPI - The daily New York state ski report compiled by Ski Areas of New York Inc.:

Legend: New, new snow; GM, grooming; SM, snowmaking; NS, night skiing.

Surface condition codes: P, powder; PP, packed powder; WP, wet powder; WBP wind blown powder; MGS, machine groomed surface; FG, frozen granular; LG, loose granular; ICY, icy; WG, wet granular; CRN, corn snow; VAR, variable; SPR, spring conditions. The final two numbers refer respectively to number of day slopes open and number of night slopes open.

Key to Cross-Country: TS, track setting in last 24 hours; SM, snowmaking; KM TRAX SET, distance of groomed trail available in system; KM TRAILS, total trail distance open in system; NS, area offers night cross-country facility.

Note: The absence of a ski center listing in the daily report indicates that no report was received from that ski center or that it may be a weekend facility.

#90073u0522 03/14/1990 ~United Press International
(MARCH 14) UPI - Around the world... around the clock... U-P-I brings you the world, next:

Former White House aide Oliver North is expected to complete his testimony today in the Iran-Contra trial of former national security adviser John Poindexter. Poindexter's lawyers argued yesterday that North worked behind his boss's back in the worst scandal of Ronald Reagan's presidency.

A Titan-3 rocket stands ready and waiting a Cape Canveral launch pad for a dawn blastoff. Officials say the private booster is carrying a high-power 140-Million-dollar communications satellite into orbit. The launch is another major step for America's infant commercial space program.

Tornadoes ripped through sections of three states yesterday... leaving at least two people dead in their path. Authorities in Kansas, Iowa and Oklahoma say the killer tornadoes also destroyed homes and farm buildings and left hundreds homeless. One person reportedly was killed in Burrton, Kansas.

Soviet President Gorbachev has directed a special commission to settle the status of Lithuania and Estonia, two Soviet republics. Lithuania has declared its independence from Moscow... and Estonia is leaning toward a similar declaration. Gorbachev refuses to hold break-away talks with Lithuania.

Representative Les Aspin says a secret Pentagon report concludes that the situation in Europe has changed so much that NATO does NOT need to rely on

the threat to use nuclear weapons. The Wisconsin Democrat says political changes in the Warsaw Pact mean it has lost the military advantage in Europe.

-30- 1743

#90073u0523 03/14/1990 ~United Press International

(MARCH 14) UPI - Greyhound pledged to resume contract talks in hopes of ending a strike marred by violence that has curtailed bus service nationwide. The latest trouble included the torching of an empty bus in California and shots fired at a bus full of passengers in Chicago. NO injuries were reported in either incident.

The Bush administration is asking the Supreme Court to re-instate the anti-flag burning law enacted by Congress last year. Lower courts have over-turned the law... ruling that burning the flag as a political protest is a constitutionally protected form of free speech.

Washington, D-C, Mayor Marion Barry discussed his addiction to alcohol yesterday in a deeply personal speech before supporters and staff. Barry also for the first time admitted to abusing perscription medicine... but he made NO mention of cocaine charges pending against him in federal court. Barry said he would not resign from the office he has held for 12 years.

The State Department says the collapse of Israel's coalition government will complicate and delay the Middle East peace process. However, the spokesman says the Bush administration feels NO responsibility for sparking the episode. The government broke up over support for a U-S-proposed Mideast peace plan.

A joint U-S-South Korea combined military exercise went into full swing today. Hundreds of Marines landed on a beach in a mock assault backed by Navy and Air Force units. In Seoul, 13 dissident students staged a brief sit-in protest demanding that the annual field exercise be called off.

#90073u0526 03/14/1990 ~United Press International

PARIS (MARCH 14) UPI - Soviet glasnost has infiltrated the opening shows of the Paris fall-winter women's ready-to-wear collections, even to czar-sized fur hats.

Brocaded boots edged with fur and ballooning satin Cossack trousers from medieval times gleamed on the runway of Japanese designer Kimijima. While the song ''Moscow Nights'' purred in the background or Russian church bells tolled, gowns crusty with brocade set off with chunky earrings and necklaces seemed to echo the opera ''Boris Goudonov.''

''Kimijima started on this idea last fall,'' said an official of the Paribas Bank, which backs the firm. ''We figured, well, the Americans surely would like it.''

While the Soviets were discussing separating the Communist Party from the state, designer Dobi Broda was opening her show with babushka head scarves plus colorful Russian folklore prints.

The French designer said her printed suspender dresses were inspired by Eastern Europe because ''I've Polish ancestry from long ago and I've been very moved by the recent events.''

Both Kimijima and Broda showed bulky coats with hoods - another tendency that has swamped the 10-day annual shows for world-wide store buyers and press that opened Monday. Designer Michel Klein for the Christian Aujard firm even teamed hooded dresses with hooded coats.

Two other trends repeated in the opening shows were lurex, a gleaming stretch fabric, and fake fur.

Lurex tights and bulky bright red hooded coats of false fur were seen at Aujard. Silver lurex turtleneck tops teamed with wide cloud-gray flannel trousers or black wool little suits at Paco Rabanne. His black fake fur coats sprinkled with gold dust and topped with giant hoods were highlights of the charming, very wearable collection.

The Nina Ricci show in black, white and red brought happy news. The veteran house hired a new stylist for its ready-to-wear, Englishman Philip Waghorn. His snug, short skirts and sleek jackets with pointed edges brought an exciting young look to the usually quiet Ricci collection.

One applauded number looked like a black T-shirt topped by a black and white tweed jacket and black skirt - but actually it was a trompe l'oeil dress.

Shoulders at Ricci - as in all the shows so far - are calm and unfootballish, but many still are quietly padded. As Waghorn said, ''My clients don't want limp shoulders.''

So far, women have a choice of hemlines - above the knee, covering the knee or at mid-calf - or trousers, usually narrow and above-ankle. Emmanuel Kahn's flowing, belted maxi dresses should come as a relief to women who do not want to show most of their legs.

ISLAMABAD, PAKISTAN (MARCH 14) UPI - Prime Minister Benazir Bhutto said Wednesday the recent coup attempt in Kabul has opened the way for a ''bold new initiative'' aimed at solving the Afghan civil war.

''The attempted coup in Afghanistan ... could herald a new era and new opportunities for trying to resolve the issue,'' Bhutto told a news conference.

''I think this is a time for a bold new initiative,'' she said. ''It is a time for Pakistan to stop playing favorites. It is a time for the Soviet Union to stop playing favorities. And if everyone agrees to turn toward the people of Afghanistan and ask them what they want, I am sure we can work out a settlement.

''Pakistan is in touch with its allies on this question. We are in touch with the United States, Iran, Saudi Arabia and other countries because we would like to work out a system whereby elections are held for a credible, representative and independent Afghanistan.

''It's time to break the stalemate,'' she said.

Afghan President Najibullah says the March 6 coup attempt was led by Defense Minister Gen. Shah Nawaz Tanai and backed by Moslem fundamentalist guerrilla leader Gulbuddin Hekmatyar.

Rebel military units bombed Kabul, including the presidential palace, and fought street battles with forces loyal to Najibullah in the most serious threat to his regime since the withdrawal one year ago of Soviet troops supporting the government.

But Tanai and about 20 other generals involved in the revolt fled to Pakistan the next day when it became clear the attempt had failed.

Bhutto Wednesday repeated official denials of charges by Kabul that Pakistan, which provides sanctuary to the U.S.-backed guerrillas fighting the communist Afghan government since 1978, had a hand in the coup attempt.

''The events in Afghanistan had nothing to do with Pakistan, the (Moslem guerrillas) or indeeed (military intelligence) or the Pakistan army,'' she said.

''The recent events in Afghanistan were clearly a revolt by Najibullah's supporters, people who had been diehard supporters of the present government but who had become frustrated. They didn't want to see the deadlock continue. They wanted to start the task of reconstruction.''

She said Najibullah had emerged ''much weaker'' from the coup attempt. ''Even in urban areas his support has been divided and depleted. The

Afghan armed forces today are divided, depleted and devastated.'' She warned of a ''long period of recriminations, of investigations, of suspicion and of acrimony.''

Najibullah came to power in 1986, seven years after the Soviets invaded in December 1979 to support the first of a series of Marxist rulers against anti-communist Moslem rebels.

The Soviet Union withdrew its more than 100,000 troops last year and Najibullah's Marxist administration defied predictions it would fall to the U.S.-backed rebels within months of the pullout.

#90073u0614 03/14/1990 ~United Press International

AUBURN HILLS, MI (MARCH 14) UPI - A Detroit Pistons trainer could face charges for sending emergency medical workers on a phony heart attack run to The Palace of Auburn Hills during a team practice last week, police said.

Police said Tuesday Mike Abdenour apparently wanted to check the response time of the local rescue unit after the death of college basketball star Hank Gathers. Gathers collapsed and died March 4 after suffering a heart attack while playing for Loyola Marymount University in Los Angeles.

According to police reports, Abdenour had a security guard at The Palace call the 911 emergency number about 11:35 a.m. March 6 to request emergency help because a Pistons player had collapsed at the team practice.

About five minutes later, five members of the Auburn Hills rescue team responded to the arena with a fire engine, a Fleet ambulance and a police scout car.

Police said the team was met by Abdenour, who said there was no emergency and then congratulated them for their quick response team. Abdenour treats players for injuries and oversees their conditioning programs.

Dennis M. McGee, director of the Auburn Hills Public Safety Department, said neither the Piston nor The Palace management had any knowledge of Abdenour's plan. He said both have apologized and promised it will not happen again.

No real emergency requests came to the department while the emergency team was on the phony run to The Palace, McGee said.

#90073u0649 03/14/1990 ~United Press International

(MARCH 14) UPI - Talks to start again in the Greyhound strike... violent weather kills two people... a commerical rocket is ready for launch... and the Iditarod race nears the end. Those stories and more, next from U-P-I.

Contract talks are scheduled to resume in Phoenix this weekend in the violence-marred Greyhound bus strike.

Greyhound says the renewed talks were scheduled at the request of a federal mediator. Union officials could NOT be reached for comment.

The announcement follows a suspicious bombing of a garage adjacent to a Greyhound terminal in Tacoma, Washington... and shots fired at a bus full of passengers in Chicago. NO injuries were reported in either incident.

In Tacoma, an explosion yesterday ripped through a parking garage attached to a Greyhound bus depot. Officials first said they did NOT believe the blast was connected to the strike. But after discovering charred wood chips near the blast site, they said they could NOT rule out the possibility that the explosion was deliberate.

Nobody was injured in the blast. The garage is used by several businesses in the area, including Greyhound.

In Chicago, a departing bus was hit early yesterday by at least four bullets. Chicago police say they are NOT convinced the shooting incident was related to the strike. One officer said ''Things get shot at all the time up here.''

Tornadoes pummeled the nation's midsection yesterday, touching down in parts of Kansas, Iowa and Oklahoma.

The severe weather killed at least two people, and left hundreds homeless in its aftermath.

A spokeswoman for Kansas Governor Mike Hayden says Hayden called out the National Guard to stricken sections. Kathy Peterson says the move was made to provide security and shelter, and to help in clean up efforts.

One hard-hit area was Harvey County, where the twisters killed one person and left about 300 people without homes. The tornado also smashed a truck stop along Interstate 135.

Two twisters touched down northeast of Harvey County in Marion County.

Other parts of the nation experienced a spring-like warming trend. The thaw prompted a crime wave in Chicago, where police Sergeant Jim Roussell said- ''Everyone's out on the street, and they remember how much they doN'T like each other.''

-30- 2471
#90073u0664 03/14/1990 ~United Press International
(MARCH 14) UPI - The U-S commercial space program is set to take another major step forward in its struggle to win a share of the international rocket launch market.

The head of Commercial Titan says his engineers are waiting to fire into space a Titans-t.

The rocket will carry into orbit a 140-Million-dollar communications satellite. The four-story tall, oil-drum shaped satellite is mounted in the Titan's nose cone, and is the second of five Intelstat-6 communications satellites that will be launched.

The satellites are the largest and most powerful relay stations ever built as a commercial venture.

The head of the Intelstat spacecraft mission says his company has invested about 270-Million dollars for today's Cape Canaveral launch. The payload is UNinsured.

Former White House aide Oliver North is expected to complete his testimony today in the Iran-Contra trial of former national security adviser John Poindexter.

Poindexter is charged with five felony counts of lying to Congress and obstructing a probe of secret arms sales to Iran and the transfer of those profits to the Contras. Congress at the time had banned aid for the Contras.

Poindexter's lawyers yesterday tried to shift the blame to North... portraying the former Marine colonel as a loose cannon who went behind his superior's back in his Iran-Contra activities.

The prosecution is depicting Poindexter as a mastermind of the scandal... but the defense is trying to blunt that argument. Its legal strategy places much of the blame on Poindexter's predecessor, Robert McFarlane, who has pleaded guilty to withholding information from Congress.

North has tried hard NOT to implicate Poindexter... but said again that he kept Poindexter advised of all of his activities.

-30- 1948
#90073u0674 03/14/1990 ~United Press International
(MARCH 14) UPI - Soviet President Gorbachev has appointed a top-level

commission to settle the status of two Baltic republics seeking to leave the Soviet Union.

Lithuania's Parliament has voted for independence from the Soviet Union... and the neighborhing republic of Estonia has expressed similar intentions.

Both republics, along with the Soviet republic of Latvia... were swallowed by the Soviet Union at the beginning of World War Two.

Gorbachev discussed the Lithuania Parliament's declaration of independence before the Congress of People's Deputies yesterday. The Soviet leader has ruled out independence talks with the breakaway republics.

Referring to documents he has received from Vilnius on the Lithuanian declaration of independence... Gorbachev said ''From what I have read, it is illegal and invalid.''

The Soviet legislature also gave Gorbachev sweeping new powers by establishing a presidential system in the Soviet Union and ending the Communist Party's monopoly rule.

West Virginia teachers are mulling over a seven-point plan to end a six-day-old walkout that has paralyzed the state's schools.

Teachers union leaders say they'll draw up a response to Governor Gaston Caperton's proposal later today.

While there's NO indication if the negotiators will respond favorably to Caperton's plan, it's apparent that they did NOT approve of the method in which he introduced it.

The head of the West Virginia Education Association tells U-P-I she's ''disappointed'' that Caperton waited until late last night to introduce a plan to hike teachers pay with a 20-Million-dollar increase in the 1991 budget.

Kayette Meadows says her frustration stems from the fact that after two days of talks, Caperton introduced his idea at 20 minutes before 11:00 last night and asked for a response to be broadcast on the 11 o'clock news.

The strike erupted after teachers accused Caperton of backing out on a promise to lift educators' wages.

-30- 2154

#90073u0680 03/14/1990 ~United Press International

(MARCH 14) UPI - A pair of old racing rivals are in a mad dash to the finish line as they left the rest of the field far behind in the 18th

annual Iditarod , a grueling test of sled dogs and their mushers.

The 11-hundred 61-mile race from Anchorage to Nome has come down to former winners Susan Butcher and Joe Runyan. They are expected to reach the finish line at mid-day today. Barring last-minute trouble, at least one of the pair should break the race record set by Butcher in 1987.

Following a mandatory six-hour rest, Butcher was to leave the last checkpoint at White Mountain this morning, more than an hour before Runyan could leave.

It was clear and 14 below zero in Nome last night with clear, sunny and zero-degree weather predicted for the finish.

Butcher told race officials she is shooting not just for the 50-thousand dollar first prize, but for a record. Butcher won the fastest Iditarod in 1987, finishing in 11 days, two hours, five minutes and 13 seconds.

Runyan won last year in the second-fastest time- 11 days, five hours, 24 minutes and 34 seconds, with Butcher second.

-30- 1267

#90073u0683 03/14/1990 ~United Press International

BOSTON (MARCH 14) UPI - A state safety official warned that elevators are ''not a place to play a game in'' following the death of a University of Massachusetts student who was apparently ''elevator surfing'' when he plunged 16 stories down a shaft.

Joel Mangion, 18, of Newton, a student at the college's Amherst campus, died early Sunday in an accident at the John F. Kennedy dormitory. Mangion had apparently climbed on top of an elevator car and was trying to jump to the roof of another car when he slipped and became wedged between the car and the wall of the shaft. He fell 16 stories to his death, authorities said.

Mangion had been apparently been playing a game known among students as ''elevator surfing.'' Several UMass students told The Boston Globe the practice - in which riders push the ''emergency stop'' button between floors, climb on top of the cars and ''surf'' up and down the shafts - is a growing fad on college campuses, including UMass-Amherst.

UMass officials said they were aware that some students play in elevators shafts. They blamed it and other potentially hazardous horseplay on student drinking.

Charles Dinezio, chief of inspections for the state Department of Public Safety, said he knew some UMass students and students on some other

campuses had been playing in elevator shafts. But he cautioned against characterizing ''elevator surfing'' as a fad that might pique the interest of other young people.

''I don't know that it's a widespread problem. I'm sure that it's a catchy phrase. I'd hate like hell to see a lot of people think that it's a new fad. It's extrememly dangerous,'' Dinezio said.

#90073u0763 03/14/1990 ~United Press International
(MARCH 14) UPI - Stock prices on the Tokyo Stock Exchange tumbled for the third straight day Wednesday, with the market's key index losing nearly 5 percent since the beginning of the week, as investors worried about the Japanese yen and interest rates.

The blue-chip Nikkei Stock Average of 225 selected issues, which plunged 747.66 points Tuesday after a fall of 624.89 points Monday, fell another 268.44 points to 32,352.13, its lowest level since March 28, 1989.

The broader-based Tokyo Stock Exchange Price Index of all major listed shares lost 36.40 points to 2,420.70 after skidding 51.78 points Tuesday.

Volume continued at its slow pace, with an estimated 480 million shares changing hands, compared with 422 million Tuesday.

Declines whipped advances by an almost a 4-to-1 margin with 789 issues declining in price, 206 advancing and 129 unchanged.

Elsewhere in Asia, prices closed lower in listless trading on the Hong Kong Stock Exchange.

The Hang Seng Index, which lost 5.67 points Tuesday, fell another 6.39 points to 2,881.23. Financials fell 19.79 points, utilities lost 4.71, industrials edged up 1.85 and properties closed down 8.42 points.

Turnover amounted to 1.15 billion shares, compared with the 1.25 billion shares traded Tuesday.

Prices closed slightly lower in light trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which lost 16.38 points Tuesday, eased 0.87 points to 1564.81. The narrower All Singapore Index eased 0.27 points to 428.04.

Turnover was 74.3 million shares, compared with 64.7 million shares Tuesday.

In Australia, stocks closed lower in light trading on the Sydney Sharemarket.

The blue-chip All Ordinaries Index, which fell 10.3 points Tuesday, eased 1.9 points to 1558.7.

Turnover amounted to 82.8 million shares, up from the 69.8 million shares

changing hands Tuesday.

Declines led advances 207 to 112, with 280 issues unchanged.

#90073u0797 03/14/1990 ~United Press International

NORTH BLENHEIM, NY (MARCH 14) UPI - Utility crews Wednesday extinguished burning propane and plugged a ruptured gas pipeline that caused a pair of fiery explosions that leveled half of the small town of North Blenheim.

Two people died and five others were injured when the cloud of gas blew up Tuesday morning, destroying half of the homes in town and setting an entire hill ablaze.

A Schoharie County sheriff's spokeswoman said the remaining propane had been burned out of the line Wednesday and that the line was plugged just after 5 a.m.

Power and telephone service was restored to homes left standing in the village about 30 miles southwest of Albany and residents were returning to their homes after spending the night with friends, relatives, or in hotels.

The deadly blast about 7:36 a.m. Tuesday - which was immediately followed by a second explosion - apparently was the result of an undetected leak along a 4,100-mile liquid propane pipeline, a twisting and turning conduit that reaches from Texas to New York state, authorities said.

''We had no indication that something was wrong,'' said Katherine Kemper, a spokeswoman for the Texas Eastern Products Pipeline Co., which owns the pipeline.

The blasts left two men dead and five other people injured.

Virginia Noxon, 54, who had a history of heart trouble, began suffering chest pains upon hearing the explosion. She was in stable condition at Cobleskill Hospital Wednesday morning.

Ten homes were leveled, and five others were extensively damaged in the community of about 100. Smoke wafted from the blackened shells of burned-out cars at the side of Westkill Road and flames danced from trees 60 feet high. An entire hill was engulfed in flames. All that was left of one home was a chimney.

Children on a school bus rode past the pipeline moments before it exploded and they saw the pair of blasts.

Sheriff Harvey Stoddard said the bus ''was maybe a minute and a half''

from being at the center of the inferno. The rural community had a sense that the children were spared by good timing.

''They were between a quarter and a half mile away when the thing went. The kids were saying they could see the fire out the back window,'' Stoddard said.

John Barnett, a Texas Eastern official, said the same pipeline is routed through urban areas, where the consequences of a similar explosion would have been much worse.

The disaster was the third to strike Schoharie County in just three years. In April 1987, heavy rains and melting snow combined to flood the valley and collapse a state Thruway bridge, killing 10 people. In July 1989, a tornado roared through the area and dozens lost their homes.

Town Supervisor Robert Shaffer, father of New York Secretary of State Gail Shaffer, said he was heading out to his barn when he saw a ''huge white cloud of mist 1,000 feet in the air.''

Shaffer called gas company emergency crews and was reporting the propane cloud when the explosion enveloped the rural community 40 miles southwest of Albany in a ball of fire. Then, the line went dead.

The explosion knocked out all power and telephone service at least 6 miles from North Blenheim. Robert Shaffer immediately declared a state of emergency and asked Gov. Mario Cuomo for assistance.

Texas Eastern officials speculated leaking liquid propane formed a puddle near the center of the small village, evaporating into a volatile gas cloud that exploded minutes later. The flames then raced up a large hill back to the pipeline and touched off a second explosion.

Jim Gately, a North Blenheim resident, nursed minor burns to his nose and arm and described how the explosion sounded ''like a bomb went off.''

''I heard this whoosh and my clothes were on fire. I jumped in the shower '' he said.

Ed Collins, a Public Service Commission spokesman, said the 8-inch line enters New York at the Pennsylvania line south of Watkins Glen and goes to the rail yards at Selkirk, some 15 miles south of Albany.

Because the pipeline crosses state borders, Collins said federal agencies would investigate the explosion.

EXETER, NH (MARCH 14) UPI - An avowed recruiter for the Ku Klux Klan finished last in a field of five candidates for town selectman, receiving 145 votes out of 2,651 ballots cast.

Tom Herman, 28, who lost in Tuesday's election, operates a Klan telephone hotline that exhorts listeners to join the white supremacist organization and carries racist messages.

In one of his recorded telephone messages, Herman said he was running for selectman because of rampant ''nepotism and cronyism'' in local government.

''Just like cockroaches they will scatter,'' Herman said, when the Klan reveals alleged ''misdeeds'' committed by officials. ''This is the perfect opportunity to vote these bums out of office.''

Herman spent Tuesday campaigning outside the Exeter Town Hall. He said some voters had expressed support for him.

''People have been coming to me in ones and twos and saying, 'We can't support you openly, but what can we do to get you elected?''' he said.

But he also attracted about half a dozen anti-Klan demonstrators who carried signs and passed out buttons.

''Whatever votes he gets is a win. If it's four votes or 104 (Herman's) position would be that that's support for his viewpoint,'' said an unidentified protester. ''I would be hardpressed to argue with him.''

Herman, a radio technician for the Rockingham County Sheriff's Department, has been actively recruiting for the Klan since last summer.

He was fired in December from his part-time job as a Newfields police officer because of his involvement with the Klan.

Herman has asked the state chapter of the American Civil Liberties Union to defend him in a bid to get his job back. The ACLU said the request is under study.

DARDANELLE, AR (MARCH 14) UPI - Three patients were killed and two dozen were injured in a fire that gutted a nursing home soon after most of the patients had gone to bed for the night, authorities said Wednesday.

Authorities said one fireman was injured in the Tuesday night blaze at the Dardanelle Nursing Center. He and three nursing home patients were flown

to Baptist Medical Center in Little Rock, where they were listed in satisfactory condition.

The fire began in the living room in the west wing, which contained most of the bedridden patients, about 9:30 p.m. at the center, which had 85 patients. The cause has not been determined but an electrical problem was suspected.

''I got there right after the fire trucks,'' said Kurt Spears, communications operator and jailer for the Yell County sheriff's office. ''We just started busting out windows and going in and getting people out. They were generally pretty calm. Oh God, it could've been a lot worse.''

Spears credited quick notification and response time and help from three counties to keeping the situation from being worse. He said fire gutted the building.

Police Chief Monte Sims said about thee-fourths of the patients were in bed for the night when the fire started.

''The building was ablaze,'' Sims said. ''They also discovered at that time that more than half of the patients in the nursing home were still in their rooms.''

TOKYO (MARCH 14) UPI - Chinese Communist Party Chairman Jiang Zemin, arriving in North Korea for a three-day visit, met with President Kim Il Sung Wednesday in talks expected to reaffirm their mutual support for a hard-line brand of communism.

News agencies for the two communist nations reported the talks began as a U.S.-South Korea combined military exercise involving about 190,000 troops went into full swing Wednesday in South Korea with hundreds of marines landing on a in a mock assault backed by navy and air force units.

China and North Korea, two of the last communist strongholds in the world, are increasingly turning to each other for support as their former allies in Eastern Europe and the Soviet Union move toward democracy and market economies.

China's Xinhua News Agency said Jiang and Kim met for a first round of talks in the afternoon in the Kumsusam Assembly Hall.

Xinhua said Kim's eldest son, Kim Jong Il, who is widely expected to succeed his father in the coming year, also took part in the meetings.

''Long live the unbreakable militant friendship and solidarity sealed in blood between the parties and peoples of Korea and China,'' the news agency said.

''Comrade Kim Il Sung and senior party and state officials greeted Comrade Jiang Zemin,'' the news agency said.

Kim, one of the world's most secretive leaders, has ruled the northern half of the divided Korean peninsula since 1945.

In November Kim made a secret trip to China to meet with China's senior leader Deng Xiaoping.

Recent South Korean news reports have said Kim, 77, will soon step down, making way for his son, Kim Jong Il, to take over as president.

Kim Jong Il was also at the airport to meet Jiang, the news agency said.

''The airport and streets of the capital city were decorated beautifully and wrapped in a festive mood to greet the friendly envoy of the fraternal Chinese people and were overflowing with the feelings of friendship and solidarity between the Korean and Chinese peoples,'' the news agency said.

The Korean peninsula has been divided into the communist north and U.S.-backed south since after World War II.

In 1950, North Korea sent Russian-equipped troops to the south to unite Korea by force. An American counterattack beat them back but massive intervention by Chinese troops saved North Korea and the three-year war ended in a stalemate. China has remained a strong ally of North Korea.

The talks began as the U.S. and South Korea started a large-scale military exercise to demonstrate Seoul's combat readiness.

The exercises include 60,000 Americans, including 43,000 men stationed in Korea, units brought in from overseas bases and those aboard 26 naval vessels of the 7th U.S. Fleet.

The landing operation occurred before dawn at Pohang Beach, 170 miles southeast of Seoul, military officials said. From the U.S. side, about 200 members of the 9th Marine Expeditionary Brigade participated, U.S. officials said. The number of Korean marines involved was not disclosed.

U.S. and South Korean amphibious assault vessels and transport helicopters joined in the operation to support the landing forces, the officials said. More landing operations were planned for this week, the officials said.

With the Pohang landing as the starting signal, two weeks of inland field

maneuverings began in the northern areas, the officials said.

#90073u0840 03/14/1990 ~United Press International
WASHINGTON (MARCH 14) UPI - The National Gay and Lesbian Task Force Wednesday urged homosexual and lesbian couples living together to honestly answer the 1990 census, saying it will for the first time provide a measure of the extent of such relations.

''The struggle to have our relationships and our families recognized and protected will assume much greater urgency in the decade to come,'' said Ivy Young, director the task force's Families Project.

While the 1990 census form, which will be mailed to an estimated 106 million households on March 23, contains no questions on sexual orientation, the section of the survey asking how people in a household are related will include the designation ''unmarried partner'' along with the more traditional categories of ''roomer/boarder,'' ''housemate/roommate.''

It is the first time the ''unmarried partner'' designation has been included in the decennial census.

According to officials at the Census Bureau, the new designation is an effort to get a handle on the number of heterosexual couples living together without being married - who share households ''for more personal reasons.''

But the task force maintains that by simple deduction, including gender-specific names of household members or gender designation, Census statisticians will also be able to determine the number of same-sex couples living together.

Census officials agreed that the gay relationship figures would be a ''natural by-product'' of the census process.

Task force members said both sets of figures - same-sex and heterosexual - will be published.

''Lesbians and gay men have taken the lead in this country on the issue of family diversity,'' the task force said in a statement. ''The 'unmarried partner' question on the 1990 census marks the first time the federal government has ever acknowledged one element of that diversity: domestic partnership.''

The task force argues that because census figures play a key part in setting the social and economic agenda of the nation for the coming decade

it is important that gays make their numbers known.

They have mounted a campaign in the nation's gay communities urging homosexuals and lesbians to answer the question but acknowledge there is reluctance on the part of some same-sex partners to answer because of the fear of bias and discrimination.

Census officials, however, stress the confidentiality of the count and said the published figures would be for areas of at least 10,000 people to protect the identity of both types of couples.

#90073u0860 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Congress is unlikely to make major changes in the rules on how much money farmers can collect in farm program benefits, House Agriculture Committee Chairman Kika de la Garza said Wednesday.

Some congressmen have suggested cutting off payments to large farmers, either as a way to meet budget targets or out of a belief the payments are wasteful.

''I doubt it,'' de la Garza said during a press breakfast when asked if the idea was likely to go far.

The White House has listed stricter payment limitations as one of three possible areas for finding the $1.5 billion it wants in spending cuts. However, Agriculture Department officials, including Secretary Clayton Yeutter, said Tuesday tougher rules offer the least potential for savings.

At present, benefits are available to any farmer who signs up for the farm program although there is a $50,000 limit on crop support payments to an individual farmer and a $250,000 limit on all types of program payments.

De la Garza said there was little sentiment in the agricultural community to change the rules. But he noted ''somebody outside of the agriculture sector, as one member from Texas is talking now'' who could try to force the issue on the floor.

He apparently was referring to Rep. Richard Armey, D-Texas, who has filed

a bill to bar payments to farmers with a large volume of sales.

JAKARTA, INDONESIA (MARCH 14) UPI - More than 200 companies from 17 countries including the United States are participating in the second Asia-Pacific Mining Exhibition which opened Wednesday.

The four-day exhibition at the Jakarta Fair Grounds is promoting the latest underground extraction equipment and machinery for open-cut and alluvial mining, mineral processing equipment, drilling, boring and excavation tools. The biggest exhibits are from Australia, the United States, Canada, Singapore, and the host country Indonesia.

An official of the ASEAN Federation of Mining Associations, which is sponsoring the show, said the potential market for the development of coal gold mining and other mineral extracting projects in Southeast Asia was believed to be the reason of the strong interest in the exhibition.

The official said investment in the mineral industry of member states of the Association of Southeast Asian Nations was expected to expand rapidly due to the political stability of the region and the favorable environment for foreign investment.

The organization predicted that at least $5 billion would be spent on equipment, supplies and services for mineral development in the region in the next decades, making one of the more attractive targets in the world for mining companies. Indonesia acounted for almost 60 percent of the projection.

WASHINGTON (MARCH 14) UPI - The inventories of America's business warehouses edged up by 0.2 percent in January after a 0.4 percent decline in December, the Commerce Department reported Wednesday.

An increase in the quantity of unsold goods points to weakness in the economy. A decline or small increase suggests businesses are keeping a close eye on their stockpiles of goods.

The total value of inventories in January climbed to $795.9 billion after declining in December to a revised $794.1 billion, the department's Census Bureau said in its monthly report. The numbers are adjusted to reflect seasonal factors such as the weather.

January inventories of durable goods, items made to last three or more years, increased by less than 1 percent to $488.1 billion, while stockpiles of non-durable goods were up by 0.5 percent to $307.8 billion, the report said. Inventories of retail goods declined by 0.6 percent in January, but clothing stores reported a 0.9 percent increase in unsold products, it said.

Food stores, meanwhile, reported a 0.4 increase in inventories, but auto dealers saw their lots empty out by 3.6 percent, reflecting consumer rebates and other deals.

Excluding autos, retail inventories increased by 0.6 percent. Total sales in January were up by 0.3 percent to $523 billion, compared to a 0.2 decline in December to $521.25 billion, the Commerce Department said.

Sales of durable goods in January jumped by 0.4 percent to $248.2 billion, while sales of non-duarble goods in the first month of the new year stood at $274.8 billion, an increase of 0.25 percent, the department said.

The government economic report also said that the inventory-to-sales ratio which measures how long it takes businesses to liquidate inventories,

held steady in January at 1.52.

BONN, WEST GERMANY (MARCH 14) UPI - The United States, the Soviet Union, Britain, France and the two Germanys started the ''two-plus-four'' talks Wednesday on reunification of the German states divided since the end of World War II.

The delegations of foreign affairs officials, meeting at the Foreign Ministry in Bonn, were expected to start discussing the agenda for the conference conceived at a meeting in Ottawa last month.

No concrete decision was expected until after March 18 elections in East Germany expected to confirm the end of 40 years of Communist leadership.

At a later stage, the talks are expected to include the foreign ministers of the four World War II victors - Britain, France, the Soviet Union and the United States - and of the two German states.

Informal talks between foreign ministers of the participating countries are likely to take place before ministerial talks.

There was speculation in Bonn that Secretary of State James Baker would discuss the German reunification process with his British and Soviet counterparts when the three are in Windhoek to attend March 20-23 celebrations marking the independence of Namibia.

Baker aide Robert Zoellick heads the U.S. delegation at the Bonn talks, where the delegations were expected to keep the contents of the discussions secret.

In the past few days, agreement appeared to emerge among the participating nations that Poland should be included in the talks on German unification when the discussion turns to its border with East Germany.

The Bonn government recently said a unified Germany will have to sign a border treaty with Poland and said it will not seek to reclaim territories that Germany ceded to Poland after Germany lost World War II.

Observers believe the question of Germany's military affiliation will be a major stumbling bloc when the talks will move to a decision-making stage.

The Western powers favor Germany's continued membership of the North Atlantic Treaty Organization, the Western military alliance. It is not clear at this stage whether such a plan will entail the withdrawal of Soviet troops currently stationed in East Germany.

The Soviet Union has rejected the concept, backing a neutral Germany. It also has criticized a plan outlined by West German Chancellor Helmut Kohl that would allow East Germany to simply join the West German federal republic.

Critics have said the plan amounts to a virtual annexation of East Germany.

The two-plus-four conference is also expected to consider plans for the

monetary unification of the two German states, that entail the introduction of the West German currency in East Germany.

At an election rally in the East German town of Cottbus Tuesday night, Kohl pledged that East Germans will be able to convert their savings at a one-to-one rate once the union is forged.

''This will only be valid for small savers but not for the whole currency '' he said.

#90073u0912 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Cardinal John O'Connor of New York pledged Wednesday the Roman Catholic Church will mount a full-scale lobbying effort against proposed legislation to protect legal abortion.

''In the months to come,'' O'Connor said in a letter to every member of Congress, ''you will therefore be hearing from me and from the staff of the Bishops' Conference about legislation that advances or hinders this goal'' of making abortion illegal.

O'Connor, one of the nation's most influential prelates, is chairman of the National Conference of Catholic Bishops' Committee for Pro-Life Activities.

The letter to Congress was O'Connor's first since his election to the post last November at a meeting of the bishops in which they also adopted a controversial resolution sharply criticizing politicians who support legal abortion.

In his letter to Congress, O'Connor said the church views opposition to abortion as ''the fundamental human rights issue.''

O'Connor also took aim at two pieces of proposed legislation that have been introduced on Capitol Hill following the Supreme Court's Webster decision that granted states more powers to regulate and restrict abortion.

One of those, the ''Freedom of Choice Act,'' would prohibit states from restricting the right of a woman to choose to terminate a pregnancy before viability - about 24 weeks after conception.

The second bill, the ''Reproductive Health Equity Act,'' would overturn restrictions on federal funding for poor women seeking abortions.

O'Connor suggested supporters of the bills are extremists, arguing supporters ''are in no position to accuse pro-life advocates of extremism on the abortion issue.''

He said the proposed ''Freedom of Choice Act'' ''is even more extreme'' than the 1973 decision legalizing most abortions because it would invalidate any effort by a state to ''restrict the right of a woman to choose to terminate a pregnancy.''

''Such (restrictive) efforts could include regulations designed to protect parental rights, limit government funding of abortion or ensure informed consent and optimum health care for women,'' O'Connor said.

He said the legislation would ''force states to allow abortion as a first-resort method of birth control.''

And, he added, the proposal to restore Medicaid abortion funding for poor women ''would require taxpayers to support such (birth control) abortions.''

He urged members of Congress to oppose the two pieces of legislation and urged sponsors to ''step back for a moment and examine the consistency of your position.''

#90073u0955 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - The $350 billion U.S. electronics industry will have to look for growth overseas in the 1990s, while facing heightened competition from foreign companies worldwide, an industry survey said Wednesday.

The survey, "Electronics 90: The new competitive priorities," was conducted among key executives at more than 750 U.S. electronics companies by the professional services firm of Ernst & Young and the bimonthly magazine Electronic Business, published by Reed Publishing Inc.

"Virtually every executive in this industry will need to understand the issues of international distribution and sales, strategic partnership with foreign companies, recruiting foreign personnel and managing currency rate exposure," said Stephen Almassy, national director for computer industry services at Ernst & Young.

The survey also said that the U.S. industry, which had $350 billion in revenues in 1989, will have to raise substantial funds for research and

development, including from foreign investors, in order to remain competitive. The $550 billion worldwide electronics market is expected to top the $1 trillion mark by the end of the decade.

About 75 percent of the companies polled said they already generated a part of their revenues from foreign markets. Among those companies, 74 percent were selling products in Canada, 70 percent in Western Europe, 49 percent in the Pacific Rim countries, excluding Japan, and 42 percent in Japan.

"Although 42 percent (of the companies) said they had Japanese sales, many respondents reported failure" in Japan, the survey said. It noted that one out of three U.S. electronics companies having tried to establish a presence in Japan failed.

The rate of failure, however, was greater in developing countries and Eastern Europe, and larger corporations fared better than smaller companies, the survey said.

The United States will remain the main market for U.S. electronics companies, regardless of the size of the companies' foreign operations, the survey said. But at the same time, U.S. electronics companies will need to increase dramatically their share in foreign markets, including Canada, Western Europe, Japan, and other Pacific Rim countries.

While 90 percent of the U.S. electronics companies viewed other American corporations as their main rivals, one-third of the respondents said their main competition will come from overseas within five years.

U.S. semiconductor manufacturers were the most concerned about foreign competition in a sector where Japanese companies are major players on the international scene.

A stunning 50 percent of the electronics manufacturers believed that their sucess in Japan depended on the U.S. government's ability to negotiate a favorable bilateral trade agreement. An almost equal percentage, 46 percent, felt the same about Western Europe. Only companies providing electronics for the U.S. defense sector expressed virtually no concern about foreign competition.

U.S. companies did not expect stronger competition from the European Community of 1992, boosted by the lifting of trade barriers. They expected to generate 25 percent of their foreign revenues from the EC by 1994.

"Over 50 percent of all companies view 1992 positively, while only 15 percent are worried about the negative implications for their companies," the survey said.

Electronics companies felt that new investments were the key to their

development. Large companies said they will need to raise $22.1 billion, while the top-tier companies said they will need $78.5 billion.

An increasing number said they will need foreign investments. Up to 27 percent of the companies polled felt they would need foreign investments by 1995, up from 16 percent next year. The largest corporations said they will need to raise one third of their fresh capital from overseas.

With only six percent of the companies having revenues of more than $300 million a year and controlling 81 percent of the total market, U.S. electronics corporations said business alliances and mergers will shape the future of the industry.

About 55 percent of the executives polled felt their company will be acquired in the next five years, while about 65 percent said their company will buy another. The large corporations will lead the merger game, with about 85 percent of them saying they will buy a company.

#90073u0983 03/14/1990 ~United Press International

SILVER SPRING, MD (MARCH 14) UPI - Bruno Bettelheim, one of the great figures in American psychology whose career was dedicated to healing the emotional scars of early life, died of asphyxiation in a retirement home. He was 86.

Police ruled Bettelheim's death Tuesday at the Charter House a suicide, and said a note was found but no details were revealed. Friends said Bettelheim recently had suffered a stroke.

Born in Vienna on Aug. 28, 1903, the famed psychoanalyst died 52 years to the day after the Nazis marched into Austria, on March 13, 1938.

Bettelheim, who based his own ideas on those of Sigmund Freud, was a pioneer in treating childhood mental disturbances and his therapeutic techniques made major contributions to therapy for children.

Much of his work focused on the importance of play, fantasy and fairy tales in child development and he authored highly influential articles and books. One of his best known was ''The Uses of Enchantment,'' in which he probed fairy tales for the secrets of their emotional power over children.

Bettelheim was known for his provocative views on issues that won him both praise and criticism that sometimes prompted him to change his theories.

A concentration camp survivor, Bettelheim gained insights into the human condition, during the almost two years he spent in Nazi captivity at Dachau and Buchenwald camps.

He did studies on why some people survived the Nazi concentration camps while others did not and one of his first works described the disintegration of dignity and personality in the Nazi concentration camps.

The insights from the camps were foundations for a revolutionary and humane approach to treating disturbed children in his pioneering treatment center, the Sonia Shankman Orthogenic School at the University of Chicago.

Bettelheim was known for his indulgent approach to the treatment of autistic childen. He was convinced autistic children, those who withdraw into a virtually silent, private world, would respond to a special environment.

He often spoke out on social issues of the day. In the late 60's he was the most prominent psychologist to turn against youthful activists, calling them neo-Nazis.

Coming to the United States, Bettelheim joined the faculty of the University of Chicago, where he taught until his retirement in 1973. He became director of the Sonia Shankman Orthogenic School, on the ground of the university.

He came to Silver Spring in recent weeks from California, where he had been living and working.

Bettelheim's wife, Gertrud Weinfeld, also from Vienna, died in 1984. He is survived by three children, Ruth, Naomi and Eric.

PARIS (MARCH 14) UPI - The five permanent members of the U.N. Security Council agreed Wednesday on an enhanced role for the United Nations in resolving the Cambodian conflict, including the creation of a U.N. transitional authority that would govern the war-torn country until free elections can be organized.

The five - the United States, the Soviet Union, China, France and Britain - also said they hoped to meet again in New York before mid-May to continue their efforts to achieve what a U.S. statement called ''a comprehensive settlement, including the military and peace-keeping aspects and the question of existing structures and regimes.''

U.S. diplomats said they believed the two-day meeting in Paris had made progress on defining the role the United Nations would play in monitoring a cease-fire and organizing free elections in which all of Cambodia's political groups would be represented.

The statement did not specify the length of the proposed transition period but officials have previously said it would be at least a year before free elections could be organized once the U.N. mechanism was put in place.

Many of the points covering the proposed U.N. role, however, had been previously agreed to in principle and a number of analysts said Wednesday important questions, especially the role that the Vietnamese-installed Hun Sen administration in Phnom Penh would play during the transition period, remained unsettled.

In a statement last Feb. 25 Cambodian resistance leader Prince Norodom Sihanouk said he would accept an interim U.N. role ''only if the Hun Sen administration is, at the same time, dismantled from top to bottom.''

U.S. officials said Wednesday that the current Cambodian government was made up of about 250,000 bureaucrats and that it was doubtful all of them could be dispensed with during the planned transition period.

American officials said the U.S. assistant secretary of state for Asian and Pacific affairs, Richard H. Solomon, who represented Washington at the Cambodian talks, began two days of discussions in Paris Wednesday with Soviet Foreign Affairs Minister Igor Rogatchev.

The U.S. officials said the previously scheduled talks would review the current situation in Asia and were part of regular consultations on regional isssues between the two superpowers.

The third big power conference on Cambodia since the start of the year was held against the backdrop of renewed fighting in Cambodia's Battambang province on the border with Thailand and unconfirmed reports that some regular army Vietnamese troops had begun to re-enter the country two weeks ago.

The Vietnamese overthrew the Khmer Rouge in 1979, installing the present Hanoi-backed government. Vietnam, however, says it removed all combat troops from Cambodia last September, although it recently admitted that what it calls advisers and technicians are still in the country helping regular Cambodian government troops.

The five permanent Security Council members agreed at the Paris session that the United Nations should be responsible for the organization and conduct of free elections resulting in the formation of a constituent assembly that would approve a new constitution before transforming itself into a legislative body.

The statement said all Cambodian participants in the elections should have the same rights and opportunities to take part in the process and that all parties ''should commit themselves to honoring the results.''

The five powers asked the four warring Cambodian factions to agree to the establishment of a Supreme National Council ''as the unique legitimate body and source of authority'' during the transition period. The Council

would include representatives of all parties and factions.

But the statement said the Council would delegate its powers to the United Nations Transitional Authority in Cambodia that will be established by the U.N. Security Council, with the Supreme National Council playing only an advisory role.

GENEVA, SWITZERLAND (MARCH 14) UPI - The United States offered at the Uruguay Round trade talks Wednesday to completely eliminate a wide range of import duties if its trading partners were prepared to do the same.

A detailed U.S. proposal running to 800 pages was being presented Thursday to meet a March 15 deadline for tariff-cutting offers at the trade liberalization negotiations.

An advance summary made available Wednesday said Washington in many trading sectors was ready to go far beyond the overall target of an average 33.3 percent cut in import tariffs.

It said there could be totally "duty-free access into the U.S. market" for many goods ranging from wood and steel to bicycle parts and toys. Other countries, however, would have to eliminate duties or nontariff barriers like quotas on the same American-made products.

Zero tariffs were offered by Washington on wood products and paper, steel, aluminum, and certain construction equipment, lift trucks and engines, certain bicycle parts, certain electronic articles, certain furniture articles, and certain toys and dolls.

Ambassador Rufus Yerxa, the U.S. chief negotiator, said Washington "is also ready to cut by up to 50 percent" on other products provided there is reciprocity.

In the agricultural sector, Washington repeated its earlier offer for reciprocal elimination of import tariffs or their reduction to very low levels.

Nontariff barriers like quantitative import limits and export subsidies would be converted by means of complicated mathematical formulas into tariff equivalents and then be eliminated or reduced. The European Community has labeled such "tariffication" as "unrealistic and unworkable."

Yerxa called on the Uruguay Round participants, the 97 members of the General Agreement on Tariffs and Trade, urgently to accelerate their work because of the fast-approaching December deadline for its conclusion. "If we do not get going now there is a substantial risk of getting a lot less " he warned.

#90073u1024 03/14/1990 ~United Press International
WASHINGTON (MARCH 14) UPI - The Judicial Conference of the United States has given its approval to a plan designed to shorten the death row appeals process, it was announced Wednesday.

The conference, which is the policy-making body of the federal judiciary, announced its approval of the plan at the conclusion of its meeting held at the Supreme Court.

The conference's approval of the plan, which was drawn up by a committee led by former Supreme Court Justice Lewis Powell, included modifications, one of which mandates that states adopt standards for attorneys who handle capital cases.

At issue are efforts to reduce the seemingly endless number of appeals that death row inmates have through the use of habeas corpus writs. Habeas corpus is a process available to state prisoners seeking federal court

review of alleged constitutional defects in state court proceedings.

Any changes in such procedures must be adopted by Congress and the conference's report was forwarded to Congress.

Also at the meeting, which was closed to the public, the conference:

-Passed a resolution expressing its sorrow over the murder of 11th U.S. Circuit Court of Appeals Judge Robert Vance, who was killed by a mail bomb received at his home outside Birmingham, Ala., in December.

-Approved a resolution that recognized an ''emergency situation'' exists regarding the off-site security of judicial officers and their families and called on Attorney General Dick Thornburgh to address the situation immediately.

-Urged Congress to reconsider the wisdom of mandatory minimum sentence statutes.

#90073u1028 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - President Bush will probably start planning his re-election campaign early next year, aides say.

They insist that Bush has not yet set the political wheels churning for a second term, that the machinery is not yet in place, and that it is ''too early'' to swing into a campaign mode.

But even though Bush has not announced his plans to run for re-election - which no one on the Washington scene doubts he will do - he has already said that Vice President Dan Quayle will be his running mate again.

Why he made such a premature announcement is a puzzlement, unless he was trying to head off other contenders such as Secretary of State James Baker who undoubtedly has higher political ambitions, and Housing Secretary Jack Kemp, who aspired to the presidency in 1988.

While Bush is enjoying a high popularity rating and reveling in the presidency, the picture is not so clear with Barbara Bush. Her popularity rise in the White House was meteoric, but some of her comments indicate that four years in the goldfish bowl is enough for her.

White House chief of staff John Sununu says there is a possibility that Bush may travel abroad in late July or early August, between the end of the Economic Summit in Houston and his summer vacation at Kennebunkport, Maine.

Bush, who traveled to 79 countries as vice president during his eight years, has the travel bug. Sununu says he ''wants to go everywhere and he wants to go everywhere now.''

The big ticket items are South America, Africa and back to Asia for another swing. Europe is also in the picture as the day nears when there is an agreement in Vienna on superpower troop cuts on the continent.

Like many of his predecessors, perhaps stemming from the feeling of isolation, President Bush has telephonitis. He has made some 3,000 phone calls, 500 to heads of government, since he has been in office. And there are more to come.

The president believes in personal diplomacy, and getting on the horn is

one way to solidify friendships. It also provides the direct approach for a president who has something he wants to get off his chest.

Rarely, unless Bush says so himself, are the contents of the phone calls leaked. But sometimes the White House wants to get the word out and the call is leaked.

Preparations are well under way in Houston for the July 9-10 Economic Summit meeting with leaders of the seven Western industrialized nations.

''It's the first time we've had an Economic Summit meeting in an American city and it's going to be world class,'' said Peter Roussel, who is handling many of the communications arrangements for the hundreds of journalists who will converge on Houston.

What's Texas without a barbecue? The foreign leaders can all expect to be treated to such fare, not to mention Stetsons and other symbols of the Lone Star State.

There's another Jackie Kennedy in the White House. Not as high profile as the former first lady. But as an assistant to White House chief of staff John Sununu, this Jackie Kennedy can wield some gatekeeping powers of her own.

The attractive New Englander came to the White House with Sununu, having served with him when he was governor of New Hampshire. Her name does give newcomers a start.

The original Jackie Kennedy has only been back to the White House once in recent memory. That was during the Nixon era when her portrait was presented to the White House.

#90073u1076 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - Lockheed Corp. stepped up its fight in the proxy battle with Harold Simmons Wednesday by running newspaper advertisements accusing the Texas investor of spreading "misinformation" to win shareholder support.

The aerospce giant ran ads in The New York Times and The Wall Street Journal quoting comments it said Simmons made to a Los Angeles newspaper in October describing his investment activities in Lockheed.

"Lockheed is actually just a decoy ... I have several decoys out there because there's really something else that I want to slip up on," Simmons was quoted as saying to the Los Angeles Daily News. "You've got to put out misinformation, if you relly want to buy something for a fair price."

Simmns, who owns nearly 19 percent of Lockheed's stock, has proposed a 15-member slate to replace the current board at Lockheed's annual meeting March 29.

Earlier this week, Simmons revealed his proposed plans for Lockheed, saying the company should curb diversification and focus on its core space, missile and aeronautics business.

He also said, if successful, he would slash costs, implement a strategy of "return on investment" and insist that Lockheed's non-core businesses achieve acceptable profitability.

In the newspaper ads, Lockheed said, "In our opinion, this 'program' reflects a lack of understanding about Lockheed's businesses and the markets they address. "We will have more to say shortly about this 'program,"' the ads said.

The ads also defended Lockheed's restructuring plan launched in April after Simmons first disclosed he had acquired 5.2 percent of the stock. The restructuring program included cutting the workforce in aeronautical and defense electronics, selling surplus real estate, divesting most of the informations systems group and creation of an Employee Stock Ownership Program (ESOP).

"We have been implementing a program which we believe will position Lockheed for growth in profitability and shareholder value," the ads said. "We expect the benefits of Lockheed's restructuring program will be seen beginning in the current year."

On Tuesday, Simmons, in a new move in his proxy battle, said he would add a representative of the company's ESOP to the board if he is successful in the takeover fight. "We believe the employees in the Lockheed ESOP deserve board representation," Simmons said.

Lockheed's ESOP shares constitute about 18.9 percent of the company's outstanding stock - about the same percentage as that held by Simmons. Analysts regard the ESOP shares as more likely to back management's slate of directors at Lockheed's annual meeting, scheduled to be held in Los Angeles.

Lockheed also accused Simmons in the ads of running a slate of nominees, none of whom "has any experience as an executive officer with a major company in the defense industry."

Among the Simmons' nominees are former Sen. John Tower, who once headed the Senate Armed Services Committee, and Admiral Elmo Zumwalt Jr., former Chief of Naval Operations.

#90073u1097 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Rep. Dennis Hastert, R-Ill., proposed legislation Wednesday that would require deregulation of trucking within the states and establish a uniform operating policy for the trucking industry.

Hastert said his bill would eliminate internal trade barriers imposed by state regulation of interstate motor carrier fleets, and strengthen truck safety enforcement by requiring the Department of Transportation to identify carriers with an unsatisfactory safety rating and establish tougher penalties for truck safety violators.

The legislation would also create uniformity among the states regarding motor carrier economic regulation and registration and taxation requirements, Hastert said.

''In 1980 we started to solve the problem of excessively high transporation costs by deregulating interstate truck shipping,'' Hastert said Wednesday. ''Yet 42 states continue to maintain some type of control over motor freight rates and its costing us a bundle.''

Earlier this week, Transporation Secretary Samuel Skinner said motor carrier deregulation at the state level would be a priority in implementing the nation's new national transportation policy.

Americans for Safe and Competitive Trucking, a coalition of 182 trucking firms, consumer and agricultural groups that supports the proposed legislation, noted that while the distance between Jackson, Miss., and Houston, Texas, is 170 miles longer than the distance between San Antonio and Houston, it costs Dallas-based Frito-Lay $60 more per truck load to ship products between the two Texas cities than to Jackson.

''Uniformity of regulation, registration and taxation is needed now to increase the efficiency and productivity of the trucking industry,'' the organization said in a statement. ''This increased efficiency would make our economy and its manufacturers more competitive with our overseas counterparts.''

The legislation could, however, face opposition from the American Trucking Association and various trucking unions.

''If they oppose our effort ... then they should be held accountable for something as anti-consumer as that might be,'' said former Agriculture Secretary John Block, a supporter of the bill.

''I think there are some things in this legislation that those organizations want very badly,'' Hastert said. ''I hope that we could certainly join hands and make it a good piece of legislation for everybody and build a coalition of as many people as we can.''

#90073u1100 03/14/1990 ~United Press International

HOUSTON (MARCH 14) UPI - A transsexual once convicted of murder will face off against a nephew of Sen. Lloyd Bentsen, D-Texas, in a runoff election for chairman of the beleaguered Harris County Democratic Party.

The party was stung two years ago when Claude Jones, an associate of political extremist Lyndon Larouche, won the top spot for the county party. Democrats stripped Jones of all power and eventually ousted him from office.

In Tuesday's primary elections, incomplete returns gave Ken Bentsen Jr. 42 percent of the vote and Leslie Elaine Perez, 27 percent. Two other candidates split the remaining vote.

Bentsen and Perez will compete in an April 10 runoff.

Perez was convicted under the name Leslie Douglas Ashley in the 1961 shooting and torching death of Houston insurance salesman Fred Tones, the Houston Chronicle reported Wednesday.

Ashley's death sentence was overturned and a second trial resulted in a 15-year sentence. After being paroled in 1971, Ashley underwent a sex-change operation and is now known as Leslie Elaine Perez.

Convicted felons are barred from holding public office in Texas, but that prohibition is lifted after they have served out their sentences.

Jack Carter, departing county chairman, said he was surprised Perez pushed the race into a runoff.

''I'm sure there are some people who thought her name sounded like someone they wanted to vote for,'' he said.

Bentsen, 30, is an investment banker who has worked in statewide and congressional campaigns since 1980. He also has been an aide to Rep. Ron Coleman, D-Texas. His uncle, the state's senior senator, was the 1988 Democratic vice presidential nominee.

Perez, 52, a real estate investor, is president of the Houston chapter of the Gay and Lesbian Democrats of America and was a delegate to the state Democratic convention in 1984 and 1988.

The Harris County Democratic Party has struggled recently with a lack of funds and poor organization, and supporters have said a strong, new leader is needed to reorganize the party.

#90073u1117 03/14/1990 ~United Press International

BOSTON (MARCH 14) UPI - It may be useless to ask potential sexual partners about their risk factors for AIDS because people in that situation tend to lie, a survey of college students showed Wednesday.

The survey of 422 sexually active college students in southern California found a ''sizeable percentage'' admitted they had lied to have sex, researchers said.

One third of the men and 10 percent of the women said they had told a lie to obtain sex, said Susan Cochran, an associate professor of psychology at California State University in Northridge who helped conduct the survey.

In addition, when the students were asked hypothetically whether they would lie about testing positively for the AIDS virus, 20 percent of the men and 4 percent of the women said they would, Cochran said.

The survey indicates ''telling people to question their partners about their risk histories for AIDS is probably bad advice,'' especially when such interrogations are used as ''substitutes for safe sex practices,'' she said.

Although the survey was limited to college students, Cochran said: ''There's no reason to think that people who are not in college are more honest with each other about sex.''

Consequently, she and Mays recommended doctors caution patients that

''safe-sex strategies are important,'' no matter what their partners say, and especially in areas with high rates of drug use and sexual experimentation.

Cochran conducted the study with Vickie Mays, a psychologist at the University of California-Los Angeles. Their findings were reported in a letter to The New England Journal of Medicine.

The survey provides ''strong evidence'' that merely asking questions is not an effective means of reducing the risk of AIDS, Cochran said.

Although health professionals and even television advertising have been urging Americans to find out whether potential partners are at high risk for the AIDS virus, Cochran said no one had investigated the wisdom of that strategy.

If a woman asks a man whether he falls into a high-risk category, such as being an intravenous drug user, and ''he says 'yes,''' then she knows to be careful,'' Cochran said.

But ''if he says 'no,' she really doesn't know what that means,'' the researcher added.

Cochran said she was concerned people might be ''using questions'' instead of condoms as protection against the human immunodeficiency virus (HIV), which causes AIDS.

Cochran and Mays asked the 196 men and 226 women surveyed to fill out anonymous questionnaires about their sexual behavior. All were heterosexuals aged 18 to 25.

In a section labeled ''dishonesty in dating,'' the students were asked whether they had lied - or been lied to - for purposes of sex.

Among the women, 60 percent said someone had lied to them for sex. The figure was only slightly lower for men - 47 percent.

Under ''willingness to deceive,'' 47 percent of the men and 42 percent of the women said that if asked, they would understate the number of previous sex partners they had.

Asked if they would disclose the existence of another sex partner to a new one, 22 percent of the men and 10 percent of the women answered ''never.'' On the flip side, 29 percent of the women, but only 10 percent of the men, said ''yes.'' The rest said they would ''after a while'' or ''if asked.''

To a question about whether they would reveal a single episode of infidelity to their partners, 43 percent of the men and 34 percent of the

women answered ''never.''

Those who said ''yes'' included 22 percent of the men and 35 percent of the women.

Although the male respondents were more willing to lie than the women, Cochran said it would ''be a mistake to say that men are more dishonest'' about sex.

Rather, ''women will lie in order to achieve a relationship, while men will lie for both sex and relationships,'' she said.

#90073u1151 03/14/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (MARCH 14) UPI - President-elect Fernando Collor de Mello faces a daunting task when he assumes leadership of Brazil Thursday, taking over a giant country floundering deep in economic crisis.

Banks were closed for three days beginning Wednesday in preparation for an announcement by Collor of his new economic program, expected to include government cost-cutting measures and tax hikes.

Other expected possible steps would be a devaluation and the issuing of a new monetary unit to replace the new cruzado, the national currency adopted in 1986 to replace the ''new cruzeiro'' in an unsuccessful effort by outgoing President Jose Sarney to bring the economy under control.

The bank closing was prompted by fears that uncertainty would worsen a recent rush by investors to take their money out of the banking system and buy U.S. dollars.

Collor de Mello, 40, has vowed to fight hyperinflation and stimulate growth in South America's largest country, but it is unclear whether he has the political muscle to go the distance neccesary to pull his country from economic disaster. In a nation where more than a third of the 144 million inhabitants live in extreme poverty, Collor de Mello said recently ''It is neccesary to show that democracy is capable of giving us the economic progress we hope for.''

''In this process of economic adjustment that will be implemented March 15 we will declare a state of war on inflation.''

Inflation topped 72 percent in February and rose more than 2,750 percent during the preceding 12 months, causing the national currency to lose an average of 4 percent of its value a day.

A study by economist Dercio Garcia Munhoz reported that the inflation rate

rose an astronomical 1,850,000 percent during the five years of President Jose Sarney's administration.

Collor de Mello said he will not impose price controls but said he would arrest merchants for price gouging.

''Inflation in Brazil today is no longer a case of the economy out of control. It is a case for the police,'' the president-elect said.

Collor de Mello has named the current head of the federal police, Romeu Tuma, as tax director. ''Fiscal evasion is a police matter, and now it is going to have a happy end: jail,'' Tuma said.

Though the future president is a middle-of-the-road politician from a well-to-do family, he has sent chilling messages to Brazil's ruling class.

''A large part of our problem is caused by the corrupt elite that lives on favors of the government,'' Collor de Mello said a few days before his inauguration.

Collor de Mello has outlined an economic austerity plan designed to lower the bloated government fiscal deficit by raising taxes, privatizing money-losing state companies and reducing the number of government employees.

The future president started cutbacks with his Cabinet, naming 12 ministers instead of the 23 that had counseled Sarney.

Official statistics indicate that 47 percent of the economically active population depend either directly or indirectly on the state. The costs alone of paying 2.25 million government workers, among them federal government employees, military personnel and the staff of state-owned companies, consumes 2 percent of the gross domestic product.

Collor de Mello has also promised to open Brazil's doors to foreign investment, and his economic program calls for eliminating government subsidies to local companies.

Analysts predict that Collor de Mello will devalue currency, hike public utility rates, abolish controls on foreign currency exchange and steeply tax bank earnings.

Bankers interviewed by United Press International said they feared Collor de Mello will declare a moratorium on the country's $108 billion internal debt, despite the president-elect's denials.

Collor de Mello, a charismatic speaker whose popularity has increased since the December election, named Zelia Cardoso de Mello, 36, as his

economy minister. The first woman economy minister in Brazil, she is considered tough-minded and committed to free market policies.

''The inflation is not going to come down in two weeks, but the population will have other compensations, like improved public services, starting with state reform,'' Cardoso said.

WARSAW, POLAND (MARCH 14) UPI - Poland will start negotiations soon with the Soviet Union on the withdrawal of Soviet troops from its territory and change the terms of their stationing, a government spokeswoman said Wednesday.

Poland also will seek renegotiation of the terms for basing some 40,000 Soviet troops currently on Polish soil and try to reduce their affect on Polish residents, especially by Soviet military flights.

The talks concerning ''partial reduction and a complete withdrawal in the future of Soviet troops will begin very soon,'' government spokeswoman Malgorzata Niezabitowska said at a news conference.

Soviet troop headquarters is located in the southwestern city of Legnica.

The spokeswoman said many communities had been pressing to eliminate military airfields or some flights.

''The arrangements for the Soviet forces, including payments for the use of housing and facilities, will be renegotiated,'' she said.

The spokeswoman said the decision to enter negotiations with the Soviet Union came Wednesday at a meeting of National Defense Council which includes President Wojciech Jaruzelski, Prime Minister Tadeusz Mazowiecki and Defense Minister Florian Siwicki.

The Soviet Union recently offered to start talks on the issue, but the Polish government waited, apparently using the issue as a bargaining card in seeking Soviet backing for Poland's participation in the talks on Germanys reunification.

Poland wants to be part of the ''two plus four'' talks between the four victorious World War II allies - the United States, the Soviet Union, Great Britain and France - and the two German states. Poland wants to get appropriate assurance on the final character of its western border with East Germany running along the Oder and Neisse rivers.

Niezabitowska also announced Poland would present its own initiative at

troops reduction talks in Vienna concerning a new system of European security in which a reduction of forces, including Soviet forces in Poland would be an integral part.

ATHENS, GREECE (MARCH 14) UPI - Iran plans to spend $10 billion to purchase new armaments to modernize its armed forces by early 1994, a report from Tehran said Wednesday.

The Tehran newspaper Kayhan, copies of which reached Athens, said Iran would spend $10 billion for armaments and modernizing its armed forces during its current five-year development plan, which runs to March 1994.

The newspaper quoted Defense Minister Akbar Turkan as saying: ''Of course, our main emphasis will be on the human reconstruction of these forces.''

Turkan gave no further details of Iran's defense reconstruction plans, but the amount Tehran will reportedly spend on arms purchases represents about 10 percent of the country's projected oil revenues in this period.

Last month Kayhan quoted Iranian Oil Minister Gholamreza Aqazadeh as saying Iran expected to earn $100 billion in oil revenues during the current five-year plan period.

There was no immediate indication of how far above its normal defense budget Iran plans to go in purchasing new arms. Over the past few years, Tehran has kept its defense budget secret.

On Feb. 19, President Akbar Hashemi-Rafsanjani presented a $57.3 billion dollar budget to the Majlis or Parliament, but reports in the official Iranian media did not say how much was to be spent on defense.

Since the end of the eight-year Gulf war in August 1988, Iran and Iraq are reported to have entered an arms race, in an apparent bid to be prepared in case fighting breaks out anew, but details of the arms purchases by the two sides have at best been sketchy.

Iran has also launched plans to make some of its own weapons, and its activities in this field have been taken seriously enough to attract the attention of some of its neighbors, including U.S. ally Pakistan.

A high-level Pakistani military delegation recently visited Tehran.

On Monday, the official Islamic Republic News Agency said a 50-ton Iranian-made gunboat was launched in the Caspian Sea for training purposes. The gunboat was 66 feet long and almost 20 feet wide and capable

of speeds up to 16 knots.

IRNA said the vessel was developed by the maritime division of the Defense Industries Organization in Tehran, but the news agency gave no further details.

Earlier reports said the Islamic Republic had developed, and was now producing, a small two-seater training aircraft, and was pressing ahead with plans to repair some of its more sophisticated U.S.-made weapons damaaged during the Gulf war.

Iraq, for its part, is reported to have developed medium-range missiles capable of reaching Tehran and cities near the Iran-Afghan border from launch sites inside its own borders.

SPRINGFIELD, IL (MARCH 14) UPI - Conservative Republican gubernatorial hopeful Steven Baer said Wednesday the next governor should take a $25,000 pay cut.

Criticizing Republican Gov. James Thompson's lifestyle, Baer said, ''What the governor needs to do more than anything is to set a tone for state government. You can't ask people in government service to make sacrifices, to squeeze out greater efficiencies, if you yourself are living high and eating caviar.''

Baer said, if elected, he would cut the governor's $93,000 annual salary by $25,000, end state-supported trips by the governor to foreign countries and trim the number of gubernatorial bodyguards.

Baer accused Thompson of going on too many state-supported ''junkets.'' Thompson has made 19 trade missions since elected and plans to travel to Japan and Canada in the next few months but Baer said there are ''few necessary reasons'' for the governor to travel outside of the country on state business. Thompson has said in the past his overseas trips have brought the state millions of dollars in foreign investment and opened new markets for Illinois products.

ST. MARYS, GA (MARCH 14) UPI - Peace activists, foiled by the Navy in their attempt to block an alleged shipment of nuclear warheads, said Wednesday they will use a ''peace flotilla'' to protest the Trident submarines at Kings Bay Naval Submarine Base.

John Linnehan, leader of the Metanoia peace group, said the Navy reportedly brought the warheads to the St. Marys base by truck instead of rail, as activists had expected. Navy officials refused comment.

''That's our conclusion, just by putting together facts and reports,'' Linnehan said. ''The (Navy's) announcement that the sub (the USS Tennessee) will be deployed by the end of the month, the fact that the sub is in the explosives handling wharf (at Kings Bay), and a number of reports we've received from people on base that the weapons are there.''

Linnehan and other activists had planned to lie down on railroad tracks along the route from the Department of Energy's Pandex nuclear plant in Amarillo, Texas, to Kings Bay in an attempt to stop the warheads from reaching the base.

Since that strategy apparently has been foiled, the activists plan to protest the USS Tennessee's deployment with a fleet of kayaks, canoes, rafts, power boats and other small craft in the canal leading to the base. Protesters also will be stationed on land outside the base, Linnehan said.

Linnehan said the deployment protest has not been scheduled, but that it probably would be held later this month.

''It will be some sort of a land-and-water action at the base, a citizens reaction to the deployment of this first-strike new system, which we feel is destabilizing to world situations, dangerous and exorbitantly expensive '' Linnehan said.

''We're trying to form a peace flotilla of citizens that will leave St. Marys and go up the St. Marys River to the canal and the base,'' he said. ''We haven't been able to deal with the Navy on any other level, either

personally or through the gates. Our last recourse is to deal with them on the water.''

Groups expected to participate in the protest include Metanoia, Greenpeace and the Florida Coalition for Peace and Justice.

#90073u1181 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Congress moved one step closer to recognizing the historic Selma-to-Montgomery march 25 years ago when the House Interior Committee approved a plan Wednesday to study how best to include the 54-mile route in the national trails system.

The one-year study would consist of an oral biography of local citizens who participated in the march and an examination of where to place markers along the Alabama route that took thousands of marchers to the state capital to urge passage of the nation's first Voting Rights Act.

The march was preceded by what has become known as ''Bloody Sunday,'' the day 525 marchers attempted to make their journey but were blocked and injured by state police.

Several days later, President Lyndon Johnson federalized the Alabama National Guard to assure the marchers' safe passage, and the journey was completed successfully.

''Those events are still fresh in our minds today,'' said Rep. Bruce Vento R-Minn., a member of the Interior Committee.

The bill was offered by Rep. John Lewis, D-Ga., who participated in the 1965 march as a student activist.

Several weeks ago, Lewis led scores of people along the route to commemorate the 25th anniversary of the march.

The $150,000 study would be conducted by the National Park Service, which supports the bill. The House is expected to vote on the measure next week, followed shortly after by the Senate.

#90073u1183 03/14/1990 ~United Press International

(MARCH 14) UPI - Oliver North returns to the witness stand today to possibly finish his testimony in the Iran-Contra trial of John Poindexter. During statements yesterday, North admitted that he secretly kept in touch with former national security adviser Robert McFarlane about classified matters after McFarlane left the White House.

Teachers union leaders in West Virginia say they will respond today to a proposal offered by Governor Gaston Caperton to end a six-day-old walkout. Caperton's plan calls for a 20-Million dollar increase in the state's budget next year for increased wages and an education summit in May.

Officials at New York's Bellevue Hospital say former Mayor Abe Beame will be transferred today to Mount Sinai Medical Center for treatment by his personal physician. Beame was stricken with chest pains Monday night and was rushed by ambulance to Bellevue yesterday morning. The 83-year-old Beame is listed in stable condition.

U-S and South Korean officials say a joint military training drill called ''Team Spirit'' has begun in South Korea. A spokesman for the American armed forces says Korean police arrested 13 dissident students who protested the exercise involving 190-thousand troops. The students claim the drill raises tensions between the two Koreas.

China's state-run news agency says a regional people's congress has voted to remove a prominent liberal journalist from his seat in the country's nominal Parliament. During last year's massive pro-reform demonstrations, the newsman tried to call a special parliamentary meeting to counter the party's hard-line stance.

-30- 1779

#90073u1198 03/14/1990 ~United Press International

CAIRO, EGYPT (MARCH 14) UPI - The Iraqi government said Wednesday President Saddam Hussein would not bow to international pressure to commute the death sentence of an Iranian-born British journalist convicted of spying.

The statement appeared to be a rejection of appeals for clemency from world leaders to commute the death sentence faced by Farzad Bazoft, 31, who was arrested last September while on assignment in Iraq for the London weekly Observer newspaper. Bazoft is scheduled to be executed Saturday.

''The hasty way pursued by the British side on this matter is not the correct way to make the president of the Iraqi republic intervene, and use his constitutional powers to commute the sentence,'' a Foreign Ministry spokesman in Baghdad said in a statement carried by Iraq's official INA news agency.

''The president of Iraq cannot take a decision of this kind under circumstances of pressure and political and media campaigns,'' INA said.

''Also, Iraq has confidence in its judiciary. It has confidence that the verdict issued against a person convicted of a crime of espionage in the

interests of a hostile party is a fair decision, taken at a fair trial, with the attendance of the British consul in Baghdad,'' the unnamed spokesman said.

In London, the Foreign Office said Iraq had refused to receive Foreign Secretary Douglas Hurd on a mercy mission aimed at gaining clemency for Bazoft and a British nurse also sentenced for spying.

British officials said Hurd had hoped to go to Iraq during an upcoming visit to Oman to personally appeal to the president.

''The Iraqi's did not feel able to speak about this given the present climate,'' the official said. ''They have said that this would not be the right time for a visit.''

In Strasbourg, France, officials of the Council of Europe called on Hussein ''to re-examine the sentences pronounced.'' European deputies will vote Thursday on a resolution concerning the dispute.

Bazoft was tried with a British nurse, Daphne Parish, 52, who was accused of driving him to an unauthorized military complex north of Baghdad where an earlier explosion was alleged to have killed hundreds of people. Parish was sentenced to 15 years hard labor.

Baghdad-based British diplomats said the military court's five-hour hearing did not produce any evidence to warrant such severe sentences.

Although Bazoft confessed on state-run Iraqi television to spying for Israel, the accusation was vigorously denied by his newspaper, which said the confession was obtained under duress. British diplomats said Bazoft repudiated the confession during his trial.

Persons convicted of treason or espionage in Iraq are usually executed by firing squad. But Saddam must first endorse the death sentence before it can be carried out.

#90073u1201 03/14/1990 ~United Press International

KANSAS CITY, Mo. (MARCH 14) UPI - US Sprint said Wednesday its subsidiary, Sprint International, has signed a preliminary agreement to provide telephone service in the Soviet Union through a joint venture.

Sprint has signed an agreement with Central Telegraph of the Soviet Ministry of Posts and Telecommunications and the Institute of Electronics and Computer Science of the Latvian Academy of Sciences.

The new company, to be called Telenet USSR, will provide a variety of

telecommunications services in the Soviet Union, Sprint said.

Telenet USSR operations are scheduled to begin in late 1990, subject to Soviet government registration and the granting of export licenses from the United States, the company announcement said.

Projected revenues from the project were not available.

Sprint also said it would participate in a $260 million project to build a fiber-optic cable system that would serve major markets of the Pacific Basin.

Details of the Soviet joint venture, including financing, will be completed by mid-1990, Sprint said.

Telenet USSR will provide a variety of telecommunications services, including a switching center in Moscow that will be connected with Sprint's international data network and provide electronic messaging service domestically and internationally. The company will distribute the Telenet line of data communications equipment within the Soviet Union.

''As the perestroika process unfolds and economic bridges between East and West are built, modern telecommunications will become even more important '' said Paolo Guidi, Sprint International president. ''We are delighted to participate in this process.''

Central Telegraph provides international and intercity public telex, telegram and low-speed data communications services in the USSR. About 120,000 domestic telex subscribers and 4,000 international customers use its services.

The Institute of Electronics specializes in computer network technology. It has developed software and hardware systems for packet switched data communications.

The Pacific Rim project, a 4,500-mile Asia-Pacific submarine cable, would link Japan, China, Hong Kong and Singapore and connect several transpacific cable systems serving the United States and Canada.

Sprint said a cable linking Tokyo, Shanghai, Hong Kong and Singapore would be able to handle 30,000 calls simultaneously.

-30- 2607

#90073u1225 03/14/1990 ~United Press International

(MARCH 14) UPI - When personable Fernando Collor de Mello, 40, takes office Thursday he will be the youngest president in Brazilian history and the first one elected by the people since 1960.

Since winning the run-off election Dec. 17, Collor's popularity has risen among his countrymen as he outlined a liberal economic reform program and gained statesmanlike exposure on a recent tour of Western Europe, the United States, Japan and the Soviet Union.

An admirer of British Prime Minister Margaret Thatcher and Spanish Prime Minister Felipe Gonzalez, the future leader hopes to turn back economic hardship in South America's largest country and put it back on the road to growth and prosperity.

Not so long ago, in March 1989, Collor was an obscure presidential candidate from the miniscule National Reconstruction Party, a group that has only 29 of the 575 seats in congress.

But in six months of campaigning with a winning grin, flashing teeth, and the good looks of a television hero, Collor made himself the front-runner. He was the most-voted-for candidate in the first round of balloting in two-stage elections, and he won the runoff in December against left-wing candidate Luis Inacio Lula de Silva.

Collor had the help of ample television coverage, especially from the friendly Globo TV network, that capitalized on his dashing looks and strong speaking skills.

His family owns 13 radio stations, a television station, TV Gazeta, which rebroadcasts programs of TV-Globo, the largest network in Brazil, and the newspaper Gazeta de Alagoas, the largest circulation daily in the northeastern state of Alagoas.

Though he tried to project an image of innocence, free of traditional politics during the campaign, Collor comes from a political family.

His grandfather, Lindolfo Collor, was the labor minister during the dictatorship of President Getulio Vargas in the 1930s, and his father, Arnon de Mello, a federal senator from the state of Alagoas, accidentally shot a colleague to death on the floor of the Senate.

According to accounts of that episode, Mello drew a gun from his pocket when he thought a rival was pulling out his firearm. Another colleague knocked Mello's arm away as the weapon fired, and the stray shot killed a third senator who was not involved in the dispute.

Collor says he is in the center of the political spectrum, but his left-wing opponents say he is on the right.

As a member of the presidential Electoral College in 1985, he voted for conservative, pro-business candidate Paulo Maluf, who was also the favorite

of the outgoing military leadership that dominated the country for 21 years.

His proposed economic program follows the currents of the Latin American ''new right'' - calling for privatization of money-losing state companies, cutting the fiscal deficit by increasing tax collection cutting costs and eliminating price controls.

A former federal deputy and mayor of Maceio, capital of the state of Alagoas 1,000 miles northeast of Rio de Janeiro, Collor was elected state governor in 1986. His administration launched a crusade against officials popularly called ''maharajahs,'' lavishly paid public functionaries who didn't do any work.

He opposed incumbent President Jose Sarney's campaign to have a constituent assembly approve a five-year term of office for him instead of a four-year term, and in retaliation Sarney, who eventually got the five-year term, restricted the flow of federal development funds for the state of Alagoas, whose 2 million inhabitants live in an impoverished region subject to droughts and floods.

The sanctions backfired, largely because of Sarney's unpopularity and his inability to stabilize Brazil's economy and slow inflation, now approaching runaway proportions.

Sarney's opposition helped, rather than hurt, Collor, and the previously unknown governor of Alagoas surged into national prominence.

Despite his small following in Congress, legislative sources say that a majority of legislators support his economic plan.

Collor's is married to Roseane Malta, 25, a student of business administration who is his second wife.

His first wife, Lilibeth Monteiro de Carvalho, whom he divorced, aided his campaign. She belongs to a prominent Brazilian business family.

They have two children, Arnon Affonso, 13 and Joaquim Pedro, 11.

#90073u1272 03/14/1990 ~United Press International

ATLANTA (MARCH 14) UPI - Immigration agents captured 45 illegal aliens aboard an Eastern Airlines flight Wednesday and said the detainees probably spent their life savings to get help from a massive smuggling operation.

Thomas P. Fischer, district director of the Atlanta Immigration and

Naturalization Service office, said the Eastern flight was filled with natives of Mexico, Peru, Guatemala, El Salvador, Ecuador, Honduras and Colombia. All were headed to New York City.

Neil Jacobs, head of the INS Investigations Division in Atlanta, said a check of airline passenger lists showed as many as 90 illegal aliens may have passed through Atlanta on the way to New York Tuesday. None was captured.

The 45 captured Wednesday represent the second-largest such operation in U.S. history, he said. Agents removed 48 people from the plane, but three were Hispanics who had permission to be in the United States.

''This is a replay of a similar situation one year ago that involves illegal aliens on board commercial aircraft in the United States,'' said Fischer. ''This may be part of a massive alien smuggling operation.''

On Feb. 28, 1989, agents removed 79 illegal aliens from an Eastern flight in Atlanta and deported them.

Eastern Flight 88 was headed to New York from Los Angeles Wednesday with a stop-over in Atlanta. Agents boarded the plane shortly after its 6:40 a.m. arrival.

Jacobs said the majority of suspected aliens were traveling to New York seeking employment.

''I think we only left about 15 (passengers) on the flight,'' the investigator said.

Agents said each of the illegal aliens probably paid about $3,000 to smugglers for housing, transportation and fake immigration papers, Social Security cards and drivers licenses.

''These people probably used their life savings to make this trip,'' Fischer said. ''The smugglers are the real culprits. Basically they're just peddling flesh.''

Jacobs said the aliens apparently crossed the border from Tijuana, Mexico, into the metro San Diego area.

''I came to work - to help my family out,'' said Allejo Juarez Pintor, a 16-year-old Mexican who spoke with the help of an interpreter.

Guadalupe Morales, who came with his wife Josefa, said he had been in the country and deported before.

He said he would not try it again because the trip was too dangerous.

One illegal alien, who appeared to be in his 30's, cried softly as agents fingerprinted him.

Agents said the 36 Mexicans would be placed on a bus to Brownsville, Texas later Wednesday. In Brownsville, they will be allowed a deportation hearing before facing the trip across the border.

The nine residents of Central and South America will be transported to the Krome Detention Center in Miami, where they will be able to claim refugee status and have a hearing before being deported.

''I have no doubt we'll see the same people coming back,'' Jacobs said.

Jacobs said the INS has some leads as to who the smugglers might be. However, he added interviews with the illegal aliens were little help.

''Generally, the aliens are kept in the dark,'' Jacobs said. ''They know relatively little about the smuggler.''

-30- 3425

#90073u1297 03/14/1990 ~United Press International

SAN DIEGO (MARCH 14) UPI - Knootka, the oldest killer whale at Sea World's San Diego park, has died after battling an infection for three months, park officials said Wednesday.

A necropsy was performed Tuesday night to determine the exact cause of the whale's death, but final results were not expected until tissue samples tests were completed in four to six weeks.

Knootka was believed to be in her late 20s. The average life span for a killer whale is between 25 years and 35 years.

''Age was certainly a factor in Knootka's death,'' said Dr. Jim McBain, a Sea World veterinarian. ''Her blood parameters and the decline of her immune system over the last few years are consistent with that of an aged animal.''

The 8,500-pound sea mammal had been stricken with a fungal infection known as aspergillus three months ago and developed a secondary bacterial infection last week.

''It appears Knootka was overwhelmed with the infections,'' McBain said.''Even with the medication she received, her immune system was unable to respond to the challenge of the fungus and the bacteria.''

Knootka's death was the third whale death in 18 months and left Sea World

with three killer whales in San Diego, including Baby Shamu.

Orky, a male, died of old age in August 1988. Kandu, Baby Shamu's mother, died during an altercation over dominance with another female last August.

#90073u1298 03/14/1990 ~United Press International

ANGELS CAMP, CA (MARCH 14) UPI - Goliath frogs from Africa are 3 feet long, weigh up to 12 pounds and can easily out-jump any California bullfrog.

Since they are meat-eaters, they could chew up the competition in other ways at the Calaveras County Jumping Frog Jubilee, scheduled for mid-May - if they get the chance.

Directors of the annual jump have been wrestling for the past two months with a request by Seattle importer Andy Koffman to enter his super frogs.

They were expected to decide the entry issue Wednesday night, possibly with restrictions. Or they could once again postpone the decision, presumably to milk the super frogs for maximum publicity.

Koffman visited Angels Camp in California's historic Mother Lode gold rush country earlier this month, and liked what he saw. He promised to return with 20 or 30 giant frogs for the May 17-20 competition, depending on possible state import restrictions.

''You will see me at Calaveras,'' he promised. ''I'm quite sure of that.''

Contest promoters were optimistic, and local business people formed a group - ''Let Every Amphibian Participate,'' or LEAP - to support Koffman's bid.

''I think they have no choice but to allow the frogs,'' the jubilee's publicist Jewel Lucken said Wednesday. ''They have no rule except a minimum size of 4 inches. There is no maximum size.

''Mr. Koffman was here, and he feels that he has some of his smaller frogs that will fit on the 8-inch pad. If this is true, we have no choice but to let him jump those frogs.''

The nine-member Calaveras County Fair Board had expressed concern that the giant, sharp-toothed frogs might ruin the 64-year-old competition, eat other amphibians and possibly injure spectators.

The contest is to see which frog covers the greatest distance in three jumps from a launch pad in the center of a circle. The African frogs would

have a huge advantage since they are nearly three times the size of common bullfrogs.

However, Lucken said Koffman indicated he might bring some of his smaller Goliaths and show their big brothers only in an exhibit.

''They'd still be larger than our bullfrogs, but would easily fit on the pad,'' she said.

Once entered in the jump, Koffman still had to convince state wildlife officials to allow the giant frogs to be brought across state lines. Officials had expressed concern the frogs might escape, get into the state's rivers and breed.

The Jumping Frog Jubilee began in 1926, inspired by ''The Celebrated Jumping Frog of Calaveras County,'' a story written by Mark Twain in 1865.

''Mark Twain would have just loved this whole thing,'' said Will Fullaway, the board's president.

(MARCH 14) UPI - America's infant commercial space program took a giant step this morning with the successful launch from Cape Canaveral of a Titan-3 rocket carrying a high-power 140-Million-dollar communications satellite into orbit. The Intelsat-6 satellite is the second of a new breed of high-speed radio relay stations capable of handling 120-thousand telephone calls at once.

The so-called ''two-plus-four'' talks on German re-unification opened this morning in Bonn. Delegations from the United States, the Soviet Union, Britain, France and the two Germanies are expected to keep the contents of the discussions secret. Observers feel the question of Germany's military status will be a major stumbling bloc when the talks move to later stages.

Utility crews in North Blenheim, New York, have put out burning propane gas and plugged a ruptured pipeline. A massive explosion yesterday destroyed nearly half of the town... killing two people and injuring five others. Officials are blaming the explosion on an UNdetected leak along a liquid propane pipeline that spans from Texas to New York.

Authorities in Tega Cay, South Carolina, say a dog specially trained to sniff out gasoline and other liquid fuels found possible traces of flammable liquids at the burned-out remains of T-V evangelist Jim Bakker's former home. Officials say the black labrador retriever yesterday led fire officials to at least two suspicious spots in what was once a one Million-dollar mansion.

(MARCH 14) UPI - The Bush administration has asked the Supreme Court to formally re-instate the anti-flag burning law enacted last year by Congress. Last month a federal judge in Washington state struck down the new law in a case that involved a flag-burning incident in October 1989. The court ruled that the anti-flag burning law violated the First Amendment right to free speech.

Defense Secretary Cheney has confirmed that he's discussing with Israel a possible sale of the sophisticated Patriot air-defense system. The sale is intended to afford Israel some protection from the spread of ballistic missiles in the Arab world. Cheney made his remarks yesterday during a United Jewish Appeal's Young Leadership Conference in Washington.

Two rival dog sled teams are mushing for the finish line today in the one-thousandmile Alaska-to-Nome Iditarod race. Former winners Susan Butcher and Joe Runyan are expected to reach the finish line at midday today. Barring any last-minute trouble, the winner should break the race record set by Butcher in 1987. Butcher held the lead at the last checkpoint.

The Soviet Union has invaded Paris... infiltrating the opening shows of the fall-winter women's ready-to-wear collections. Brocaded boots edged with fur and ballooning satin Cossack trousers from medieval times were featured by the Japanese designer Kimijima. Designer Dobi Broda was opening her show with babushka head scarves plus colorful Russian folklore prints.

LONDON (MARCH 14) UPI - Stock prices closed higher in light trading Wednesday on the London International stock exchange boosted in part by a handful of favorable earnings reports and a stronger pound.

The blue-chip Financial Times 100-stock index, which added 1.7 points Tuesday, closed up 1.6 points at 2,226.1. The narrower top 30 industrial average gained 3.0 points to 1,758.6.

Volume was around 376 million shares, compared with 320 million shares traded Tuesday.

On the London Foreign Exchange, the pound closed higher against the U.S. dollar ending the day at $1.6085 compared with $1.6020 Tuesday.

On the earnings front, British Aerospace PLC, Britain's largest manufacturing group, reported an 28 percent rise in pretax profits for 1989, with strong growth in commercial aircraft, automotive and property operations offsetting a flat performance in defense systems.

Some analysts were skeptical about the results, however, saying they were less impressive if proceeds from the sale of two subsidiaries and a property revaluation were stripped out.

British Aerospace PLC ended the day 30 cents higher at $8.06.

Pharmaceuticals giant Smithkline Beecham PLC lost 24 cents to $8.24 after announcing a pre-tax profit up 3 percent to $1.17 billion for 1989.

BTR PLC, the industrial conglomerate and fifth largest company in terms of market capitalization, reported pretax profits surged 31.7 percent in 1989 amid a year of record sales.

BTR slipped 10 cents to $6.65 on what analysts said were earnings slightly below market expectations.

Christies International PLC, the auction house, reported pretax profits up 58 percent in 1989 as sales topped the $1.6 billion level for the first time in its history.

Christies ended slightly higher in brisk trading.

Among other highlights, Rolls Royce PLC gained 8 cents to $2.90 and Grand Metropolitan PLC added 11 cents to $8.97.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed slightly lower in light trading.

The German Stock Index eased 4.64 points to 1,862.84.

#90073u1327 03/14/1990 ~United Press International

AQUASCO, MD (MARCH 14) UPI - President Bush popped in Wednesday on the crew that keeps the lights burning in the White House, visiting an electric power plant in a photo op-rebuttal to charges he has let down environmentalists.

Ever on the go, Bush, who highlighted environmental issues Tuesday by visiting a gas station, toured whirring turbines at the Chalk Point Generating Station to promote a revision of the Clean Air Act pending in the Senate.

The back-to-back fieldtrips, emphasizing the marriage of environmental and economic concerns, came against a backdrop of complaints from environmental groups that he bowed to business in shaping the Clean Air Act compromise.

A dozen or so protesters, accusing him of caving in to industry pressure, were on hand Tuesday to greet Bush during his fleeting appearance at a Sunoco station in Washington that sells clean-burning methane fuel for cars.

And in prepared remarks Wednesday to reporters outside the Chalk Point plant, Bush defended the Clean Air Act revision as ''consistent with the need to balance environmental benefits and sustain economic growth.''

''There are megabucks involved in all of this,'' he told reporters, ''and we want to be as helpful as possible in making these changes as cost-effective as possible while still meeting our environmental goals.''

Despite a clamor from environmental groups for more stringent clean-up standards for coal-burning power plants like Chalk Point, Bush insisted industry must have ''the flexibility to make emissions reductions in the most cost-effective manner possible.''

''Providing this flexibility, we can ensure that the environmental benefits are gained at the least cost to the guy that pays the bill, the consumer,'' he said.

Urging Congress to pass the legislation ''within the parameters hammered out in the compromise,'' Bush said, ''We cannot let this country screech to a halt, but I am determined to clean up the air.''

In hard hat and shirtsleeves Bush toured the Potomac Elctric Power Company plant, about 45 miles from Washington, with Energy Secretary James Watkins and Environmental Protection Agency head William Reilly.

The plant is one of six in a Pepco grid that supplies power to the Washington area. In the control room, he watched as the facility sent 10 million watts to offices and homes on one of the hottest March days on record.

Although Chalk Point meets current environmental standards, company spokeswoman Nancy Moses said it would cost $12 million a year in additional fuel and plant modification expenses to comply with the first-phase emission reductions proposed in the Clean Air Act revision.

Pepco estimates a one-time outlay of $264 million in capital costs and $36 million a year in higher operating expenses to meet its longer-term anti-pollution requirements, she said.

It was environmental rather than energy considerations that brought Bush to the plant to deliver a presidential pat on the back to Pepco. He congratulated the company for its record on clean air and was given a display of what one aide described as its ''ecological conscience'' at a fish hatchery that has raised some 1 million striped bass for release into waters in the Chesapeake Bay area.

Bush, in suit and tie, thrust his hands into a pool of water to grapple with a foot-long bass, then hoisted a second fish of similar size long enough for photographers to record what was certain to be the lasting image of his visit.

''We'll keep keep plugging along on both these fronts, environmental and economic,'' he told his hosts. With that, Bush turned and walked away. His policy promotion by photo op was over.

#90073u1344 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - M. Danny Wall, in his first public statement since leaving the Office of Thrift Supervision, said Wednesday allegations that his appointment to head the agency was unconstitutional were "ridiculous."

On Tuesday, an attorney for a small Illinois thrift facing possible seizure by the OTS argued in federal court that actions taken by the agency under Wall were invalid because he had not been confirmed by the Senate to head the agency.

"The claims in the court are totally ridiculous. Could I make myself clearer?" Wall said after an address to the National Association of Federal Credit Unions. "It is not a fact," Wall said. "It is a theory and an unsubstantiated theory."

"The president proposed I should continue on, the Senate had a vote on whether I should be there. That was voted on straight up," Wall said. Wall left the OTS last week after resigning as director in December amid pressure from congressional investigation of the failure of the Lincoln Savings and Loan Association and concerns that he played down the size of the looming thrift crisis.

He said the recent allegations were launched by two thrifts to block federal regulators from placing the institutions under conservatorship. "They are using any means possible they can use," Wall said. "They are insolvent institutions."

Charles Cooper, an attorney representing Olympic Savings and Loan, of

Berwyn, Ill., argued in U.S. District Court that Wall's appointment was unconstitutional because only the president has the authority to appoint someone to such a high-level position. A similar argument was made by Franklin Savings Association, the largest thrift in Kansas.

U.S. District Judge Royce Lamberth agreed Tuesday to take the Olympic matter under submission and rule before March 21, the expiration date of a temporary restraining order he granted last week prevented the OTS from taking any actions against Olympic. A similar order was granted by a federal judge in Kansas for Franklin.

Wall, former chairman of the Federal Home Loan Bank Board, became director of the OTS when it was created in August as part of President Bush's $166 billion thrift bailout bill.

A provision of the bill allowed Wall to move from his position at the bank board to head the OTS without undergoing Senate confirmation hearings. But Wall said the Senate voted on him when it approved language in the bailout bill last June to allow him to bypass the traditional confirmation hearings.

"When the Senate began considering (the Financial Institution Reform, Recovery and Enforcement Act) there was a debate on whether that language should be in there," Wall said of the provision allowing him to head the OTS. "It was a vote on Dan Wall," he said. "Make no mistake about it."

Attorneys for the OTS have said that if the court ruled in Olympic's favor the decision could open a floodgate for the 200 thrifts seized by the agency to argue that the OTS, Wall and agency employees were not qualified constitutionally to handle their cases.

#90073u1352 03/14/1990 ~United Press International

WEST BERLIN (MARCH 14) UPI - A leading East German conservative accused of having worked for the once-feared secret police resigned as chairman of his party Wednesday, four days before historic elections in which his candidacy was backed by West German Chancellor Helmut Kohl.

A member of Kohl's Christian Democratic Union said Democratic Awakening Chairman Wolfgang Schnur had admitted to the West German party he had had contacts with the East German security police in the past.

Schnur's resignation was expected to seriously damage prospects of the conservative Alliance for Germany - which includes the Democratic Awakening - in parliamentary elections Sunday in East Germany. The elections are the first free vote in East Germany's 40-year history.

The resignation also was expected to prove a major embarrassment to Kohl's party, which backs the East German conservative alliance.

Kohl had earlier made it plain he favored Schnur as a new East German prime minister and shared the platform with the 45-year-old candidate at electoral rallies in recent weeks.

When the accusations against Schnur were first leveled last week, the Bonn government dismissed them and said Schnur had risked life imprisonment by informing Bonn on the persecution of East German dissidents.

Kohl Wednesday described the affair as ''totally incomprehensible.''

''Many questions arise but I cannot answer them,'' he told journalists traveling with him to an electoral rally at the East German town of Leipzig, where he was initially to appear with Schnur.

Officials of Kohl's party said their party had asked Schnur to resign.

The affair is likely to boost the electoral chances of the Social Democratic Party, which, according to recent surveys, already stood to gain a slight advantage over the conservative alliance.

The surveys indicated none of the parties would manage to gain an absolute majority. The Social Democrats have said they would be prepared to form a coalition government.

Schnur, in announcing his resignation, did not repeat earlier denials he worked for the secret police under the Stalinist East German government ousted last fall.

Instead, in a statement read at a news conference organized by Kohl's Christian Democratic Union Party in West Berlin and read by a Democratic Awakening official, he said he had always worked for the oppressed.

''Because of massive attacks on my person in connection with the former ministry of State Security and the current lack of opportunity for me to objectively respond to the accusations leveled against me, I draw the consequences in the interest of political honesty and responsibility,'' Schnur said.

''With immediate effect I resign my position as chairman of the party Democratic Awakening ...'' Schnur said.

The West German publication Bild Zeitung quoted Schnur as saying he had been forced to sign a document agreeing to work for the secret police, known as Stasi, in 1964.

''For the past two decades, I have been followed, kept under surveillance, blackmailed and threatened,'' he said in the interview released Wednesday in advance of publication.

He admitted he ''had to make certain concessions to this regime that did not respect human rights" but added "documents show no one was harmed as a result."

A senior Democratic Awakening official said Schnur will probably have to give up his party membership.

Schnur has been in a hospital since he suffered a minor stroke last week when an East German commission of enquiry claimed he had worked for the Stasi.

Traders at the Frankfurt stock exchange said that news of Schnur's resignation had immediately caused the deutsche mark to drop.

In another development Wednesday, the West German government in Bonn announced contingency plans to cut benefits to East German immigrants entering the country at a daily rate of about 2,000.

Interior Minister Wolfgang Schaueble said the plan would take effect once East Germany's political situation stabilized and migration dropped. He said he expected this to happen after East Germany's election and after a planned monetary union of the two states.

#90073u1354 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Members of Congress assailed Defense Secretary Dick Cheney's proposal to close 35 U.S. military bases and told Pentagon officials trying to sell the plan Wednesday that opposition is going to be ''ferocious.''

''Ladies and gentlemen of the Defense Department, your stated information and reasonings are terrible,'' Rep. Glen Browder, D-Ala., told Pentagon officials in their first appearance on Capitol Hill to testify about the plan.

David Bertou, principal deputy assistant defense secretary, and assistant secretaries of the Army, Navy and Air Force were testifying before the House Armed Services' Military Installations and Facilities Subcommittee.

On Jan. 29, Cheney announced a list of 35 bases in the United States he is studying for closure. These would be in addition to the 86 bases picked by a bipartisan commission and approved for closure by Congress last year.

Reflecting bipartisan opposition to the latest plan, Rep. Arthur Ravenel, R-S.C., told Berteau he is against the Cheney list because, ''I am absolutely parochial. My people sent me up here ... to look out for their interests.''

Noting it is an election year, Ravenel candidly said any plan that causes dislocation in a particular congressional district is ''going to dislocate that congressman - unless he does everything to keep that base from being closed.''

''Congressional opposition ... it's going to be ferocious,'' Ravenel said, adding that ''1,000 angels sent down from Heaven wouldn't help'' a member of Congress who allowed a base to be closed in his or her district.

''We know this is a tough issue,'' Berteau said. ''It requires a spirit of cooperation.''

Subcommittee Chairwoman Patricia Schroeder, D-Colo., said that 19 of 21 major bases targeted to be closed are in Democratic districts and that the ''Cheney list looks a little unbalanced. ... It looks partisan; it smells partisan.''

''It's true that a large portion of bases and jobs are in Democratic districts,'' Berteau said. ''I can testify absolutely to the fact that that was neither a consideration nor a factor.''

An alternative proposal by House Armed Services Committee Chairman Les Aspin, D-Wis., which would create a commission similar to one in 1988 that was able to pick bases for closure that Congress could not change, did not generate much support from subcommittee members either.

''I'm not sure if the Aspin approach is right,'' Schroeder said. And ranking Republican, Rep. David Martin of New York, added that ''the rank and file of the House and Senate are not going to sign on to another commission.''

Berteau argued that Cheney's list would be speedier than a commission and could take advantage of the need to reduce the U.S. armed forces quickly, without worrying about where to transfer all of the personnel.

''Jobs are going away,'' Berteau said. ''We don't need a commission, don't want a commission!''

Rep. Earl Hutto, D-Fla., said of Cheney's list of targeted bases: ''It seems to me that a lot of these proposals are not well thought out.''

''There's certainly a potential for change in what the final outcome is,'' Berteau replied.

He said the Pentagon would not be able to make final recommendations to Congress on which of the 35 bases to close before environmental and economic impact studies are completed, probably not before the fiscal 1992 budget is presented next January.

''You may end up with more (closures) rather than fewer,'' Berteau said.

#90073u1362 03/14/1990 ~United Press International

DAMASCUS, SYRIA (MARCH 14) UPI - Former President Jimmy Carter arrived in Syria Wednesday on the second leg of a four-nation Middle East tour and said he hoped Syria would use its influence to win freedom for Western hostages held in Lebanon.

Syrian Foreign Minister Farouk Sharaa, who met Carter and his wife Rosalynn at Damascus airport, said there were some grounds for hope.

''We are not pessimistic. And as we have exerted great efforts in the past to secure the release of many hostages, we will intensify our efforts in this regard,'' Sharaa said.

Carter, who will meet Syrian President Hafez Assad, told reporters after his arrival from Egypt that Syria could play a role in gaining the release of the 18 Western hostages, including eight Americans. He said Syria could become a key player because of its influence in Lebanon and its strong ties with Iran. Syria is Iran's sole Arab ally.

Earlier in Cairo, Egypt, Carter said he thinks Iran would use its influence to release the hostages when it believed such a move served its national interests.

''And my belief is that when and if Iran believes it is in its best interest to use its influence for the release of the hostages, they will be released ... (but) I don't know when,'' Carter said.

Kuwait's official news agency KUNA quoted Carter as saying Wednesday that Iranian statements on the hostages, including two recent editorials in Tehran newspapers indicating the captives would be released by the end of the year, were contradictory.

Turning to the issue of Soviet Jewish migration to Israel, Carter said he agreed with President Bush that the migrants should not settle in the Israeli-occupied territories.

After Syria, Carter is scheduled to visit Jordan before ending his nine-day tour in Israel.

Carter, who mediated the 1978 Camp David accords and subsequent Egyptian-Israeli peace treaty, said a strong government is needed in Israel to advance the peace process.

The former president said he believed there still is a good chance that U.S.-sponsored efforts to achieve Palestinian-Israeli dialogue might get off the ground, despite the fall of Israel's coalition government.

Carter was president when Iranian radicals stormed the U.S. Embassy in Tehran in 1979 and held embassy staff, including 62 Americans, hostage for 444 days until he was replaced by Ronald Reagan.

#90073u1368 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - U.S. petroleum consumption last month dropped more than one million barrels daily, or 6.5 percent, from a year ago in one of the warmest Februarys on record, the American Petroleum Institute reported Wednesday.

The oil industry's monthly survey found a daily average of 16.61 million barrels was supplied to domestic customers, compared with 17.76 million barrels in February 1988.

Deliveries of home heating oil and other distillate fuel oils dropped 7.3 percent to 3.16 million barrels a day from last year's 3.41 million barrels daily, API said.

Discounting relatively small month-to-month variations in the amount of petroleum products in storage, deliveries are roughly equal to consumption. "For distillate fuel oil, unusually warm weather was at least partly responsible for that product's decline," the organization said.

Most of the nation's heating oil is consumed in the Northeast. The National Weather Service's New York City bureau said last month was the fourth warmest February on record.

API said the 6.5 percent drop in all petroleum deliveries "was considerably more than the one to three percent, year-to-year (monthly) decreases typical since mid-1989," when gasoline demand flattened in the wake of rising prices.

Daily deliveries of gasoline dropped 3.2 percent to 6.9 million barrels in February "despite unusually favorable driving conditions for a winter month," the API report said. After rising in December and January, "February (gasoline) deliveries reverted to the (year-to-year) decline pattern," API said.

February daily deliveries of industrial fuel oil, or residual fuel oil, fell 15.2 percent from 1.68 million barrels last year to 1.43 million barrels. "In February, electric utility demand is believed to have been weak for the second month in a row due in part to a weather-related drop in electricity generation," the report said.

Residual fuel consumption would have been down even without the warmer weather because many utilities able to also use natural gas switched to the lower-cost fuel, API said.

"Spot residual fuel oil prices in February averaged roughly 20 percent ... higher than a year ago, while spot gas prices were roughly even. ... Users with fuel-switching capability have apparently continued to favor natural gas," API said.

February deliveries of kerosine-jet fuel declined 4.5 percent to 1.27 million barrels a day, API said. "Airlines have been able to absorb some of the growth of the past few months by filling otherwise empty seats," the institute said.

Domestic crude oil production dropped 6.9 percent in February from a year ago to 7.2 million barrels daily, while crude imports rose 10.7 percent to 5.7 million barrels a day. Average crude oil inventories rose last month by 3.2 percent over a year ago to 343.4 million barrels.

Imports of all petroleum products climbed 2.5 percent to eight million barrels a day, while refined products showed a 13.5 percent decline to 2.3 million barrels daily.

Utilization of U.S. refineries in February was 87.7 percent, up from 82.9 percent in February 1988, API said. Stocks of gasoline averaged 246 million barrels during the month, a slight 0.4 percent decline from a year ago.

Supplies of unleaded gasoline, used by 90 percent of American motorists, were a comfortable 13.8 percent higher than a year ago at 186.8 million barrels.

Distillate fuel stocks averaged 114.8 million barrels, 6.8 percent higher than February 1988, and kerosine-jet supplies were 39.8 million barrels, a rise of 6.4 percent.

Total U.S. supplies of all oils last month was 0.7 percent higher than a year earlier at 1.044 billion barrels - nine million barrels higher than January.

"For only the second time in the past ten years, total stocks rose during

February. The nine million-barrel increase contrasts with an average decline of 29 million barrels for the same month in the previous five years," API said.

#90073u1369 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - Brazilian leader Fernando Collor de Mello must act swiftly upon his inauguration as president Thursday to slash hyperinflation and mend relations with his country's foreign creditors, U.S. analysts say.

Vacillation over budget-cutting, monetary tightening, and other remedies for a 2,750-percent annual inflation rate could rob him of the initiative and grass-roots support, they warned. Such pitfalls tripped up Argentine President Carlos Saul Menem, whose own economic turnaround is faltering.

Collor must address his country's foreign debt, the largest in the developing world at $112 billion. Brazil, which once staged an abortive moratorium on its debt obligations, has made no interest payments since late last year and its arrears practically rule out U.S.-backed debt reduction. Time, the Brazil-watchers say, is not on Collor's side.

"He'll have the mandate of the people to do anything he wants to do, and my fear is that he'll miss that opportunity and lose that mandate," said Shafiqul Islam, a senior resident fellow of the Council on Foreign Relations in New York and a specialist on debt-burdened Third World economies.

"Basically my feeling is that he's a rerun of the Menem phenomenon," Islam said. "When you are dealing with hyperinflation you have to do it within a few weeks. Once you've dillydallied for a while you've lost credibility."

More sanguine was Lawrence Krohn, a senior economist with Shearson Lehman Hutton Inc. in New York who follows Brazilian developments. "I'm cautiously optimistic," Krohn said. "He (Collor) seems to have a program that is going to be oriented towards privatizing (state industries), rendering the economy more efficient and cutting the budget deficit." But he added, "Menem said the right things too, but in fact the problems of his country were so great his solutions really weren't adequate."

Brazil's bank creditors are looking for signs of greater cooperation on the country's debt. They'd like at least a good faith payment to end a de facto moratorium on interest payments in effect since September.

Brazil is $6.5 billion behind on interest payments to U.S. and other banks that hold $73 billion of its total external debt. "He's saying all the right things and making a good impression," said Krohn. "He's certainly

not going to antagonize the banks."

But initially at least, Brazil will not be a strong candidate for reduction of its debt under the so-called Brady Plan, named for U.S. Treasury Secretary Nicholas Brady, who advanced it a year ago. It has been applied to Mexico and the Philippines. Venezuela is reported to be on deck.

While Brazil's need for debt reduction is urgent, Krohn said, its leverage in obtaining forgiveness for part of what it owes to banks and restructuring of the rest will be considerably less than Mexico enjoyed.

Mexico, whose "Bradyization" trimmed its $103 billion debt by $7 billion and cut annual interest payments by $1.6 billion, was hard to ignore as a U.S. neighbor and had a better debtor record than Brazil.

Islam stressed that talking about the debt is futile unless Collor institutes sweeping reforms to address hyperinflation, excessive government spending and inefficient, protected state and private industrial sectors.

"You can write off all Brazil's debt tomorrow and those problems won't go away," he said. "Once debt reduction is given and wasted you have lost another cushion that won't be available later on," Islam said. "I feel the ball is in Brasilia now and not Washington," he added.

BY UNITED PRESS INTERNATIONAL

(MARCH 14) UPI - The Intelsat 6 satellite launched Wednesday by a Titan 3 rocket is the most powerful civilian communications satellite ever built on a commercial basis. Here are details at a glance:

-Owner: The International Telecommunications Satellite Organization, a 118-nation consortium that handles most of the free world's space communications.

-Builder: Hughes Aircraft Co. of El Segundo, Calif.

-Contract value: $700 million for five Intelsat 6 spacecraft, or about $140 million each.

-Number of flights to date: 2 (one aboard a French-built Ariane 4 rocket in October and one Wednesday aboard a Titan 3 rocket, built by Martin Marietta Astronautics Group of Denver.

-Cost of Wednesday's launch: $270 million, including the price of the

satellite, the Titan 3 booster and other launch services.

-Insurance: None.

-Satellite weight at liftoff: 29,448 pounds, including the weight of the spacecraft's built-in solid-fuel booster.

-Weight after booster firing to raise orbit: 10,145 pounds, 5,613 pounds at its operational altitude 22,300 miles above the equator.

-Height: 17.7 feet at launch, 38.8 feet with cylindrical solar panel extended.

-Width: 11.9 feet.

-Lifetime: More than 13 years.

-Electrical power: 2,252 watts.

-Communications payload: 38 C-band radio transponders and 10 high-speed K-band transponders.

-Capacity: Up to 120,000 simultaneous telephone calls and three color television channels.

-Orbital station: 22,300 miles above the equator at 332.5 degrees East longitude in the mid Atlantic Ocean.

(MARCH 14) UPI - TODAY'S PEOPLE

CRUISING SPEED: Tom Cruise took his latest movie role too far and it cost him $125. Cruise was fined after getting caught driving 66 mph in a 35-mph zone on March 2 in Darlington, N.C., where he is playing a race car driver in the movie ''Days of Thunder'' at Darlington Raceway. The fine would have been worse had not Judge Dan Causey reduced the speeding count to the lesser charge of careless operation of a vehicle. But Darlington Mayor Ronnie Ward says city officials had even discussed dropping the charge altogether but were concerned about possible adverse publicity. Court officials say plea bargains on speeding tickets and other minor traffic counts are common throughout the state.

MANDY'S MARRIAGE: Mandy Smith, the young wife of Rolling Stone Bill Wyman, 53, denies there is trouble in paradise. ''I loved him when we got married

(nine months ago) and I love him now,'' says Smith, 19. ''All this divorce talk is rubbish.'' The divorce talk comes from the London tabloids but Smith insists her only problem is her health. She's been suffering from a yeast infection that has caused her to lose weight and made her allergic ''to everything from perfume to tobacco,'' she said. ''No marriage in which the husband is away as much as Bill and the wife is ill, can be entirely happy. But as far as I can be, I am happily married. As for splitting up, that's just not true.'' Wyman also scoffs at the reports. ''These rumors are rubbish and based on misinformation. Mandy and I are very happy and my wish is to see her left alone to get well,'' he said.

ROYAL NIGHT OUT: Prince Andrew and his wife, the former Sarah Ferguson, had what may be their last evening out together before their second child is born. Andrew, a naval officer who was in London on 48-hour leave, took her to their favorite dining club, Harry's Bar in the West End, Monday night. Andrew's ship, the Campbelltown, just returned to Britain after an exercise and is scheduled to remain in home waters until July, which means he will be a fast drive away at the Royal Navy base at Portland, Dorset, when Sarah is admitted to the Portland Hospital in London. The baby is due next week and bookmakers are offering 5-4 odds that it will be a sister for Princess Bea and even money on a boy. The favorite name for a girl is Charlotte at 6-1 and for a prince, David at 5-1.

LAWYER JOKES: Imprisoned evangelist Jim Bakker is keeping in touch with the outside world. Bakker, who is serving 45 years in a federal prison in Rochester, Minn., for defrauding his flock, called his attorney, Jim Toms of Hendersonville, N.C., last week to share some humor. ''He asked me if I knew what they call 20,000 lawyers at the bottom of the sea,'' Toms said. ''Then he told me the answer - 'A good start.' That shows he at least is in good spirits.'' Bakker also had his brother, Norman, deliver a single red rose with a card to the burned-out five-story home he lived in during his PTL Ministry heyday. The house, which had been sold to a New Jersey man, burned last week and authorities say arson is a possibility. ''But one thing's for sure,'' an arson investigator said. ''Bakker's alibi is solid.''

GLIMPSES: Actor Gary Busey has filed for divorce from his wife of 18 years Judy. The couple has a son, Jake, 18, and have been separated since May 1988. Busey's attorney, Norman Dolin, says the actor has completely recovered from the 1988 motorcycle accident that required brain surgery ... Sammy Davis Jr. is at home in Beverly Hills after being released Tuesday from Cedars-Sinai Hospital, where he underwent several weeks of

chemotherapy for a recurrence of throat cancer. Spokeswoman Susan Reynolds says Davis will concentrate on resting and building his strength. ''He's feeling stronger and his spirits are up and he continues to fight,'' she said. ''He fared well with the treatment and did not suffer too many side effects.''

SEATTLE (MARCH 14) UPI - Three Japanese conglomerates reportedly are prepared to spend large amounts of money to help The Boeing Co. develop and build the proposed 777 jet.

The companies - Mitsubishi Heavy Industries, Kawasaki Heavy Industries Ltd., and Fuji Heavy Industries - said they have accepted Boeing's invitation to join in producing much of the passenger airliner and are willing to spend up to a combined $822 million on the project, which could cost more than $3 billion.

The investment offer reported Tuesday by Asahi News Service in Toyko appears to signal a deepening commitment by the Japanese to help build the 777, which Boeing says it needs to compete with Airbus Industrie's A-330 and A-340 and the McDonnell Douglas MD-11.

A twin-engine widebody, the 777 would be designed to carry between 300 and 400 and would be used on medium-to-long-range routes. A Boeing spokesman said the report was similar to a previous report Asahi carried several years ago.

"Maybe it's an expression of the companies' desire" to enter into an agreement with Boeing, said Dick Schleh of the Boeing Commercial Airplane Group. "We're continuing to hold discussions, but nothing is definitive yet," he said.

Boeing announced it would proceed with development of the 777, making a final decision on whether to actually build it based on input by commercial airline customers.

Analysts said at the time Boeing probably would invite Japanese companies to participate in the project because of their financial resources and manufacturing expertise and because it may forestall them teaming up with Airbus or McDonnell Douglas Corp. Japanese companies provide many parts for Boeing jetliners but have never taken a major role in the development of one of its jets.

#90073u1428 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - House Democratic leaders said Wednesday a consensus is building in favor of making small defense spending cuts now, which in a few years will lead to even greater savings.

After a closed meeting of more than two hours, which centered more on policy than on setting a defense spending figure, leaders in the debate said the immediate savings may not be large, but the long-term savings could be substantive.

Defense Secretary Dick Cheney wants a 1991 defense budget of nearly $307 billion in spending authority and $303 billion in actual cash outlays in the year.

Congress is likely to take a larger cut from the budget authority column than the outlay column. That would produce a smaller cash saving in 1991 but set the stage for larger reductions in future years because the authority category will be shrinking and the number of projects given the go-ahead will be falling.

The budget authority column has been higher than actual spending during the past decade because of the defense buildup instituted by President Ronald Reagan, leading to a ''bow wave'' of projects ready to come on line and demand large amounts of spending. Among the projects likely to come in for cuts are the B-2 stealth bomber, the C-17 cargo plane, the next generation of fighter and attack planes, along with troop strength, bases and aircraft carrier battle groups.

''I think there is an understanding that the defense budget is driven by budget authority,'' said House Speaker Thomas Foley, D-Wash. ''Immediate and deep reductions are difficult but over time there will be significant reductions in the defense budget that will come out of a realignment of strategic policy.''

He said there is no leadership figure to aim for.

House Budget Committee Chairman Leon Panetta, D-Calif., told reporters after the meeting of the House Democratic Caucus, ''What you see is a consensus building in the debate on several key items.''

Among the items is a focus on reducing budget authority over the long term.

But Panetta said, ''It has to be driven by policy, not just numbers.''

''For the first time, I think a (conservative John) Murtha and a (liberal) Ron Dellums could take to the floor'' to support the Democratic defense position, said Panetta, who noted that the changed situation in Europe will permit defense reductions.

Murtha, D-Pa., who controls the subcommittee that sets the actual spending figure for the Pentagon, agreed.

''The possibility of war has been reduced substantially. ... We can reduce our troop strength substantially in the first year and that's going to be the key, the first and second year troop reductions and then which of the (weapons) systems we need with the changed threat,'' Murtha said.

And House Democratic leader Richard Gephardt of Missouri said that this year there is ''the potential for more unanimity in the Democratic Party'' on defense than at any time since he came to Congress in 1977.

#90073u1433 03/14/1990 ~United Press International
BY LEON DANIEL - UPI

WASHINGTON (MARCH 14) UPI - The alcoholic and drug-abusing mayor of the nation's capital, arrested in an FBI sting while allegedly smoking crack, refuses to be counted out.

Faced with a June 4 trial on cocaine and perjury charges that could send him to prison for 20 years, Marion Barry promises to announce soon whether he will run for re-election.

The mayor is down but not necessarily for the count.

After seven weeks in rehabilitation centers in Florida and South Carolina, Barry resumed his mayoral duties Tuesday.

He used his carefully-scripted return to acknowledge for the first time that besides alcoholism, he also suffers from chemical dependency on Valium and Xanax, drugs used to treat anxiety.

The 54-year-old self-dubbed ''night owl,'' who previously has denied using cocaine, staged a 20-minute ''news conference'' in which he refused to answer any questions.

Barry, who put his re-election plans on hold after he was arrested Jan. 18 in a drug sting in a downtown hotel, insisted he has no intention of resigning. Despite his bravado, the mayor's power base has been seriously eroded by the latest scandal and 10 years of rumors of cocaine use and extramarital flings.

If Barry was cheered when the Rev. Jesse Jackson recently removed himself from consideration as a mayoral candidate, he reportedly was enraged by the entry into the race of his longtime political ally Walter Fauntroy, Washington's non-voting delegate to Congress. Some of Barry's staunchest

supporters already have defected to the Fauntroy camp.

There has been speculation that Barry might attempt to negotiate a plea if the federal grand jury comes up with more charges against him.

Some observers have suggested he would rather face a jury as a sitting mayor and potential candidate for re-election so that his lawyer could argue that the government was trying to drive a black from office. As a potential candidate, some say, Barry would gain leverage in possible negotiations for a plea bargain with the federal prosecutor.

Published polls disclose that Barry maintains a solid core of supporters, including many who believe the mayor has been unfairly prosecuted, as well as persecuted by the media.

His homecoming speech was vintage Barry.

''I'm back and I feel good about my treatment program,'' said the mayor, who promised to attend daily meetings of support groups such as Alcoholics Anonymous.

Barry's speech could have been a preview of the defense his lawyer is expected to employ in the mayor's trial by jury.

Barry described his alcoholism as a ''disease'' which could afflict anyone.

He spoke of his ''repressed anger'' and the stress of being mayor, which some observers saw as veiled references to the various investigations that have targeted him for a decade.

Barry is still down, but it would be a mistake to count him out. His supporters credit the mayor with great courage, which his detractors say is nothing more than a collosal ego. But either of those qualities have been known to prod a fighter get up off the canvas and resume punching.

#90073u1440 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - The United States and Romania signed an agreement Wednesday for $80 million dollars in immediate food aid for Romania, with the understanding that the Romanian government will move toward democratic insitutitions and the establishment of a free market economy.

The proposal was announced last month in Bucharest during Secretary of State James Baker's visit, and the final document was signed at the State Department on Wednesday.

Under the terms of the agreement, the United States will provide the humanitarian assistance ''with the understanding that Romania is dedicating itself to the establishment of democratic institutions and a market economy, based on the principles of freedom and opportunity, and is holding free and fair elections open to international observers.''

Parliamentary elections are now scheduled to take place in Romania on May 20, but some opposition parties have asked for them to be postponed to give the newly formed political groups time to organize an electoral campaign.

In the food agreement, the United States will donate 315,000 tons of feed grains for farm animals and 7,500 tons of butter. The feed grains must be distributed equitably to both private farms and state farms.

Under a second agreement signed Wednesday, the Romanian government will be given a low interest loan of $20 million to buy additional feed grains, as needed.

#90073u1461 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Pesticide laws should be changed to make it easier to suspend the use of dangerous chemicals, administration officials said Wednesday but faced questions if they would let emotions dictate action.

The White House first proposed changes in the law as part of a food safety initiative announced last Oct. 26. It did not give Congress its suggested language for putting the revisions into law until Monday.

Food safety emerged as a major issue a year ago in the wake of the Alar scare.

A House Agriculture subcommittee, which also is working on two other food safety bills, reviewed the administration proposals but took no immediate action. Chairman George Brown, D-Calif., ''a number of issues'' would be the ''subject of obvious negotiations.''

Subcommittee members questioned if the administration would allow the Environmental Protection Agency to suspend or cancel use of farm chemicals without adequate proof of a hazard. Some consumer and environmental groups have faulted the Bush administration for not being strict enough.

Deputy EPA administrator Linda Fisher said the agency now has to conduct an economic impact study before it can suspend a chemical, even in an emergency. The administration wants to change the law to allow suspensions when the EPA has ''prudent concern'' that a chemical poses an unreasonable

risk.

Rep. Sid Morrison, R-Wash., said the change in language could allow a ''power grab'' by EPA. Rep. Fred Grandy, R-Iowa, said he was worried the definition was too fuzzy and would allow EPA to be buffaloed by public opinion.

''That allows the (broadcast news) 'sound bite' rather than science to dictate decisions,'' Grandy said.

The Bush plan would adopt a so-called neglible risk standard for allowing use of chemicals. Other legislation would ban use of chemicals that pose more than a one in 1 million risk of causing cancer over a lifetime.

Fisher said the new language on suspending chemicals was needed because an economic impact study ''takes a lot of time'' but ''We cannot make suspensions today without that.''

#90073u1470 03/14/1990 ~United Press International

MOSCOW (MARCH 14) UPI - The Soviet Parliament Wednesday defeated a proposal that would have forced Mikhail Gorbachev to face a nationwide election for executive president - a post assured him when two other candidates withdrew from the race.

Premier Nikolai Ryzhkov and Interior Minister Vadim Bakatin were nominated to run against Gorbachev, the general secretary of the Communist Party, in the election open only to parliamentary members. But both pulled out, leaving Gorbachev unopposed for what will eventually become the most powerful political post in the country.

The Congress of People's Deputies then voted to enter Gorbachev as the sole candidate, guaranteeing him the election. The vote was 1,702 for, 156 against and 36 abstentions.

The actual vote for president was scheduled for late Wednesday, and the official news agency Tass said preliminary results will be announced early Thursday Moscow time.

But it is inconceivable the lawmakers would register enough ''no'' votes of protest to leave the new executive office sought by Gorbachev without an occupant.

''I am not against the nomination of Mikhail Gorbachev, but what we have here is a spectacle. There were only three candidates, and we knew in advance two would be withdrawn. Why did we waste our time?'' said one angry lawmaker, Genrikh Egitan

Earlier, the Congress of People's Deputies defeated a proposal that would have taken the presidential election out of Parliament's hands and forced a nationwide popular poll to determine the winner.

The Congress on Tuesday created the office for him, allowing him to declare states of emergency and veto laws but restricting him to two five-year terms with the power to impeach him.

But Parliament's decision ran counter to a nationwide poll announced on Soviet televsion Tuesday night that said 84 percent of the people wanted the post filled by a general election.

''I know his (Gorbachev's) wisdom. I know his intellectual capabilities. I know his potential. Of course I know some of his drawbacks. All of us have drawbacks. But he is the leader who can guide the country,'' Ryzhkov said in withdrawing his candidacy.

Ryzhkov earlier showed rare public anger at Gorbachev after the Soviet leader gave the floor to liberal lawmaker Anatoly Sobchak, a Leningrad law professor and rising star of the legislator. ''Why do you always give the floor to Sobchak,'' Ryzhkov flared at Gorbachev. ''Why do you let whoever wants to speak.''

Radical deputies began the afternoon session by demanding an amendment to the law that mandates that the first Soviet president be elected by the Congress of People's Deputies and subsequent chief executives by the people.

A vote was immediately scheduled on the proposal. The delegates had to vote either ''yes'' in favor of the Congress electing the president or ''no'' for the people to elect.

The Gorbachev supporters needed 1,501 votes, or one more than two-thirds, for the Congress to elect him. A total of 1,542 voted for the Congress elections, and 368 against.

Gorbachev's chief supporters took the floor to argue that the country was in a crisis, could not afford a long election campaign and that extended powers for Gorbachev would not deter growing democracy.

Dmitri Likachev, 84, a historian of Russian culture who has been called the ''conscience of the Russian nation,'' said anarchy would erupt if presidential elections were now held across the Soviet Union.

''Our country is swept with emotion and under the present circumstances, direct elections of the president would lead straight to civil war,'' he said.

Politburo member Alexander Yakovlev, a major proponent of the glasnost and perestroika reforms, said the lawmakers should act with political maturity and get on with electing the president themselves.

''Let us not outwit ourselves,'' he said. ''We have assembled here to elect the first president of our country so that our democracy and democratic process of perestroika will move forward.''

Sobchak said he was speaking for realism.

''We are deciding the fate of the presidency and the fate of our country,'' he said. ''In theory, it would be best to have the vote by universal suffrage but not in the face of the paralysis of power in our country.''

#90073u1479 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - The administration has budgeted about $500 each to repatriate every Contra guerrilla and an average three dependents into Nicaraguan society, an administration official said Wednesday.

An estimated 15,000 guerrilla fighters and the dependents are camped along the Honduran border of Nicaragua and are being encouraged to return to Nicaragua to live under the new reformist government that defeated the leftist Sandinista regime in elections Feb. 25.

The United States spent millions of dollars in arming and supporting the Contras during their unsuccessful decade-long war to oust the Soviet-supported Nicaraguan government, and President Bush has called for U.S. humanitarian aid to return them to their home.

Joseph Sullivan, a deputy assistant secretary for Inter-American Affairs, told a House Foreign Affairs subcommittee that the administration wants to spend $32 million on transportation, agricultural supplies, food, and other basics to return the Contras to Nicaragua and help them in farming and similar actitivites.

He said each of the 15,000 guerrillas has an average of three dependents, for a total of 60,000 individuals. The cost for the $32 million project breaks down to about $533 per individual.

The aid is being considered as part of a $300 million economic support program that Bush has proposed for Nicaragua to help restore its economy, battered by a U.S. trade embargo and the Contra war.

#90073u1491 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - The daughter of former Egyptian President Anwar Sadat pleaded with Israeli leaders Wednesday to prevent their paralyzed government from collapsing, warning its fall might end the Middle East peace process.

Speaking at a news conference, Camelia Sadat said she had communicated in the last 24 hours with leaders of the Likud and Labor parties, whose fragile coalition government is on the brink of toppling.

''During my personal telephone conversations ... I have voiced concern that the peace process will be indefinitely delayed or possibly brought to an end with the fall of the coalition government,'' she said.

Sadat, 39, appealed to Likud Prime Minister Yitzhak Shamir to rescind his firing from the Cabinet of Labor Party leader Shimon Peres, the move that precipitated the current government crisis.

Likud and Labor have been bickering over the terms a U.S. peace plan calling for Israeli-Palestinian talks.

Sadat pleaded with Shamir to work harder for the peace process, saying, ''We are running out of time.''

Sadat, a director of the New York-based Sadat Peace Foundation, is the daughter of Anwar Sadat, the Egyptian leader who signed the historic Camp David peace accords in 1978.

The foundation is dedicated to continuing the peace efforts in the Middle East of Sadat, who was assassinated by Islamic fundamentalists in 1981.

Camelia Sadat said that in addition to speaking to Peres, an aide to Shamir and other Israeli government leaders, she also was communicating with the White House by telegram and had met with Vice President Dan Quayle in November.

''I reminded President Bush and Prime Minister Shamir that my father paid with his blood to achieve peace with Israel,'' she said. ''To that end, I stated that it would be the saddest day of my life ... if the peace process ... was to come to a halt for lack of trying.''

Sadat said Israeli minister Gad Yaacobi told her Tuesday that her father's name had been repeatedly invoked during the heated Cabinet debate over the U.S. peace plan.

She urged Shamir and Bush to meet in Washington on March 26 to hold talks marking the 12th anniverary of the Camp David accords.

''Let us waste no more time to complete Anwar Sadat's agenda for peace in the region,'' she said.

Sadat is studying for a doctorate in peace studies at Boston University.

#90073u1505 03/14/1990 ~United Press International

BEIRUT, LEBANON (MARCH 14) UPI - Steel-helmeted Syrian troops fanned out through west Beirut Wednesday to quell two days of fighting between two Shiite factions.

Meanwhile, rival Chrisian forces in east Beirut traded sporadic bursts of gunfire despite efforts to halt their 43-day-old struggle. Palestinian sources told United Press International that Christian leader Michel Aoun, a general, was determined to crush the rival Lebanese Forces militia.

Late Wednesday, hundreds of steel-helmeted Syrian troops fanned out on the streets of sprawling southern Beirut, silencing the guns of pro-Syrian Shiite Amal militiamen and Iranian-backed Hezbollahs who battled for the second day, police said.

The Syrian troops, part of an estimated 10,000-strong force policing west Beirut and the southern slums, faced no resistance from the Moslem rivals who abandoned the streets and twisting alleys, police said.

Police said that 10 people were killed and 35 others were wounded in the new bout of inter-Shiite street violence.

After a tense overnight lull, the hostile gunmen fought with heavy machine guns and armor-piercing rockets, damaging property and setting several houses and cars afire, witnesses said.

They said the fighting raged around the Hezbollah-patrolled area of Beir Al Abed where some of the 18 foreign hostages are believed held. But analysts said the violence had nothing to do with the captives' plight.

Former President Jimmy Carter, arriving in Damascus, Syria, Wednesday as part of a Middle East fact-finding tour, said he hoped Syria would use its influence to free the Western hostages - including eight Americans.

Syria had reportedly turned down U.S. requests to use force to free the captives, arguing that it would put the hostages' lives in jeopardy.

Security sources said Hezbollah's spiritual guide, Sheikh Mohammed Hussein Fadlallah, escaped an assassination attempt Monday.

Gunmen opened fire on Fadlallah's motorcade in Beir Al Abed. His

bodyguards fired back, the sources said, killing two of the attackers. The sheikh was not hurt, they said. Fadlallah had escaped at least four previous attempts on his life.

Amal and Hezbollah have been engaged in a two-year struggle for supremacy overthe country's estimated 1 million Shiite Moslems.

The fighting spread to the vicinity of the heavily fortified Iranian Embassy in suburban Beir Hassan, police said. Shells hit the nearby three-story South Yemeni Embassy, but no one was hurt, they said.

Amal charged Tuesday that Hezbollah attacked its headquarters in the Burj El-Barajneh neighborhood, but Hezbollah spokesman said the enemy group triggered the violence by snatching a Hezbollah member.

In east Beirut, Aoun's troops and Samir Geagea's militiamen, entrenched along a 7-mile front, brushed each other's positions with automatic weapons fire throughout the day, killing two people and wounding four others, police said.

The rivals have repeatedly breached a truce arranged 12 days ago by a Vatican-backed local mediation committee.

Police said 810 people have died and 2,750 have been wounded in the 43 days of fighting. French media reports said the violence has demolished 5,000 houses and forced 250,000 Christians to flee the enclave - inhabited by 1 million people.

(MARCH 14) UPI - Engineers monitoring today's Titan-3 rocket mission say they have NOT been able to pick up signals from the communications satellite that was launched by the rocket. A spokesman for Hughes Aircraft... builder of the 140-Million-dollar satellite... says tracking stations around the world are trying to locate it. He says he canNOT rule out the possibility of a major failure. The Titan-3 earlier today blasted off from the Cape Canaveral Air Force Station and successfully boosted the satellite into preliminary orbit.

The Soviet parliament is gearing up for a vote on who will fill the new post of president that it created yesterday. NO candidates have been nominated yet, but it's almost certain that Mikhail Gorbachev will be chosen. The parliament earlier rejected an appeal by Gorbachev to drop the age 65 limit for the presidency. But Gorbachev, who is 59, would still be able to serve two full terms, which is all the new law allows.

Residents in the tiny community of North Blenheim, New York, are picking up the pieces after yesterday's explosions that leveled half the town. Two people were killed and five others hurt in the blasts, which apparently resulted from a leak in a liquid propane pipeline. Today, utility crews extinguished the last of the burning propane and plugged the pipeline. Residents began returning to the homes that are still standing in the town about 30 miles southwest of Albany.

CHICAGO (MARCH 14) UPI - Wheat futures turned higher about midday but other grain and soybean prices were lower Wednesday on the Chicago Board of Trade.

Light commercial buying triggered the rally in wheat after the early selling activity diminished. However, the gains in wheat were tempered by improving soil moisture conditions in the Wheat Belt.

Follow-through selling and weather conditions also pressured corn, wheat and soybeans. Widespread rain was reported overnight around the Midwest and more rain was in the forecast.

Soybeans were at or near session lows at the final bell in relatively light trading. Rumors the Brazilian currency will be devalued again coupled with the weakness in soybean oil futures kept soybeans on the defensive.

Heavy delivery notices of the March contract pressured soybean oil.

Corn was lower across the board with commercials on both sides of the market. Losses were limited by the lack of outside selling interest.

At the close, corn was unchanged to off 3 1/2, soybeans down 5 to 7 1/2, wheat unchanged to up 2 3/4 and oats off 1 to 3 1/4 cents.

#90073u1549 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - A 12-year-old boy set afire by a teenager described as a neighborhood bully underwent skin-graft surgery Wednesday as local clergy began a seven-day prayer vigil for the boy's recovery.

David Aupont went into the operating room at 7:30 a.m. for surgery, said Kathleen McGowan, a hospital spokeswoman.

The frail Aupont was on his way to school last week when, police said, a neighborhood bully forced him into the basement of an abandoned Brooklyn building, beat him, tied him to a railing and set him afire.

The brutal attack left David with second- and third-degree burns over 55 percent of his body and a 50-50 chance of surviving.

His plight brought and outpouring of sympathy nationwide, including calls and letters from President Bush, former President Ronald Reagan, Hulk Hogan and LaToya Jackson.

At noon Wednesday, clergy from around the city gathered in an hourlong prayer service at the hospital's chapel. The service was scheduled to be held for the next six days.

The suspect was charged with attempted murder, first-degree assault, kidnapping and robbery. He was being held at a juvenile center.

(MARCH 14) UPI - Pakistani Prime Minister Benazir Bhutt says a recent coup attempt in Kabul has paved the way for a ''bold new initiative'' to end the fighting in Afghanistan. Bhutto says Pakistan would like to work out a system where elections could be held for what she describes as a ''representative and independent'' Afghanistan. At a news conference in Pakistan's capital, Bhutto denied charges by Kabul that Pakistan aided in the coup attempt.

Israel's Supreme Court hears arguments on the timing of a NO-confidence vote that could give the Labor Party an edge over the Likud Party in the fight to form a government. Prime Minister Yitzhak Shamir's firing of Labor leader Shimon Peres yesterday caused 10 Labor Party ministers to submit resignations, sending the coalition government into near chaos. The court timing of the vote is the key in determining the face of a transitional government if it passes, and whether Shamir keeps his post if it fails.

Nudists in South Kingstown, Rhode Island, must surrender the Moonstone Beach to the birds. The U-S Fish and Wildlife Service canceled the town's lease for the clothing-optional beach and will put up a fence to keep people away. The government is taking the action to protect the endangered piping plover, whose numbers along the East Coast and Canada have dwindled to less than one-thousand.

WASHINGTON (MARCH 14) UPI - Japanese researchers claimed Wednesday that two seasons of ''scientific'' killing of whales yielded important clues about the marine mammals and they are expanding a project critics see as disguised commercial whaling.

Writing in the scientific journal Nature, Fukuzo Nagasaki of Japan's Institute of Cetacean Research criticized opponents of his project, which has killed more than 500 southern minke whales and is being expanded.

''Many of those who oppose Japan's whaling operations do so for emotional reasons without scientific basis,'' Nagasaki wrote. ''Our ignorance about the biology of whales is delaying any informed discussion about the practice of commercial whaling.''

The International Whaling Commission imposed a 10-year moratorium on all whaling in 1986, largely because several species are on the verge of extinction and there numerous alternatives to products derived from whales.

The commission estimates there are about 725,000 minke whales worldwide - 600,000 in the Southern Hemisphere where the Japanese want to continue whaling.

The minke is not on the U.S. list of endangered species, but opponents fear the Japanese project, while catching minkes, may also kill endangered blue and sperm whales.

When the Japanese plan was proposed in 1987, researchers said they wanted to kill 1,650 minke whales in the Antarctic region over two consecutive whaling seasons.

But a storm of protest, including threats of U.S. trade sanctions, forced the Japanese to scale back the plan to a ''small-scale feasibility study.'' The researchers killed 273 minke whales during January-March 1988 and about 240 whales during January-March 1989.

A Japanese fleet - vessels once used for commercial whaling - is currently in the Antarctic killing minke whales. Officials of the environmental group Greenpeace said the Japanese aim to kill about 300 whales.

Nagasaki gave no number but said, ''It is hoped that sample size will be increased in future research.''

Campbell Plowden, a spokesman for Greenpeace in Washington, said most marine scientists see no need for the Japanese to kill whales for research. Plowden charged the project is part of a Japanese effort to continue whaling despite the worldwide ban.

But Nagasaki insisted the program ''is not a disguised commercial operation.'' Sales of whale meat covered only about two-thirds of the cost of the first survey, he said, and the second survey had a $2 million deficit.

The Japanese researcher agreed estimates of whale populations can be done by visual sightings and other non-lethal methods. But he said ''it is necessary to kill the animal'' to discover age and sex distribution, as well as the natural rate of die-off.

The Japanese ssampling revealed ''a noticeable lack of 5- to 15-year-old whales,'' a gap that researchers speculated may stem from the greater ability of those animals to avoid capture.

It also found mature males and females, including pregnant animals, tend to form schools near pack ice, while younger whales are more solitary and live in off-shore waters.

WASHINGTON (MARCH 14) UPI - President Bush will nominate former aide G. Philip Hughes to be the U.S. ambassador to the Caribbean nations of Barbados, Dominica, Saint Lucia and Saint Vincent and the Grenadines, the White House announced Wednesday.

Hughes, who has been executive director of the National Security Council for the last year, formely held positions at the Commerce and State departments and served as director of Latin American affairs for the NSC.

Hughes joined the Reagan administration in February 1981 as Bush's deputy national security adviser in the Office of the Vice President.

#90073u1602 03/14/1990 ~United Press International
WASHINGTON (MARCH 14) UPI - L. William Seidman, chairman of the Federal Deposit Insurance Corp., Wednesday defended the Office of Thrift Supervision from congressional calls to abolish the agency.

"We are not convinced that the thrift supervision structure should be changed at this time," Seidman told a subcommittee of the House Banking Committee. "It has only recently been changed and should be given a chance to work."

The agency, created last August as part of President Bush's $166 billion thrift bailout bill, has faced considerable pressure from several members of Congress who claim it has moved too slowly.

One critic, Rep. Charles Schumer, D-N.Y., has proposed legislation to abolish the OTS by placing its thrift-regulating responsibilities with the Office of the Comptroller of the Currency.

"Even only eight months after passage, it is clear that there are major problems with President Bush's (thrift) rescue plan," Schumer said, citing the slow pace of thrift sales and liquidations.

"We believe at this time the OTs is doing a good job and it is too early to consider abolishing it," Seidman said. Seidman said any restructuring of the OTS would result only in more confusion and disruption of the thrift industry.

He did note that some revision of last August thrift bailout bill may be needed. "Based on our limited experience of only a few months, we have identified certain sections of (the Financial Institution Reform, Recovery

and Enforcement Act) where changes appear necessary," Seidman said the act's controversial leverage capital standard, purchased mortgage servicing rights and insurance coverage of certain deposits may need revision.

He also singled out the act's "loan-to-one-borrower" provision as an area for improvement. The provision, which limits the amount of capital thrifts can lend to one borrower, has drawn fire from home builders who say they are having trouble raising money for their projects.

Seidman said the provision, which was implemented immediately, should be phased in to give builders and others time to line up alternative financing.

"While we see no reason why thrifts cannot operate successfully under these restrictions, we recognize that full and immediate implementation of these restrictions may place a short-term hardship on the industry," Seidman said.

Comptroller of the Currency Robert Clarke said changes to the bailout bill are not warranted now. "The administration and Congress took decisive action seven months ago to enact sweeping legislation to respond to problems in teh savings and loan industry and its insurance fund," Clarke said.

"As these news responsibilities are undertaken, and the changes made in law and practive are felt in the financial services industry, it would be premature to urge further legislation."

ORLANDO, FL (MARCH 14) UPI - The San Francisco 49ers, the NFL's ''Team of the 1980s,'' placed three players and a coach on the All-NFL team of the 1980s voted by the 26 Pro Football Hall of Fame selectors.

Quarterback Joe Montana, safety Ronny Lott, wide receiver Jerry Rice and Coach Bill Walsh were first-team picks of the team announced Wednesday.

Montana and Lott were members of four Super Bowl championship teams, and Rice played on two title teams.

Rice was a unanimous selection, as were New York Giants outside linebacker Lawrence Taylor and tackle Anthony Munoz of Cincinnati.

Chicago Bears running back Walter Payton and linebacker Ted Hendricks of the Los Angeles Raiders were also first-team picks, making them the only repeaters from the 1970s All-NFL team. Payton is the NFL career rushing leader with 16,726 yards.

Other first-team offensive players were running back Eric Dickerson of Indianapolis and the LA Rams, Seattle wide receiver Steve Largent, San Diego tight end Kellen Winslow, guards John Hannah of New England and Russ Grimm of Washington, Miami center Dwight Stephenson and Chicago tackle Jim Covert.

Also on the first-team defense were ends Randy White of Dallas and Howie Long of the Raiders, tackles Randy White of Dallas and Dan Hampton of Chicago, Chicago inside linebacker Mike Singletary, cornerbacks Mike Haynes of New England-LA Raiders and Mel Blount of Pittsburgh, and Seattle safety Kenny Easley.

The kicker was Morten Andersen of New Orleans, Sean Landeta of the Giants was the punter, Billy Johnson of Houston-Atlanta-Washington the punt returner and Washington's Mike Nelms the kick returner.

The second-team offense was quarterback Dan Fouts, running backs Roger Craig and John Riggins, wide receivers James Lofton and Art Monk, tight end Ozzie Newsome, tackles Gary Zimmerman and Joe Jacoby, guards Bill

Fralic and Mike Munchak and center Mike Webster.

On the second-team defense were ends Lee Roy Selmon and Bruce Smith, tackles Keith Millard and Dave Butz, inside linebacker Jack Lambert, outside linebackers Andre Tippett and (tie) John Anderson and Carl Banks, cornerbacks Frank Minnifield and Lester Hayes, and safeties Deron Cherry and (tie) Joey Browner and Nolan Cromwell.

The second-team specialists were kickers Gary Anderson Eddie Murray (tie), punter Reggie Roby, punt returner John Taylor and kickoff returner Rick Upchurch. The second-team coach was Pittsburgh's Chuck Noll.

#90073u1705 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Oliver North, ending four days of testimony in the Iran-Contra trial of John Poindexter, conceded to prosecutors Wednesday his former White House boss was at the center of all aspects of Ronald Reagan's worst scandal.

In a rapid series of questions to the former Marine, prosecutor Dan Webb tried to counter the defense argument that North frequently acted behind Poindexter's back in selling missiles to Iran, and providing arms and money to the Nicaraguan Contra rebels.

After defense lawyer Richard Beckler completed questioning North, Webb bore down on the retired lieutenant colonel with question after question. Webb won potentially damaging admissions from North that Poindexter was a mastermind behind the scandal.

North told Webb that Poindexter, who was Reagan's national security adviser, knew about the secret plan to help the Contras, that he was one of the White House officials in charge of the arms-for-hostages deals with

Iran and was involved in trying to conceal both operations.

Poindexter, 53, is charged with five felony counts of lying to Congress and obstructing its investigation of the scandal.

The prosecution is trying to prove that the retired rear admiral broke the law by destroying some politically embarrassing documents, knew North was destroying others and also effectively ordered North to lie to Congress when it began investigating.

North's former secretary, Fawn Hall, was the second prosecution witness. Like North, she testified under a grant of immunity from further prosection and said she altered key White House documents about ''the Central American issue.''

Hall repeated her earlier congressional testimony that she made changes to the original documents at North's direction. The altered documents were then put back in a White House vault as though they were the originals.

She also testified that Poindexter worked on a false White House chronology about the secret U.S. arms sales to Iran.

Poindexter and his wife, Linda, an Episcopal priest, warmly greeted Hall and her parents before Hall took the stand.

The toughest portion of Webb's final interrogation of North came when he zeroed in on a meeting in which North lied to members of the House Intelligence Committee about his role in aiding the Contras.

Webb, asserting that North ''lied and lied and lied'' to Congress under implicit orders from Poindexter, argued that Poindexter told North before the meeting to ''take care of it.''

''And you did, didn't you,'' said Webb.

''Yes,'' replied North.

''And you lied,'' added the prosecutor.

"Yes, and I've admitted it," replied North, his voice barely above a whisper.

''You expected him (Poindexter) to be happy that you had carried the water '' said Webb. ''Did you think you did well when you went to Congress and lied?''

''No,'' answered North, his voice cracking. ''I've told the world I didn't feel good about it.''

The line of questioning prompted U.S. District Judge Harold Greene to question North about a false White House chronology of U.S. dealings with Iran.

''You were not worried at all about deceiving the elected representatives of the people of the United States?'' Greene asked.

''That never entered my mind,'' North replied, arguing he was more concerned with the lives of U.S. hostages being held in Lebanon.

Beckler asked North if he conspired with Poindexter.

''If conspire means to violate the law, I didn't do it,'' North said firmly.

In his final question to North, Beckler asked if he was trying to protect himself, not Poindexter, by removing key documents from the White House complex as the scandal exploded in November 1986.

''Yes,'' replied North.

North has been convicted of three Iran-Contra crimes and acquitted of nine others. He is appealing.

BOGOTA, Colombia (MARCH 14) UPI - Police killed nine gunmen and captured a 10th suspect near a Caribbean resort city when the band allegedly attempted to abduct a newly elected legislator, the sister of a drug suspect held in the United States, authorities said Wednesday.

The gunmen on Tuesday broke into the Santa Marta beach house of Marta Abello Silva, sister of Rafael Abello Silva, accused chief of Caribbean coast operations for the notorious Medellin cocaine cartel who was extradited to the United States last Oct. 29.

Police said when the armed group realized the woman, a representative in the Magdalena state legislature, was not home, they ransacked the house, stealing jewelery and cash.

Police commmander Col. Hugo Alberto Pulido told reporters that when a patrol attempted to enter the house the gunmen opened fire. Nine of them were killed in a gunbattle, he said. Police captured one man and two men escaped.

Police think the group was the same that robbed several beach houses in

the area, masquerading as security police pursuing leftist rebels.

National newspaper El Tiempo reported Wednesday that the group had cut telephone lines and threatened the people they found in the houses with guns. The paper said the band took about $40,000 in cash and jewels from the house.

Police are investigating the possibility the assault was linked to the country's powerful drug syndicate.

The legislator's brother, Rafael Abello Silva, faces drug trafficking charges in Oklahoma. He is accused of being the seventh-ranking man in the Medellin cartel.

Fourteen Colombians have been transferred to the United States on drug charges since President Virgilio Barco resurrected the extradition policy to battle rampaging cocaine cartels last August.

#90073u1718 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - The Prudential Insurance Co. of America said Wednesday it had a 1989 net income of $743 million, down moderately from 1988 profits of $829 million, reflecting losses in its Prudential-Bache securities business and the costs of two acquisitions during the year.

The insurance giant's securities brokerage and investment banking subsidiary, Prudential-Bache Securities Inc., had a loss of $51 million in 1989 against net income of $111 million the previous year.

George Ball, Prudential-Bache's chairman and chief executive officer, told reporters that the Wall Street firm would "of course" carry out some staff reductions this year, following other brokerages. "No, they won't be across the board," said Ball, who described the personnel cuts as "selective changes."

Prudential's chairman and chief executive officer, Robert Winters, said the securities business was in a difficult period. "Right now, individual investors are staying away from the marketplace," he said. "We believe the wrenching times for this busines will end. It is a cyclical business. Our job is to manage through these wrenching times," he said.

Prudential's performance reflected the costs of acquiring the Thomson McKinnon Securities Inc. retail brokerage network and integrating it with that of Prudential-Bache. Also in 1989 Prudential acquired Merrill Lynch & Co.'s realty and executive relocation businesses.

"Despite challenging operating conditions in many of our businesses, the

company achieved strong, balanced growth in 1989," Winters said. "At the same time, we continued to make sizeable investments to enhance our position as a leading provider of a broad range of financial services."

Prudential is now negotiating to sell the former Merrill Lynch realty offices to regional management and incorporate them into its franchise network, a statement by the company said.

Prudential's total revenues for the year were $43.03 billion, up from $37.50 billion in 1988. Capital surplus grew 17 percent to 7.9 billion, and policy owner dividends grew five percent to $2.5 billion. Those are two key performance indicators for a mutual life insurance company, Prudential said.

Prudential saw earnings gains in its individual insurance, group, reinsurance and asset-management businesses. Earnings of the company's new property and casualty insurance sales were hurt by Hurricane Hugo and the San Francisco earthquake, which produced losses of $34.5 million for the company.

#90073u1739 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - A major federal study called Wednesday for overhauling the U.S. child-care system through billions of dollars in new government spending, federal standards for day-care centers and a year's unpaid leave from work for parents of newborns.

''Existing child-care services in the United States are inadequate,'' concluded the two-year study conducted by a 19-member National Research Council panel of experts at the request of the Health and Human Services Department.

''Of greatest concern is the large number of children who are presently cared for in settings that do not protect their health and safety and do not provide appropriate developmental stimulation.''

The report said America has fallen behind other industrial countries in responding to the ''social revolution'' of recent decades that reshaped the family and resulted in the majority of children having mothers who work.

Since there is agreement that ''mothers are in the labor force to stay,'' the study proposed devoting $5 billion to $10 billion a year in government money and ''substantial'' private funds for a child-care system that in many cases would go beyond even the most controversial proposals now before Congress.

''Child-care must be viewed as an investment in the health and development of children in America, the well-being of all American families and the future productivity of the American work force,'' panel Chairman John Palmer, dean of the public affairs school at Syracuse University, told a news conference.

Child-care legislation has been stalled since last fall because of a turf battle between two House committees over financing methods. But, in a major difference from the report, it would only require that states set standards.

The Washington Post reported a compromise bill costing at least $2.4 billion a year could emerge Wednesday or Thursday. House Speaker Thomas Foley, D-Wash., told reporters he did not ''see any great impediments'' to an agreement and added a compromise could come this week.

Congress also is considering a parental leave bill this year, but it too falls short of the report's plan, guaranteeing only 15 weeks of unpaid leave.

The child-care bill faces an uncertain fate at the White House, and Labor Secretary Elizabeth Dole has said she will urgesident Bush to veto any bill requiring employers to provide leave.

The report calls for immediately taking the following steps to assure quality, access and affordability in the U.S. child-care system:

-Expand government subsidies for low-income families. The study said child-care subsidies, in the form of tax credits, actually shifted in the 1980s to wealthier families, increasing the burden on the poor.

-Provide funding to enroll all eligible 3-year-olds and 4-year-olds in the government's Head Start preschool program. President Bush has proposed enrolling all 4-year-olds but has said two years of preschool is not needed.

-Encourage care by creating referral services, improving training and salaries, expanding voucher programs and organizing family care networks.

-Develop federal standards that would be the basis for state rules governing staff-child ratios and teacher training requirements. Rules on such matters as ''teaching and learning styles'' would be left to local authorities.

-Require that all new parents be allowed to take unpaid leave from work with health benefits for up to one year.

The study said it would like to go beyond the five proposals in revamping America's $16 billion child-care industry, but acknowledged that ''highly constrained public budgets'' limit action.

For example, the report, noting the importance of parental involvement in the first year of life and a shortage of good infant care, said it would be best if parents were given six months of paid and six months of unpaid leave.

The report said the failure to develop an adequate system results in part from America's traditional view of child rearing as a private matter.

In 1971, it noted, President Nixon vetoed a comprehensive child-care bill saying that the proposal threatened the sanctity of the American family and promoted ''communal approaches.''

The $856,000 study - titled ''Who Cares for America's Children?'' - was

funded largely by HHS, with additional money donated by the Ford Foundation and the Foundation for Child Development.

#90073u1745 03/14/1990 ~United Press International

BY PATRICK MOSER - UPI

BONN, WEST GERMANY (MARCH 14) UPI - The East German elections Sunday not only will shape the future of the former communist state but will serve as a crucial contest for West Germany's political leaders, for whom the ultimate prize will be the leadership of a reunited Germany.

The East German balloting is viewed widely as a test run for West German elections in December that will pit Social-Democrat Oskar Lafontaine against Chancellor Helmut Kohl, who is chairman of the conservative Christian Democratic Union.

East Germany's political landscape closely reflects that of West Germany, with a conservative alliance in fierce competition against the Social-Democratic Party. A small liberal group is in the middle.

The election Sunday will mark the culmination of weeks of electioneering by West German political heavyweights, including Kohl, his liberal foreign minister, Hans-Dietrich Genscher, and the SPD's honorary chairman, Willy Brandt.

Predictions are that the East German SPD will gain a slight majority over the conservative parties, though not big enough to form a government. A coalition may be necessary.

The politicians from Bonn have spent the past weeks criss-crossing East Germany by rail, road and air to spread their parties' messages, backed by their respective political bases.

In his campaign, Kohl has taken a calculated risk, playing to massive pressure in East Germany for rapid reunification and telling East Germans that a conservative vote is a vote for West German-type affluence.

Lafontaine, conversely, left most of the East German campaigning to other SPD members, obviously aware he could not challenge Kohl's reputation as the architect of reunification.

He is expected to show his full hand only after Sunday's elections, once the initial euphoria has died down and Germans start realizing there is a price to pay for reunification.

That price could include massive unemployment in economically

uncompetitive East Germany and higher taxes for West Germans to finance the rehabilitation of East Germany's run-down infrastructure.

By suggesting that the best reunification formula is for East Germany to simply join the West German republic, Kohl has put himself and his CDU in a delicate position.

If a new East German government - probably a coalition - agrees to the chancellor's reunification suggestion before the West German elections, Kohl's fragile conservative-liberal coalition may soon face the challenge of an SPD strengthened by its likely East German majority.

Genscher's small, liberal Free Democratic Party, which has been at odds with Kohl for some time, could chose to join the winning side, as it has in the past.

The chancellor may call for early West German elections before the West German SPD has had time to fully capitalize on the resentment that the high price of reunification could bring about.

Kohl believes that the unification process will start immediately after Sunday's vote and that an all-German election will not be held until 1991.

But, if the current pressure for rapid reunification continues, Kohl may face demands that the vote for a united parliament be held in lieu of December's West German elections.

By trying to resist such demands, Kohl might risk accusations he is delaying reunification, and, as a result, damage his chances of becoming the first leader of a reunited Germany.

#90073u1752 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - An international agreement reached 16 years ago to protect textile manufacturing in the industrial countries costs developing countries billions of dollars and must be dismantled, the World Bank said Thursday.

"Textiles Trade and the Developing Countries: Eliminating the Multi-Fibre Arrangement in the 1990s," a book published by the bank, said the developing countries would gain about $3 billion a year if the the MFA were dismantled.

MFA is a framework for "voluntary export restraints" that restrict the volume of most textiles imported into North America and Western Europe from developing countries. It was introduced in 1974 as a temporary arrangement to allow the textile industry in the industrial countries to

adjust to rapidly increasing exports from developing nations.

Eliminating the MFA as well as tariffs on textiles imported into the developed countries would mean $8 billion a year for the developing countries, Stanley Fisher, the World Bank's vicepresident and chief economist, told a news briefing.

"Virtually all developing economies, including such major exporters as China, Republic of (South) Korea, Taiwan, Brazil, Hungary and Turkey would gain substantially from this liberalization," the book said.

Since 1974, the MFA has been extended three times and is scheduled to expire in 1991. Fisher expressed pessimism about the possibility of eliminating the MFA in less than ten years.

Developing countries insist that the MFA be phased out as soon as possible. Many governments realize that a successful conclusion to the current Uruguay Round of world trade liberalization negotiations under the General Agreement on Tariffs and Trade may not be reached without a pact to end the MFA, the book said. The Geneva, Switzerland-based GATT is the multilateral organization that seeks to liberalize world trade.

The book, edited by Carl B. Hamilton, noted that as a result of the MFA restrictions consumers in the industrial countries are being overcharged billions of dollars each year for clothing, fabrics and other textile products.

Fisher said that due to the MFA, consumers in the developed world pay about $10 billion a year more for their textile purchases. Yet, the book acknowledged that dismantling the MFA will not be easy.

Officials involved in eliminating the arrangement must recognize that "private interest groups have played a major role in formulating current policies, and that these interests need to be considered in developing proposals for reform."

Whatever plan is adopted to bring textiles and clothing into the mainstream of the international trading system, "irreversibility, simplicity, flexibility and some degree of continuity is the formula for abolishing the MFA," Fisher said.

AVON, NY (MARCH 14) UPI - A New York state environmental official responsible for Eastman Kodak Co. said Wednesday new charges of chemical discharge permit violations by the company were overblown.

Thomas Marriott, Kodak project director at the state Department of Environmental Conservation's Avon regional office, said he saw the same Kodak reports used by Atlantic States Legal Foundation to formulate claims the company made illegal discharges into the Genesee River.

Atlantic States on Monday gave the Rochester-based photography giant 60 days' notice of its intention to sue, charging Kodak with discharging 25 chemicals not covered by its state environmental permit.

In its notice to the company, Atlantic States said it got its information on the discharges from reports filed by Kodak under the federal Emergency Planning and Community Right-to-Know Act. The 60-day notice period is required by federal law.

"We looked at that ... data and asked the same questions (as Atlantic States)," Marriott said. "If there was a concern from our standpoint, we would have taken action by now."

Marriott said officials at Atlantic States who presented the information "don't really have a feel for it. It sounds bad; therefore it must be bad. But what do those numbers mean?"

Many of the chemicals cited by Atlantic States either could not be detected by the technology available when Kodak's discharge permit was issued in 1985 or have not been discharged in sufficient amounts to be detected at all, Marriott said.

In reporting its chemical discharges, Kodak used a "mass-balance basis" formula in which the company recorded how much of a chemical went into a process, how much ended up in the product and how much was in its waste treatment plant. The rest was reported as discharged. "That turns out to be a rather crude approach," Marriott said.

The difficulty comes in trying to detect some of these substances in a treatment system, particularly one the size of Kodak's, which handles more than 30 million gallons a day, he said.

"The policy is: if you can't detect it, there is no permissable level attached to it," Marriott said. "Putting a limit on a substance you can't even detect doesn't make much sense."

Marriott said Kodak's permit must be renewed this year and currently is under review. "We permit, roughly, what Atlantic States says Kodak is doing," he said. "If there are a couple of substances that ought to be included on their permit, we will certainly add them."

#90073u1795 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - A flexible, waterproof material developed by Japanese engineers may offer long-sought advantages in the construction of dams, tunnels and earthquake-resistant buildings, it was reported Wednesday.

Researchers said the new material, which resembles asphalt and is dubbed Aquaphalt, is made of liquid components that solidify when combined, even when mixing occurs underwater. The substance sticks well to other materials, is pliable and allows very little water to penetrate, they added.

In a study published in the journal Nature, researchers from Hokkaido University and Okumura Corp. Ltd. said Aquaphalt has potential ''as a shock-absorbing waterproof backfill material for tunnels and dams, and as an ... agent for protection of buildings exposed to earthquake hazards.''

Materials currently used as backfill or foundation material are not flexible enough to withstand fracture during many earthquakes, offering buildings and tunnels little protection against destructive jolts.

In contrast, laboratory tests show Aquaphalt is flexible enough ''to cushion the shock from earthquakes,'' researchers said.

The new material, made from a tar-like liquid laced with cement and a small amount of a water-absorbing polymer, may also be used to protect against earthquake damage by ''stiffening'' soil under buildings, researchers said.

Structures built on sandy ground are particularly vulnerable to earthquake hazards because vibration can cause sand to act like a liquid. Currently, such buildings must be supported by costly, deep pilings that penetrate below the sand into bedrock.

The Japanese team, headed by Akihiro Moriyoshi, said using Aquaphalt as a foundation material may improve construction in quake-prone sandy areas by reducing the risk of sand ''liquefaction,'' as well as buffering shocks, during a temblor.

Although no major projects have yet used Aquaphalt, researchers said it is being exaimined for use in the planned Tokyo Bay Tunnel. No cost estimates for the new material were given in the study.

Scientists say widespread soil liquefaction occurred during California's Loma Prieta earthquake in October. The damage in San Francisco's marina district, much of which is built on sand and other fill, was widely attributed to liquefaction and there are hints it may have played a role in the collapse of the upper deck of the Nimitz Freeway.

PARIS (MARCH 14) UPI - In a major addition to the world's largest collection of works by Spanish painter Pablo Picasso, the French government said Wednesday it had obtained a large number of the artist's paintings, designs and engravings as well as his masterful 1943 sculpture, ''Le Faucheur'' (The Reaper).

Officials at the Ministry of Culture said it was impossible to estimate the current market value of the 49 paintings, 38 designs, 19 ceramics, 240 engravings, seven lithographs and two sculptures that make up the collection, but they said it was certainly in the tens of millions of dollars.

The works are the bequest of Catherine Hutin, the daughter of Picasso's last wife Jacqueline Picasso, who committed suicide at her villa in southern France 3 1/2 years ago.

''At a time when the works of Picasso are becoming difficult for museums to acquire, given their market value, a collection of great importance will strengthen the publicly held French collections,'' the Culture Ministry said in a statement.

The works will be displayed in the Picasso Museum in Paris which, with more than 200 of the artist's paintings and 1,000 of his prints, already boasts the largest Picasso collection in the world.

The bequest to the government includes only one work not signed by Picasso a 1913 papier colle called ''Tivoli Cinema'' by the cubist Georges Braque.

As was the case with the previous donations by Picasso's heirs that led to the establishment of the museum bearing the artist's name, Hutin made her bequest under terms of a 1968 French law allowing heirs to donate works of art to the government in lieu of paying estate duties.

But if many of the paintings are considered masterworks, officials at the General Direction of French Museums say the most valuable piece in the new collection is Picasso's 1943 sculpture ''Le Faucheur,'' which the government has been trying to acquire since 1973.

An evocation of death, the work represents a martyrized Spain following the 1933-1939 Civil War. ''It is an allegory of Spain of great artistic and historical importance,'' one museum official said.

A large number of the 49 paintings donated Wednesday are from the artist's

final two decades, a period usually referred to as the ''Jacqueline Years'' because Picasso painted over 70 portraits of his last wife, who he met in 1954 but did not marry until 1961.

#90073u1850 03/14/1990 ~United Press International

HOLLYWOOD (MARCH 14) UPI - In a first for the Oscars, three of Hollywood's leading men, Charlton Heston, Jack Lemmon and Mel Gibson, will present statuettes from three overseas locations during the Academy Awards presentation, the academy announced Wednesday.

Heston will appear with Argentine actress Norma Aleandro in Buenos Aires to announce winners in the two documentary categories from the Teatro Cologne.

Lemmon is scheduled to announce the winner of the best foreign language film from Moscow with Russian actress Natalya Negoda from the Rossia Theater near the Kremlin.

And Gibson will join actress Glenn Close in London where they will announce the winner of the art direction category from the Ritz Hotel.

As previously announced, Australian actor Bryan Brown and his wife, actress Rachel Ward, will read off names of the winners for best sound and best sound effects editing from the Sydney Opera House.

The winners, however, will all accept their Oscars at the Los Angeles Music Center.

The four foreign locations mark the first time in the 62-year history of the Academy Awards that Oscar announcements will be made from overseas venues via satellite.

A fifth, pre-taped ceremony will emanate from Japan involving a ''special surprise,'' according to Gilbert Cates, producer of this year's Academy Awards presentations.

At a news conference Wednesday, Cates introduced three of the four producers of the foreign segments, each segment expected to last seven minutes. They were Patricia Elizondo of Argentina, Ilmar Taska of the Soviet Union, and Peter Faiman of Australia. Absent was Paul Smith of England.

Elizondo, Taska and Faiman expressed their governments' gratitude and spoke of the national excitement over participating in the March 26 Oscar show, one of the world's most widely viewed televised entertainment programs. This year it is predicted more than a billion people will tune

in.

Representatives of the accounting firm of Price Waterhouse said names of the winners would be kept secret, with envelopes being delivered to the participating stars at the four venues by bonded couriers.

#90073u1854 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - The International Monetary Fund announced Wednesday a $206 million loan in support of Hungary's economic policies.

The 12-month loan will unlock a $1 billion financial package from the European Community that was conditioned on Hungary reaching an agreement with the IMF on an economic stabilization and reform program.

Ferenc Bartha, president of the National Bank of Hungary, recently said in Washington that his country will also negotiate with the IMF a $1.5 billion medium-term loan during the second half of 1990.

According to the IMF, Hungary's economic and financial program for 1990 aims at reducing its domestic and external imbalances while restructuring, reforming and liberalizing the economy.

Objectives of the program are to: reduce the convertible-currency current-account deficit to $550 million, achieve balance in the non-convertible-currency current account following a $800 million surplus with the socialist bloc in 1989, contain inflation and avoid further declines in production.

Fiscal policy under the program is designed to reduce the absorption of resources by the public sector in order to increase their availability for the productive sector and to support external adjustment, the fund said.

The nation's 1990 budget, adopted in December, aims at a surplus equivalent to 0.5 percent of GDP. Hungarian authorities plan spending reductions across a broad range that includes defense and subsidies, while holding the growth of other expenditures below that of nominal GDP.

Under a continuing program of economic reforms, Hungary has furthered the liberalization of prices, reduced tax rates, decentralized the banking system and taken steps to restructure or close down money-losing enterprises.

The fund noted that, in Hungary's advance toward a market economy, further import liberalization was introduced at the start of 1990, new laws were adopted to establish a framework for the transformation and privatization of state enterprises and legislation was approved to establish a stock

market.

Hungary's IMF quota is $688 million and its outstanding financial obligations to the fund resulting from past operations total $223 million. The country's foreign debt in convertible currencies totals $21 billion.

BUCHAREST, ROMANIA (MARCH 14) UPI - Interim President Ion Iliescu declared the start of Romania's election campaign Wednesday after Parliament approved a blueprint for the country's first democratic government in four decades.

The election law, approved 44-3 with two abstentions, defines the new form of government as a democratic republic, to be headed by a president. It provides for a bicameral Parliament similar to that in the United States, with a senate and a house of represenatives.

Over the objections of opposition members, the Provisional Unity National Council, or interim Parliament, also confirmed the previously announced date of May 20 for the first democratic elections in post-war Romania.

''For three or even four days we discussed every article of the law at length and in detail and we finally arrived at a single platform, although not unanimously,'' Iliescu said following the marathon session.

He said all major political parties played a role in preparing the text of the law, which he described as the result of a ''confrontation of opinions and options.''

''The election campaign has started,'' he told reporters.

Many of the provisions of the election law were debated and approved piecemeal over four days of debate before being given final approval Wednesday.

In a dramatic session late Tuesday, council members voted against postponing the May 20 elections, despite pleas by opposition parties for more time to campaign.

Several opposition leaders complained that the National Salvation Front, which dominates the provisional government, has an unfair advantage because of its control over the news media.

Also fiercely debated was a proposal to exclude former high-ranking communist officials from the government - a measure that would have barred many top figures in the National Salvation Front from seeking office.

The proposal was defeated, and instead the parliament approved a measure that would prevent anyone who ''abused political or administrative office and violated basic human rights'' from holding a government post.

Under the new law, the new lower house of parliament will have at least one seat reserved for each of Romania's ethnic minorities.

The law also states that a presidential candidate must sever all ties to his political party if elected. Iliescu explained that after four decades of single-party rule, the council felt the president should ''not obey party but state discipline.''

By: Joan Hanauer

NEW YORK (MARCH 14) UPI - James Arness rides back onto the television screen as Marshal Matt Dillon in a new "Gunsmoke" movie, but he's hung up his star and left Dodge City. "Gunsmoke II: The Last Apache," to air on CBS Sunday, March 18, 9-11 p.m. Eastern time, picks up where one of the episodes of the old series left off.

"Gunsmoke" fans may remember that Matt was once injured and suffered a brief bout of amnesia, during which time he was nursed by, and had a love affair with, Michael Learned as a woman rancher named Mike. There's even a flashback clip from the original episode, in which the players look appealingly young.

When he recovered his memory he rode back to duty and never knew he and

Mike had a daughter, now 21. He finds out about it after he receives a letter from Mike. The girl has been kidnapped in a raid by a fierce renegade Apache warrior, Wolf, played by Joe Lara, who was Tarzan in a recent CBS movie. Funny how renegade Indians always prefer blondes.

Matt gallops off in pursuit of Beth, after being jailed by Hugh O'Brian as an inept Army general. He is accompanied by Mike's suitor, an Army scout played with amiable charm by Richard Kiley.

The film was shot in southwest Texas and in the beautiful mountain country of Big Bend National Park. True to the "Gunsmoke" tradition, the show goes beyond the shoot-'em-up simplicity of some old westerns and offers a bittersweet romance and examples of the insensitive treatment of the Indians.

"They've hauled 'Gunsmoke' out and dusted it off and we're giving it another shot," Arness said good-naturedly in an interview. "I kind of like it - I like it much better than having to do a weekly series. That gets into some hard work. This way you go down for a few weeks, do it and then you're back home. That has a lot of appeal, as long as you have a good story and good people."

"Gunsmoke," the series, ran from 1955-1975, the first of the so-called adult westerns and the last to leave the air when the western went that-a-way, probably from overkill. At its height, there were more than 30 prime time westerns on in a single season.

What happened to Matt Dillon between then and now? "After 20 years of the weekly run it was intimated and I presumed he was going to take off the badge and quit the marshal's job," Arness said. "He spoke occasionally of going off into the mountains and maybe getting a small ranch and sort of living that kind of quiet mountain man lifestyle.

"His dream was always to hang all that up and simply head out and lead a quiet life somewhere and we sort of assume that's what he did after the 'Gunsmoke' show folded."

Arness believes there's still a place for westerns on television - but not as series.. "I think certainly there's room for a good western show such as 'Lonesome Dove,"' he said. "But you have to do it in the larger sense, not as a weekly. You need to go out on location and get the big scenic values because they are part of your story. You can do that in a miniseries or a movie."

The insurance investigators who hire Kim Paris to help them investigate a Houston double murder keep calling her a flake, which is an understatement. As played by Mare Winningham, she's the central character of "Love and Lies," to air on ABC Sunday, March 18, 9-11 p.m. Eastern time. The case is

a real one, based on the murder of a lawyer and his wife in their beds, with their grandchildren sleeping in the room with them.

The movie, told from Paris' point of view and with some composite characters, deals with the murder only tangentially. Cindy Campbell, the daughter of the murdered people who is serving a life sentence for her part in their deaths, is spoken of but never seen.

Instead "Love and Lies" tells a weird love story involving Paris and Peter Gallagher as David West, the man who actually pulled the trigger. Paris picks up West, pretending to be a girl named Theresa, and he falls in love with her. She is tortured as she entraps him and loves him.

West comes off as a sensitive soul who seems almost more sinned against than sinning. That may be true in his relationship with Paris, but the Marshalls might have thought otherwise - if they had survived his bullets.

It will have been almost a year since the Exxon Valdez disaster when the Discovery Channel broadcasts "Black Tide," a look at the environmental Hiroshima in Alaska's Prince William Sound and environs. The show airs Sunday, March 18, 8-9 p.m. Eastern time, narrated by Christopher Reeve. The Exxon Valdez ran aground on March 24, 1989.

You see the pitful dead and dying animals and birds coated in shiny black goo. You visit the despoiled beaches - and beaches that look clean, but where oil lies beneath the gravel to a depth of four feet.

"Black Tide" blasts the oil industry, looks with some suspicion on the will of the Coast Guard, and issues a clear warning of what we can expect in the future if we do not clean up our act and, forsaking expediency and complacency, force the oil industry to clean up theirs.

#90073u1919 03/14/1990 ~United Press International

LOS ANGELES (MARCH 14) UPI - State Attorney General John Van de Kamp proposed Wednesday that a controversial abortion pill sold in France should be tested by California health officials and be made available in the state if it is proven safe.

In a move that could ultimately alter the national debate on RU 486 - the world's first abortion-inducing pill - Van De Kamp, a Democratic candidate for governor, said the state Department of Health Services has the authority to begin testing the drug in state labs on behalf of clinical researchers or pharmaceutical firms.

Currently, only one company, Roussel Uclaf of France, has manufactured the drug, which is available in France and is being tested in other European

countries. The drug has a 96 percent success rate and is considered in France safer than surgical abortion.

''If further testing confirms that RU 486 is safe and effective, the women of America should have access to it on the same terms as the women of Western Europe,'' Van de Kamp told a news conference. ''If they are to be denied equal access, that decision should be made on medical merit and not political pressure.''

The drug induces a spontaneous miscarriage in the first weeks after conception by blocking the hormone progesterone and thereby preventing a fertilized egg from becoming implanted in the uterus.

A recent New England Medical Journal study of more than 2,000 U.S. women showed the drug to have minimal side effects and fewer complications than surgical abortion. Also, the California Medical Association last week endorsed clinical testing of the drug.

Although French anti-abortion and religious groups vigorously opposed the drug when it was first made available in 1988, the French government eventually ordered the company to reintroduce it on the market.

But the prospect of a similar backlash and threats of boycotts by anti-abortion groups in the United States have made Roussel Uclaf and many American pharmaceutical firms reluctant to seek approval of the drug here.

Van de Kamp, however, said that Roussel Uclaf officials have told him they would ''seriously consider'' seeking approval of the drug under California drug testing and licensing procedures. Those procedures were established in 1987 to facilitate AIDS drug research and are considered faster than the approval process of the federal Food and Drug Administration.

Van de Kamp said he sent a letter Wednesday to Dr. Kenneth Kizer, head of the state Department of Health Services, urging him to use the same state process for testing RU 486.

''The Department of Health Services has the discretion to test but no mandate,'' he said, adding that he would seek legislation for the mandatory testing of the drug if state officials do not act.

There was no immediate comment from Kizer's office.

Federal law permits states to approve drugs as long as the drug is not shipped out of that state. ''(But) in practical terms, that's very difficult to do - to keep a drug within state lines even in a state as big as California,'' said Bill Grigg, a spokesman for the FDA.

Van de Kamp asserted California's drug testing program prompted the FDA to

set up its own accelerated approval process for AIDS drugs and he suggested that state testing of RU 486 could prompt the FDA to do its own testing.

''I think the threat of competition helped convince the FDA to do its job '' he said. ''And the process worked so well I think we should try it again with RU 486.

''This state should permit testing and evaluation of RU 486. If it turns out to be as safe as advertised, this drug should be licensed for manufacture and sale in California,'' he said.

Van de Kamp has made abortion and the right to privacy a key issue in the governor's race. All three mainstream candidates in the race have publicly supported a woman's right to an abortion.

Mayor Dianne Feinstein, another Democratic gubernatorial candidate, has charged that Van de Kamp cannot be trusted to keep abortion legal because while he publicly supports abortion rights, he is personally opposed to it because he is a Roman Catholic.

''I realize that this is a highly controversial proposal,'' he said. ''There is nothing more personal, more private than a decision a woman makes to give birth to a child. That decision is freighted with such meaning ... that we can reach no social or religious consensus on how it should be guarded.''

#90073u1925 03/14/1990 ~United Press International

JERUSALEM (MARCH 14) UPI - Israel's Supreme Court decided not to interfere to allow a no-confidence vote in Parliament Wednesday, postponing by at least a day a showdown between the Labor and Likud parties after the fall of the country's ruling coalition.

The Labor Party sought the early no-confidence vote, which through legislative manuevering would have given Labor an edge over Likud in devising a new ruling government.

Israel's religious parties appeared to carry the deciding votes for the parliamentary showdown now expected Thursday.

Prime Minister Yitzhak Shamir's firing of Labor Party leader Shimon Peres in a dispute Tuesday over the course of the peace process triggered the collapse of the 15-month-old ruling coalition and reduced the Israeli political scene to near chaos. Peres' dismissal prompted the 10 other Labor Party ministers to submit letters of resignation, effective midday Thursday.

With Likud and Labor attempting to gain firm commitments from Israel's 120 members of Parliament, the outcome of a no-confidence vote remained uncertain after daylong meetings Wednesday.

The two-member ultra-orthodox Degel Hatorah Knesset delegation announced its support for Likud, but said it was conditional on Shamir accepting a U.S. compromise peace proposal and bringing Labor back into the coalition.

Within the Likud Party, the votes of several members were not certain, although Shamir appeared to have the backing of Ariel Sharon, who resigned his post as trade and industry minister last month in a fallout with his Likud colleague.

''The formula that we have now is how to ensure a government in Israel led by the Likud. That is the most important thing and that all of our efforts will be put into this issue,'' Sharon said. ''Then if we manage to secure a Likud government - and I believe that any other government will never to able to bring the peace ... then we will have to sit and work out new plans.''

Labor leaders generally remained silent during Wednesday's jockeying for support. But by Wednesday evening, Labor appeared to have a possible 59 votes to Likud's 56.

Addressing Likud Knesset members Wednesday, Shamir attacked Peres' credibility and pledged to continue the peace process despite near chaos in the political scene.

''To everything is a limit and Peres can lie all the time to the public,'' Shamir said. ''But there is a limit to the lies. Today he presents himself as the general of keeping promises. ... He blames us that with Likud it is impossible to reach peace. I haven't seen him reach any achievement for peace.''

The Israeli government crisis, simmering for a month, centers around the peace process and particularly the differing views of the Likud and Labor parties on the role of East Jerusalem Palestinians. Likud worries if East Jerusalem Arabs participate, it would lead to negotiations on Israeli sovereignty over Jerusalem.

Labor and other left-wing parties appealed to the Supreme Court to permit a no-confidence vote Wednesday and overrule a decision by the Knesset's chairman to postpone the motion. After hearing arguments Wednesday morning the justices decided against interferring in the issue, but added there was no lawful basis for the postponement.

Timing of a no-confidence vote against the government coalition was

important because Peres' dismissal and the resignations take effect Thursday morning.

Passage of a no-confidence vote Wednesday would have provided the Labor Party with the opportunity to remain in a transitional government. When a no-confidence vote passes, current Cabinet members stay in place in a transitional government until a new government is formed.

Once the Knesset approves a motion of no-confidence, President Chaim Herzog must select a party he believes has the best chance to form a new government. Only a majority of the Knesset can call for early elections.

Nine no-confidence votes are scheduled for Thursday.

Israel's 15-month-old government coalition has survived several crises since its birth, and Tuesday's collapse stemmed from fundamental differences on the peace process and acceptance of a compromise plan offered by U.S. Secretary of State James Baker.

Under the plan, Israel would agree to talks with a Palestinian delegation that included one Arab deported by Israel and one or two West Bank Palestinians with second residences or offices in East Jerusalem.

Labor sought approval of the plan, while Likud does not want East Jerusalem Palestinians involved, fearing their participation would lead to negotiations on Israeli sovereignty over Jerusalem. Israel annexed Jerusalem and maintains the city as its capital, but most governments including the United States have not recognized the designation.

#90073u1943 03/14/1990 ~United Press International

AUSTIN, TX (MARCH 14) UPI - Treasurer Ann Richards and Attorney General Jim Mattox, the two remaining Democratic gubernatorial candidates in Texas said Wednesday their nasty rivalry might grow even more bitter during the campaign for the April 10 runoff race.

Richards, whose refusal to answer questions about whether she used ilegal drugs dominated the end of the campaign, Richards received the most votes in Tuesday's Democratic primary with Mattox trailing close behind. The two Democrats will face each other in an April 10 runoff.

With almost 100 percent of the precincts counted, Richards had 572,398 votes, 39.4 percent of the Democratic ballots, followed by Mattox with 537,031 votes, 36.9 percent. Former Gov. Mark White was third with 280,996 votes, or 19.3 percent.

Flamboyant oilman Clayton Williams walked away with the Republican gubernatorial nomination, capturing 517,582 votes, or 60.8 percent.

The primaries attracted about 2 million voters, more than any non-presidential Texas election in 20 years, the secretary of state's office said.

The Democratic gubernatorial race was marked by a series of attack ads among the top contenders. Richards implying that White had ''lined his pockets'' during his first term in office and that Mattox had something to hide by not releasing his income tax returns.

''We won because voters in the end focused on the issue of ethics and character and who they want to lead the new Texas through the 1990s and into the 21st century,'' Richards said at a post-election news conference.

''I expect the runoff to be hard fought,'' she said. ''You all know my opponent. You know what to expect. I am sure that given Jim's past campaigns, he will try to make it into a mud wrestling match.''

Richards said Mattox was trying to rewrite history by stating on election night that he had run a positive, issue-oriented campaign.

''I think it's important for me to remind you that he ran the first negative ad. He ran the last negative ad and he ran the most negative ads in between. I think that voters will ultimately see through those

tactics.''

Mattox challenged Richards to stick to the pledge that all three candidates signed with the Democratic Party to not question each other's character, integrity and the honesty.

But Mattox said he was ready for a debate over personal ethics and did not rule out using the drug issue against Richards in the runoff campaign, saying, ''I can't answer that for you right now. If I could, I would.

''I think it's a significant issue. I don't think you can have a war on drugs when the commander and chief takes the Fifth Amendment. ... I don't think you can tell children to say no when the commander and chief will not say no. I think the people deserve to have an answer to that question.''

Mattox would not say whether he had any evidence that Richards has used illegal drugs. ''I really don't want to respond to that question at the moment,'' he said.

Mattox warned that if Richards wants to talk about ethics, ''We can talk about her ethics also. There are quite a number of things that we have not brought up over the course of our campaign that can be discussed concerning how she raises her money, her own business dealings, her efforts within state government to benefit people that she has done business with. There are all kinds of issues such as that that could be brought up.''

Mattox declined to give any specifics.

The losing Republican candidates - Railroad Commission Chairman Kent Hance Dallas Lawyer Tom Luce and former Secrtary of State Jack Rains - have said they will support Williams, and the big question Wednesday was which Democrat would get the nod from White.

Mattox and Richards both say they will attract White's supporters, and even Williams said he will woo the former governor's camp.

''It's like a pretty girl. You never get a kiss unless you ask,'' Williams said.

Richards spoke with White by telephone Tuesday night and again Wednesday morning but would not disclose details of the conversations.

White, who had demanded an apology from Richards over her television ads, said he would make a decision in the next few days.

#90073u1955 03/14/1990 ~United Press International

(MARCH 14) UPI - The White House says President Bush and British Prime Minister Thatcher will meet in Bermuda next month to discuss developments in Europe and NATO. Spokesman Marlin Fitzwater says the informal one-day meeting will take place on April 13th. Thatcher has been deeply concerned about the pace of negotiations for German re-unification, and about other developments in Europe. Bush also has voiced surprise about the speed of changes in Eastern Europe.

There's still NO signal from a communications satellite that was put in preliminary orbit today by a Titan-3 rocket, and officials fear the spacecraft might be lost. It's been more than four hours since this morning's launch, and technicians at a tracking station in Hawaii have NOT been able to communicate with the 140-Million-dollar Intelstat-6. The high-power relay station can handle 120-thousand phone calls at once. It's NOT insured.

The National Weather Service says a storm in central Texas spawned a tornado that threatened Hill County. A tornado warning was in effect for Hill County, where a tornado was reported just south of Hillsboro. Officials say at least one twister touched down near Belton in Bell County this morning, causing some property damage but NO injuries.

Unseasonably warm weather in the Midwest and Plains created twisters that flattened homes and killed two people yesterday. A ham radio operator in Hesston, Kansas, described the town as being littered with trees and debris and cars ''that look like they've been run through'' a crusher. A 100-mile-long band of tornadoes danced across the central and eastern parts of Kansas yesterday. Tornado warnings were posted for Texas and Oklahoma today after several twisters were reported in the central and southwest parts of the states.

VIENNA (MARCH 14) UPI - More than 6,000 Romanian refugees streamed into Austria Wednesday to beat a midnight deadline for entering the country without a visa.

Government officials had estimated 35,000 Romanian refugees would try to cross the border from Hungary before 12:01 a.m. Thursday - four times as many as entered the country in all of 1989. But after a morning rush at the main Hungarian-Austrian border crossings, the influx of newcomers slowed dramatically.

Border guards said many Romanians were turning back because they did not have the required $410 in Austrian schillings, or its equivalent in hard currency, needed to enter the country.

In Vienna, a parliamentary debate on the visa requirement was disrupted when about 150 youths staged a noisy demonstration in the gallery to protest the new restrictions on refugees.

The protesters chained themselves to one another with handcuffs and began chanting, ''The right to asylum is a human right.'' The parliament session was adjourned so police could haul the demonstrators away.

The Interior Ministry, reacting to growing discontent over ever-increasing numbers of Romanian refugees in Austria, began moving last week to impose a visa requirement on Romanians seeking to enter Austria. The requirement was due to go into effect at midnight.

Vice Chancellor Josef Riegler told a news conference Wednesday about 5,000 Romanians had crossed the Hungarian border into Austria in the morning hours, and estimated 30,000 others were heading toward border points hoping to beatthe visa deadline. Border officials later put the number new arrivals at more than 6,000.

''We must proceed under the assumption we will soon have thousands of new refugees in Austria,'' Riegler said.

Authorities reported huge traffic jams at Klingenbach and Nickelsdorf, two of the main crossing points at the Hungarian-Austrian border.

Until the new law takes effect, border guards are obliged to admit Romanians with valid passports, but Interior Minstry spokesman Rainer Mayerhofer said the guards were strictly enforcing regulations that require a person to carry the hard-currency equivalent of $410 to cross the border.

''The border police will also be out in full force to prevent illegal

entries,'' Mayerhofer said.

Austria, which traditionally has opened its doors to refugees from Eastern Europe, has been hit with a flood of mostly economic refugees from Romania since the December revolution that ousted the hard-line communist government of Dictator Nicolae Ceausescu in Bucharest. Ceausescu was executed Christmas Day.

Government officials last week reported Romanians were entering Austria at the rate of more than 150 a day, filling the main refugee center at Traiskirchen to capacity.

Plans to open new refugee camps in several areas have been protested in some cases by local residents, who fear the newcomers will bring an increase in crime and unemployment.

#90073u1983 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Transportation Secretary Samuel Skinner, pushing the administration's new transportation policy, said Wednesday motorists would accept a gas tax increase to pay for road construction and research.

Skinner cited surveys that show Americans are so fed up with traffic jams, pollution and potholes that they would pay up to 16 cents more a gallon in gas taxes to finance improvements.

Addressing the National Press Club, he said an overall expansion of the nation's road system is vital and that ''the consumer will benefit in countless ways.''

Skinner and President Bush announced a comprehensive transportation policy last week that calls for raising state gas taxes to finance road projects.

The policy seeks to upgrade road as well as rail and air systems - and shift costs from Washington to state and local governments.

The policy has drawn mixed reaction. Mayors, governors and congressmen say a sweeping plan is needed. But they maintain the one offered by the administration is short on specifics and federal help.

Skinner, addressing the National Press Club, said the policy has received a bad rap. He said overall federal highway assistance would increase under the new policy, but so would the state and local share of highway projects.

The federal government now pays, on average, about 82 percent of the cost of federal highway projects. Skinner wants to reduce this to a yet defined

level.

Skinner, who recommends that states raise gas taxes to finance road work, cited a 1989 survey by the American Association of State Highway and Transportation Officials.

It found that 50 percent of the public would vote for a 16 cents per gallon increase in fuel taxes if the money were ''used to support the right combination of expenditures.''

According to an association spokeswoman, the ''right combination'' would involve having 4.9 cents of the increase used to improve roads, 2.9 cents for research, 2.3 percent to reduce traffic, 2.1 cents to reduce accidents 1.9 cents on mass transit, 1 cent on pollution, and 0.6 cent to reduce the federal deficit.

Skinner said recent polls in Minneapolis and Florida found similar sentiment.

Shortly after his address, Skinner left on a five-day trip to Europe, where he is to check on aviation security and some high-speed rail systems that he would like to see brought to America.

WASHINGTON (MARCH 14) UPI - The State Department took a tolerant view Wednesday of a report that the Chinese government had placed the United States first on a list of countries unfriendly to China.

A report by CBS News said a telegram circulated to Chinese diplomats around the world placed the United States at the top of a list of countries considered enemies of the Peoples Republic of China.

State Department spokeswoman Margaret Tutwiler said she could not confirm the existence of such a list, but, she said, ''If it's true, if the document exists, obviously, it's unfortunate, but we can understand the reasons.''

She recalled that the State Department ''put out a very critical human rights report on China just last month.''

She added, ''We still continue to view China as an important country, and we hope that positive steps would be taken to improve the relationship.''

Although the United States has eased some of the restrictions against contacts with China, including a total ban on high-level exchanges that followed the crackdown on a fledgling pro-democracy movement, the

administration continues to have some economic sanctions on trade with China.

ANCHORAGE, AK (MARCH 14) UPI - Prosecutors are trying to prove Exxon Valdez skipper Joseph Hazelwood sounded sober coming into the port of Valdez and drunk as he left, but an expert defense witness testified Wednesday someone may have tampered with the audio tapes in the case.

Prosecutors want the tapes played for the jurors, but Hazelwood's attorneys are objecting.

On the March 24 outbound tape, in which Hazelwood reports the grounding on Bligh Reef and the oil spill, he speaks slowly and deliberately, slurring his words somewhat.

On the March 22 inbound tape reporting the tanker's progress into Valdez, Hazelwood speaks in a voice higher and faster than the other tape.

Defense audio expert Edward Siedlick testified that when he traveled to Valdez last month to listen to the tapes, he found out the original inbound tape had been destroyed by the Coast Guard and he would have to listen to a copy.

The copy of the inbound tape was made by holding up a microcasette recorder's built-in microphone to the speaker of a Coast Guard tape recorder.

Siedlick testified that the two machines operated at slightly different speeds - just enough to increase the pitch and speed of Hazelwood's voice and make it sound a little different.

The defense expert also testified that he detected electronic start-stop signatures on the duplicate tape and that there appeared to have been some editing of the duplicate tape.

Siedlick, a former New York city detective and New York state electronic surveillance expert, is now a private investigator who was hired by Hazelwood's defense lawyers.

The duplicate tape, he testified, ''Is not an accurate reproduction of the conversation'' between Hazelwood and the Coast Guard officials in the Valdez marine safety office as the empty tanker approached the oil port.

Siedlick testified that the inbound tape sounded faster than Hazelwood's normal talking voice, based on his conversations with the skipper and a review of other taped conversations.

The Coast Guard records all vessel conversations and destroys the tapes by reusing them if no incidents necessitate saving them. The outbound tape was saved, but not the inbound tape.

The 987-foot tanker broke open on Bligh Reef and spilled nearly 11 million gallons of crude oil into Prince William Sound, the worst spill in U.S. history.

Hazelwood is charged with operating the tanker while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief. The 43-year-old Huntington, N.Y. mariner faces up to seven years, three months in jail and a $61,000 fine if convicted.

WASHINGTON (MARCH 14) UPI - The Consumer Product Safety Commission and an Illinois firm warned Wednesday that heart-shaped tags affixed to a line of stuffed animals may pose a choking hazard to children.

The toys, imported from Korea by TY Inc., of Oak Brook, Ill., have small red plastic hearts attached to their tails or necks that can be easily pulled off and swallowed by children, federal officials said.

Parents are urged to remove and throw away the tags, which have a gold border and bear the initials TY, officials said. The tags were affixed to a wide variety of stuffed animals, including monkeys, cats, dogs, lions,

lambs and pigs.

#90073u2030 03/14/1990 ~United Press International
WASHINGTON (MARCH 14) UPI - First lady Barbara Bush applauded 52 school teachers Wednesday, winners of research grants through the National Endowment for the Humanities - some of whom said they may lose their jobs as a result.

Hosting the winners of the 1990 NEH-Reader's Digest Teacher-Scholar awards of up to $27,500 for a yearlong study sabbatical, Mrs. Bush heralded the teaching vocation as the ''most demanding profession in the world.''

''You are really heroes to George and to me,'' the first lady said in brief remarks at a White House reception.

But one 30-year veteran high school teacher, Arthur Wilhelm of Smyrna, Ga. said he has no guarantee the school board there will give him his job back when he returns.

Wilhelm, who will be using his stipend to study the works of author William Faulkner in Paris, added that by accepting the award he will be

forced to take a pay cut because his annual salary has reached $39,500, and he will have to pay the bulk of his own health insurance for the year.

''They don't want to set a precedent,'' he said of the Cobb Country, Ga., district administrators.

Teacher Edward Rauchut of Omaha, Neb., who has taught the past five years at Central High School, said he also had no guaranteed job on his return.

The teachers were selected by the endowment to receive the grants to support a year's sabbatical for full-time, independent study in history, literature, languages and culture.

The NEH administers the program, now in its second year, in partnership with funds from Reader's Digest.

#90073u2042 03/14/1990 ~United Press International

ANCHORAGE, AK (MARCH 14) UPI - Redoubt Volcano erupted Wednesday and sent an ash cloud blowing toward Anchorage, but the Alaska Volcano Observatory predicted any ashfall in populated areas would be light.

The 10,197-foot mountain 110 miles southwest of Anchorage exploded at 9:49 a.m. Alaska time (1:49 p.m. EST) and sent a plume of ash and steam pouring out of the crater summit in an eruption that lasted 11 minutes, geologist Cynthia Gardner said.

Seismic activity increased right before the eruption, warning scientists of the impending explosion, but the tell-tale earthquakes beneath the mountain dropped off again when Redoubt finished blowing out volcanic material, Gardner said.

Winds sent the plume to the northeast directly over Anchorage.

The mountain has been exploding regularly about every five days for than a month. Redoubt exploded to life Dec. 14 in its fourth eruption this century.

CAPE CANAVERAL, FL (MARCH 14) UPI - The shuttle Discovery was readied Wednesday for a snail-like crawl to the launch pad Thursday and work to ready the spaceplane for takeoff April 12 to ferry the $1.5 billion Hubble Space Telescope into orbit.

Carried by a powerful crawler-transporter left over from the Apollo moon program, Discovery and its mobile launch platform were scheduled to begin the 4.2-mile, six-hour trip from NASA's rocket assembly building to the pad at 7:30 a.m. EST Thursday.

''All operations are on schedule to roll Discovery out to launch pad 39B '' said NASA spokeswoman Lisa Malone, adding that engineers have four days of ''contingency'' time available to handle any problems that might develop between now and liftoff.

Engineers plan to move the costly Hubble Space Telescope to the launch pad Monday for installation in a special ''clean room'' before it is mounted in Discovery's 60-foot cargo bay.

The shuttle's five-member crew, meanwhile, plans to fly to the Kennedy Space Center Monday to participate in a dress-rehearsal countdown Wednesday and Thursday, a routine exercise to give the astronauts and engineers a final chance to practice launch-day procedures.

A formal flight readiness review to assess launch processing is scheduled for March 30 and 31, and if all goes well the $2 billion orbiter will blast off at 9:21 a.m. EST Thursday, April 12, to kick off the year's third shuttle flight.

The goal of the 35th shuttle mission is the deployment of the Hubble Space Telescope, the most powerful astronomical instrument ever built to operate above Earth's obscuring atmosphere.

The telescope is expected to revolutionize optical astronomy and to help scientists learn more about the conditions that existed in the universe shortly after the big bang explosion believed to have given birth to the cosmos some 15 billion years ago.

The telescope also may be able to find direct evidence of planets circling other stars and it is expected to provide routine Voyager-class photos of Jupiter and Saturn.

Launch originally was scheduled for October 1986, but the Challenger shuttle disaster grounded the American manned space program and put the

flight on hold until now.

#90073u2085 03/14/1990 ~United Press International
NEW YORK (MARCH 14) UPI - The dollar mostly marked time in uninspired New York foreign exchange trading Wednesday as traders lacked any new information or economic data to trade on and dealt cautiously amid rumors that central banks were planning to gang up on the U.S. currency.

Though mixed, the dollar remained essentially firm at the levels it reached earlier in the week, driven by pessimism about the inflationary consequences of German monetary unification and about the Bank of Japan's apparent indecision on raising its key discount interest rate.

"The mood on the dollar is bullish but cautiously so, and so cautious you had currencies treading water for the most part," said Lisa Finstrom, a currency analyst for Shearson Lehman Hutton Inc.

Foreign exchange manager Robert Ryan of the Bank of New York said trading was very quiet and "totally dominated by technicals" given the lack of fresh information to spark a trend in the market.

Late in the New York trading session, the dollar was quoted at 1.71 German marks, up slightly from 1.7090 marks Tuesday. The U.S. currency was changing hands at 152.15 yen, also up from 152.05 yen.

But, Ryan added: "We're starting to hear rumors there might be concerted (central bank) intervention as well as interest rate hikes tomorrow. People are thinking they might put a real slam dunk on us."

Speculation had it that Bank of Japan Governor Yasushi Mieno might raise his institution's key discount rate Thursday upon his return from consultation with European monetary authorities. Rumors also said the West German and Swiss central banks might similarly hike rates.

Intervention by the U.S. Federal Reserve and other central banks in the form of dollar selling has done little to halt the dollar's advance against the yen and, to a lesser degree, the deutsche mark. Critics of the

intervention say it is futile unless interest rate changes are made.

To brace the yen, Finstrom said, an increase of at least 3/4 percentage points is needed because the market has been waiting for the Bank of Japan hike for so long it has built that much into current prices. "Anything less than that would be viewed negatively" and lead to yen-selling, she said.

If Mieno pushed the discount rate, charged on loans to commercial banks from central reserves, up a whole point to 5.25 percent, the action would be "very supportive" for the yen, the analyst said.

A Japanese interest rate hike could boost the yen by drawing global capital to yen-denominated investment instruments, increasing demand for the currency on world foreign exchange markets.

Other dollar rates: 1.5240 Swiss francs, up from 1.52; 5.7750 French francs, off from 5.7770; and 1,262 Italian lire, unchanged. The British pound slipped to $1.6095 from $1.6105.

In Europe, the dollar closed lower, finishing in Frankfurt at 1.7135 German marks, off from 1.7170 Tuesday, and declining in Zurich to 1.5250 Swiss francs from 1.5278 the day before.

In Paris, Brussels and Milan, it fell to 5.7920 French francs from 5.8035, 35.56 Belgian francs from 35.66 and 1,264.15 lire from 1,267.20.

In London, the pound moved up to $1.6085 from $1.6020. London traders said the market was quiet ahead of a Bundesbank meeting Thursday.

In Tokyo earlier, the dollar closed lower at 152.20 yen against 152.67 yen at the previous day's close.

Republic National Bank in New York closed cash gold lower at $398.25 an ounce, off from $399.25 Tuesday. The New York Commodity Exchange settled gold at $398 an ounce, off from $399. In Zurich, gold rose to $399 an ounce from $397.35 Tuesday. In London, gold also rose, to $399.50 an ounce from $396.25.

Republic closed cash silver at $5.095, up from $5.055. Comex spot silver rose to $5.081 an ounce from $5.059. Zurich silver rose to $5.10 an ounce from $5.05. London silver moved up to $5.10 an ounce from $5.05.

#90073u2087 03/14/1990 ~United Press International

CAPE CANAVERAL, FL (MARCH 14) UPI - A $140 million communications satellite was stranded in a safe but useless orbit Wednesday after

problems separating from its Titan 3 rocket and officials said they were considering a request for a shuttle rescue mission.

The Intelsat 6 satellite was launched at 6:52 a.m. EST in only the second flight of a commercial Titan 3 rocket, but the uninsured relay station failed to separate from the rocket's second stage as planned 25 minutes after takeoff from the Cape Canaveral Air Force Station.

Engineers were forced to take a drastic step to save the satellite by radioing commands that caused it to separate from its on-board solid-fuel booster, a rocket required to push the satellite to the higher orbit required by communications satellites.

Without the ''perigee kick motor,'' Intelsat 6, owned by the International Telecommunications Satellite Organization - Intelsat - was stranded in a safe but useless orbit in a major failure for the fledgling U.S. commercial space program.

''This maneuver deprived the satellite of the ability to use this motor to get into geostationary orbit,'' Intelsat spokeswoman Maria DeSario said. ''But it allowed the satellite to be placed in a safe low-Earth orbit while we look at some other options, including recovery by the shuttle.''

No other details were released, including the satellite's altitude, and while the Intelsat 6 series originally was designed for launch on a space shuttle, NASA officials had no immediate comment on any possible plans for an orbital rescue mission.

Failure to salvage the satellite or raise its orbit would saddle Intelsat with a $270 million loss, the second major commercial space disaster in a row since the Feb. 22 explosion of a French Ariane 4 rocket that destroyed two Japanese satellites.

Intelsat 6 was built to carry up to 120,000 trans-Atlantic telephone calls and officials with Titan-builder Martin Marietta Astronautics Group of Denver initially said the company's rocket performed flawlessly.

But later in the day they said the costly satellite did not separate from the rocket's second stage as planned 25 minutes after launch.

''Initial review of data suggests separation did not occur,'' said a company spokeswoman.

But it was not clear whether the satellite or the Titan was responsible for the initial failure, and with a virtual news blackout in effect at Intelsat headquarters in Washington, details about what engineers might ultimately do to salvage the spacecraft were not immediately known.

NASA has rescued or repaired four satellites during three previous shuttle missions but a similar effort in the conservative post-Challenger environment appeared to be a remote possibility. But with details about the satellite's orbit unknown, no options could be ruled out.

The $130 million Titan 3 rocket, the most powerful U.S. booster ever built as a commercial venture, blasted off from the Cape Canaveral Air Force Station at 6:52 a.m., and about 10 minutes later the second stage carrying the Intelsat 6 satellite was in its planned preliminary orbit.

Martin Marietta officials first said data radioed to Earth from the Titan second stage showed the drum-shaped satellite had been ejected into space, completing the launch phase of the mission. Later they revised their statement and said the satellite apparently was never released from the rocket.

In any case, when the satellite sailed back into radio contact over Hawaii a little more than an hour after launch, engineers on the ground were unable to detect any signals from the spacecraft.

''Intelsat 6 ... is encountering difficulties,'' said a spokesman for Intelsat, an international consortium that handles most of the free world's international communications traffic.

Intelsat 6 was the second in a series of five super-powerful communications satellites built by Hughes Aircraft Co. of El Segundo, Calif., under a contract valued at $700 million. The first was successfully launched last October by an Ariane 4 rocket.

It was only the second flight of a Titan 3, built by Martin Marietta Astronautics Group of Denver, in the post-Challenger commercial space program, and if the satellite cannot be salvaged the emerging commercial launch industry in the United States will be dealt a major setback.

The next Titan launch is scheduled for June 1 to carry another Intelsat 6 into orbit. What effect the problem Wednesday might have on those plans was not immediately known.

The most recent previous Intelsat loss came in 1986 when the third stage of an Ariane rocket failed. The last time an Intelsat spacecraft was lost after launch from Cape Canaveral came on June 9, 1984.

The four-story-tall Intelsat 6, capable of handling 120,000 simultaneous telephone calls, was placed into an egg-shaped orbit by its Titan 3 booster with a low point of about 109 miles and a high point of 247 miles.

To reach its operational altitude of 22,300 miles above the equator, Intelsat 6 must first separate from the Titan 3 second stage before a

series of onboard rocket firings starting with a critical ''burn'' 70 minutes after liftoff when the perigee kick motor was scheduled to ignite.

NEW YORK (MARCH 14) UPI - Average yields for money market mutual funds rose or stayed the same in the latest reporting week, while rates at competing savings and loan institutions mostly moved up, two organizations that track the funds and institutions said Wednesday.

The Donoghue Organization of Holliston, Mass., said average seven-day simple yields on money market funds were up to 7.65 percent from 7.63, while 30-day simple yields were unchanged at 7.64 percent. The average maturity of fund portfolios rose to 43 days.

The Bank Rate Monitor of North Palm Beach, Fla., reported that rates at competing banks and savings and loan institutions mostly rose in the latest week.

The Monitor's index of average rates: money market deposit accounts 6.07, down from 6.08; Super-Now accounts 5.01 percent, unchanged; six month certificates of deposit, 7.67 percent, up from 7.66; one-year CDs 7.74 percent, up from 7.72; 2 1/2-year CDs 7.72 percent, up from 7.71; and five-year CDs 7.78 percent, up from 7.76.

The average rate for a one-year adjustable rate mortgage was 8.57 percent, up from 8.51.

The average rate on a 15-year fixed-rate mortgage rose to 9.94 percent from 9.89 and the average rate on a 30-year fixed-rate mortgage rose to 10.13 from 10.09 percent.

The average rate for a four-year automobile loan rose to 12.19 percent from 12.18.

#90073u2140 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - Jean-Michel Cousteau, son of pioneer ocean explorer Jacques Cousteau, previewed his new film Wednesday on the Alaska oil spill and called for industry to advance beyond the ''Stone Age of cleanup technology.''

The 40-minute film, titled ''Outrage at Valdez'' and narrated by the younger Cousteau, is scheduled be broadcast March 25, the day after the first anniversary of the worst oil spill in U.S. history.

Nearly 11 million gallons of crude oil was dumped into Alaska's Prince William Sound when the supertanker Exxon Valdez struck a reef late on the night of March 24, 1989, off the port of Valdez.

Oil from the spill ultimately fouled some 1,200 miles of Alaska coastline.

The documentary chronicles the aftermath of the spill in terms of its destructive effect on the environment, wildlife and people of Prince William Sound, which Cousteau describes at the outset of the film as ''once untouched, untainted purity of air, ice and water.''

It also examines government and oil industry plans to prevent such an accident or deal with one if it happened, as well as cleanup and containment methods that proved largely ineffective in Alaska.

''The only thing this company (Exxon Corp.) could do was to put 12,000 people to work on their hands and knees, literally, with paper towels cleaning one rock at a time,'' Cousteau said before showing the film to a small audience on Capitol Hill. ''We are in the stone age of cleanup technology for oil spills.''

The film is to be shown initially on the Turner Broadcasting System SuperStation.

It was produced by the Cousteau Society, a non-profit organization that sponsors environmental education, research and media projects. Jean-Michel Cousteau, an executive vice president of the society, also been taken part in his father's research and exploration.

His film crew visited Prince William Sound six times during the making of ''Outrage at Valdez,'' most recently in December, about three months after Exxon ended its cleanup operations for the winter.

The documentary vividly illustrates the persistence of the spill, showing pools of oil as well as blackened, slime-covered soil and tar-stained rocks on beaches treated by Exxon's crews.

There is footage of seals, otters and birds coated in oil - some dead, some dying - and of the efforts of Valdez residents to clean the surviving wildlife with toothbrushes, Waterpiks and other household items.

But the film also focuses on a little-reported consequence of the spill - the human toll described by Cousteau as ''social chaos.''

While some residents found alternate sources of income or even profitted from jobs associated with the cleanup effort, many suffered devastating losses and a whole way of life was disrupted.

The incidence of crime, domestic violence, divorce, alcohol and drug abuse and psychiatric treatment are all on the rise in communities affected by the spill, Cousteau said.

Another major theme of the film was the ability of the oil industry and government agencies to respond to a major spill.

Environmental Protection Agency chief William Reilly says in the film, ''We were shockingly unprepared.'' Alaska Gov. Steven Cowper says, ''If a spill of this size happens again, we will not be in much better shape to clean it up then we were for the last one.''

Cousteau called for development of more effective cleanup methods, mandatory double hulls on oil tankers, stricter navigation controls and the development of more comprehensive contingency plans for dealing with spills.

He later appeared at a House subcommittee hearing to support proposals to impose an international ban on mineral development in Antarctica.

#90073u2170 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - The stock market, which spent the day mirroring the movements of Treasury bonds, closed higher Wednesday in moderate trading after bonds rebounded in the afternoon to their late-morning highs.

The Dow Jones industrial average, which fell 12.16 Tuesday, rose 13.29 to close at 2687.84.

Among broader market gauges, the New York Stock Exchange composite index rose 0.43 to 185.68 and Standard & Poor's 500-stock index rose 0.87 to 336.87. The price of an average share added eight cents.

Advances led declines 818-644 among the 1,944 issues crossing the NYSE tape. Big Board volume totaled 145,060,000 shares, versus 145,440,000 shares traded Tuesday.

The stock market showed its sensitivity to moves in interest rates Wednesday, moving in line with a seesawing bond market. Bonds gained in early trading, rebounding from Tuesday's sharp decline sparked by signs of economic strength in the government's report on retail sales. Stocks followed, responding to the lower interest rates that result from higher bond prices.

But before midday, stocks lost their modest gains as bonds eased after the Federal Reserve's beige book report showed moderate economic growth. Bond traders felt the report would further defer any easing of short-term interest rates by the Federal Reserve.

In the afternoon, however, bonds rebounded and stocks again rose on the decline in yields. In late trading, the 30-year bond was at 98 28/32, up 1 2/32, to yield 8.60 percent. Some analysts mentioned news of softer-than-expected auto sales in early March as sparking the late gains in bonds. Many stock market watchers were disappointed by the narrowness of Wednesday's advance, though.

"The breadth of the rally wasn't all that great," said Rodd Anderson, vice president in equity trading at Shearson Lehman Hutton Inc. "It was really concentrated in 4 or 5 Dow stocks. There was strength in the oils, but IBM was unchanged on the day and that's been a bellwether," he said. "I'd feel better if I saw more broad-based buying."

But analysts stressed that many investors were on the sidelines before Friday's round of economic reports and "triple-witching hour" expirations of stock-index futures and options as well as options on individual stocks.

On the trading floor, Unisys, the subject of frequent takeover speculation, was the most active issue, jumping one to 16 5/8. The company barred comment on the unusually heavy trading and steep gain.

Japan OTC Equity Fund followed on its first trading day, unchanged at 12. Chase Manhattan was third, off 1/2 to 28 5/8.

Among the blue chips, IBM was unchanged at 106 1/4, AT&T lost 1/8 to 41 and USX was down 3/8 to 35 1/2 after criticizing a proposal by investor Carl Icahn to spin off the company's steel business and predicting the plan would be defeated in a shareholder vote at the annual meeting in May.

Pacing the rally in the Dow industrials were Procter & Gamble, up one at 65 1/8; General Electric, up one to 63; oil issues such as Chevron, up one to 69; and Merck, up 1 1/8 to 68 1/4.

Elsewhere, MCA, which has agreed to acquire Geffen Records, tumbled 1 7/8 to 54 1/2. Under the buyout agreement, MCA will issue one million shares of a new series of convertible preferred stock.

Monsanto sank 5 3/8 to 54 1/2 after saying it expects first-quarter earnings to fall short of estimates and year-ago levels.

Trading in West Point-Pepperell was halted late in the session with the stock up 5 1/8 at 46 3/4.

The company declined comment on the sharp rise in its stock. But after the close, the company said it has negotiated a new $1.2 billion bridge loan with major banks. And reports said the sale of its Cluett Peabody unit, seen as crucial to the completion of William Farley's purchase of West Point-Pepperell, should take place by the end of this week. Volume was about 3 times the average daily volume.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 172,899,620 shares, compared with 172,683,740 shares traded in the previous session.

Prices closed higher in moderate trading on the American Stock Exchange. The Amex Market Value index rose 0.58 to close at 361.37. The price of an average share gained two cents. Advances led declines 283-245 among the 783 issues traded. Composite volume totaled 15,223,070 shares, compared with 16,930,680 traded Tuesday.

Bankers Trust "put" warrants on Tokyo's Nikkei stock index, which are bets against that market, led the Amex issues, down 3/8 to 15 3/8.

The National Association of Securities Dealers composite index rose 1.57 to 436.15.

#90073u2193 03/14/1990 ~United Press International

WEST PATERSON, NJ (MARCH 14) UPI - A state judge has granted heavyweight contender Evander Holyfield a temporary restraining order letting him proceed with his mandatory title challenge against Buster Douglas, Holyfield's promoter said Wednesday.

Speaking in Passaic County Superior Court, Judge Joseph Salerno said Holyfield would be ''irreparably harmed'' if litigation were to delay his

chance to fight for the title, according to promoter Dan Duva's statement.

Salerno also said he was satisifed Douglas had agreed to fight Holyfield within 120 days as a condition to entering into his February title bout with Tyson, and that Holyfield was likely to prevail when the case comes before a full hearing March 26.

''It is evident that the minions of boxing have been circling over Buster Douglas ever since he won the championship. But there is no reason why that should have any effect on Evander Holyfield,'' the statement quoted Salerno.

Holyfield and his promoters had requested a TRO preventing Douglas, promoter Don King, the Mirage Hotel in Las Vegas, Nev., and any others from interfering with the purse bid procedures that would set the Douglas-Holyfield bout.

#90073u2204 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - CBS told its advertisers and their agencies Wednesday that it was taking aim on the young crowd with prime shows in development for the 1990-91 season that were animated, musical and featured stand-up comics.

Jeff Sagansky, the new president of CBS Entertainment, and Peter Tortorici senior vice president, program planning, outlined the third-place network's ''game plan'' for the coming season, describing 23 pilots that are under consideration.

There is no guarantee which of them will actually appear on the schedule when it is announced later this spring.

Sagansky said CBS wanted to ''be different, attract star acting and producing talent to the network and broaden the demographic base of the audience.'' Among the producers returning to CBS will be Norman Lear.

The CBS executive pointed to two series that will be different - ''The Pink Panther,'' a mixture of live-action and animation that proved successful in the film ''Roger Rabbit,'' and ''Shangri La Plaza,'' described as ''a musical half-hour which is scored and sung from beginning to end.''

Speaking of the network's effort to broaden its demographic base, Sagansky said:

''We have to program younger. The oldest baby boomers are still only 43, and if we're not programming to them - which we do in shows like 'Murphy

Brown' and 'Designing Women' - then we ought to be programming for their kids and teenagers.''

Among the shows in this category, under consideration for the 8 p.m. (Eastern time) period, aside from ''Pink Panther'' and ''Shangri La Place '' are:

''Big,'' based on the hit movie, starring Bruce Norris, Darin McGavin and Alison LaPlaca.

''Uncle Buck,'' with comic Kevin Meany as an uncouth, ill-mannered and totally unprepared head of an unlikely household.

''Broken Badges,'' the story of a Cajun cop who works with a group of fellow police, all on psychiatric leave with various mental problems.

''Lenny,'' developed around the stand-up comic persona of Lenny Clarke, a blue-collar hero with a strong middle-American point of view.

Also ''The Flash,'' based on the DC Comics character; ''NYPD Mounted,'' about an odd-couple pair of New York cops on horseback; an untitled family comedy about a single dad, and ''The Rock,'' starring comic Joy Behar.

Drama development for the 9 p.m. (Eastern time) slot includes ''Over My Dead Body,'' starring Edward Woodward as a retired cop turned mystery writer; ''Shore Patrol,'' with Rich Schroder in an action series; ''WIOU '' an ensemble show set in a midwestern television station newsroom (from Grant Tinker's new company), and ''Sporting Chance,'' about a one-time star athlete who, after being caught in a betting scandal, returns as a sports world private eye.

There are three shows with law environments - ''Bar Girls'' about two women attorneys; ''The Antagonists,'' about a defense lawyer and a prosecutor who compete in solving crimes, and ''Hanging Judge,'' in which a once-idealistic judge, after having been injured and slightly disfigured fights for justice with an array of high-tech weapons from a cavernous courtroom beneath the regular courthouse.

''Sons and Daughters'' is a family comedy.

In comedy development for the new season is ''Sunday Dinner,'' a family comedy from Norman Lear; ''Steel Magnolias,'' and an untitled comedy built around stand-up comic Rich Shydner.

For midseason and beyond, Sagansky said, the network has commitments from Angela Lansbury for a half-hour comedy; Julia Duffy and Peter Scolari; Bob Newhart, ''hopefully for the fall of 1991,'' and Peter Strauss playing a network correspondent.

Tortorici announced motion pictures-for-television starring Robert Urich, Strauss, Jobeth Williams, Donna Mills, Barbara Eden, Barbara Hershey, Edward Woodward, Meg Tilly, Michael Tucker, Jill Eikenberry, Phylicia Rashad, Rick Schroder and Rue McClanahan, among others.

#90073u2227 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - The government needs to reorganize its rural economic development programs to get more bang for the buck, supporters said Wednesday as the House began work on a bill White House officials warned would be vetoed.

The measure would give the Agriculture Department authority to shift money among $1 billion in development programs to ensure the most important project in a region is funded. Local officials would write development plans for their areas and recommend which projects should be funded.

Rural development has been a topic of concern for Congress because of the sour rural economy with slow job growth, poverty rates above the U.S. average and challenges in providing schooling and health care. One-fourth of the U.S. population lives in rural areas.

''Rural development as it exists today has not been working and needs to be changed,'' said Rep. Glenn English, D-Okla., an author of the bill.

White House officials issued a veto threat last week, demanding five changes ''so that acceptable legislation can be presented to the president.'' The most significant would tone down the role of local officials and eliminate language the White House says could cause $570 million in added spending.

''The White House seems to be saying there is no future in rural America '' responded House Agriculture Committee Chairman Kika de la Garza, D-Texas, who indicated there would be no concessions.

Representatives rejected one suggestion to change the rules of debate on the bill on account of the administration complaints. The House planned to tackle amendments to the bill on Thursday. About two dozen had been filed.

During debate Wedneday, English and co-sponsor Rep. Thomas Coleman, R-Mo., said funding flexibility would allow the government to seek the greatest return on its money, since it was unlikely more funding would be allocated.

''We concentrate all the focus on where we can get the most growth for the dollar,'' English said.

The flexibility idea has attracted some critics, however. Rep. Charles Rose, D-N.C., tried during committee action to prevent any transfers from a $400 million water and sewer program. House Appropriations Committee chairman Jamie Whitten, D-Miss., also objected.

(MARCH 14) UPI - Engineers have been unable to pick up signals from a communications satellite put into orbit today by a Titan-3 rocket. Hours after launch from Cape Canaveral, Florida, technicians are still trying to communicate with the relay station. It is NOT immediately clear if the uninsured 140-Million-dollar satellite is working. The Titan rocket put the bird into a preliminary orbit, but there is NO word whether an on-board rocket fired as planned to begin the satellite's climb into final orbit 22-thousand miles above the equator.

A panel of experts working at the request of the Health and Human Services Department is calling for BILLIONS of dollars in government spending to overhaul the nation's child-care system. The study by the 19-member National Research Council says U-S child-care services are inadequate. It says that ''mothers are in the labor force to stay,'' so five-BILLION to 10-BILLION dollars should be spent each year for a child-care system that goes beyond legislation now before Congress.

There's new hope for a settlement in the West Virginia teacher strike. Teachers union leaders are looking at a proposal from the governor to end the walkout that has closed schools in 27 counties. The plan calls for 20-Million dollars in the state's budget next year to raise teacher salaries. It also calls for an education summit in May, and a special legislative session to deal with teacher salaries. A spokeswoman for the governor says officials are waiting to see what the union response is.

More violent weather in the nation's mid-section. Authorities say at least two tornadoes touched down in parts of central Texas today, knocking down telephone poles, scattering cars and damaging a building. NO injuries were reported. One of the twisters hit near Belton, and the other touched down in Hillsboro. Elsewhere, residents in other towns in the Plains and Midwest began cleaning up after tornadoes that flattened homes and killed two people yesterday.

(MARCH 14) UPI - The Judicial Conference of the United States has approved a plan designed to shorten the death row appeals process. The policy-making body of the federal judiciary announced approval a slightly

modified plan first drawn up by a committee led by former Supreme Court Justice Lewis Powell. At issue are efforts to reduce the number of appeals by death row inmates through habeas corpus writs that seek federal review of alleged constitutional defects in state court proceedings.

Political scandal in East Germany. With four days to go before parliamentary elections, a leading conservative candidate resigned as his party's chairman. Wolfgang Schnur's resignation from the Democratic Awakening Party comes amid allegations that he worked for the once-feared East German secret police. Schnur was backed by West German Chancellor Helmut Kohl and was his party's leading candidate in the March 18th elections.

STRATFORD, CT (MARCH 14) UPI - Sikorsky Aircraft unveiled a prototype of a new U.S. Army special operations helicopter Wednesday that was inspired by a failed mission to rescue hostages in Iran.

The MH-60K, or Kilo, helicopter took $83 million and more than three years to develop and is designed to fly missions at night and in bad weather.

The Kilo was derived from the Black Hawk helicopter and also incorporates some advanced technology from the Sea Hawk helicopter, Sikorsky said.

''The new capabilities built into this aircraft enable finely trained special operations crews to fly, unescorted, on missions that previously existed only in the imagination,'' said Sikorsky President Eugene Buckley.

Plans for the Kilo were born during the administration of President Jimmy Carter and the failed attempt to rescue the American hostages in Iran, Sikorsky said.

''It was determined then that an infiltration aircraft was needed that could get in quietly, clandestinely, that could get in and get the job done,'' said Rudolph W. Beckert, Sikorsky's program manager for the Kilo.

Sikorsky is under contact to build 22 additional Kilos at an estimated cost of about $14.4 million each, the Army said. The Army also has options to buy another 38 of the special operations helicopters.

The first helicopter is scheduled to be delivered to the Army in November 1991, officers said. The first test flight of the Kilo, which can fly further than the Black Hawk with more night capability, is set for this summer.

The new craft has both radar and forward-looking infrared systems that will allow it to fly low-level flight paths at night and in adverse weather, Beckert said.

The aircraft also has special protections against radar and heat-seeking missiles, he said.

''The Army wanted to be able to do a penetration without being seen or shot at,'' Beckert said.

Army Col. John Dailey, regimental commander of the Army's special operations, said the men who would be flying the Kilo also had worked on its development with Sikorsky, a subsidiary of United Technologies Corp. of Hartford.

''Development and testing of this aircraft is being done by the individuals who will fly it,'' Dailey said. ''In my opinion it was one of the few programs with high user visability all the way through.''

(MARCH 14) UPI - Iraq says President Saddam Hussein will NOT bow to international pressure to commute the death sentence of a British journalist convicted of spying. World leaders have appealed for clemency for the Iranian-born journalist, who was arrested last September while on assignment in Iraq for the London weekly Observer newspaper. Today's statement from the Iraqi government appears to be a rejection of those appeals. The execution is scheduled for Saturday.

Banks in Brazil are closed for three days beginning today in anticipation of a new economic recovery program expected to be unveiled by President-elect Fernando Collor de Mello. He is to be inaugurated tomorrow and is expected to announce the financial plan on Friday. Collor has said that drastic steps must be taken to halt inflation in Brazil, where it is running at an annual rate of more than three-thousand percent.

#90073u2318 03/14/1990 ~United Press International

ALBANY, N.Y. (MARCH 15) UPI - New York Telephone Co. filed Wednesday for a $965 million rate hike that would boost the average residential customer's bill by 34 percent upstate and 36 percent in New York City starting in 1991.

The request was filed with the state Public Service Commission just one week after a $445 million rate increase for the company, which has not had a rate hike in five years, was rejected by the commission.

Business telephone rates also would rise but less steeply than residential rates.

New York Telephone spokesman Peter Muller said that without the increase, the Nynex Corp. subsidiary would return only 6.8 percent on investments - about half what the commission says is a fair rate of return.

''You could get more than that just putting your money in the bank,'' Muller said.

Attorney General Robert Abrams blamed the rate hike on ''huge cost overcharges forced on New York Telephone by the financial manipulations'' of Nynex.

Abrams said he has documented $150 million in such overcharges to date.

Under the proposal, the cost of installing a phone and calling directory assistance would rise along with basic monthly rates. Discounts for evening, night and weekend calls would also be reduced.

#90073u2351 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - A hoax telephone call that led President Bush to mistakenly believe Iranian President Hashemi Rafsanjani was ready to discuss the American hostages was traced to a government building in Tehran, the White House spokesman said Wednesday.

Press secretary Marlin Fitzwater, revealing some more details on the mysterious episode disclosed last week, also said the telephone call taken by Bush at the White House had been monitored by both Israel and Iraq.

Fitzwater, however, said U.S. authorities still did not believe that the source of the phone call, made sometime last month, was a true Iranian official.

The spokesman said Bush became aware that the caller was not Rafsanjani when he only could hear a translator speaking, and then when a telephone number given for a check went unanswered or was hung up when the United States tried to confirm the call's origin.

''There may have been intelligence ways, but those are two ways that we knew,'' Fitzwater said.

The spokesman, however, said a phone used by the imposter was traced ''to an official government building in Tehran,'' the capital of Iran. He also said the United States was aware that the conversation had been monitored by the countries of Israel and Iraq.

On Tuesday, Bush told a news conference that he would again risk answering a hoax telephone call if it could lead to freedom for the eight American hostages in Lebanon.

''But what's wrong with reaching out and touching someone, when the hostages are at stake?'' Bush asked.

Additionally, the president said, ''When the whole story comes out on this you are going to be very, very fascinated with the details, very fascinated.''

Wednesday afternoon, as he was leaving the Oval Office, Bush dodged questions about the provocative comment, indicating to reporters that any further word from him might jeopardize attempts to win the release of the hostages. ''If you want the hostages out, then you'd better leave me'' some room to manuever, he said.

Last week the White House acknowedged that Bush took the call from a prankster posing as the Iranian president and claiming to have knowledge about the hostages.

The day after the White House disclosure, Rafsanjani ridiculed Bush for the episode, which the White House conceded was ''embarrassing.''

#90073u2404 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - Greece's second-largest bank and 13 of its employees in the United States were indicted Wednesday by a federal grand jury on charges of ''blatant'' money laundering of hundreds of millions of dollars.

The indictment, unsealed in U.S. District Court in Brooklyn, accused the National Mortgage Bank of Greece and 13 of its employees at branches in New York, Illinois and Massachusetts of accepting hundreds of millions of dollars in illegal deposits, often from customers carrying suitcases full of cash.

The bank and its employees also were charged in the 30-count indictment with conspiring to defraud the Internal Revenue Service, laundering millions of dollars in cash deposits, operating an illegal bank and other crimes, said Andrew Maloney, the U.S. attorney for the Eastern District of New York.

''This is perhaps the boldest and most blatant form of institutionalized money laundering we have ever encountered,'' Maloney said. ''This bank and its employees set up policies and procedures designed to violate American laws and then advertised their illegal services.''

Twelve of the bank employees, all Greek citizens, were arrested in June after a nine-month undercover operation by the U.S. Customs Service and the IRS code-named ''Operation Zorba.''

The 12 suspects were released in June after the bank put up more than $8 million in bail, Maloney said. One suspect, Greek national Angelos Petratos, is a fugitive and is believed to be in Greece.

The U.S. branches of the bank, which is partially owned by the Greek government, have been closed since June.

The indictment said the bank, operating without a license, took millions of dollars in cash in deposits, exchanging the money for checks in a laundering scheme called ''structuring'' so depositors could avoid paying taxes to the IRS.

The National Mortgage Bank, Greece's second-largest bank, is registered with the Treasury Department and the banking departments of New York, Pennsylvania, Illinois and Massachusetts as a ''representative bank.''

As such it is authorized to act as only a liaison between the bank's customers in the United States and the bank's headquarters in Athens and is forbidden to accept deposits and opening accounts, the indictment said.

Maloney declined to specify exactly what originally alerted authorities to the alleged illegal activity, though he noted the bank and its employees had so ''flagrantly'' violated the law that he was surprised they were able operate for so long.

''They were advertising in the Greek community, in Greek-language newspapers since 1983, that this was the way to beat taxes,'' he said. ''I'm surprised we didn't catch them long ago.''

The indictment charges two top managers of the bank, Kostas Giziakis and George Kontos, and Vasilis Kretsas, a customer representative, with conspiring to launder $250,000 per week in illegal gambling money.

Kretsas also was charged with offering a bribe to a Citibank employee.

Maloney said the Justice Department has held discussions with the Greek Embassy in Washington about the charges, but he declined to elaborate. In Washington, a spokesman for the Greek Embassy had no immediate comment on

the indictments.

Also named in the indictment were Nikolaos Stathopoulos, Alex Kosteroglou, George Analytis, Vassilios Dascalopoulos, Eleftherios Fitras, George Lazaris, Stellios Psarros, Apostle Zoupaniotis and Manolis Stefanakis.

If convicted on all counts, the bank faces fines totalling $10 million.

Giziakis, Kontos and Kretsas face more than 30 years in prison and fines of more than $1 million if convicted on all counts.

The others named in the indictment face 10 years or more in prison and fines of more than $500,000 if convicted on all counts.

#90073u2418 03/14/1990 ~United Press International

WASHINGTON (MARCH 14) UPI - A federal appeals court upheld Wednesday the Nuclear Regulatory Commission's decision to grant a full-power operating license for the controversial Seabrook nuclear power plant in New Hampshire.

The court ruling, which is subject to further legal appeals, came as opponents of the plant attacked the NRC at a House subcommittee hearing that focused on the agency's March 1 decision to allow full-scale operations at the $6 billion electric generating plant.

The Court of Appeals for the District of Columbia rejected a motion by Seabrook opponents, lead by Attorney General James Shannon of Massacusetts and two environmental groups, seeking a stay of the NRC's decision. It did not issue an opinion. The effective date of the NRC order is Thursday.

''We lost,'' Shannon's press secretary Mary Breslauer said. She added, ''The apeal goes forward, though. We still have a substantive appeal that we'll go forward with.''

Brendan DuBois, spokesman for Seabrook's owner-operator, New Hampshire Yankee, said, ''We're very pleased that the court decided there is no basis to delay the startup of Seabrook.''

''We received this license because we deserved it,'' DuBois said.

Appearing before the Housie Interior and Insular Affairs investigations subcommittee, NRC Chairman Kenneth Carr protested the timing of the meeting, citing the pending appeals court action.

''Your formal request that we appear before you has potentially serious and adverse consequences for the parties to the Seabrook proceeding,''

Carr told the lawmakers. ''To protect the due process rights of the parties, we cannot today respond to questions about contested issues relating to licensing of Seabrook.''

One of the key issues is the utility's emergency evacuation plan for New Hampshire and nearby Massachusetts communities within 10 miles of the plant. The commission ruled it is adequate, while opponents believe people could not be evacuated properly or in time.

''This is a rogue agency,'' Sen. Edward Kennedy, D-Mass., said. ''Over the years, the NRC has taken a series of actions on Seabrook (that) paint a portrait of an agency that has subordinated its primary mission of public health and safety to the preservation of the nuclear energy option.''

Subcommittee Chairman Rep. Peter Kostmayer, D-Pa., said, ''Much as Dr. Frankenstein gave up his own humanity to breathe life into his monster, so the NRC has compromised its duty to protect the safety of the citizens around the Seabrook facility and around our nation.''

For example, he said that in 1984, when Seabrook could not meet the NRC's requirement for a preliminary showing of the adequacy of an emergency plan ''the NRC simply changed its rule to accommodate Seabrook.''

Massachusetts Gov. Michael Dukakis said, ''Neither the public health and safety of the people of Massachusetts nor the people of New Hampshire are being protected by the Nuclear Regulatory Commission.''

He said he wants the subcommittee to explore all NRC procedures to determine the agency's integrity, see if there was any undue White House pressure on licensing decisions and ''seek to change the law'' if any improprieties took place.

The Democratic governor sparred with Rep. Norman Lent, R-N.Y., who said if the NRC licensing process has been ''corrupted, that corruption has been caused by anti-nuclear zealots.''

''It's obvious he knows very very little about this plant,'' Dukakis said.

#90073u2443 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - ''Elvis,'' the television series, will be yanked from the ABC schedule after this Sunday's episode but will return at a later date, ABC announced Wednesday.

Robert A. Iger, president of ABC Entertainment, said that while the show about the singer's early life will have its last telecast in its current time period on Sunday, March 18, it will continue in production for its

full episode order and will return in the future in a different time period.

''Elvis'' apparently has fallen victim to the success of its lead-in, ''America's Funniest Home Videos.''

Last week ''Home Videos'' was the No. 1 show in the Nielsen ratings, but ''Elvis'' failed to hold onto that audience, dropping to 47th place on the list. ''Home Videos'' had a 37 share; ''Elvis'' a 17 share. A share is the percentage of TV sets tuned to a particular show.

''We're very proud of 'Elvis' and hope to find another spot on our schedule where it will have another chance to succeed,'' Iger said. ''Meanwhile, we want to maximize the growing success of 'Americas Funniest Home Videos' on Sunday night and will try a series of different approaches in hopes of accomplishing that end. These experiments will continue through May sweeps.''

The networks plans to change lineups weekly, with these shows now scheduled to follow ''Home Videos:'' March 25, an original ''Doogie Howser M.D.''; April 1, ''Roseanne'' repeat; April 8, ''Home Videos'' repeat, and April 15, ''The Living Daylights,'' the network premiere of the theatrical movie marking Timothy Dalton's debut as James Bond.

#90073u2449 03/14/1990 ~United Press International

NEWARK, NJ (MARCH 14) UPI - A New Jersey couple was charged Wednesday with filing 41 federal and state income tax returns under different aliases in an attempt to receive $305,000 in refunds.

Veronica Lauranilla, 32, and Romeo C. Deiparine, 43, a married couple who are both natives of the Philippines, were released on personal recognizance bonds but ordered them to remain confined to their apartment pending trial.

The investigation began in January when Canadian customs officials searched Deiparine at the border, finding a list of 400 names with social security numbers and birth dates.

IRS agents allegedly found 190 W-2 forms in the couple's garbage during a search at their home last week and another in Deiparine's typewriter when he was arrested.

''The defendant is still expecting many refunds,'' Bader told U.S. Magistrate Stanley Chesler, asking for pre-trial detention. ''He sends them out continuously.''

Deiparine, apparently a U.S. citizen, had a U.S. passport, two Philippines passports and other identification, including three California driver's licenses, for a total of six aliases, Assistant U.S. Attorney Cheryl Bader said.

Investigators charge that Deiparine and Lauranilla used mail drops in New Jersey, Delaware, Michigan and other states in their scheme.

The couple face up to five years in prison if convicted.

#90073u2451 03/14/1990 ~United Press International

NEW YORK (MARCH 14) UPI - The spring training lockout passed its 28th day Wednesday with some gallows humor from the union, more propaganda from management, and progress from neither side.

Two days before the expected announcement of regular-season postponements, union chief Don Fehr was asked Wednesday evening what comes next.

''I assume dinner,'' he said.

Kansas City Royals co-owner Ewing Kauffman became the fourth owner in three days to defend management's position. If the union holds its demand for second-year arbitration, the season should be canceled, Kauffman said.

''If I'm running the organization, which I'm not, if I had the 26 votes, they'd be out all year,'' he said.

Houston's John McMullen, the New York Yankees' George Steinbrenner, and Texas' George W. Bush have spoken on the lockout in recent days, with Bush suggesting a secret ballot among players as a way to end the dispute. Kauffman also brought up that issue.

''I really feel if a vote was taken by the players, you'd find a majority of them would like to play baseball,'' he said.

Fehr said he talked twice by phone with owners negotiator Chuck O'Connor, and received some language on collusion protection and the study commission.

No talks have taken place since March 7, when the sides exchanged compromise proposals on the issue of salary arbitration. Owners stressed money and performance in their proposal, while players concentrated on service time.

Kauffman said at a news conference at Royals Stadium that the definition of labor negotiations is give-and-take, and the owners have heeded many of

the players' demands.

''The union requested greater free agent mobility, we gave them that,'' Kauffman said. ''They requested greater protecton on waivers for young players, we gave them that. They requested an increase in the major league minimum salary from $68,000, and we went to $90,000.''

The owners also agreed to a roster increase until the National League adds expansion teams and offered to increase pension benefits from $34 million to $50 million, Kauffman said.

''Now you might ask, why don't the owners give in to two or three years' players arbitation? There comes a time when you cannot keep giving and giving and giving,'' he said.

The dispute has all but wiped out the Grapefruit and Cactus League schedules, and some teams have already slated minor-league games for parks where spring training contests normally would be played.

''They weren't done for us,'' said Mike Soltys, ESPN's manager of programming information. ''It's not likely that we will do Triple A games, but it is a possibility.''

ESPN has already lost six of its scheduled 10 spring training games and will likely lose some regular-season games Friday when Commissioner Fay Vincent announces the fate of Opening Day.

San Francisco radio statio KNBR, which had scheduled 17 Giants broadcasts this spring, will start replaying tapes of at least five Giant games to fill the void.

''We're going through baseball withdrawal,'' KNBR program director Bob Agnew said.

Fehr said arbitrator George Nicolau said he would rule ''promptly'' on the union's request to have $51.6 million in collusion damages placed in escrow, so owners cannot use it to fund the lockout.

#90073u2462 03/14/1990 ~United Press International

TRENTON, NJ (MARCH 15) UPI - In what some observers say is a political ''Mission Impossible,'' a moderate Republican announced plans Wednesday to challenge two-term incumbent Democrat Bill Bradley for his U.S. Senate seat.

But Christine Whitman, inspired by a chat with President Bush, insists that she's serious in her challenge to the prominent senator who often is

mentioned as a possible presidential candidate.

''I'm in it to win. I don't intend to run a dirty campaign, but if I rough him up in winning it - in the sense of exploring some issues with which he may be uncomfortable - that's fine,'' she said.

Bradley has a campaign chest of more than $9 million, but Whitman said her campaign will find ways to compensate for this trove.

''We're looking at a budget of $1.5 million. We're not going to have a lot of TV buys. This is going to be a good old-fashioned campaign where you go to your Republican organizations and your volunteers and find the groups that support you,'' she said.

Wednesday's announcement came 10 days after Whitman resigned as commissioner of the Board of Public Utilities, saying she was considering a run for the 12th District Congressional seat held by Jim Courter. Courter recently announced he would not seek re-election.

Courter was trounced by Democrat Jim Florio in a race for the governor's mansion, and control of the Assembly also switched from Republican to Democrat. The Democrats already controlled the state Senate and now have a full lock on the Statehouse.

Whitman said a Republican retreat in the Garden State could set the party back for years.

Whitman said a talk Bush last week helped confirm her decision to run.

''President Bush and I may not agree on every issue,'' Whitman said. ''But when it comes to taxes and spending, I believe it's time George Bush has a friend in the United States Senate from New Jersey.''

The challenger said she hoped for a chance to back Bush's programs, such as a Gramm-Rudman balanced-budget amendment and the line-item veto.

Whitman denied that the run is a stepping stone to a national Republican appointment. Bradley's 1984 opponent, Mary Mochary, stepped into a State Department post after her loss.

''I'm not looking at this as a stepping stone. I could fall flat on my face. I'm looking at this race and this race alone,'' she said.

-30- 2579

#90073u2477 03/14/1990 ~United Press International

(MARCH 14) UPI - Greyhound, which unexpectedly decided to resume contract talks to end the bitter and sometimes violent nationwide strike, warned in

newspaper ads Wednesday that union demands would put the bus line ''out of business.''

The ads came two days before federally mediated negotiations were set to resume in Tucson, Ariz., between the nation's largest bus line and representatives of the Amalgamated Council of Greyhound Local Unions.

Greyhound took out its full-page ads in several newspapers Wednesday, including the Los Angeles Times, the Chicago Tribune, the Chicago Sun-Times and The Oregonian in Portland, in the form of an open letter to the mayors of the cities.

It thanked the mayors and citizens ''for their support during the current work stoppage'' and said Greyhound had provided ''excellent jobs'' in the city.

Despite Greyhound Chairman Fred Currey's boasts about a hefty strike fund, the letter said: ''Greyhound lost $20 million in 1987-88; last year we barely broke even. The last thing our company can afford is a strike.''

The ad said the union's demands would ''slowly but surely put Greyhound out of business.''

In Washington, Transportation Secretary Samuel Skinner said Wednesday, ''I'm delighted that the federal government and mediation service has been able to facilitate what I hope is a swift and quick resolution to that strike.''

Addressing the National Press Club, Skinner said, ''It is a good sign that both sides will begin discussions. ... That dispute needs to be resolved by both management and labor.''

Skinner said, ''Rural America is connected by one remaining bus line,'' Greyhound.

P. Anthony Lannie, Greyhound's executive vice president and chief labor negotiator, said Friday's negotiations were scheduled at the request of Bernard DeLury, director of the Federal Mediation and Conciliation Service in Washington.

Greyhound has not said why it had chosen to resume the talks, leaving it unclear whether either side had softened its position on the issues. The company last week flatly refused a union request to resume the talks.

One striker has been killed since the walkout began March 2. Company spokesman George Gravley said that there had been seven shootings at Greyhound buses.

The strike began after negotiations broke off on a new three-year contract for about 9,000 Greyhound employees represented by the union, including drivers, baggage handlers, mechanics, ticket agents and reservation clerks.

The walkout was called on grounds of unfair labor practices, rather than simple economics.

The National Labor Relations Board is reviewing a complaint by the union that Greyhound was bargaining in bad faith before the strike, and was trying to break the union.

Greyhound, based in Dallas, carried 22 million passengers last year and is crucial to low-income travelers who live in smaller communities.

The company says 1,800 union employees have returned to work, including 358 drivers. The company also has hired 700 replacement workers. Greyhound said it is running at 33 percent of its normal sevice levels.

The union says the hiring of replacement workers is illegal, and that actually only about 400 union members have crossed picket lines, with fewer than 100 union drivers returning to work.

(MARCH 14) UPI - Officials are afraid that an expensive communications satellite that was launched into orbit today from a Titan-3 rocket might be lost. Intelstat officials say the uninsured 140-Million-dollar satellite is suffering ''difficulties.'' But they did NOT rule out the possibility that the problem could be fixed and the satellite's mission salvaged.

The Soviet parliament has decided it will elect the Soviet Union's first executive president. Parliament members today defeated an opposition proposal that would have forced Mikhail Gorbachev to face a nation-wide election to the new post of ''super-president.'' Gorbachev is the only candidate.

A Polish government spokeswoman says Poland is preparing to enter into negotiations with the Soviet Union regarding a Soviet troop withdrawal. The spokeswoman adds that Poland wants to re-negotiate the terms for basing some 40-thousand Soviet troops on Polish soil.

President Bush and British Prime Minister Thatcher are to meet in Bermuda on April 13th for consultations on the rapid developments in Europe. The White House says the informal meeting also will deal with NATO and bilateral relations. Officials say the one-day meeting was ''mutually arranged.''

An ominous report out of Iran today. A report from Tehran says the country plans to spend 10-BILLION dollars in the next four years to buy new weapons to modernize its armed forces. The purchases are part of Iran's current five-year development plan, which runs to March 1994.

#90073u2553 03/14/1990 ~United Press International

CHARLESTON, W.Va. (MARCH 14) UPI - All West Virginia's public schools were closed Wendesday for the rest of the week as more than 8,000 striking teachers swarmed the state Capitol to denounce Gov. Gaston Caperton's proposal to end their illegal weeklong walkout.

''Things are just getting out of hand in terms of tempers,'' state school Superintendent Hank Marockie said in shutting down schools in all 55 West Virginia counties Thursday and Friday.

Local superintendents have had the option of closing schools since the strike began March 7, and more than 25 of them chose to do so Wednesday. Marockie's order, however, affects all 55 counties.

Marockie said after the cooling-off period, county school systems will be expected to take action to discipline teachers who remain on strike. That action could range from reprimands to firing, and Marockie said the counties will have to handle each case individually.

The superintendent said he took the action after the West Virginia Education Association and West Virginia Federation of Teachers rejected Caperton's proposal. ''We hoped the talks would produce an agreement, but they have not,'' Marockie said.

The shutdown order was issued as teachers rallied on the Capitol steps.

''The governor's offer ... is inappropriate and insulting,'' said WVEA President Kayetta Meadows. ''We won't take it. ... His offer ignores even the basic needs of teachers and all school employees of West Virginia.''

Caperton offered the plan late Tuesday after two days of private talks with the 16,000-member WVEA and 3,000-member WVFT.

Only 7,001 of the state's 21,653 public school teachers were listed as having reported to work Wednesday morning, but the state said that figure did not include any who may have reported in counties where the schools were closed.

Caperton, a Democrat, had offered Tuesday to set aside up to $23 million to address teacher pay equity problems and to hold an ''education summit.''

He said he would call a special legislative session this summer to consider across-the-board pay raises, but only if West Virginia ended the fiscal year on June 30 with a budget surplus.

The unions have accused Caperton of reneging on a previous plan to provide $35 million for a 5 percent pay raise, an extra $6.5 million for health insurance and $27 million in new taxes on coal operators to help pay for the package.

The Caperton administration said the governor was ''very disappointed'' with the union response to his latest proposal.

''The feeling was, as we left the room last night, (that) Kayetta Meadows and Bob Brown were both ready to accept this proposal,'' gubernatorial spokesman Gordon Morse said. ''Their reactions were positive and encouraging.''

The state Legislature moved to revise West Virginia's school aid formula to provide between $24 million and $27 million for teachers' salaries and operating expenses for West Virginia's 55 county school systems.

''We've been pushing for every little nickel and dime we can get,'' said Senate President Keith Burdette, a Democrat. ''It appears we could end up with as much as $27 million for equity.''

#90073u2596 03/14/1990 ~United Press International

NEW YORK (MARCH 15) UPI - Scores of former Drexel Burnham Lambert Group Inc. employees appeared Wednesday on Phil Donahue's television show and blamed government officials and other Wall Street firms for the collapse of the investment giant.

Most of the audience, filled with people who once worked for Drexel, directed their criticism at former U.S. Attorney Rudolph Giuliani, who spearheaded a government investigation into insider trading at the firm.

Under threat of a racketeering indictment, Drexel pleaded guilty in 1988 to six felony counts and agreed to pay $650 million in penalties.

''Rudolph Giuliani decided to make it his project, to gain votes or potential votes, to go after Drexel with RICO,'' said Valerie Sue Jones, a former employee, referring to the federal Racketeer Influenced and Corrupt Organizations Act. ''It's as simple as that.''

Giuliani made an unsuccessful bid for mayor of New York City after leaving the U.S. attorney's office.

Donahue reached Giuliani by telephone during one of the ''Donahue'' show's commercial breaks, and the former federal prosecutor might appear on a later show with former Drexel employees, said a spokeswoman for the talk show.

About 140 Drexel employees, most of whom have been laid off, appeared on the talk show filmed at NBC studios in New York. The show was aired live locally and will be broadcast Friday or Monday in other cities.

Some laid blame on U.S. Treasury Secretary Nicholas Brady, the former head of the investment banking firm Dillon Reed & Co., and other top government officials for not encouraging banks to rescue Drexel at the eleventh hour. Drexel filed for bankruptcy protection Feb. 13.

''It's no secret Nicholas Brady, the former chairman of Dillon Reed, wanted to take Drexel down,'' said one Drexel employee on the show. ''Drexel took a lot of business from them. He is bitter and he took it out on Drexel.''

Added another, ''Once the government and Giuliani and Nicholas Brady want to get you, they get you.''

The employees said other Wall Street firms were jealous of Drexel's success in the 1980s, when the firm built a fortune as a pioneer in the high-risk, high-yield junk bond market, and wanted to see the investment giant fail.

''I believe certain powerhouses of the street pushed some buttons and got some politicians involved and Rudolph Giuliani was nothing but a pawn,'' said one man. ''He was sent out to put Drexel out of business and he succeeded.''

Another employee said, ''Every firm on Wall Street wanted to get into our business. It's no secret.

The audience expressed a resounding loyalty to Drexel, even when Donahue asked about the $260 million in bonuses Drexel paid top executives in December and January.

''It bothers us, of course, but one way or another they would have lost those people if they didn't pay the bonuses,'' said one employee. ''What we're so hurt about is Drexel was the best damn company in the world.''

After the show, however, one former analyst said she and others were angry at Drexel but afraid to speak out and endanger their careers on Wall Street.

''They don't want to burn any bridges. No one's going to get up and say something,'' she said.

''Management never let us know what was happening when it was going on,'' she added bitterly. ''I had to read about it in the papers.''

The audience cheered at mentions of Michael Milken, who reaped hundreds of millions in profits for the firm by using junk bonds as a vehicle in leveraged buyouts in the 1980s. The former head of the junk bond department left Drexel in the wake of the government probe and now is

under indictment for securities fraud and other charges.

''We feel if he was there, he would have helped us,'' said one employee.

Asked about the insider trading charges levied at Drexel, one replied, ''We weren't doing anything that anyone else on the street wasn't doing.''

Members of the audience good-naturedly defended themselves against Donahue's remarks that the public views them and Drexel as greedy and arrogant, and that junk bonds and leveraged buyouts relied dangerously on borrowed money.

''I think as a group we believed in what we were doing,'' said one. ''We believed we helped create jobs.''

The show's producers posted a sign inside Drexel's offices just after the bankruptcy filing inviting employees to appear on the show, members of the audience said.

#90073u2672 03/14/1990 ~United Press International

ANCHORAGE, ALASKA (MARCH 14) UPI - The defense in the Joseph Hazelwood trial Wednesday accused the Coast Guard and the prosecution of altering a tape recording of Hazelwood's voice to make the former Exxon Valdez skipper sound drunk when the tanker ran aground.

A defense audio expert testified Hazelwood's voice was distorted on tape and a chief mate on the ship said he could not even recognize Hazelwood's voice on the tape.

Also Wednesday, another Exxon skipper said Hazelwood's actions last March were prudent, even typical of tanker captains, and that Hazelwood was not reckless like the prosecution says he was.

And an alcohol expert for the defense characterized as ''nonsense'' the prosecution effort to estimate Hazelwood's blood alcohol content at the time of the wreck based on a blood test 11 hours after the grounding.

The four defense witnesses spent the day hitting away at prosecution evidence as the defense nears the end of its case, which could close late Thursday or early Friday, followed prosecution rebuttal.

Hazelwood, 43, of Huntington, N.Y., is charged with operating the tanker while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief.

The 987-foot tanker broke open on Bligh Reef March 24 and spilled nearly

11 million gallons of crude oil into Prince William Sound, the worst spill in U.S. history.

Prosecutors are seeking to play for jurors taped radio communications between Hazelwood and the Coast Guard. They say the tapes show Hazelwood was sober en route to Valdez and drunk when he left and the ship struck a reef.

A March 22 tape of Hazelwood's conversation with the Coast Guard when the empty tanker was approaching the oil port, has the skipper speaking in a voice higher and faster than normal. A tape made March 24 after he left the port has Hazelwood speaking in a slow, deliberate manner, sometimes slurring his words.

The defense said the Coast Guard and the prosecution manufactured the difference in the two recordings to create the impression that Hazelwood was drunk.

Defense lawyer Michael Chalos said after court, ''I think the Coast Guard did this on purpose because they're very nervous about their liability in this case. They're trying to alter the evidence, and the prosecution knows that tape has been altered.''

Defense audio expert Edward Siedlick went to Valdez last month to analyze the original tape March 22 tape. He was told the Coast Guard had destroyed the original tape and only had a copy made on a microcassette recorder.

Siedlick said the March 22 tape was a flawed copy made by a machine operating at a different speed than the Coast Guard tape recorder used for the original. He said the increased speed raised the pitch of Hazelwood's voice and by comparison made the skipper's voice sound slower on the second tape.

Siedlick, a former New York city detective and New York state electronic surveillance specialist and now a private investigator, said he detected electronic start-stop signatures on the duplicate and that it appeared to have been edited.

He said the duplicate tape ''is not an accurate reproduction of the conversation'' between Hazelwood and the Coast Guard officials.

Exxon Valdez chief mate James Kunkel, who testified in the case last month made a surprise return to the witness stand to support the defense contention that the prosecution tape altered the sound of Hazelwood's voice.

At first, Kunkel said, ''I wasn't able to recognize the voices on the tape.''

Later, he said he was able to make out Hazelwood but ''to me it sounded like he was talking awfully fast.''

Defense alcohol expert Michael Hlastala, a University of Washington physiologist, attacked the prosecution alcohol calculation in which an Oklahoma toxicologist took Hazelwood's blood sample from 11 hours after the wreck and calculated backwards to estimate a blood alcohol level 1 1/2 times the legal limit at the time of the grounding.

''It's nonsense to try to pin down a specific alcohol content at that time '' Hlastala said, rejecting as scientifically unreliable this backwards extrapolation.

The fourth defense witness of the day, Exxon Capt. Ivan Mihajlovic, testified that Hazelwood's actions before the grounding were typical of tanker captains.

Mihajlovic, a friend and neighbor of Hazelwood's in the nearby Long Island N.Y. town of Centerport, said tankers routinely took detours around icebergs like the one the Exxon Valdez was taking.

LOS ANGELES (MARCH 15) UPI - The best broadcast advertisements over the past three decades were the 1987 Pepsi Cola ads starring Michael J. Fox and a series of Excedrin radio ads in 1967, the Hollywood Radio and Television Society said Wednesday in handing out its ''Best of Three Decades'' awards.

The Pepsi ''Apt. 10-G'' ad won the society's 1987 Sweepstakes award as the best television commercial of that year.

The three Excedrin ads included Dick Cavett, Louise Lasser, Bob Marcado and Charles Nelson Reilly. They won the society's 1967 Sweepstakes award as the best radio commercials. Young & Rubicam of New York was the ad agency for the series.

The decade awards were presented in celebration of the society's 30th anniversary.

The society, during a black-tie dinner Wednesday night, gave its 1989 TV Sweepstakes award to the ''Missing Link'' commercial for Diet Pepsi. BBDO of New York was the agency and Rick Levine of Los Angeles was the producer.

The 1989 sweepstakes award for the best radio ad went to ''What's This,'' a spot for Carr Stores/Brach Candy. Dick Orkin's Radio Ranch of Los

Angeles was the producer.

BBDO also won the award for best series of TV ads with its three commercials for Apple-MacIntosh.

The awards drew some 5,000 entries from 60 nations, including the People's Republic of China, the society said.

The Cliff Freeman & Patners agency of New York won two TV awards: best 30-second live-action English language ad for its ''Mood for Love'' commercial for Philips Lighting and for the combination category for its ''Insurance'' ad for Little Caesar Enterprises.

The Sarley, Bigg & Bender agency of Los Angeles won two radio awards - best 30-second humorous commercial and open 30-second category - for its ''Yolanda'' ad for WPGH-TV.

Other TV awards, listing title, advertiser and agency, were:

60-second live action, non-English: ''Wherever You Go,'' Hitachi Ltd, Hakuhodo Inc..

30-second live action, produced outside the U.S.: ''Reversing Logs,'' KHBB London, Annex Films.

30-second live action, non-English: ''Chaplin,'' Associao Dos Dirigentes De Vendas Do Brasil, Salle Inter-Americana.

Animation: ''Tula,'' Bayer, OMON Baiman.

Humorous: Tie between ''Trenches,'' Essex Corp., Trahan, Burden & Charles; and ''Spa,'' ABC Televsion Network, ABC On-Air Promotion.

Short, 20 seconds or less: ''Slapping,'' Snyder's Drug Stores, Martin/Williams Advertising.

Public Service: ''Lifestyles of the Homeless,'' Coalition for the Homeless Chiat/Day/Mojo.

Local: ''Wake Up,'' American Heart Association-Genetech, Burson-Marsteller.

Other radio ads:

Musical, 60 seconds: ''Linda Ronstadt,'' Coca-Cola USA-Diet Coke, Lintas: New York.

Musical, 30 seconds: ''Day-O,'' The Benjamin Franklin, Marx/Knoll, Denight & Dodge.

Humorous, 60 seconds: ''Beedenbenders,'' Konica USA, North Castle Partners.

Open, 60 seconds: ''Hard Lesson,'' Church of Jesus Christ of Latter-day Saints, Bonneville Media Communications.

Public Service: ''Boy in the Classroom,'' Adam Walsh Center, no agency.

Series: ''Stress/Forward to Present/Handcuff,'' California Department of Transportation, McDaniels, Henry & Sproul.

-30- 3406

#90073u2889 03/14/1990 ~United Press International

BOISE, ID (MARCH 15) UPI - The Idaho Senate State Affairs Committee voted Wednesday to delay action on a bill that would give the state the most restrictive abortion law in the nation.

After a hearing that lasted more than three hours, most committee members said they wanted to hear more testimony focused on the legal and constitutional aspects of the measure, from one or two speakers on each side of the debate.

The panel voted 8-3 to delay committee action on the measure. Sen. Mark Ricks, a Republican, chairman of the committee, said the committee probably will vote on the bill Friday afternoon and, if it is sent to the Senate, the earliest the it could be voted on by the full Senate would be Tuesday.

The bill would make abortions illegal in Idaho as a means of birth control outlawing abortions except in cases of rape, incest, profound fetal disability or threats to the life or health of the mother. It would eliminate about 95 percent of abortions in Idaho.

The bill cleared the House on a 47-36 vote on Friday.

Opponents and even some supporters of the bill are considering whether it could withstand a Supreme Court challenge without amendments, especially its restrictions for rape and the health of the mother.

Supporters hope it will prompt the Supreme Court to overturn the landmark 1973 Roe vs. Wade decision, which legalized abortion nationwide.

But opponents believe it is broadly unconstitutional, would not have a chance of being upheld by the Supreme Court and would cost the state up to $1.5 million to defend in court.

Kerry Uhlenkott, legislative coordinator for Right to Life of Idaho, an

anti-abortion group, threatened to withdraw her group's support for the bill if any amendments to lessen its restrictions are attached.

Sen. Claire Wetherell, co-sponsor of the bill in the Senate, said the lengthy deliberations were indicative of the magnitude of the issue, not only for Idaho but the rest of the nation.

''This is the most important civil rights issues of our lifetime,'' said Wetherell, a Democrat who is strongly anti-abortion. ''It's clear to me this is the most important vote we will ever make in our career as legislators.''

The committee heard testimony from three speakers for both sides.

Dr. Kathleen McGowan, an abortion rights gynecologist, said the bill would cause severe harm to Idaho women.

If the bill passes, she said, those who can afford to travel to other states to have abortions will do so. Those who cannot, she said, will be subject to ''back-alley abortionists'' and some will be injured or die as a result.

Brigham Young University Professor Richard Wilkins, a constitutional abortion scholar, told the committee via videotape that while he is strongly against abortion the bill is unconstitutional on several points.

''I firmly do not believe House Bill 625 stands any reasonable chance of being upheld by the Supreme Court,'' Wilkins said. Instead, he said it would likely ''hurt the pro-life movement because it would solidify Roe (vs. Wade).''

#90073u2898 03/14/1990 ~United Press International

LOS ANGELES (MARCH 14) UPI - A man has been arrested as a suspect in a bomb threat that forced the partial closure of the Los Angeles International Airport control tower earlier this week, police said Wednesday.

Michael Griffith, 23, was arrested late Tuesday at his South Los Angeles residence after police received a tip that he was responsible, said detective Richard Kensic of the Criminal Conspiracy Section of the Los Angeles Police Department.

Griffith is suspected of making several telephone calls to Federal Aviation Administration headquarters Monday, saying explosives had been placed in different parts of the airport, Kensic said.

One of the threats prompted FAA officials and police to order all but four controllers out of the tower for more than an hour. In the interim, incoming flights were delayed as long as 90 minutes and planes were diverted or delayed throughout the country.

No bomb was found.

Kensic said the tower was the only airport facility named in the threats that was evacuated.

Griffith was booked on suspicion of making a false report of a bomb, a felony charge, and jailed in $5,000 bail.

#90073u2922 03/14/1990 ~United Press International

LOS ANGELES (MARCH 14) UPI - Lynne Cox, whose unprecedented 1987 swim across the Bering Strait became a symbol of international goodwill, is ready to make another symbolic crossing - between the two Germanys.

Cox announced Wednesday she will attempt a 10- to 15-mile swim from East Berlin to West Berlin in the Spree River May 18-20 in a symbolic linking of the Germanys.

''I hope to accomplish a number of goals with this project,'' the 33-year-old Cox said. ''One is to tackle the physical challenge of the swim. Another is to expand on the cold-water medical research conducted during my previous swims.

''But the overriding goal is to symbolically bring the divided countries closer together.''

Cox, of Los Alamitos, Calif., won acclaim three years ago when she swam the Bering Strait from Little Diomede in the United States to Big Diomede in the Soviet Union.

The crossing was toasted by Soviet President Mikhail Gorbachev and then-President Ronald Reagan for helping bridge the political gap between the superpowers.

Cox began planning her latest project before German unification talks began recently. She expects to have support from both Germanys, the United States, Great Britain, France and possibly Japan.

Cox will be escorted by between two and four boats during the swim. Those on board will make sure she stays on course and search for potential hazards such as barbed wire, which was was strung across the river to prevent people from fleeing East Germany.

One boat will carry diplomats and officials from Berlin and several governments.

Cox credited Sen. Frank Murkowski, R-Alaska, with helping coordinate the project by contacting and receiving replies of support from the British, Soviet, French and U.S. embassies.

''The idea is to have officials from the countries all in the same boat during the swim to reinforce the spirit of global cooperation,'' Cox said.

At age 15, Cox shattered the men's and women's records for swimming the English Channel.

In January, she became the first to swim the 45-degree waters of the Beagle Channel separating Argentina and Chile. The countries disputed possession of the channel for a century before Pope John Paul mediated a treaty that brought peace to the region.

Through her Beagle Channel project, Cox sought to fortify the friendship between Argentina and Chile. The countries coordinated Cox's swim and met in the middle of the channel to celebrate the success of the swim.

#90073u2961 03/14/1990 ~United Press International

HUNTINGTON BEACH, CA (MARCH 14) UPI - After spending at least $17 million in cleanup costs, the last 3 1/2-mile stretch of beach fouled by a nearly 400,000-gallon oil spill was reopened Wednesday.

Chuck Webster of British Petroleum, which owned the oil that gushed from the tanker American Trader Feb. 7, was among the first to return to the waters.

''He promised to go swimming when the oil spill was all over,'' city spokesman Dennis Williams said. ''I was taking pictures and was putting a new roll of film in my camera when I turned around and he was in the water.''

Williams said the two sections of beach reopened Wednesday included a 2 1/2-mile stretch from Golden West Street to the Bolsa Chica State Beach and a one-mile section from Magnolia Street to the Santa Ana River jetty.

He said a total of 8 1/2 miles of Huntington Beach sands were closed because of the 394,000-gallon spill off the Orange County coast.

In all, some 16 miles of Southern California beaches were closed by the oil that gushed from the tanker's hull when the ship apparently struck its

own anchor while trying to dock at an underwater pipeline two miles off the coast.

The other beaches were reopened March 10.

Williams said before reopening the beaches, authorities examined the sands for any signs of oil residue.

Once city, state and federal officials were satisfied with the appearance of the beach, experts from Med-Tox of Anaheim, Calif., took soil samples for chemical analysis.

''The tests determined that the sands on the beaches were within county and federal levels of toxic hydrocarbons,'' Williams said.

Huntington Beach officials were still totaling up the city's costs for the cleanup, Williams said.

British Petroleum has spent more than $17 million to clean up the oil and beaches, although the costs ultimately will be paid by the American Trading Transportation Co. of New York, owner of the crippled tanker.

BP officials said ASI, a local contractor, has been hired to perform follow-up shoreline surveillance and other long-term activities relating to the spill.

The state Lands Commission last week opened the first public inquiry into the tanker accident. An American Trading official told the three-member panel the firm would pay all costs relating to the spill, including claims from residents and merchants who lost money due to the tanker mishap.

The ship company has a $500 million insurance policy to cover oil spills, the commission was told.

Besides soiled beaches, more than 700 birds died as a result of the spill.

-30- 2776

#90073u2978 03/14/1990 ~United Press International

(MARCH 14) UPI - Soviet Parliament prepares to choose a new president... a communications satellite lost in space... Oliver North ends Iran-Contra testimony... and a call for higher child-care standards. U-P-I has the latest, next:

Mikhail Gorbachev is assured of becoming the first executive president of the Soviet Union. He's the only candidate for the post created yesterday by the Soviet Parliament.

Two other candidates were nominated, but they withdrew... leaving the Communist Party general secretary unopposed for what will eventually become the country's most powerful political post.

The parliament voted to enter Gorbachev as the only candidate. The actual parliamentary vote for president is to take place tonight.

The Soviet lawmakers earlier defeated an opposition proposal calling for a nation-wide election for the presidency. That means the first executive president is picked by parliament, and later presidents will be chosen by national election.

A nation-wide poll announced on Soviet T-V last night said 84 percent of the people wanted a general election for the presidency.

An uninsured 140-Million-dollar communications satellite appears to be lost in space. The high-power relay station was launched from Cape Canaveral aboard a commercial Titan-3 rocket earlier today with NO apparent problems.

But this afternoon, a spokeswoman for Titan-builder Martin Marietta Aeronautics Group said initial data suggests that the satellite did NOT separate from the second stage of the rocket as planned.

The satellite is owned by the Intelsat- the 118-nation International Telecommunications Satellite Organization. Hughes Aircraft built the four-story drum-shaped satellite, which is equipped to handle 120-thousand telephone calls simultaneously.

If radio contact with the spacecraft canNOT be re-established, Intelsat will be faced with a 270-Million-dollar loss.

Officials privately say there could be a problem with an on-board rocket, a glitch that could have put the satellite into an unstable orbit. But, they aren't ruling out the possibility of locating the satellite and fixing whatever problems exist.

-30- 2344

#90073u3000 03/14/1990 ~United Press International

(MARCH 14) UPI - Oliver North has ended his four days on the stand at John Poindexter's Iran-Contra trial in Washington, D-C.

Near the end of his testimony, the retired Marine Lieutenant Colonel conceded to prosecutors that his former White House boss was at the center of all aspects of the scandal.

Defense attorneys earlier argued that North frequently acted behind

Poindexter's back in selling missiles to Iran and providing arms and money to the Nicaraguan Contra rebels.

But North told prosecutor Dan Webb that Poindexter knew about the secret plan to help the Contras. He also said Poindexter was one of the White House officials in charge of the arms-for-hostages deals with Iran and was involved in trying to conceal both operations.

Poindexter was national security adviser under Ronald Reagan. He's chargad with five felony counts of lying to Congress and obstructing its probe of the scandal.

Turbulent weather slammed into the southern Plains today. Storms battered Oklahoma and Texas. Tornadoes in central Texas turned cars upside down and toppled telephone poles, but NO injuries were reported.

Outside Chicago, heavy thunderstorms pushed a river over its banks. The mayor of the suburb of River Grove urged residents to clear their basements of valuables.

Elsewhere in the nation's mid-section, residents cleaned up after tornadoes that destroyed homes and killed two people yesterday.

65 National Guardsmen were sent to central Kansas, which was hit by tornadoes that stretched along a band 100 miles long. A witness said- ''The streets are just littered with trees and debris.''

Dozens of people were reported injured in yesterday's tornadoes. In Nebraska, farm animals were running loose after winds ripped apart fences. Train cars that were tipped over during the storms littered railroad tracks.

#90073u3045 03/14/1990 ~United Press International

(MARCH 14) UPI - Members of Congress are sharply critical of Defense Secretary Cheney's proposal to close 35 U-S military bases.

Lawmakers say opposition to the plan is going to be- quote- ''ferocious.''

Pentagon officials were on Capitol Hill today to testify on the plan for the first time and were met by lawmakers from both parties who staunchly oppose the idea.

Republic Congressman Arthur Ravenel of South Carolina noted that it's an election year and that any plan to close down a particular base will ''dislocate'' that district's congressman, unless he does everything to keep the base open.

Ravenel said- ''One-thousand angels sent down from heaven'' wouldn't help a congressman who allows a base to be closed in his or her district.

The 35 bases that Cheney has targeted to be closed are in addition to 86

bases picked for closing last year by a bi-partisan commission and approved by Congress.

The South African government today unveiled a 27-point-eight-BILLION-dollar budget that maintains tight fiscal policies to counter international economic sanctions. But it adds one-BILLION dollars to social spending for blacks, up from 749-Million dollars last year.

The South African finance minister presented the budget to a joint session of parliament today as the first under President Frederik de Klerk's five-year racial reform program.

The program aims to re-structure the economy, reduce inflation that stood at 15 percent last year and meet foreign debt payments. The finance minister says social spending will increase by one percent, down from two percent last year, and urges the already strained private sector to create more jobs.

The finance minister says the economy must be re-structured so the ''entire South African population'' can enjoy higher living standards as quickly as possible.

(MARCH 14) UPI - Talks on German re-unification began today in Bonn, and it was agreed that Poland would be invited to join in when matters affecting its borders are discussed. The six main participants in the talks are Britain, France, the United States, the Soviet Union and the two Germanys.

Soviet Parliament members vote for the country's first executive president today. Mikhail Gorbachev is the only candidate and it's certain lawmakers will elect him to fill the new post of ''super-president.''

A 140-Million-dollar communitations satellite that appears to be lost in space may be attached to the second stage of a Titan-3 rocket. A spokeswoman for Martin Marietta Aeronautics in Denver... manufacturer of the rocket... says initial information suggests separation did NOT occur.

The United States and Romania have signed an 80-Million-dollar food aid agreement. The pact comes with the understanding that the Romanian government will move toward democracy and establish a free-market economy.

House Democratic leaders met today to discuss the defense budget. They say there's a consensus building in favor of making small cuts in defense spending now... which will lead to greater savings in a few years.

Former President Carter is in Syria on the second leg of a four-nation Middle East tour. Carter says he hopes Syria will use its influence to help free the Western hostages held in Lebanon.

In Alaska, Susan Butcher won her fourth Iditarod Trail Sled Dog Race today. She drove her inexperienced dog team across the finish line in Nome... covering the 11-hundred-61 miles in record time of 11 days, one hour, 53 minutes and 23 seconds.

Officials say a U-S-bound Northwest Airlines jet landed safely back in Scotland today after the crew reported a possible electrical problem. The crew decided to return to Prestwick shortly after takeoff. NO injuries were reported.

#90073u3551 03/14/1990 ~United Press International

(MARCH 14) UPI - Poland apparently will join talks on German reunification. The first session of those talks began today in Bonn, and it was agreed that Poland would be invited to participate when matters affecting its borders are discussed. Poland is concerned that a united Germany might seek to reclaim territories given over to Poland when Germany lost World War Two.

Oliver North ended four days of testimony at the Iran-Contra trial of John Poindexter today, conceding to prosecutors potentially damaging evidence regarding the actions of his former White House boss. North admitted that Poindexter... President Reagan's national security adviser... was one of the White House officials in charge of the plan to arm the Contras and the arms-for-hostages deals with Iran. The former Marine said Poindexter was involved in trying to conceal both operations.

Syrian troops converged on west Beirut today to end two days of intense fighting between two warring Shiite Moslem factions. And rival Christian forces continued to trade sporadic gunfire, despite on-going negotiations to end their struggle.

Vice President Quayle and Cuba's Fidel Castro will both be in Brazil tomorrow, but Quayle says there will be NO meeting between the two. They are attending the inauguration of Brazil's President-elect Fernando Collor de Mello. Quayle's comment came at a news conference in Buenos Aires, Argentina.

#90073u3761 03/14/1990 ~United Press International

(MARCH 14) UPI - An uninsured 150-Million-dollar communications satellite

is stranded in space after being launched from Cape Canaveral this morning. The satellite failed to separate from the second stage of a Titan-3 rocket and was left in a safe but useless orbit. It's a major failure for the U-S commercial space program, and officials say they may request a shuttle satellite-rescue mission.

The White House says it has received reports from Italy that fire has broken out at a plant in Libya suspected of making chemical weapons. But spokesman Marlin Fitzwater says the Bush administration has NO independent confirmation that the Rabta plant was burning. He denies any U-S involvement in the fire. The plant... 60 miles south of Tripoli... came back into the news recently after U-S sources claimed it had resumed making chemical weapons.

Mikhail Gorbachev is expected to be elected as the Soviet Union's first executive president. The Soviet parliament today voted for the nation's ''super-president'' and Gorbachev stands as the lone candidate. Lawmakers earlier defeated an opposition plan that would've placed the election before the Soviet people. But, a nationwide poll announced on Soviet television found 84 percent of the people wanted the post filled by a general election.

Striking West Virginia teachers have defeated a seven-point proposal from Governor Gaston Caperton. The two major unions representing the teachers say the proposal is ''deficient in several areas.'' The week-long strike, illegal under West Virginia law, has closed schools in 27 of the state's 55 counties. Teachers say Caperton is reneging on a promise to provide 35-Million dollars for a five percent pay increase and extra funds for health insurance.

-30- 1923

#90073u3821 03/14/1990 ~United Press International

(MARCH 14) UPI - Authorities in Colombia say gunmen broke into the house of a newly elected legislator in an attempt to kidnap her, but they were attacked by police in a battle that killed nine gunmen. One suspect was captured in the battle near the Caribbean resort city of Santa Marta. The legislator, who was NOT home, is the sister of a drug suspect who's being held in the United States.

California State Attorney General John Van de Kamp says the controversial abortion pill sold in France should be tested by state health officials. The attorney general says if the pill is proven safe, it should be made available in California. There is considerable national debate regarding R-U-486, but Van de Kamp says the decision to sell the drug in America should be based on medical merit and NOT political pressure.

The campaign is officially under way for free elections in Romania. The

nation's interim parliament approved plans today to adopt a system of democratic government similar to the United States, with voting to take place May 20th. The election rules allow multi-party participation but state that the elected president must sever all party ties.

A University of Washington study of rape victims in the Seattle area shows that as many as one in five victims contracts a venereal disease in the attack. The study says rape victims should be instructed to seek treatment regularly after the attack to check for diseases that may have incubation periods of days or weeks.

-30- 1658

#90073u4042 03/14/1990 ~United Press International

(MARCH 14) UPI - The White House says it has received reports from Italy and other governments that fire has broken out at a suspected chemical weapons plant in Libya. Spokesman Marlin Fitzwater says the administration has NO independent confirmation of the fire. He also denies the United States... which has been critical of the plant... had anything to do with the incident. Fitzwater says Libya has closed its borders, indicating Libyan authorities don't want people entering the country.

NASA officials say there is little chance the busy space shuttle schedule will be reshuffled for the rescue of a communications satellite left in a useless orbit following a failed launch this morning. The 150-Million-dollar Intelsat-6 satellite failed to separate from a TitanS commercial space program.

Oliver North concluded four days of testimony in the Iran-Contra trial of John Poindexter in Washington, D-C, today. Prosector Dan Webb hammered away at the former Marine in an attempt to disprove defense arguments that North is to blame for the scandal. But North finally admitted that Poindexter, the former national security adviser, was at the center of almost all aspects of the covert operation.

A federal appeals court in Washington, D-C, today rejected a motion by opponents of the Seabrook nuclear power plant to prevent the New Hampshire facility from firing up its reactors. The court upheld the Nuclear Regulatory Commission's March 1st decision to grant a full-power operating license to the controversial plant. The effective date of the N-R-C order is tomorrow. Opponents say they'll appeal today's ruling.

-30- 1795

#90073u4096 03/14/1990 ~United Press International

(MARCH 14) UPI - Tornado-ravaged towns in the Plains and Midwest are cleaning up in the wake of yesterday's twisters that demolished houses, killed two people and injured dozens of others. In central Nebraska, many

farm animals are running loose after winds tore their fences down. Texas experienced violent weather this morning when two tornadoes touched down in the central part of the state. Authorities report property damage but NO injuries.

Israel's coalition government faces a NO-confidence vote tomorrow. The nation's Supreme Court declined to step in and force the vote to take place today... giving the Likud Party extra time to prepare. The rival Labor Party had sought to seize the political initiative with a NO-confidence vote today, in hopes of quickly forming a new ruling government.

Texas Treasurer Ann Richards and Attorney General Jim Mattox say their nasty rivalry may intensify as both prepare for a run-off race April 10th to decide who'll be the Democratic gubernatorial candidate in November. The nominee will face flamboyant oilman Clayton Williams, who walked away with the Republican nomination in yesterday's primary elections.

A 12-year-old burn victim is in critical but stable condition after undergoing skin-graft surgery at a Manhattan hospital today. Clergy held a prayer vigil for David Aupont... who last week was tied up and burned by a teen-ager described as a neighborhood bully. The brutal attack left David with second- and third-degree burns on more than half of his body. The youngster's plight has brought an outpouring of sympathy from people nationwide, including President Bush.

-30- 1808

#90073u4281 03/14/1990 ~United Press International

(MARCH 14) UPI - Oliver North completed four days of testimony in the trial of John Poindexter today. The former Marine grudgingly gave prosecutors potentially damaging evidence against his former White House boss.

North told prosecutor Dan Webb that Poindexter, national security adviser in the Reagan administration, was heavily involved in the Iran-Contra affair. North said Poindexter was one of the White House officials who masterminded the arms-for-hostages deal with Iran and the plan to arm the Contras.

North further testified Poindexter was involved in trying to cover up both operations.

53-year-old Poindexter is charged with five felony counts of lying to Congress and obstructing its investigaton of the Iran-Contra scandal.

North's former secretary, Fawn Hall, also testified today. Under a grant of immunity from additional prosecution, Hall said she altered key White

House documents at North's direction. But, she said Poindexter did NOT know about the changes.

A federal appeals court in Washington has upheld the Nuclear Regulatory Commission's decision to grant a full-power operating license to the Seabrook nuclear power plant in New Hampshire.

Today's ruling, subject to future legal appeals, came as opponents of the plant attacked the N-R-C at a House subcommittee hearing focused on the March 1st decision to open the plant.

A spokesman for the plant's owner, New Hampshire Yankee, said- quote- ''We received the license because we deserve it.''

But opponents say they're prepared to continue their struggle against the nuclear plant. Massachusetts Democratic Senator Edward Kennedy says the N-R-C is a ''rogue agency,'' more concerned with preserving nuclear energy than protecting the public's health.

Opponents of the Seabrook plant are concerned about the utility's emergency evacuation plan for New Hampshire and Massachusetts' communities within 10 miles of the plant. The commission says the plan is adequate but many believe people could NOT be evacuated properly or in time.

-30- 2220

#90073u4296 03/14/1990 ~United Press International

(MARCH 14) UPI - Mikhail Gorbachev is almost certain to be named executive president of the Soviet Union tomorrow.

The Soviet Congress of People's Deputies set the stage for the announcement by voting today to put Gorbachev's candidacy to an immediate vote and by seeing to it that Gorbachev is the only candidate.

Two other candidates were nominated, but both withdrew.

The new post of executive president- a post so powerful it's been described as a ''super-presidency''- is one of a series of new reforms recently adopted in the Soviet Union. In creating the new post, the government set the stage for popular presidential elections in upcoming years, but the first executive president was to be elected by Congress.

That proposal caused the most debate. A poll released on Soviet television yesterday said 84 percent of the populace wanted an immediate vote to fill the post.

But Gorbachev's supporters successfully argued today that- with various republics threatening to secede- the nation is in a state of crisis,

requiring a powerful executive. They argued there's NO time for a costly and time-consuming election campaign.

The so-called ''two-plus-four'' talks on German re-unification got under way today in Bonn, West Germany.

The talks bring together representatives of the four World War Two allies- Britain, France, the Soviet Union and the United States- along with East and West Germany. They'll try to establish a process whereby the two Germanys might be re-united.

The process is expected to set up a popular vote, pro or con, within the German nations on re-unification. But it also will concern thornier issues such as the military role of a re-united Germany- whether it would be in NATO or the Warsaw Pact... or whether it would instead be forced to stay neutral.

NO real progress is expected until after East German elections set for next Sunday.

But the six nations did decide today to allow Poland to participate in the talks when the discussions concern the borders of a re-united Germany.

The West German foreign minister described today's meeting as ''a moving event for Germans.''

-30- 2336

#90073u4319 03/14/1990 ~United Press International

(MARCH 14) UPI - Greece's second-largest bank and 13 of its employees in the United States have been indicted by a federal grand jury on charges of ''blatant'' money laundering of Millions of dollars.

U-S District Court in Brooklyn accuses the National Mortgage Bank of Greece and 13 employees of accepting Millions of dollars in illegal deposits, often from customers toting suitcases full of cash.

U-S Attorney Andrew Maloney adds The bank and its employees also are charged with conspiring to defraud the Internal Revenue Service.

Maloney says- ''This is perhaps the boldest and most blatant form of institutionalized money laundering we have ever encountered.'' Maloney says the bank and its employees set up policies and procedures designed to violate American laws and then advertised their illegal services.

12 of the bank employees, all Greek citizens, were arrested in June after a nine-month undercover operation code-named ''Operation Zorba.'' One suspect is a fugitive and believed to be in Greece.

A team of Japanese engineers has developed a material that might revolutionize the construction of dams and tunnels, while offering a safer substance for buildings in areas threatened by earthquakes.

The material is a combination of liquid components that soldifies when they are combined, resulting in a solid, waterproof, but flexible substance.

It resembles asphalt and has been dubbed ''Aquaphalt.''

Researchers have published a study showing that Aquaphalt's shock-absorbing qualities make it perfect for tunnels and dams, while it should also function well- quoting here- ''to cushion the shock from earthquakes,'' both in the construction of buildings and in firming their foundations.

NO cost estimates were given for Aquaphalt, but it may soon be tested in Japan's planned Tokyo Bay Tunnel.

#90073u4389 03/14/1990 ~United Press International

(MARCH 14) UPI - The Hollywood Radio and Television Society handed out its ''Best of Three Decades'' broadcast advertisement awards in Los Angeles this evening... celebrating the society's 30th anniversary.

The best broadcast ads over the past three decades were the 1987 Pepsi Cola ads starring Michael J. Fox and a series of Excedrin radio ads in 1967.

The Pepsi ''Apartment 10-G'' ad won the society's 1987 Sweepstakes award as the best television commercial of that year.

The three Excedrin ads... featuring Dick Cavett, Louise Lasser, Bob Marcado and Charles Nelson Reilly... won the society's 1967 Sweepstakes award as the best radio commercials.

For 1989, the society gave its T-V Sweepstakes award to the ''Missing Link'' commercial for Diet Pepsi. The 1989 sweepstakes award for the best radio ad went to ''What's This,'' a spot for Carr Stores/Brach Candy.

The award for best series of T-V ads went to three commercials for Apple-MacIntosh computers.

The Society says those awards and 17 others drew some five-thousand entries from 60 nations, including the People's Republic of China.

#90073u4467 03/14/1990 ~United Press International
(MARCH 14) UPI - White House and State Department officials are checking out reports that a suspected chemical weapons plant in Libya has burned down. Presidential spokesman Marlin Fitzwater denies U-S involvement in the incident.

Fitzwater reports diplomatic sources as saying Libya has closed its borders. In Cairo, Egyptian foreign ministry sources confirmed Libya sealed its border with Egypt tonight. The sources do NOT know why the border was sealed.

Intelsat officials are reviewing their options after a communications satellite had trouble separating from the Titan-3 rocket carrying it into space today. The relay station is now in a safe but useless low-Earth orbit.

A spokesman for New Hampshire's Seabrook nuclear power plant was pleased with today's court ruling, upholding the Nuclear Regulatory Commission's granting of a full-power operating license. Opponents say they'll appeal the ruling by the Court of Appeals for the District of Columbia.

Mikhail Gorbachev is all but guaranteed to be elected the Soviet Union's first executive president. His is the only name on the ballot after two other candidates withdrew from the race. The Soviet parliament voted tonight, with results expected to be announced tomorrow.

The House Energy and Commerce Committee began work today on clean air legislation. Chairman John Dingell pledges to bring the bill to the full House before Easter. Senate leaders expect to complete floor action on their version of the clean air measure later in the spring.

-30- 1697
#90073u4475 03/14/1990 ~United Press International
(MARCH 14) UPI - Thunderstorms swept through Missouri and Texas today. Twisters hit central Texas, causing property damage but NO injuries. Officials in Neosho, Missouri, say winds in excess of 100 miles an hour caused an estimated one-Million 750-thousand dollars in damage.

Residents of Kansas, Oklahoma, Nebraska and Iowa cleaned up in the wake of yesterday's twisters that killed two people. In the East, a late winter heat wave broke temperature records for a fourth day.

Alaska's Redoubt Volcano erupted again today, sending a plume of ash 40-thousand feet into the air. The Alaska Volcano Observatory says the only significant ash fall was reported at the Drift River oil terminal, 20

miles away.

Los Angeles police have arrested a suspect in a bomb threat that forced the partial closure of the L-A International Airport control tower Monday. The evacuation delayed incoming and outgoing flights. NO bomb was found.

The lead singer for Big Twist and the Mellow Fellows is dead. Larry Nolan died early today of heart failure in Chicago. He was 53. Nolan was among the founding members of the band... which earned a reputation for upbeat, party-time rhythm and blues.

A-B-C will yank ''Elvis,'' the television series, from its schedule after Sunday night's episode. But network officials say the show about the early life of singer Elvis Presley will return at a later date.

-30- 1558

#90073u4592 03/14/1990 ~United Press International

(MARCH 14) UPI - Nations around the Mediterranean... as well as the United States... are closely monitoring events in Libya, where a plant suspected in the production of chemical weapons may have burned to the ground. There is NO official confirmation, but White House officials say Libya has closed its borders. U-S officials also deny any role in the fire- if indeed it has taken place.

A 150-Million-dollar communications satellite is stranded in a useless orbit after experiencing trouble separating from its Titan-3 rocket. And its owner, Intelsat, is considering asking NASA officials about the feasiblity of a shuttle rescue mission. The failure to deploy the satellite successfully is a major blow to the fledgling U-S commercial space program.

U-S officials claim they've traced the hostage-hoax phone call to a Iranian government office in Tehran. President Bush was embarrassed earlier this month when it was discovered that a phone conversation he had with a supposed Iranian official over the possible release of the hostages in Lebanon was actually a hoax. Bush has defended the conversation, saying- ''What's wrong with reaching out and touching someone, when the hostages are at stake?''

Haiti's interim President Ertha Pascal-Trouillot has successfully handled the first crisis of her day-old government. Air-traffic controllers at Haiti's international airport went on strike today against the nation's leading aviation official... saying he was a member of the secret police and that his office was riddled with corruption. A human-rights activist assigned to the strike by Trouillot quickly negotiated the removal of the aviation official.

-30- 1842
#90074b0006 03/15/1990 ~Business Wire

MINNEAPOLIS (MARCH 15) BUSINESS WIRE - Dayton Hudson Corp. Thursday reported record earnings for its fourth quarter and total year.

Fully diluted earnings per share increased 55 percent to $5.35 for fiscal 1989, the 53 weeks ended February 3, 1990, from $3.45 in 1988. Net earnings were $410 million, up from $287 million in fiscal 1988.

Revenues for the 53 weeks of fiscal 1989 were $13.64 billion. On a 52-week basis, total 1989 revenues for the corporation's three operating companies increased 14 percent over the same period last year, while comparable-store revenues increased 6 percent.

Fully diluted earnings per share for the fourth quarter increased 49 percent to $3.45, from $2.31 in the 1988 fourth quarter. Net earnings for the quarter were $250 million versus $182 million last year.

Revenues for the 14-week fourth quarter were $4.48 billion. On a 13-week basis, revenues for the corporation's three operating companies were up 13 percent over the same period a year ago and comparable-store revenues increased 5 percent.

Macke said each of the operating companies contributed at record levels during 1989. Each achieved strong comparable-store revenue growth during the year, with Target generating a major portion of the total growth by becoming a coast-to-coast retailer through its aggressive expansion in California and the Southeast.

Target posted its 15th consecutive year of record operating profit, with a 32 percent increase over 1988. Target's increased operating profit reflects strong sales growth, and improved margin and operating expense rates. (Operating profit is LIFO earnings from operations before corporate expense, interest and income taxes.)

Mervyn's continued to expand in current markets while improving revenue from its existing stores. Mervyn's operating profit increased 40 percent to a record level due to better inventory content and a lower markdown rate. For the fourth consecutive year, Mervyn's improved its operating expense rate.

Dayton Hudson Department Store Co. (DHDSC) benefited from growth in its base business. DHDSC's operating expense rate improved despite higher costs associated with the implementation of its program to deliver superior customer service. DHDSC's operating profit set a record in 1989, increasing 12 percent.

#90074b0013 03/15/1990 ~Business Wire

CHANDLER, AZ (MARCH 15) BUSINESS WIRE - ShareData Inc. Thursday announced that it has officially entered the game cartridge business by making its initial shipment of the ''Captain Comic'' game cartridges that are compatible with the Nintendo Entertainment System to The Movie Superstores Inc., an Arizona-based video rental chain.

ShareData also announced Thursday completion of the software development for the ''Chiller'' game cartridge which it expects to be available for shipment in five to seven weeks. Two other game cartridge titles, ''Death Race'' and ''Crossbow,'' are currently under development.

Sheldon L. Miller, chairman of ShareData said: ''We are delighted to have finally made our entrance into the game cartridge business and excited about our prospects for the future, particularly in light of the fact that ShareData is utilizing non-infringing technology acquired through a sales and technology agreement with Color Dreams Inc. Based on solid opinion letters from reputable counsel, ShareData is confident that 'Captain Comic ' 'Chiller,' 'Death Race,' 'Crossbow,' and any other cartridge based games developed utilizing this technology are in fact, non-infringing on any game cartridge hardware patents.''

Prior to entering a sales and technology agreement, ShareData received in writing an opinion of counsel from a major West Coast law firm that specializes in patents, copyrights and intellectual property as well as a copy of an opinion of counsel rendered to Color Dreams by another sizable West Coast firm specializing in the same field of law, both of which definitively stated that the technology which Color Dreams was assigning ShareData did not infringe on any patents investigated, all of which related to game cartridge hardware technology.

In light of its strong legal position, ShareData does not anticipate any litigation contesting its rights or that of its distributors to sell its game cartridge products and points to the fact that products utilizing the technology secured from Color Dreams have been in the marketplace unchallenged for a period of five months.

The company is not a licensee of Nintendo. The company's cartridge based games are not designed, manufactured, sponsored or endorsed by Nintendo. Nintendo and Nintendo Entertainment System are trademarks of Nintendo of America Inc.

ShareData designs, develops and markets computer software programs for microcomputers, including IBM, Apple, Commodores and the Nintendo Entertainment System. The Business Systems Division produces easy-to-use office productivity software and is currently marketing INTO, an integrated office system for PC-based local area networks.

VIENNA, VA (MARCH 15) BUSINESS WIRE - LEGENT Corp. (NASDAQ: LGNT) Wednesday announced that Glen F. Chatfield has resigned from the company.

Chatfield, who informed the company he would remain a member of LEGENT's board of directors, had resigned as chief executive officer in November 1989.

Chairman and chief executive Joe M. Henson said, ''The board and employees of LEGENT are grateful to Glen for the contributions he has made to this new company's development, and we wish him every success in the future.''

The chairman pointed out that Mario M. Morino, who with Chatfield co-founded LEGENT by merging Morino Inc., Vienna, with Pittsburgh's Duquesne Systems Inc. in March 1989, continues to remain active with the company, as does Neal M. Pollon, Duquesne's former president who is now vice chairman of LEGENT.

LEGENT Corp. (NASDAQ symbol: LGNT) is one of the largest independent developers and marketers of systems software, with more than 40 products in the important operational areas of information systems (I/S) management performance, networking, organization and management support.

With principal offices in Pittsburgh and Vienna, LEGENT services its customers from 12 locations throughout the United States and Canada and in some 30 countries.

ARVADA, CO (MARCH 15) BUSINESS WIRE - KD Kanopy Inc., the Colorado-based manufacturer of architectually-designed specialty tents, Thursday announced the appointment of Tom Peck as director of marketing, southwest region, and Lawrence Pfent as controller.

Pfent joins KD Kanopy from Martin Marietta. Peck has been serving as a merger-acquisitions specialist with GVA Financial Inc. in Phoenix.

Peck's responsibilities with KD Kanopy will primarily be the establishment of a direct sales network for an area designated as the southwest region, which includes California, Arizona, Nevada and Hawaii.

After receiving an undergraduate degree from the University of Wyoming and a graduate degree from the Southwestern Graduate School of Banking, Peck has held various executive-level positions with several banks in the west.

Also, Peck has been involved in several business ventures where he has gained extensive marketing experience. In recent years, Peck had conducted seminars on marketing concepts that work in today's customer service-driven economy.

Pfent earned his bachelor of science degree from Regis College, Denver. In addition, Pfent has two masters of business administration degrees from Regis: finance/accounting and information systems management.

With a broad knowledge of various computer systems, Pfent has six years of experience in cost and financial budgeting and analysis. Pfent's responsibilities with KD Kanopy will include the evaluation of the financial data of KD Kanopy for business management purposes.

Established in 1984, KD Kanopy Inc. is a leader in the design, manufacture and distribution of colorful, multi-purpose portable shelters and special events products.

NEW YORK (MARCH 15) BUSINESS WIRE - Vision Energy Resources Inc., a wholly owned subsidiary of Metro Mobile CTS Inc. (AMEX:MMZ.A, MMZ.B) has announced that it will sell the assets of Southern Gas Co., a small natural gas utility in Sarasota in exchange for several propane properties of Peoples Gas System Inc., of Tampa, Fla., and an undisclosed amount of cash.

The sale of Southern Gas is scheduled to take place on or about March 21.

As part of the agreement, Vision will acquire from Peoples the assets and operations of A-1 Gas, its propane company based in Fort Myers. This will provide Vision Energy with properties which sell and distribute propane in

Fort Myers, Naples, LaBelle, Atlantic Beach, Neptune Beach and Jacksonville Beach. The transaction will be completed on or about May 1.

Southern Gas Co. was acquired by Vision Energy in July 1989. It is Vision's sole natural gas unit and serves Sarasota, Bradenton, Palmetto and Long Boat Key.

''The exchange of natural gas for propane volume fits our primary business strategy and increases our market share in Florida,'' said Adam M. Lindemann, president of Vision Energy. ''These propane acquisitions will complement our existing operations and make us one of the largest propane marketers in the state.''

SAN JOSE, CA. (MARCH 15) BUSINESS WIRE - Digital Microwave Corp. (NASDAQ, NMS:DMIC) announced Thursday the receipt of a $2.9 million order from Celcom Sdn Bhd of Malaysia, for the supply of 10 and 13 GHz digital microwave radios.

Shipments are scheduled to begin immediately.

''We chose Digital Microwave Corporation because the demand for cellular service is increasing rapidly and our ability to meet the demand is highly dependent on the quality and dependability of our suppliers and their equipment,'' commented Rosli bin Man, general manager of Celcom.

Celcom operates the ART 900 mobile telecommunications network in Malaysia. ART 900 is based on the UK-developed E-TACS standard.

''This award from Celcom emphasizes the importance of cellular communications worldwide and reaffirms that DMC is a major supplier to the cellular market both in North America and overseas,'' commented William E. Gibson, president and chief executive officer of Digital Microwave Corp.

Headquartered in San Jose, Digital Microwave Corp. is a leading supplier of high performance short-haul transmission products to domestic and international markets.

SPOKANE, WA. (MARCH 15) BUSINESS WIRE - Key Tronic Corp. (NASDAQ: KTCC), the leading manufacturer of keyboards and other computer products, Thursday announced plans to manufacture laptop computers for OEM customers.

''Our OEM customers require flexible, high-volume production capabilities in the burgeoning portable computing market,'' stated A.T. (Fred) Zirkle, Key Tronic president. ''With our design and worldwide manufacturing experience, providing laptops and handheld computers is a logical step for Key Tronic.''

The company already produces laptop expansion stations, a diskless PC and custom application PCs for stock trading and factory data collection. Last fall, Key Tronic also announced Key Image, an upgraded Image Processing System for customers in the banking industry.

According to Zirkle, initial discussions with Original Equipment Manufacturers (OEMs) are focused on a family of notebook-sized 286 microprocessor laptops and a 386SX laptop that runs on AA batteries. The first notebook computer is scheduled to be released this summer.

''While Key Tronic is best known as the world's largest independent manufacturer of computer keyboards, its role has expanded from that of components manufacturer to technology packaging vendor,'' stated Ray Riccardi, Systems Products Marketing manager for Key Tronic.

''The increased demand for smaller-sized, light-weight computers requires innovative packaging. This provides significant opportunities for Key Tronic since the industry is facing a shortage of packaging design and plastic tooling capacity. Key Tronic's role as a packaging vendor complements the worldwide manufacturing services we presently provide OEMs '' Riccardi added.

Key Tronic's systems design and custom manufacturing expertise includes: sheet metal, tooling, injection molding, printed circuit boards, and paints and finishes. Customers may select any one or all of the services offered by Key Tronic.

Key Tronic, which recently celebrated the 20th year of its founding, operates manufacturing facilities in Spokane and Cheney, Wash.; Dundalk, Ireland; and Hsinchu, Taiwan.

VANCOUVER, BRITISH COLUMBIA (MARCH 15) BUSINESS WIRE - Avino Mines & Resources Ltd. (VSE:AVO, NASDAQ:AVMRF) Thursday reported its third consecutive year of record silver and gold production from the company's jointly-owned Avino mine in central Mexico.

Silver production for 1989, at 873,000 ounces, was 56 percent higher than in 1988. Gold production totaled 3,900 ounces, a 69 percent increase from the previous year. Since 1987, silver and gold production have increased by more than 83 percent and 82 percent, respectively. Avino President Louis Wolfin attributed the higher figures primarily to investments in plant and equipment and improved water supplies.

The Avino silver mine, located near Durango, Mexico, is owned and operated by Cia Minera Mexicana de Avino S.A. de C.V. in which Avino Mines & Resources owns a 49 percent interest. The mine has operated continuously since 1974, but until recently has been hindered by a lack of capital and chronic water shortages.

Assisted by a US $1.14 million loan from the Mexican Mining Promotion Commission, new management began in 1988 to upgrade and repair the mine's heavy equipment and milling facilities. The water problems were virtually eliminated the same year when management, working with the Mexican Agriculture and Hydraulic Resources Department, rehabilitated a large nearby reservoir.

Further production increases are expected in 1990.

Based in Vancouver, British Columbia, Avino Mines & Resources Limited is an international resource company with mineral interests in Canada and Mexico. The company's shares trade on the U.S.NASDAQ system (AVMRF) and the Vancouver Stock Exchange (AVO.V).

DENVER (MARCH 15) BUSINESS WIRE - George K. Hansen, chairman of the board and chief executive officer of Bayly Corp. Thursday announced the results of operations for the first fiscal quarter ended Jan. 31 as follows.

Hansen discussed the quarterly results, indicating that: ''The company completed a refinancing on Jan. 5 which exchanged $15 million of outstanding debt for $15 million of preferred stock while simultaneously replacing its previous working capital facility with a three-year revolving factoring/financing loan that permits increased borrowing of up to $20 million.

''Total costs of approximately $1 million were incurred to accomplish this refinancing. Bayly's quarterly operating results continue to improve. The loss for the first quarter of 1990 of $1,215,000 on net sales of $15,332,000 was $1,379,000 less than the $2,594,000 loss for the same quarter of 1989 on slightly higher net sales of $15,811,000.

''The improvement was primarily due to an increase of $1,370,000 in gross margins for the period. Gross margin percentages increased from 20 percent to 30 percent for 1990's first quarter on improved sales mix and lower production costs.

''In February 1990 the executive management was restructured to provide the organization and leadership needed to meet Bayly's new challenges. Everett G. Warren, a director of the company since August 1988, was named president and chief operating officer while I became chairman of the board.

''To provide more focus to our merchandising/sales efforts for Branded products, Jerrold Hair was selected to concentrate on OP product merchandising while Edward Calligan focuses exclusively on growth of the O'Neill brand,'' Hansen said.

Headquartered in Denver, Bayly Corp. (NASDAQ:BAYL) designs, manufactures and sells young men's wear under license from Ocean Pacific (Op) Sunwear Ltd., men's and boy's sportswear under the nationally known brand name of O'Neill, as well as private-label apparel.

Bayly's customers include major department and specialty stores for its branded products and mass merchandisers and other retailers for its private-label apparel.

AGOURA HILLS, CA (MARCH 15) BUSINESS WIRE - Fortune Petroleum Corp. (NASDAQ:FPEX) announced Thursday that it is a participant in the drilling of an exploratory oil prospect on its Montebello lease in late March.

The 9,500-foot test well will be drilled by Trio Petroleum of Bakersfield, acting as operator on behalf of itself, Benton Petroleum, Oregon Natural Gas and Transpacific Exploration.

Fortune will participate through a farmout of its 20 percent working interest, which will retain a 2 percent carried working interest until payout at which point Fortune will convert to an 8 percent working

interest participation. The participating group will drill and test the well, the Trio Petroleum ''Benton-Montebello'' 2-6 redrill, at no cost to Fotune.

Dan E. Pasquini, president of Fortune Petroleum, said, ''We are pleased to participate in the drilling of this prospect.'' If successful, it is estimated that recoverable reserves of between 10 and 20 million barrels could be discovered. Pasquini noted that the prospect is located within a 500-acre land block and, should the test well prove successful, additional development drilling would ensue.

Fortune Petroleum is an independent oil and gas exploration and development company with its principal producing properties located in California.

PHOENIX (MARCH 15) BUSINESS WIRE - Arizona Land Income Corp. (ASE:AZL), an independent real estate trust, Thursday announced earnings for the year ending Dec. 31, 1989.

The company also announced earnings for the three month period ending Dec. 31, 1989.

The company reported gross revenues of $3,471,000 for the year. Net income for the year was $2,255,000 and earnings per share were 82 cents. This contrasted to total income of $1,759,000, net income of $1,689,000, and earnings per share of 62 cents for the period from June 13, 1988 (inception) to Dec. 31, 1988. For the year ended Dec. 31, 1989, the company declared 81 cents per share in dividends vs. 60 cents for the period from inception to Dec. 31, 1988.

For the operating period of Oct. 1, through Dec. 31, 1989, the company had gross revenues of $679,000 and net income of $412,000 or 16 cents per share. A dividend of 8 cents per share was paid Jan. 16, 1990 to shareholders of record Dec. 30, 1989.

This contrasted to gross revenues of $839,000 and net income of $785,000 or 28 cents per share for the period from Oct. 1 through Dec. 31, 1988.

SAN JOSE, CA (MARCH 15) BUSINESS WIRE - Pacific Western Bancshares Inc. (ASE:PWB), the parent company of Pacific Western Bank, announced Thursday the appointment of Elinor Mansfield as vice-chair of the bank's board of directors.

Mansfield is one of a handful of women in the state to hold a position at this level within a banking institution.

Mansfield joined the board of directors of Santa Cruz's County Bank and Trust in 1983 and then was appointed to the board of Pacific Western Bank when the two banks merged in August of 1986. Since the merger she has served on several of the bank's most active board committees, including the loan committee.

In addition to her work with the bank, Mansfield is the director of administration and the staff board liaison for the Los Altos-based Sempervirens Fund, a land conservancy for the preservation of redwood park lands in the Santa Cruz mountains.

She is also past president of the Palo Alto branch of the American Association of University Women (AAUW) and works with the California Transcribers and Educators of the Visually Handicapped.

''A great deal of Pacific Western's continuing success is due to our commitment to serving the community,'' said Phillip R. Boyce, Pacific Western Bancshares' chairman and chief executive officer. ''Not only does Ms. Mansfield mirror that commitment but during her more than seven years of service on the board she has repeatedly demonstrated a strong knowledge of our business.''

Mansfield holds an undergraduate and law degree from Stanford University. She is also a member of the State Bar of California.

Pacific Western Bancshares Inc. is a bank holding company. Through its non-bank subsidiaries, the company offers trust and asset management services, and financially oriented data processing and software development services. The holding company's Pacific Western Bank has 21 offices in three counties serving California's Santa Clara Valley and Monterey Bay area.

SANTA FE SPRINGS, CA (MARCH 15) BUSINESS WIRE - McFarland Energy Inc. (NASDAQ:MCFE) announced that its wholly owned subsidiary, Carl Oil and Gas Co., has acquired various oil- and gas-producing properties located in South Louisiana from LGS Exploration Inc., a subsidiary of Louisiana General Services Inc.

Carl paid $4.2 million for the properties, consisting primarily of LGS-operated interests in 53 producing oil and gas wells, leases and related equipment located in 12 parishes in South Louisiana. The transaction closed on March 8, 1990, but is effective, for purposes of allocating income and expenses, as of Dec. 31, 1989.

The properties currently produce approximately 2,000 MCF and 250 barrels per day net to the interests acquired. Carl will succeed LGS as operator of the interests.

McFarland Energy Inc. is a California-based oil and gas company with headquarters in Santa Fe Springs and interests in over 500 wells located primarily in the San Joaquin Valley of California, and Louisiana.

Carl Oil & Gas Co. is based in Corpus Christi, Texas, and is actively involved in developing and drilling oil and gas exploration prospects and acquiring producing properties in the Texas, Louisiana and Mississippi Gulf Coast region.

SALT LAKE CITY (MARCH 15) BUSINESS WIRE - Stuart R. Havenstrite has announced his resignation as president but will remain as a director of Salt Lake City-based Alta Gold Co. (NASDAQ:ALTA), according to Dan S. Bushnell, chairman and chief executive officer.

Bushnell said, ''Naturally, we are going to miss the 19 years of valuable knowledge and experience Mr. Havenstrite provided. We have already begun the process of finding his replacement. Meanwhile, our field operations are in excellent hands and gold and base metals production continues as expected.''

Havenstrite indicated he intends to establish his own mining engineering and consulting service and will continue as a consultant to Alta Gold.

He joined Alta Gold's predecessor Silver King Mines Inc., in 1971 as vice president and chief geologist and in 1981 was named executive vice president of the other Alta Gold predecessor, Pacific Silver Corp., and eventually became its president.

In 1987, he was named president of Alta Gold Co. and subsequently assumed the additional duties of chief operating officer.

SAN FRANCISCO (MARCH 15) BUSINESS WIRE - Bank of America has named William B. Morrow, manager of its Europe, Middle East and Africa Division's corporate finance activities, a senior vice president. Morrow, 42, is responsible for syndicated credit products, project and export finance, leveraged finance, mergers and acquisitions and specialized trade finance. He reports to Gerald Doherty, Senior Vice President and head of Capital Markets, Corporate Finance and Bank of America International Ltd., the bank's London-based merchant banking subsidiary.

Morrow, who joined the bank in 1979, assumed his corporate finance responsibilities in London last June. Prior to that, he had served as a senior team leader of the bank's Leveraged Finance Group in New York for two years.

He has also worked as an account officer in Los Angeles, a senior account officer in New York and was senior manager responsible for global relationship management of chemical multinationals, also in New York.

Born in Worchester, Mass., Morrow holds a BA in English from Bucknell University in Lewisburg, Pa., a masters in education from George Washington University, in Washington D.C., and an MBA in finance from the Wharton School of Business at the University of Pennsylvania. From 1974 to 1977, he served as a Peace Corps budget officer for Latin America in Washington D.C.

SUGAR LAND, TX (MARCH 15) BUSINESS WIRE - The board of directors of Imperial Holly Corp. (AMEX:IHK) Thursday declared a 3-for-2 stock split to be effected in the form of a stock dividend.

One share of the company's common stock, without par value, will be distributed with respect to each two shares of common stock outstanding at the close of business on March 26. This stock will be distributed on April 17. Fractional shares will be paid in cash.

In addition, the Imperial Holly board increased the quarterly dividend 25 percent from the equivalent of 8 cents per share to 10 cents per share (post-stock split). This increased dividend of 10 cents per share on the common stock is payable April 17 to shareholders of record at the close of business on March 26. This cash dividend is payable on all shares including the additional shares issued as a result of the 3-for-2 stock split.

CHATSWORTH, CA. (MARCH 15) BUSINESS WIRE - Datametrics Corp. (ASE:DC) Thursday announced operating results for the first quarter ended Jan. 28.

The company reported that revenues advanced to $6,635,513 from $5,799,928 reported for the first period of 1989. Net income for the quarter was $136,733, or 2 cents per share, in contrast to a loss of $1,229,440, or 35 cents per share, for the 1989 first quarter.

Sidney E. Wing, president and chief executive officer, said that the increase in revenues resulted primarily from improvements that have been implemented in manufacturing processes as well as increases in non-recurring engineering revenues. He attributed the turnaround in earnings performance to a significant reduction in the company's workforce and a planned decrease in research and development expenditures.

Wing noted, however, that Datametrics' heavy investment in research and development in recent years has resulted in the completion of a diverse printer product line that establishes the company as the recognized leader in the manufacture of military color printers.

He added that Datametrics has also developed a number of image enhancements for black and white printers that have received excellent customer response.

Commenting on the outlook for the remainder of 1990, Wing said, ''Based on our strong contract base, as well as the substantial cost reductions we have achieved, we are optimistic that Datametrics will experience continued earnings growth.

''Reinforcing that optimism is the fact that earlier this week we announced that the company has just been awarded two contracts totaling $8.2 million -- the largest single procurement in our history.''

Datametrics is a 27-year-old producer of computer peripherals for aerospace, defense and industrial markets. The company's products include mil-spec and ruggedized high-speed, non-impact printers, printer/plotters, teleprinters, high-density cartridge tape recorders, facsimile products and keyboards, all of which meet stringent requirements for operating under extreme variations in temperature, moisture, radiation, vibration and shock.

#90074b0115 03/15/1990 ~Business Wire

DALLAS (MARCH 15) BUSINESS WIRE - Brian J. Bolton, recently elected president and chief executive officer of Dallas Corp., Thursday announced that the company is changing its name back to Overhead Door Corp., its corporate name from its founding in 1921 through 1985.

Describing the motivation for renaming the company, Bolton explained: ''The 1980's was a decade of diversification for our company. Many diverse acquisitions were made. As this occurred, our original name no longer clearly identified our corporate composition. So, our name was changed to Dallas Corporation to symbolize and relate to the growth of our area at that time.

''Starting two years ago, we decided to refocus our emphasis back to our original and greatest strengths. This process continued through 1989, and will be our theme into the 90s. Because of this, our name should reflect our focus and direction -- primarily commercial, industrial and residential doors, and related construction products,'' Bolton continued.

Since 1985, when the corporate name was changed to Dallas Corp., the company's largest division has continued to operate as Overhead Door Corp. the leader in the garage door and opener industry. This division sells its products through a nationwide network of 400 distributors, which all display the Overhead Door name and its trademarked logo.

The company recently completed a merger transaction with Bessemer Capital Partners, a private investment firm based in New York City. Following the merger, in a previously planned management succession, Bolton succeeded Robert C. Haugh as president and chief executive officer of the company. Haugh, who held that office for 23 years, continues his long association with the company as vice chairman of the board of directors. Bolton rejoined the company in 1987 as executive vice president and chief operating officer. He had previously been employed with the company from 1973 until 1979, when he left his position as senior vice president to become president and chief operating officer of Aircondex Inc., Dallas.

Overhead Door Corp. is the nation's leading manufacturer of commercial, industrial, and residential doors and related products for the construction and transportation industries, and includes the Overhead Door Group, TODCO Products, and the Architectural Products Division.

MACEDONIA, OH (MARCH 15) BUSINESS WIRE - To all owners of Century 580 infant car seats models 4581, 4583, 4585:

Century Products has determined that a safety defect exists in the above referenced car seat handle when used as a carrier. This condition does not affect the car seat's crash worthiness.

When the carrying handle is rotated, occasionally the two Handle Retaining Screws loosen and sometimes back out. Should either of these screws back out, the handle can separate from the seat and impair the security of the child when used as a carrier, not as a car seat.

Only those seats dated prior to November 1989 need replacement screws. The 4-digit manufacturing date code can be found on the label affixed to the side of the base. Date code numbers of 8910 and smaller require the Screw Replacement Kit. Any 580 owner wishing to easily replace these shorter screws with longer, better holding screws, need only to call 1-800-527-1300 and a Screw Replacement Kit will be promptly sent out to you.

In the meantime, check to make sure your handle screws are tight but not too tight to prevent handle rotation.

If your handle screws are black in color or your seat is dated after October 1989 (8911, 8912, 9001, etc.), you do not need screw replacements.

In the event you feel that Century Products Co. has failed or is unable to remedy the non-compliance within a reasonable time and without charge, you may submit a complaint to the Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington DC 20590, or call the toll-free Auto Safety Hotline at 1-800-424-9393 (Washington DC area residents may call 366-0123).

LOS ANGELES (MARCH 15) BUSINESS WIRE - George Smith/Grubb & Ellis Financial Services announced that is has arranged $150 million in debt and

equity financing for the development of Leisure Oaks Escondido, a master-planned 525-home active adult community located in North San Diego County.

The project will be developed by Leisure Technology Inc. (NYSE:LVX).

The new community will be developed on a 234-acre parcel of land that has been sold to a limited partnership by Leisure Technology for $20 million. The limited partners are a consortium of Japanese investors. A $130 million loan commitment to provide development and construction financing has been issued by a Japanese credit bank. The five year loan offers both prime based and LIBOR pricing options.

According to Gary M. Tenzer, executive director of George Smith/Grubb & Ellis Financial Services: ''This joint venture demonstrates the recognition by Japanese investors of the profit opportunities offered by investment in residential development in the United States.

''An unusually high level of interest was expressed in the Leisure Oaks Escondido project because of the historic profitability of well-conceived active adult communities, the opportunity of venturing with Leisure Technology, an acknowledged industry leader in the active adult market and the fundamental demographics of the North San Diego area.''

Leisure Technology, established in 1957, is the largest nationwide developer of active adult communities. The company is also engaged in developing non-age-restricted single-family projects in California, New Jersey, New York, Florida and Illinois.

Los Angeles-based George Smith/Grubb & Ellis Financial Services, with offices in San Francisco, Newport Beach and San Diego, specializes in arranging debt and equity financing for income property and residential developments. Since becoming a Grubb & Ellis subsidiary in December 1982 the company has arranged more than $6 billion in financings.

LOS ANGELES (MARCH 15) BUSINESS WIRE - St. Ives Laboratories Inc. announced the following key financial information for the three months and year ended Dec. 31, 1989:

ST. IVES LABORATORIES INC.
FINANCIAL HIGHLIGHTS
(in thousands)

	Fourth Quarter		Total Year	
	1989	1988	1989	1988
Net sales	$21,639	$22,869	$105,146	$103,937
Net income	65	421	3,779	4,483
Net income per share	1 cent	6 cents	55 cents	65 cents

The 1989 results include a legal settlement with Floreat International Ltd. relating to a United Kingdom distribution agreement amounting to $1,430,000, of which $730,000 was charged to the fourth quarter. Excluding this nonrecurring charge, net income would have been $499,000 and $4,630,000 (7 cents and 67 cents per share) for the three months and the year ended Dec. 31, 1989, respectively.

St. Ives Laboratories Inc. is a manufacurer and marketer of personal care products which are sold in the United States and internationally with the SWISS FORMULA brand name.

#90074b0128 03/15/1990 ~Business Wire

SHEPHERD, MO. (MARCH 15) BUSINESS WIRE - United Tote Inc. (NASDAQ:TOTE) said that the cost of acquiring Autotote Systems Inc. overshadowed a 65 percent increase in revenues and caused the worldwide wagering systems supplier to report a loss of $691,550 for the first quarter of fiscal 1990.

Revenues totaled $10.9 million for the first quarter ended Jan. 31, 1990, an increase of $4.3 million over the $6.6 million for the first quarter of fiscal 1989. Such amount includes revenues for Autotote only for the period since the Dec. 11, 1989, acquisition.

Major components of the revenue increase were a near doubling of wagering systems revenue to $6.3 million. Seventy-two percent of the increase came from the recent Autotote acquisition. Larger revenues were also generated from the racetrack operations division and sales of sports wagering systems.

The first quarter loss of $691,550, or 15 cents per share, compares with a loss of $187,561, or 6 cents per share, for the like quarter of last year.

''The seasonal downturn associated with the first quarter was further affected by the Autotote acquisition and the accompanying increases in depreciation, amortization and interest expenses,'' said Lloyd Shelhamer, chairman of the board of United Tote Inc.

James H. Pierce, United Tote president and chief executive officer, said the consolidation will enable the company to compete more effectively in the North American and international markets.

''Antitrust action by the United States Department of Justice will slow down consolidation efforts, but our cash flow will remain strong and the acquisition will provide long-term benefits to our shareholders,'' said Pierce.

United Tote added seven new customers in the first quarter, including three of the five greyhound racetracks licensed in Wisconsin where parimutuel wagering is scheduled to begin in April. Other new customers are greyhound tracks in Las Vegas and South Dakota and the Montana and North Dakota state off-track betting networks.

Sale of a wagering system to Cyprus was finalized in the first quarter. The system will service the on-track and off-track operations of Nicosia Race Club.

The company successfully inaugurated inter-state pool merging early in the second quarter -- a first for the pari-mutuel industry in the United States. Called ''Direct track interface,'' this involved the electronic exchange of wagering data between Ladbroke Racing's OTB network in Wyoming and Golden Gate Fields in California.

United Tote also implemented service to the first teletrack operation in Canada -- a 12-site network serving the province of Manitoba.

The acquisition of Autotote, the second largest supplier of wagering systems in North America, added 120 facilities, including 52 international installations, to United Tote's customer service list. United Tote now services 300 wagering facilities worldwide.

SAN FRANCISCO (MARCH 15) BUSINESS WIRE - Bank of America Thursday announced that it has appointed Richard T. Crane, 52, as senior acquisitions officer with Bank of America's Investment Real Estate Group.

Crane is responsible for sourcing, acquiring and negotiating U.S. real estate for Bank of America's Investment Real Estate clients worldwide. In this position, he will be working with Carl A. Gowan, a senior acquisitions officer who has been with IRE since 1985.

IRE is an equity real estate investment advisory group dealing with institutional-grade properties throughout the United States for clients ranging from offshore investment institutions to high-net-worth individuals.

Prior to joining Bank of America, Crane directed his own real estate consulting company, R.T. Crane Co. Inc., in Dublin, Calif. Since forming the company in 1977, Crane managed more than 45 real estate projects throughout the United States with a total value exceeding $150 million.

Crane's experience in real estate dates back to 1963 when he began working as a real estate administrator for A.G. Spanos Properties in Stockton, Calif. In 1970, he formed his own construction company, R.T. Crane Construction, based in Stockton.

In 1975, he joined Grubb & Ellis Development Co. as vice president of residential development. The following year, he joined L.B. Nelson Corp.

in Menlo Park, Calif., as a vice president.

A native of Stockton, Crane earned his B.A. degree from the University of the Pacific in 1960. He is a member of the American Society of Real Estate Counselors and serves as a member of the San Francisco Board of Realtors.

SACRAMENTO, CA (MARCH 14) BUSINESS WIRE - William Campbell, president of the California Manufacturers Association (CMA), announces the appointment of Anne Kelly as Manager of Taxation.

Kelly, 42, most recently served as chief of state to Senate Majority Leader Barry Keene, D-Benecia. At CMA, Kelly will serve as legislative advocate on taxation issues, as well as other area issues, said Campbell. She will also staff the association's Taxation Committee, composed of CMA executives from member companies.

Founded in 1918, with headquarters across the street from the State Capitol in Sacramento, CMA serves as the link between the California industrial community and state government. CMA member companies employ approximately 70 percent of the California industrial work force.

Starting as a legislative secretary to Sen. Nicholas Petris, D-Oakland in 1974, Kelly has served in various key legislative positions in her professional career, including that of legislative advocate (1979-82) on state/county health and welfare programs for the County Supervisors Association of California.

Kelly also served as policy coordinator for Assembly Speaker Willie L. Brown Jr., D-San Francisco; chief consultant for the Assembly Committee on Public Investments, Finance, and Bonded Indebtedness; chief of staff to former Assembly Member Richard Robinson, D-Santa Ana; principal consultant to the Assembly Committee on Ways and Means; associate consultant to the Senate Committee on Health and Welfare; associate consultant to the Senate Subcommittee on Social Services and Welfare, and legislative aide to Sen. John Garamendi, D-Walnut Grove.

LONG BEACH, CA (MARCH 15) BUSINESS WIRE - The first McDonnell Douglas MD-11 has logged more than 100 hours of flight test time, and the company's second new tri-jet has begun testing after its flawless maiden flight to Yuma, Ariz.

The MD-11s are the first of a five-aircraft fleet undergoing rigorous tests and Federal Aviation Administration certification procedures.

While at Yuma and Edwards Air Force Base, Calif., the first MD-11 accumulated 115 hours of flight time in just two months, a McDonnell Douglas record. Project pilot John Miller and his crew tested the MD-11's flight characteristics while cruising, climbing, descending, and at extreme center of gravity conditions.

They flew the aircraft up to 421 knots, at Mach 0.945 and an altitude of

39,000 feet and qualified eight Douglas Aircraft test pilots.

The first ship team is conducting autopilot approaches and landings daily. It has completed low airspeed calibrations and flutter vane testing to check the MD-11's structural stability.

The second MD-11 was piloted to Yuma on March 1 by Tom Melody, an avionics expert. He and his crew are testing the aircraft's flight management, autopilot and systems controllers. The aircraft has flown more than 31 hours to date and holds the MD-11 record for the longest single flight - 8 1/2 hours.

The second MD-11 spent just 13 days on the company's west ramp while all the required ramp functions and tests were completed. This is the shortest time spent on the ramp for any McDonnell Douglas-produced tri-jet.

Ed Schaniel, production business unit manager, ramp and delivery operations for MD-11, said, ''The performance by the ramp team demonstrates their commitment to quality and timely action. The short time span on the west ramp, coupled with no squawks and a flawless first flight, show the dedication of all involved.''

Schaniel said the third ship, powered by Pratt and Whitney engines, would be undergoing ground vibration testing later this month. The aircraft is expected to enter the flight test program in April.

DALLAS (MARCH 15) BUSINESS WIRE - Thomas B. Walker Jr. was elected Thursday to the board of directors of Central and South West

Corp., a Dallas-based public utility holding company.

His election increases the size of Central and South West's board to 13 members.

Walker, 66, is a limited partner of Goldman, Sachs & Co., an international banking investment firm. Walker joined Goldman, Sachs in 1968 as a general partner. In 1974 he became a member of the firm's management committee, on which he served until his retirement in 1984.

Previously, Walker was vice president and a director of Equitable Securities Corp. from 1947 to 1967.

He currently serves as a director of A.H. Belo Corp., NCH Corp., Riviana Foods Inc., SYSCO Corp., Kleinwort Benson International Equity Fund, Kleinwort Benson Global Income Fund, American Medical International, Inc. and AMI Healthcare Group, PLC.

Walker graduated from Vanderbilt University in 1946 with a bachelor of arts degree. He served in the U.S. Navy during World War II.

His civic involvements include being vice chairman of the board of trustees for Vanderbilt University and a trustee of the Dallas Museum of Art and St. Mark's School of Texas.

Central and South West Corp. owns Central Power and Light Co., Public Service Co. of Oklahoma, Southwestern Electric Power Co., West Texas Utilities Co., Transok Inc., and five other subsidiaries.

HOUSTON (MARCH 15) BUSINESS WIRE - Transco Energy Co. and Mobil Natural Gas Inc. (Mobil), an affiliate of Mobil Corp., Thursday announced that Mobil plans to acquire an interest in Transco's Mobile Bay pipeline facilities.

Mobil and Transcontinental Gas Pipe Line Corp. (TGPL), a Transco subsidiary, have agreed to form a partnership to purchase the pipeline facilities. Mobil and TGPL will each have a 50 percent interest in the partnership and TGPL will be the operator on the line.

The 123-mile pipeline extends from Mobil's natural gas treatment facility near Coden, Ala., to an interconnection with Transco's mainline near Butler, Ala. Mobil received an option to participate in the pipeline under a 1986 agreement between Mobil and TGPL.

TGPL has filed an application with the Federal Energy Regulatory Commission (FERC) requesting authority to operate the pipeline facilities pursuant to Section 7(c) of the Natural Gas Act.

The partnership plans to file an amendment to this application within 60 days requesting authorization of the acquisition and operation of the pipeline under a blanket certificate for open access transportation.

Mobil Natural Gas Inc. General Manager W.L. Luthy noted that the Mobile Bay area is expected to become one of the leading natural gas producing

regions in the country within the next few years.

He stated, ''Mobil has invested or committed about $850 million in the exploration and development of its Mobile Bay area natural gas reserves, and numerous other producers have also made significant investments in the region.

''Mobil and other producers will be bringing on new production in this area which will help offset continuing domestic gas production declines in older fields. Timely installation and further regulatory authorization of transportation facilities are important to deliver gas to Alabama customers and interstate markets." Transco Energy Co. President and Chief Executive Officer George S. Slocum said, ''The Mobile Bay pipeline provides a cost-effective means for transporting the natural gas from the Mobile Bay region to both intrastate and interstate markets.

''The 30-inch line, which is currently transporting 40 million cubic feet per day, can be economically expanded by adding compression facilities.

''The line crosses several other major pipelines and terminates at an interconnection with Transco's mainline, which provides shippers with direct access to markets along the Eastern Seaboard and the Northeast, and to most other natural gas markets in the United States by way of backhaul and exchange through other pipeline systems.''

LONGMONT, CO (MARCH 15) BUSINESS WIRE - Engineering Measurements Co. announced Thursday a net loss of $188,417, or 7 cents per share, for the third quarter ended Jan. 31, 1990.

This compares to a net income of $10,201, or $.00 per share for the same period last year. Revenues declined by 5 percent to $2,491,846 from the $2,620,781 reported for the third quarter of fiscal 1989.

For the nine month period, a net loss of $247,539, or 9 cents per share, was reported compared to a loss of $16,285, or 1 cent per share, last year. Revenues increased by 4 percent to $7,764,097 as compared to

$7,434,187 last year. Expenses associated with a strategic restructuring contributed to the increased operating loss.

The company announced the appointment of Dr. Douglas J. Collier as president of EMCO, replacing Jerry Rusnak, whose resignation was effective Jan. 12. Collier holds two management science degrees from Rensselear Polytechnic Institute and a doctorate in business adminstration from the University of Colorado. Most recently, Collier served as president of Midcontinent Airlines where he engineered a dramatic turnaround in airline profitability and operating efficiency.

Subsequent to the close of the quarter, the company's president announced the appointment of Roland W. Floberg as chief financial officer. Floberg replaces John P. Fay, who resigned effective Feb. 2. Floberg brings to the company an excellent cost and management accounting background as well as expertise in introducing and formalizing near-term and long-range budgets and improving cash flow through reduced receivables and inventories.

Floberg has developed and implemented systems and concepts to handle anticipated rapid growth and has instituted financial control and reporting systems for various companies.

SEATTLE (MARCH 15) BUSINESS WIRE - Alaska Airlines and American Express are teaming up for this summer's Goodwill Games in Seattle and some special children around the nation figure to score big as a result.

The two companies are launching a special Goodwill Games promotion that will run from March 21 to May 15. As part of the effort, Alaska and American Express will donate $1.50 worth of air travel to the Make-A-Wish Foundation for every person who flies Alaska and charges the ticket with the American Express card.

The Make-A-Wish Foundation is a non-profit organization that grants the wishes of children with life-threatening illnesses.

Donations from the promotion are likely to be in six-figures, said David Palmer, Alaska assistant vice president for marketing.

''Our goal is to tell the West Coast that one of the world's great sporting events is within easy reach this summer. This promotion allows us to do that in a way that underscores the goodwill theme,'' Palmer said.

The centerpiece of the promotion is a scratch-off game to be played on board Alaska flights. Each passenger will receive a scratch-off card that could win them one of 500,000 prizes donated by Alaska, Horizon Air, Holland America Westours, Budget Rent a Car, Kodak and Wendy's. Among the prizes are round trip airline tickets, week-long Alaska cruises, 35 mm cameras and one-year's use of a Lincoln Town Car.

Alaska is the official airline of the Goodwill Games' Seattle Organizing Committee. The games are to run from July 20-August 5.

TORONTO (MARCH 15) BUSINESS WIRE - Central Crude Ltd. (ToSE/VcSE:CLC) reported that the underground development on its Eagle River property held in joint venture with Hemlo Gold Mines Inc., located in the Mishibishu Lake area, northwestern, Ontario, is proceeding on schedule.

The first test stope (west) containing approximately 10-12,000 tonnes has now been trucked to Hemlo's Golden Giant Mill and is presently being processed with results expected by the end of March, 1990.

The second test stope (east) is currently being trucked to the mill and results of this second test stope east also containing 10-12,000 tonnes is currently being trucked to the mill and results of this test stope are expected by the end of April, 1990.

The company reports that a total of 2,664 chip samples, 2,287 muck samples and 2,509 core samples have been taken from underground development and it would appear that underground sampling is consistent with those assay results received from the surface diamond drilling conducted. The company further reported that recoveries from metallurgical testing have been in the range of 96-97 percent gold.

The company further reported the results of a drill program completed over its Moss Lake project optioned from Tandem Resources Ltd. and Storimin Exploration Ltd. Noranda Exploration Company Ltd. is operator. The project is situated some 70 miles west of Thunder Bay, Ontario. A total of 17 diamond drill holes totalling 19,610 feet have now been drilled.

This diamond drill program was designed to follow up previous drilling by Tandem/Storimin along strike of the main zone. Results thus far suggest that gold occurs in lenses within sub parallel zones hosted by a diorite intrusive. Mineralization has been traced by diamond drilling for a

strike length of 5,000 feet and continues to be open both east and west and to depth.

#90074b0262 03/15/1990 ~Business Wire
VANCOUVER, BRITISH COLUMBIA (MARCH 16) BUSINESS WIRE - Effective Thursday, Breakwater Resources Ltd. (ToSE/VcSE:BWR) has acquired all the shares of American Pacific Mining Company Inc. by amalgamating American Pacific with a wholly owned subsidiary of Breakwater.

Shareholders of American Pacific will receive three shares of Breakwater for each share of American Pacific resulting in the issuance of 31,712,880 shares of Breakwater. In addition, as part of the amalgamation, American Pacific option holders will exchange their options for options to purchase a total of 1,215,000 shares of Breakwater.

It is proposed that Desmond Alexander, David DeWitt and Brian Hinchcliffe, former directors of American Pacific, will be included as nominees for election as directors of Breakwater at the 1990 annual general meeting of Breakwater.

With the addition of American Pacific, Breakwater holds interests in four mines including the Cannon Mine, a gold mine in Wenatchee, Wash., in which Breakwater has a 49 percent interest, the El Mochito polymetallic mine in Honduras, in which Breakwater has a 100 percent interest, the Estrades Mine, a polymetallic mine in the Casa Berardi area of Quebec that Breakwater is preparing for production this fall and in which Breakwater is earning a 70 percent interest, and the Caribou Zinc Mine at Bathurst, New Brunswick, which Breakwater as manager is preparing for production and in which Breakwater has indirect equity interests.

Trading in shares of American Pacific on the Toronto and Vancouver stock exchanges will cease shortly on the date specified in notices to be issued by the stock exchanges. Letters of transmittal to allow the exchange of American Pacific share certificates for Breakwater share certificates will be distributed to American Pacific shareholders on Thursday, March 15.

CHICAGO (MARCH 16) BUSINESS WIRE - Information Resources Inc. (NASDAQ:IRIC) Thursday announced that Citicorp POS Information Services Inc. has purchased 900,000 shares of IRI common stock at $16 per share, totalling $14.4 million.

In addition, Citicorp will receive a warrant to purchase an additional 10 percent of IRI's common stock over three years at $16 per share during the first two years and $20 per share in the third year. The shares purchased

by Citicorp POS total 4.97 percent of IRI's outstanding shares.

IRI will also provide a license to Citicorp POS for information and software for which Citicorp POS will pay IRI $9 million in fees over a two-year period. In addition, IRI will become the exclusive licensee to market certain data for which Citicorp POS will receive a royalty.

IRI is the third largest marketing information company in the United States with 1989 sales of $136.4 million.

Chicago-based Information Resources Inc. develops and maintains computerized proprietary data bases, decision support software and mathematical models to assist clients, primarily in the consumer packaged goods industry, in testing monitoring and evaluating their marketing plans for new products, media advertising, pricing and sales promotions.

Citicorp POS Information Services has developed a new generation of point-of-sale store systems. The systems improve store financial controls, allow credit and debit card usage at the point of sale, and capture customer purchase information. Citicorp POS uses the customer purchase information to provide services to retailers, consumer packaged goods companies and other marketers.

IRI Chief Executive Officer and Vice Chairman Gian Fulgoni, said that ''the Citicorp POS business is producing accurate, real-time marketing information as a natural by-product of their in-store point of sale scanner-based system. Many opportunities have been created as a result of Citicorp's technology.

We look forward to working on a new generation of decision support and information services to take advantage of these data.''

Jerry Saltzgaber, chief executive officer of Citicorp POS, said: ''Each of us has served marketers by efficiently collecting and analyzing information. We've come at it from different prospectives. The cross license agreement will help each of us grow faster while improving services to our respective clients.''

#90074b0291 03/15/1990 ~Business Wire

SUNNYVALE, CA (MARCH 16) BUSINESS WIRE - ZyMOS Corp. (NASDAQ:ZMOS), producer of integrated circuits supporting the personal computer and embedded systems markets, announced Thursday revenues of $37,840,000 for the year ending Dec. 31, 1989, an increase of 38.5 percent over the 1988

level.

The fourth quarter closed with revenues of $11,515,000, a record quarter for the company, compared to $7,215,000 for the fourth quarter of 1988. Strength in the demand for ZyMOS' personal computer chip sets and VGA (video graphics array) graphics chips were the key products behind the record sales levels.

The overall financial performance of the corporation in 1989 showed dramatic improvements as well. While operating losses of $1,095,000 and $1,165,000 were reported for the fourth quarter and 1989, respectively, the 1989 loss of $1,165,000, or 4 cents per share, compares with a 1988 operating loss of $5,681,000, or 20 cents per share.

In comparing the fourth quarter of 1989 with the like quarter in 1988, it is important to note that in the fourth quarter of 1988 showed a favorable gross profit margin resulting largely from technology sales.

Also, in the fourth quarter of 1989 inventory adjustments were made and reserves established in anticipation of lower prices for some of our products entering the mature segment of their life cycle. While this move guards and improves ZyMOS' financial picture in 1990, it increases the company's 1989 operating loss by $400,000.

ZyMOS reported net losses of $1,915,000, or 6 cents per share, for the 12 months ended Dec. 31, 1989 and $1,279,000 for the fourth quarter, compared to a profit of $189,000 for 1988 and a loss of $502,000, or 2 cents per share, for the fourth quarter of 1988. Included in the profit for 1988 was an extraordinary gain of $5,785,000, or 20 cents per share, from the conversion of long-term debt to equity.

The company believes that on the strength of both its new products and the level of service provided customers, it will be able to maintain the high growth level of 1989 in 1990.

IRVINE, CA (MARCH 16) BUSINESS WIRE - Computer Automation Inc. Thursday announced that the board of directors has named William L. Osmundsen president, chief operating officer and a director of the company.

Osmundsen joined the company in December 1985 as vice president, finance, treasurer and chief financial officer. In addition to his new positions, he will continue as chief financial officer.

A graduate of California State University, Fullerton, Osmundsen, 42, served as vice president-finance, secretary and treasurer of Standard Logic Inc. prior to joining the company and previously had been associated with electronic manufacturing firms.

Osmundsen stated, ''In view of the company's precarious financial position the present effort to redirect the company's operations is a major challenge akin to changing tires on a moving vehicle.'' He noted that the company is nearing an acceptable resolution of the discontinued automatic test equipment business.

''Meanwhile,'' he said, ''available resources are being directed toward the traditional OEM product lines and the communications and ruggedized microcomputer capabilities of the Talon Technologies

subsidiary.'' Also, Osmundsen indicated that the company will more vigorously pursue patent licensing activities.

Computer Automation is a manufacturer of board-level computer products for industrial OEM applications. Through its wholly owned subsidiary, Talon Technology Corp., the company also manufactures high speed data communications coprocessors, data transmission systems, ruggedized microcomputers and facsimile subsystems for sale in the defense, petroleum and general communications industries.

The company also manufactures automatic test systems which are used in the production testing of electronic subassemblies by equipment manufacturers

in the defense, telecommunications and computer industries.

GLASGOW, SCOTLAND (MARCH 15) BUSINESS WIRE - Anderson Mavor Investments Ltd., an indiret wholly-owned subsidiary of Anderson Group PLC, has commenced a tender offer Thursday to purchase all outstanding shares of common stock of National Mine Service Co. that it does not already own at $8.875 net per share in cash.

The tender offer is being made pursuant to a previously announced agreement and plan of merger dated as of March 8, 1990, under which shares not purchased in the tender offer will be exchanged in a merger for $8.875 per share in cash.

The tender offer will expire at midnight New York City time, on Wednesday, April 11, 1990 unless extended. The offer is subject to certain conditions, including, among other things, that the number of shares tendered, when added to the shares owned by Anderson, will represent at least 75 percent of all outstanding shares.

Anderson currently owns approximately 51.2 percent of the outstanding shares of NMS.

The board of directors of NMS, upon the recommendation of a special commmitte of the board, has unanimously determined that the offer and merger are fair to, and in the best interest of, the stockholders of NMS.

The transaction is valued at $22 million.

The dealer manager for the offer is Prudential-Bache Capital Funding. Georgeson & Co. Inc. is the Information Agent.

CONCORD, CA (MARCH 15) BUSINESS WIRE - Microgenics Corp., a Concord-based biotechnology company, announced Thursday the acquisition of BioAutomed Systems Inc. of Sunnyvale, Calif.

BioAutomed Systems is a leading manufacturer of automated diagnostic test

equipment for doctors' offices and small commercial laboratories. Its ''ASCA'' product has been a mainstay in the doctor's office laboratory since 1980.

Commenting on the acquisition, Fredric Feldman, Microgenics' president and chief executive officer, stated, ''I am delighted to announce this acquisition. BioAutomed brings to Microgenics a reliable automated instrument, an established domestic and international dealer network, and a new diagnostic analyzer under development.''

Feldman continued, ''With this acquisition, Microgenics begins its positioning as a systems company able to offer to the marketplace a reliable vehicle for our CEDIA (tm) reagents which represent the state-of-the-art in the immunoassay market.''

Microgenics Corp. develops, manufactures and markets CEDIA (tm) recombinant DNA-based diagnostic tests for use in hospitals and clinical laboratories. Microgenics markets its products through its development partners, including Boehringer Mannheim GmbH, Yamanouchi Pharmaceutical Co. Ltd. and Technicon Instruments Corp.

In addition, Microgenics immunoassays are marketed in the USA by a direct sales force and are distributed by Beckman Instruments Inc. and a network of international distributors.

Microgenics, founded in 1981, is a privately held corporation based in Concord.

SAN JOSE, CA (MARCH 15) BUSINESS WIRE - Today MITEM Corp. announced that Amanda A. North has joined MITEM as vice president of marketing.

''Amanda North is a tremendous asset to our team,'' said Barry Margerum, president and chief executive officer of MITEM. ''Her understanding of the Macintosh market and its distribution channels will enable her to make a significant contribution to MITEM.''

North brings to MITEM many years of computer marketing and sales experience. She comes to MITEM most recently from Apple Computer, where she was the Central U.S. regional account manager for Businessland.

She was a founding member of Apple's Central Operations staff, where she formulated sales and marketing strategies to target major corporate customers. In addition, she developed Apple's Desktop Presentations program and managed their Desktop Publishing group.

Prior to Apple, North served in a variety of strategic planning, business development and marketing capacities for Impell Corp., an engineering consulting firm, now a subsidiary of Combustion Engineering.

Amanda North received her master of business administration degree from Stanford University. She performed graduate studies in economics at Trinity College, Cambridge, under a Rotary Club fellowship. She holds a bachelor of arts degree in economics and politics from Princeton University.

Based in San Jose, MITEM Corp. develops products to simplify user access and communications with minicomputers, mainframes and other information sources, including CD-ROM and network servers. The privately held company was founded in 1985.

SEATTLE (MARCH 15) BUSINESS WIRE - Lindal Cedar Homes Inc. (NASDAQ:LNDL) Thursday announced it has entered into a letter of intent to sell its hardwood flooring unit in Renfrew, Ontario, Canada for an undisclosed amount of cash.

Lindal said the sale will have minimal financial effect on the company.

The buyer is a new corporation being formed by Ross Staples of Ottawa, Canada. Staples is the former President of Masonite Canada. The transaction is expected to be completed by March 31, subject to financing from the Eastern Ontario Development Corp.

''The sale of the hardwood flooring unit furthers the company's goal of concentrating its future efforts on manufacturing and marketing its custom cedar homes and sunrooms,'' said Robert W. Lindal, president.

''After evaluating several offers we determined that a sale to Ross Staples, who has 25 years experience in the hardwood industry, would provide the greatest benefits to the unit's customers and employees, as well as to our shareholders,'' Lindal said.

The new hardwood flooring business will resume manufacturing operations in Renfrew; leasing approximately 35,000 square feet of the 105,000 square foot facility which Lindal owns. Lindal will be a customer of the new hardwood flooring company. Lindal Cedar Homes' Eastern Canadian home distribution warehouse operations also will remain in Renfrew.

Lindal Cedar Homes is the world's largest manufacturer of top-of-the-line, year-round cedar homes which are sold under the trademarks of Lindal Cedar Homes, Justus Log Homes and Lindal SunRooms by over 300 distributors in the U.S., Canada, Japan and other countries.

PHOENIX (MARCH 15) BUSINESS WIRE - Emerald Mortgage Investments Corp. (NYSE:EIC) announced that it had net income of $1,661,000, or 19 cents per share, for the fourth quarter ended Dec. 31, 1989.

This compares with net income of $3,293,000, or 38 cents per share, for the fourth quarter ended Dec. 31, 1988. The company cited the effects of higher short-term interest rates and corresponding higher borrowing costs along with the costs of hedging protection as the primary reasons for the decrease in earnings from the fourth quarter of 1988.

Net income for the year ended Dec. 31, 1989, was $6,525,000, or 73 cents per share. This compares with net income of $5,418,000, or 62 cents per share, for the period from July 27, 1988, when the company commenced operations, through Dec. 31, 1988.

The company had previously announced that it had received an extension on its $40 million term loan from Feb. 1, 1990 to May 1, 1990. Alan Hamberlin, the company's president, indicated that the company's first priority is still to arrange for alternative long-term financing to replace the term loan.

The company also announced that it was allowing the management agreement with its manager, Emerald Mortgage Advisors Limited Partnership, to expire on April 30, 1990. Alan Hamberlin stated he would remain as president and chief executive officer of the company and that company personnel will take over the functions that were formerly performed for the company by the manager.

GREENWICH, CT (MARCH 15) BUSINESS WIRE - Stolt Tankers and Terminals (Holdings) S.A. (NASDAQ:STLTF) Thursday opened Matex-Stolthaven, its Rotterdam regional storage and distribution terminal for Northwest Europe.

An arrangement between Matex Nederland B.V., a subsidiary of VOC (Van Ommeren Ceteco NV) and Stolthaven B.V., a subsidiary of Stolt Tankers and Terminals, provides Stolt Tankers with exclusive use of Jetty No. 5 and two newly-built coaster/barge jetties at the Matex Botlek Terminal, and guaranteed access to similar facilities at the Matex Vlaardingen terminal.

The ever increasing demands by customers and regulatory authorities concerning safety and quality for the transportation and storage of hazardous bulk liquids require substantial investments in parcel tankers and associated land based facilities. Stolt-Nielsen has taken the lead with its Owner's Berth plan for port operations. The company is investing in purpose-built terminal facilities with the objectives of reducing port time and increasing port efficiency. More than $10 million has been spent on improvements at Matex-Stolthaven.

Matex-Stolthaven has a new and unique specially designed hose tower at Jetty No. 5 which permits the rapid connection of cargo hoses between the ship's manifold and more than one hundred shore pipelines joining virtually every storage tank in this large terminal, as well as coasters and barges, and other tankers. Up to ten cargoes can be loaded and discharged at the same time.

Matex Nederland is the largest independent terminal operator handling chemicals, vegetable oils and petroleum products in the Port of Rotterdam. Matex operates three terminals in Rotterdam and one in Amsterdam with a total storage capacity of 17 million barrels. These are part of VOC's tank storage division with 70 million barrels of storage facilities worldwide for the handling of petroleum products, vegetable oils and liquid chemicals.

Stolt Tankers and Terminals (Holdings) S.A. is an international transportation company specializing in the distribution of bulk liquids, both by land and sea. The company operates worldwide, with 21 offices in 12 countries.

Stolt-Nielsen provides total distribution services with its combination of more than 55 transoceanic and 30 coastal parcel tankers, totalling about 1.7 million deadweight tons; 2,500 intermodal tank containers in door-to-door service; five regional storage and distribution tank terminals in the United States, Northwest Europe and Brazil; as well as barges, railcars and tank trucks.

#90074b0639 03/15/1990 ~Business Wire

CUPERTINO, CA (MARCH 15) BUSINESS WIRE - Apple Computer Inc. (AAPL) Thursday announced a new high-speed card that moves information up to 10 times faster between Apple II personal computers and peripheral devices, such as hard disks and CD-ROM drives, at no extra cost.

The new Apple II High-Speed SCSI Card provides the fastest data throughput available for Apple IIe and Apple IIGS users, and is compatible with all small computer system interface (SCSI) peripherals.

Customers who use the new Apple II High-Speed SCSI Card with a SCSI peripheral extend their computer's performance. For example, customers using large applications stored on a hard disk drive, such as AppleWorks GS, or any large files, will see a significant speed improvement when launching programs, as well as opening and saving files. The larger the application or the larger the file results in the greatest speed improvement.

The new Apple II High-Speed SCSI Card provides faster data transfer primarily because of a new feature called direct memory access (DMA) data transfer. Data is transferred directly between the computer's memory and the SCSI peripheral, with minimal interaction from the computer's microprocessor. The result is improved data transfer performance.

With the new high-speed card, data transfers at a rate of up to 1MB per second on the Apple IIGS computer, and at a rate of up to .5MB per second on the Apple IIe computer. In addition to DMA, the SCSI manager and firmware have been improved and also contribute to the increased performance.

Device drivers for the tape backup drive and scanner will be made available to developers, and users will be able to take advantage of these devices as applications are developed. In addition, the new card enables users to connect as many as seven SCSI peripherals to their computer.

Another feature of the card is an on-board terminator, which simplifies setup when connecting SCSI peripherals to the computer. Previously, the Apple II SCSI Card required users to understand rules regarding placement and quantity of terminators between SCSI devices. With the new card, users simply place one terminator at the end of the chain of SCSI devices.

ALBANY, NY (MARCH 15) BUSINESS WIRE - Albany International Corp. (NYSE/PSE:AIN) announced Thursday that it expects first quarter earnings to be substantially below the 27 cents per share reported before special items in the first quarter of 1989.

The principal reasons for the shortfall are weaker than expected sales in North America, higher costs incurred to support projected sales increases, costs associated with the company's major capital expansion programs, and the effect of unstable economic conditions in Latin America.

Orders for the first two months were at record levels, which should be reflected in higher sales later in 1990.

Albany International is the world's largest producer of paper machine clothing with 36 manufacturing plants in 12 countries.

#90074b0646 03/15/1990 ~Business Wire

STOCKHOLM, SWEDEN (MARCH 15) BUSINESS WIRE - Ericsson (NASDAQ:ERICY), the international telecommunications group, Thursday reported financial results for the year ended Dec. 31, 1989.

Consolidated income before appropriations and taxes more than doubled, amounting to Swedish krona 3,715 million (US$597 million)(a), compared to SEK 1,840 million (US$296 million) in 1988.

Consolidated sales increased 26 percent in 1989 to SEK 39,549 million (US$6,353 million), vs. SEK 31,297 million (US$5,028 million) in the previous year. Units added in connection with an agreement with the General Electric Co. in the United States are consolidated as of July 1, 1989. Consolidated sales of comparable units rose 25 percent in 1989.

Order bookings increased 18 percent in 1989 to SEK 42,045 million (US$6,754 million), up from SEK 35,633 million (US$5,724 million) in 1988. The increase for comparable units was 13 percent. The order backlog at the end of 1989 was SEK 29,426 million (US$4,727 million), vs. SEK 26,876 million (US$4,317 million) in 1988.

Net income after taxes paid was SEK 2,335 million (US$375 million), up from SEK 1,033 million (US$166 million) in 1988.

Income per share after tax increased to SEK 55.35 (US$8.89) per fully diluted share in 1989, up from SEK 24.07 (US$3.87) in 1988. The increase was due to the improvement in income and in part to the relative decreases in taxes paid.

Cash flow amounted to SEK 229 million (US $37 million) in 1989, vs. SEK 1,728 million (US $278 million) in 1988.

Positive cash flow for the fourth consecutive year resulted in a further decrease in net interest expense.

The strengthening of Ericsson's equity ratio that has occurred in recent years continued and at the end of 1989 was 37.8, up from 33.7 in the previous year.

The return on capital employed rose sharply for the fourth consecutive year to 23.8 percent, vs. 16 percent in 1988. The increase was due to improvements in both profit margins and the rate of capital turnover.

The return on shareholders' equity, after tax, rose to 17.3 percent in 1989, up from 11.5 percent in 1988. The sharp improvement occurred despite an increase in shareholders' equity resulting from conversions. Ericssson's tax costs relative to income before appropriations and taxes declined to 37 percent, down from 44 percent in 1988.

Ericsson anticiaptes that the good level of profitability can be maintained in 1990 and that the income will continue to improve somewhat.

The board of directors has proposed payment of a dividend of SEK 14.00 per share for 1989, up from SEK 10.50 in 1988. It is also proposed, after distribution of the dividend, that a share split be carried out, with shareholders receiving five new shares for each old share held.

Ericsson's annual general meeting will be held in Stockholm on May 8, 1990.

Headquartered in Stockholm, Ericsson is one of the world's leading manufacturers of telecommunications equipment. (a) Dollar figures in this report have been translated at the rate of SEK 6.225 to the dollar, the exchange rate on Dec. 31, 1989.

TROY, MI (MARCH 15) BUSINESS WIRE - Ameritech Publishing announced Thursday that Ameritech PagesPlus directories in the Watertown, Wis., market contain 30 percent recycled fiber content paper in the yellow pages.

The paper used in the directories was imported from the Daishowa-Fuji Mill in Japan for the trial.

The directory, the first book in the 5-state Ameritech region to contain paper with recycled fiber content, begins delivery today.

The move follows quickly on the heels of ''DirectoRecycle,'' a successful recycling venture that began in Green Bay, Wis., in December 1989, and has since spread to the communities of Manitowoc and Fond du Lac.

''We were very encouraged by the results of our print test on March 7 and believed that the success should be taken advantage of immediately,'' said Gary Drook, president and CEO of Ameritech Publishing. ''This is the first book that we've used the 30 percent recycled fiber content paper in and it is a trial. At this time, the most important aspect of the trial is that it unequivocably illustrates that Ameritech Publishing is actively seeking ways to address environmental concerns.''

More than 20,000 directories will contain the recycled fiber content paper.

Ameritech Publishing is a wholly-owned subsidiary of Chicago- based Ameritech. The company provides Ameritech PagesPlus directories for the Bell companies in Illinois, Indiana, Michigan, Ohio and Wisconsin.

ROGERS, AR (MARCH 15) BUSINESS WIRE - Hudson Foods Inc. (NYSE:HFI), an integrated poultry producer headquartered in Rogers, Thursday announced the declaration of a dividend of three cents per share on each of its outstanding shares of Class A common stock and two and one-half cents per share on each of its outstanding shares of Class B stock.

The record date for stockholders is March 30, 1990. Bank of America NT&SA, transfer agent for the company's stock, will pay the dividend on April 16, 1990.

Hudson is among the largest producers of chicken, turkey and processed egg products in the domestic poultry industry. It sells a variety of chicken and turkey products under the ''Hudson's'' and ''Flavor Fresh'' brand names, as well as poultry, beef and pork products under the ''Ohse,'' ''Schweigert'' and ''Pierre'' brand names. Its Class A common stock is traded on the New York Stock Exchange.

DAYTON, OH (MARCH 15) BUSINESS WIRE - The computer systems division of The Reynolds and Reynolds Co. (NYSE:REY) will invest nearly $3 million over the next 18 to 24 months to develop a ''world class'' National Customer Support Center to provide enhanced software support to its automobile dealer computer customers across the United States.

The primary reason for the expansion, according to Jack Proud, senior vice president, is to broaden the company's market leadership position. ''Reynolds and Reynolds has built its reputation on customer satisfaction. We are as innovative in customer support as we are in product development.

In the past four years, Reynolds has received the top award from both the International Customer Service Association and MSM, The Magazine for Computer Service Managers for customer service and customer satisfaction.

Reynolds is implementing a phased expansion schedule that will see the integration of a completely new telecommunications system that will allow Reynolds representatives to know which dealership is calling before they answer the call. The system will employ ''smart'' technology and will be tied to the customer database, allowing calls to be automatically routed to the appropriate customer service representative.

During the expansion process, current support centers in Atlanta, Los Angeles and Parsippany, N.J., will be moved to the National Customer Support Center in Dayton. By pulling the groups together, the company will be able to increase the level of service to its customers.

The expanded National Customer Support Center will be dedicated to telephone assistance to Reynolds customers for system questions. Customers will continue to call the same number that they've called in the past.

The company's regional customer education centers and local area service offices across the country will not be changed, Proud reported.

Reynolds and Reynolds, headquartered in Dayton, is a major supplier of information processing systems, including business forms and computer systems to automotive, professional, medical and general business markets.

#90074b0677 03/15/1990 ~Business Wire

FAIRLAWN, OH (MARCH 15) BUSINESS WIRE - GenCorp Thursday reported that sales from continuing operations decreased to $348 million in the first quarter of fiscal year 1990 compared to $453 million in the first quarter of 1989. Most of the sales decline was in the aerospace/defense segment but automotive sales also declined.

The company's segment operating profit was $57 million in the first quarter of fiscal year 1990 compared to $32 million in the first quarter of 1989 due to a settlement of claims related to past environmental costs as discussed below. Income from continuing operations was $23 million in the first quarter of 1990 compared to $8 million in the like period of 1989.

Net income in the first quarter of 1990 was $22 million or 68 cents per share versus $143 million or $4.50 per share in the prior year. Net income

in the first quarter of 1989 included a $137 million gain or $4.31 per share from the sale of broadcast properties.

In the first quarter of 1990 Aerojet and the U.S. Government reached agreement on settlement of Aerojet's claims for costs incurred through June 1989 related to ground water treatment at its Sacramento facility.

Negotiations are presently underway with respect to expenses incurred or to be incurred after that date. Excluding the effect of the settlement, GenCorp's segment operating profit would have declined from $32 million in the first quarter of 1989 to $23 million in the first quarter of 1990.

Commenting on GenCorp's performance in the first quarter of 1990, Chairman and Chief Executive Officer A. William Reynolds said, "For some time we have been expecting the first quarter of 1990 to be our low quarter from an operating standpoint. The decline in vehicle production in January was more severe than we expected and the mix of production had an adverse impact on our reinforced plastics operating unit.

"At the same time, we have had continuing start-up costs on new automotive products. The decline in sales and earnings at Aerojet was largely due to the timing of shipments on major contracts. We particularly look forward to the resumption of shipments on the Combined Effects Munition program now scheduled for late in the second quarter. The first quarter did reflect the initial sales on the Advanced Solid Rocket Motor program which should become significant in the future.

"GenCorp Polymer Products posted a strong earnings gain on flat sales, reflecting overall strength in its principal product lines. Of particular significance was the improvement in margins in the latex operating unit from the depressed levels of early '89."

NEWTON, MA (MARCH 15) BUSINESS WIRE - Digital Equipment Corp. (NYSE:DEC) and Stardent Computer Inc. announced Thursday that they are entering into a joint development and technology licensing agreement for Stardent's Application Visualization System, AVS.

Under the agreement, Stardent and Digital will implement AVS on Digital's workstations and Digital will have world-wide marketing and distribution rights to AVS on Digital products.

Jack Bowie, marketing manager for Scientific Visualization Applications in Digital's LDP/Science Marketing Group said, ''Digital is committed to

providing advanced visualization tools to our broad base of technical workstation users in networked research and engineering environments. And AVS is a significant new entry in the visualization arena.

AVS is an interactive visualization environment which gives scientists, engineers and technical professionals access to advanced graphics and imaging techniques without graphics programming. A unique visual programming interface allows the end-user to construct visualization applications which incorporate their own computational code.

The AVS Geometry, Image and Volume Viewers provide simple point-and-click menu interfaces for viewing engineering and scientific data sets. AVS is portable and is designed for a distributed, networked environment ranging from supercomputers to desktop workstations. AVS is already installed at hundreds of academic and commercial research facilities and has received wide praise as a breakthrough product, making visualization a practical technology for every researcher using computers.

Scientific visualization provides a new form of interaction between the human and the machine by putting the user in an interactive loop of high-performance computation and interactive graphics. Visualization provides new insight into complex computational problems and accelerates the research and design process.

Stardent Computer Inc. is the leading global supplier of visualization systems, departmental supercomputers and visualization software for the general scientific and engineering community. Applications for the company's products include mechanical computer-aided engineering, computational chemistry, computational fluid dynamics, geophysical analysis, visual simulation, econometric modeling, scientific research and image processing.

Digital Equipment Corp., headquartered in Maynard, Mass., is the world's leading manufacturer of networked computer systems. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the datacenter.

NASHVILLE, TN (MARCH 15) BUSINESS WIRE - REN Corporation - USA (NASDAQ/NMS:RENL), a Nashville-based provider of kidney dialysis services,

Thursday announced that it has acquired a dialysis clinic in Florence, Ala.

The center is expected to generate annual revenues of over $1.2 million. The first REN-owned facility in Alabama, this acquisition brings to 18 the number of centers owned or managed throughout the Southeast and Southwest.

Dr. Jerome S. Tannenbaum, president and chief executive officer, made the announcement today. He stated, ''This new facility was purchased from Dr. Rao Boorgu, a highly respected nephrologist. We are pleased to establish a working relationship with Dr. Boorgu and to now own a center in Alabama.''

Dr. Boorgu will serve as Medical Director of Ren Center - Florence. Dr. Boorgu, in commenting on the acquisition, said, ''I am very impressed with the level of patient care provided by REN Corporation. Our mutual goals of improving the quality of care of patients with kidney disease will be greatly enhanced by this collaborative effort.''

In a related announcement, REN and the Duke University Medical Center announced the opening of an 8-station dialysis facility in Durham, North Carolina. The Company recently received a Certificate of Need approval from the State of North Carolina. Medicare Certification was received on March 5, 1990. This new facility will help ease the over-burdened dialysis services at Duke University Medical Center. REN also operates a center outside Durham in Henderson, N.C., in conjunction with Duke. Dr. Steve Schwab, a faculty member at Duke Medical School, serves as Medical Director of both facilities.

REN Corporation - USA is the nation's fourth largest provider of dialysis services. The company owns or operates 18 dialysis centers in seven states and provides acute inpatient dialysis services to 14 hospitals in Tennessee and Florida. REN also operates three clinical laboratories. REN's common stock is traded in the National Market System under the NASDAQ symbol RENL.

NEW YORK (MARCH 15) BUSINESS WIRE - Mail Boxes Coast to Coast (NASDAQ:MBCC) announced Thursday that the company has signed an agreement with STRATXX Ltd., a Chicago based consulting and investment company.

Under terms of the agreement, STRATXX Ltd. will provide various consulting services to the company. Mail Boxes Coast to Coast has elected James L.

Dutt, chairman of STRATXX, as director and chairman of the board of Mail Boxes Coast to Coast.

In 1947, Dutt began working with Beatrice Companies Inc., considered to be the second largest food and consumer products company in North America. During his more than thirty-eight years of service with that company, Beatrice ran more than 1,200 companies - and Dutt progressed through various management positions to become executive vice president, director of International Operations and director. Dutt became president and chief operating officer of Beatrice in 1977.

From 1979 unit 1985, while Dutt was chairman of the board of directors and chief executive officer of Beatrice Companies Inc., the company's annual sales increased from $7.5 billion to $13 billion. When Beatrice was acquired by Kohlberg, Kravis and Roberts in late 1985, Dutt resigned from his positions and formed STRATXX Ltd., a Chicago-based company which now develops strategies for companies around the world.

Herb Goffstein, chief executive officer of MBCC, added, ''Mail Boxes Coast to Coast is dedicated to long-term growth through an ever increasing market share of the private postal business. We believe Dutt's expertise for building shareholder value and expanding corporate earnings, when added to our expanding base of operations, will be rewarding for the company and in the best interest of our shareholders. We are excited that Dutt has decided to join our management team.''

Mail Boxes Coast to Coast has been responsible for opening 97 private postal service centers in its exclusive territories. Mail Boxes Coast to Coast is the largest single area franchisee of Mail Boxes Etc., (NASDAQ:MAIL) which is the largest and most profitable franchisor of private postal centers in the nation. MCBB's exclusive franchise territories in metropolitan New York and Los Angeles include the nation's two largest financial and commercial centers and encompass approximately 10 percent of the population of the United States.

DALLAS (MARCH 15) BUSINESS WIRE - Super Club Retail Entertainment (SCRE), a subsidiary of Super Club North America Corp. (SCNA), has signed a definitive agreement to acquire approximately 40 of Vestron's video retail outlets which operate under the name ''The Video Store,'' in Ohio and Indiana.

With this acquisition, the number of Super Club retail outlets will reach nearly 400.

Darrell Baldwin, president and CEO of SCNA, commented that, ''Since Super Club's inception, it has been our goal to become strong regional players in carefully selected areas of North America.

The Video Store acquisition will provide solid expansion in cities such as Akron, Dayton, Cincinnati, Cleveland, and Indianapolis -- where they have successfully established a presence in the marketplace. These stores will operate as part of our Video Towne Entertainment group, which is headquartered in Dayton, Ohio.''

Super Club Retail Entertainment also owns Alfalfa/Movietime, Best Video, Record Bar/Tracks, Turtle's, Video Towne Entertainment, Rhythm and Views, and Automated Video Inc., which operate in 25 southeastern and mid-Atlantic states.

DALLAS (MARCH 15) BUSINESS WIRE - Skylink America Inc. (NASDAQ: SKAI) Thursday announced its results of operations for the third quarter and nine months ended Jan. 31. The company reported the following results of operations:

Three Months Ended Jan. 31,	1990	1989
Revenues	$ 3,334,245	$ 1,603,452
Net income (loss)	(389,399)	570,729
Earnings (loss) per share	(10 cents)	20 cents

Nine Months Ended Jan. 31,	1990	1989
Revenues	$ 7,854,125	$ 7,978,043
Net income (loss)	(1,287,341)	2,111,179
Earnings (loss) per share	(35 cents)	75 cents

Edward R. McMurphy, president of Skylink America, stated, "Revenues and earnings from the prior year were primarily generated from the sale of

cable systems whereas current year results primarily reflect operations of free-to-guest and pay-per-view programming businesses.

"Expense reductions initiated during the third quarter began to take effect which resulted in a positive trend within the quarter. The third quarter included approximately $350,000 of depreciation and amortization charges.

"A tax benefit of $120,000 was recorded in the third quarter of the current year as compared to a tax provision of $87,000 in the comparable period in the prior year. Interest expense increased to $119,187 in the third quarter of the current year as compared to $2,246 in the comparable period of the prior year. The increase was due to additional indebtedness incurred in connection with acquisitions.

"During the fourth quarter, free-to-guest operations located in New Jersey will be consolidated into the company's corporate headquarters in Texas thereby reducing duplicate facilities and personnel.

"The financial savings from the consolidation of operations in Texas is expected to have positive results on the company's operations, but such effect is not expected to be realized until the first quarter of fiscal 1991."

Skylink is engaged in the business of providing free-to-guest and pay-per-view programming services and selling pay-per-view equipment, as well as developing, operating and selling cable systems.

#90074b0707 03/15/1990 ~Business Wire

LAWRENCEVILLE, NJ (MARCH 15) BUSINESS WIRE - Multi Soft Inc. (NASDAQ:MSOF) and its parent company Multi Solutions Inc. (NASDAQ:MULT) announce an agreement with UNISYS that allows Multi Soft's INFRONT and EasySAA products to be used for creating SAA/CUA PC-based front-ends for applications running on UNISYS computers.

This allows developers to significantly enhance these applications without changing any host code.

Under the terms of the agreement, Multi Soft has written an interface to the UNISYS STEP (Synchronous Terminal Emulation Program) product.

STEP includes the interface card and software necessary to allow

a PC to emulate a UNISYS UTS 40 terminal. Multi Soft uses the API (application program interface) of the STEP product as the mechanism for

programmatically reading screen images or maps transmitted by a UNISYS host application. The INFRONT also uses standard UNISYS maps as a mechanism for returning data to a host application.

With this implementation of the UNISYS STEP interface, Multi Soft's INFRONT product can be used to create an advanced, PC-resident, front-end program that will run in front of an existing UNISYS host application. These front-end programs typically will include logic that will edit data entered in each field, as well as provide multi-level and context sensitive help directly from the PC.

Interfaces such as these save time and host processor cycles by catching data entry errors and handling help requests at the PC level. They also help improve user efficiency by shortening the learning curve for applications and reducing the effort required to complete a given unit of work. INFRONT will also allow developers to enhance and extend UNISYS host applications by building interfaces that are compatible with the IBM SAA CUA standards.

Multi Soft develops and markets application development tools that allow developers to create cooperative processing applications in a fraction of the time that would be required using low level languages like C or COBOL. These products also reduce the amount of effort required to write PC front-end programs by providing an object orientation for dealing with communications, user interface, and user dialog functions.

CAMBRIDGE, MA (MARCH 15) BUSINESS WIRE - Lotus Development Corp. Thursday announced it will hold its fifth annual developer conference at the World Trade Center in Boston May 10 and 11.

The company also announced that Dr. Alan Kay of Apple Computer Inc. will deliver the keynote address.

Dr. Kay is a fellow at the Palo Alto, Calif. computer company. He is one of several scientists chartered to independently pursue innovative ideas for the company's future. He is a founding principal and veteran of Xerox' Palo Alto Research Center (PARC), where he conceived Dynabook, a powerful lap-sized personal computer. Later, Kay was chief scientist at Atari Corporation, the video game manufacturer. Dr. Kay will speak on ''The Challenging Horizon of New Technology.''

As in years past, corporate and commercial developers of applications

based on Lotus software will be provided technical information and product updates. Speakers will address a wide range of technical and marketing topics, from application development with Lotus products to effective marketing of enhancement products. In addition, Lotus will demonstrate its products running in a wide range of operating environments including VM, MVS, VAX/VMS, UNIX, OS/2 and Presentation Manager, and MS-DOS.

''The evolution of our product line and the introduction of new Lotus products and technologies, such as DataLens and the Add-in Toolkit for Release 3, continue to broaden the community of Lotus partners and customers,'' said Alex Morrow, general manager of Lotus' Systems Technology Group. ''That community includes independent and corporate developers, systems integrators, and customers from every conceivable vertical market sector. We see our developer conference as a time for dynamic exploration of shared opportunities.''

The conference fee is $595. Additional information is available by contacting Lotus Development at 1-800-848-5381.

Lotus Development Corp. is the leading developer of applications software for personal computers and the leading provider of information services delivered on compact disk. Lotus' Developer Marketing Group offers a variety of support services to corporate and commercial developers through its Partner Program.

CORAL GABLES, FL (MARCH 15) BUSINESS WIRE - BLOC Development Corp. (NASDAQ: BDEV) Thursday announced record quarterly and annual revenues, pre-tax earnings and net earnings.

For the three months ended Dec. 31, 1989, revenues increased 180 percent to $5.03 million from $1.8 million for the comparable period in 1988.

Pre-tax earnings for the fourth quarter of 1989 rose 464 percent to $1.01 million from $179,000, while quarterly net earnings jumped 497 percent to $782,000 (5 cents per share on 16.5 million shares) from $131,000 (1 cent per share on 13.2 million shares) for the comparable 1988 period.

For the year ended Dec. 31, 1989, revenues, pre-tax earnings and net earnings rose 160 percent, 144 percent and 141 percent to $11.34 million, $1.71 million, and $1.2 million (8 cents per share on 15.9 million shares) respectively, from $4.37 million, $701,000, and $497,000 (4 cents per share on 12.3 million shares), respectively, for the year ended Dec. 31,

1988.

The increase in revenues and earnings reflects sales of 12 of the company's 13 PC software titles in national distribution, significant expansion of the company's TigerSoftware catalogue circulation, initial operating results from the company's recently acquired business automation services group and initial corporate licensing of the company's F3 Forms Automation System.

Based in Coral Gables, BLOC develops, publishes and markets business and personal productivity software for the IBM PC, PS/2 and IBM compatible market. In addition, the company also provides business automation services to small and mid-sized companies.

MIAMI (MARCH 15) BUSINESS WIRE - Peoples Telephone Co. Inc. (NASDAQ:PTEL) one of the nation's leading competitive public communications companies, Thursday announced that it has entered into a $27 million credit facility with Creditanstalt-Bankverein (''Creditanstalt'').

The credit facility consists of a $12 million revolving credit facility and $15 million standby/term loan. PaineWebber Inc. acted as placement agent for the credit facility.

Jeffrey Hanft, the company's chairman of the board and chief executive officer, reported that the credit facility will be used primarily to finance the acquisitions of existing pay telephone routes and to purchase additional pay telephones for installation.

Hanft stated that ''the Company will concentrate its growth in the eastern and midwestern parts of the United States.'' Hanft further stated that ''the Company has selected Creditanstalt because of its experience in the telecommunications industry and its ability to fund the Company's expansion plans well into the future.''

The company currently operates more than 7,500 telephones in Florida, Georgia, Alabama, Louisiana, Mississippi, South Carolina, North Carolina, Virginia, Tennessee, Ohio, Indiana, Kentucky, Pennsylvania, Texas, California and West Virginia.

RESTON, VA. (MARCH 15) BUSINESS WIRE - Fastcomm Communications (NASDAQ: FSCX) Thursday reported net operating earnings of $84,008, or 2 cents per share for the fiscal quarter ending Jan. 31, 1990 vs. a loss of $160,778, or (4 cents) for the like period last year.

Net earnings for this quarter included the effect of a $25,000 one time write off of obsolete inventory. Revenues for the quarter were $701,307 vs. $415,075, a 69 percent increase.

The company stated that it is gratified with the performance in this quarter and with the two previous quarters.

Robert Dennis, president, said: ''Our product acceptance has allowed us to increase margins and profits. We see this trend continuing through the balance of this fiscal year and well into next year. Our balance sheet

shows no long term debt and our cash flow will allow us to develop additional products.''

Fastcomm Communications Corp. also announced the addition of three new products to its FDX 9696 family of high speed modems. The FDX 9696S allows for complete security for the computer systems they serve. The FDX 9696B is a half-card internal modem designed for IBM PC's and compatibles and the FDX 9696LL, a modem with four-wire leased lines and autodial-restoral. All products will be available this quarter.

''We will continue to supply the communications industry with high quality products, and we are currently working on the next generation of high speed data transmission products,'' said Dennis.

''It is our intention to grow to a $25 million company through new product development and acquisition by broadening our commitment to the data transmission and communications industry over the next five years.''

Fastcomm Communications Corp. is a designer, manufacturer and marketer of data communications equipment which combine proprietary or licensed software with state-of-the-art, high performance signal processing circuitry in order to provide virtually error-free, high speed transmission of data or facsimile documents over public and private telecommunications networks.

ERIE, PA. (MARCH 15) BUSINESS WIRE - Autoclave Engineers (NASDAQ:ACLV) Thursday announced the appointment of George H. Schofield to the company's board of directors.

Schofield fills a vacancy created by the retirement of J.W. Hannon.

Schofield serves as chairman, president and chief executive officer of Zurn Industries Inc., a diversified provider of products ,equipment and services to the waste-to-energy and water control markets.

He joined Zurn on Jan. 1, 1985 as president and chief operating officer after a 33 year career with General Electric. His experience at General Electric consisted of 12 years as a key operating officer, including six years as corporate vice president and general manager of the Industrial and Marine Steam Turbine Division and 21 years of financial management experience.

Commenting on the appointment, J.C. Levinson, president of Autoclave Engineers, said, ''George Schofield's knowledge and experience will be invaluable to us as we implement our long-term growth programs.

''This company has many attractive opportunities in its niche markets and George's perspective and insight will help us to take best advantage of these opportunities. His background and accomplishments are strategic assets to the company and to our board of directors.''

Schofield's professional associations include the Pennsylvania Business Roundtable, the National Association of Manufacturers and the Pennsylvania Chamber of Business and Industry.

He is most active in the community, serving as a member of the St. Vincent Foundation for Health & Human Services Board of Corporators, the ACES Advisory Committee, the board of directors of the Erie Conference on Community Development, the board of corporators of Hamot Health Systems Inc., the board of directors of United Way of Erie County and the board of trustees of Gannon Universtiy. In addition, he serves as President of the Coalition for Health Cost Containment.

Schofield is a graduate of the University of Vermont. He and his wife, Barbara, reside in Erie. They are the parents of four children.

Autoclave Engineers, headquartered in Erie, with subsidiaries in in Erie, Orange, Calif., and Nogent, France is a recognized leader in providing high quality engineered products for chemical research and related industrial process markets throughout the world.

FRANKLIN, TN (MARCH 15) BUSINESS WIRE - Response Technologies Inc. (NASDAQ/NMS:BITXP) (ASE:RTK) Thursday reported results for the third quarter ended Jan. 31, 1990.

The company reduced its loss for the three month period to $359,000 (7 cents per share) from a loss of $5.75 million ($1.17 per share) for the like period of the prior year. Operating expenses for the quarter, were $1.58 million versus $7.95 million for the comparable quarter last year.

For the nine month period ended Jan. 31, 1990, the company reported a loss

of $5.68 million ($1.11 per share) versus a $12.56 million loss ($2.52 per share) for the like period in the prior year. The loss for this nine month period included a charge of $2.94 million taken for restructuring and reorganization of the company.

Without these special charges the loss for the period would have been $2.74 million. Total revenue, including interest income, for the nine month period was $2.60 million, compared to $4.92 million for the like period of the prior year. Operating expenses for the nine month period including special charges were $8.44 million versus $17.81 million for the comparable period last year.

''I continue to be very pleased with the progress toward the transformation of this company into a quality cancer services provider,'' said William H. West, M.D., president and CEO. ''The first IMPACT Center which opened November 1, 1989, in Memphis, Tenn., generated revenue of $409,000 in its first three months of operation.

''IMPACT (IMPlementing Advanced Cancer Treatment) Centers are designed to deliver the clinical components of advanced cancer technology to private practicing oncologists, principally through a licensed home pharmacy, blood bank and clinical laboratory. The company's second and third centers are scheduled to open in the fourth quarter as well,'' continued West.

Dr. West also reported that financing efforts required to complete the transformation of the company are in process. To date $1,460,000 has been placed in escrow towards the completion of the $2,000,000 minimum Private Placement Offering which has been previously announced. The company has extended the Feb. 28, 1990, deadline to reach the minimum offering.

Response Technologies Inc. common stock is traded on the American Stock Exchange under the symbol RTK and its preferred stock is traded on the NASDAQ/NMS under the symbol BITXP.

DFW AIRPORT (MARCH 15) BUSINESS WIRE - American Airlines introduced a new, logical and user-friendly structure for its excursion fares today (March 15).

American is reestablishing a direct link between price and length of flight.

''Our plan eliminates peculiarities in the existing fare structure, which sometimes make it more expensive to fly to the next state than halfway across the country,'' said Michael W. Gunn, American's senior vice president-marketing. ''We are simplifying the formula so all affected markets receive equal treatment.''

Under the new structure, all fare levels are based on mileage. Peak fares are 15 percent higher than off-peak, and the less-restrictive seven day advance purchase fares are only 20 percent higher than the deeply discounted 14 day advance purchase fares. No changes are being made to advance purchase requirements, penalties, or peak or off-peak days.

''Some markets will see decreases, others will have increases,'' Gunn said. ''However, the change in either direction is modest.'' For example, off-peak round trip fares will decrease as much as $31 in some markets, while peak roundtrip fares will fall by as much as $40. Increases will range from $2 to $41 roundtrip.

The plan, which covers most American Airlines markets, is effective for tickets purchased on or after April 17. These dates were selected to avoid disruption of current Easter and Spring vacation travel plans, Gunn said. ''We felt that with advance notice of the changes, people could better plan their summer travel.''

DAYTON, OH (MARCH 15) BUSINESS WIRE - Super Food Services Inc. (NYSE:SFS) Thursday reported its sales and earnings for the 12 and 24 weeks ended Feb. 10, 1990.

Net sales for the twelve weeks ended Feb. 10, 1990 were $406.2 million compared to $381.5 million for the like period last year or an increase of 6.48 percent. Net sales for the 24 weeks ended Feb. 10, 1990 were $815.4 million compared to $772.4 million in fiscal 1989.

Net income increased 8 percent in the second interim period to $3.65 million. Earnings per common share for the second quarter were 34 cents compared to 31 cents in the second quarter last year. All divisions of the company continue to show progress in improved productivity through the use of computerized technology. The company anticipates that this favorable trend will continue.

Net income in the 24 weeks ended Feb. 10, 1990 was $7.36 million compared to $6.90 million in the same period last year, or an increase of 7 percent. Earnings per common share in the first 24 weeks were 69 cents compared to 64 cents in the same period last year.

The first 24 weeks record results reflect the company's continued effort to improve its ratio of sales to net earnings. Year-to-date, the ratio of net earnings to sales was .90 percent compared to .89 percent for the same period last year.

On March 15, 1990, a quarterly cash dividend of 8 cents per share was declared on the common shares payable June 15, 1990 to shareholders of record May 21, 1990.

Super Food wholesales a complete line of food and non-food products to over 800 supermarkets in Ohio, Kentucky, Indiana, Michigan and Florida. Super Food's stock is listed on the New York Stock Exchange.

LOUISVILLE, KY (MARCH 15) BUSINESS WIRE - Steel Technologies Inc. (NASDAQ/NMS:STTX) Thursday announced that the board of directors has accepted the resignation of Daryl A. Elser as president, chief operating officer and a director of the company.

Elser resigned to pursue other personal and professional interests.

Concurrently, the company announced that the board of directors appointed Timothy M. Graven to the positions of president and chief operating officer. Graven was formerly executive vice president, chief financial officer, secretary and treasurer of steel technologies. He has been with

the company since 1979 and a member of the board of directors since 1981.

The board appointed Kenneth R. Bates to assume the positions of vice president, chief financial officer, secretary and treasurer. Bates was formerly controller of Steel Technologies.

As an intermediate steel processor, Steel Technologies processes flat rolled steel to specified thickness, width, temper and finish requirements for automotive, appliance, communications, electrical, machinery and office equipment industries, among others.

The company's common stock is traded in the NASDAQ National Market System under the symbol STTX.

FORT WORTH (MARCH 15) BUSINESS WIRE - Sunbelt Nursery Group, Inc. (AMEX symbol: SBN) Thursday reported operating results for the five months ended January 31, 1990 and 1989. Sunbelt previously announced a change in its fiscal year end from August 31 to January 31. This report is for the short fiscal transition period.

Sunbelt's unaudited results for the five months ended January 31, 1990, were sales of $46.4 million, and a net loss of $1.56 million, or $.47 per share, compared to sales of $55.5 million and a net loss of $7.43 million, or $2.03 per share, for the same period last year. For the two months ended January 31, 1990, sales were $22.2 million with net income of $131,000, or $.01 per share, compared to sales of $26.5 million and a net loss of $3.2 million, or $.88 per share, for the same period last year.

Commenting on the results, Donald W. Davis, president and chief executive officer, said, ''The positive results from our restructuring last May are clearly shown by the reduction in the loss for the five-month period from $7.43 million last year to $1.56 million this year. The decrease in sales is due to the closing of 30 stores and 23 licensed departments at Sears last May. Sales from comparable stores for the five-month period are up 3.5 percent from the same period last year.

''Early results from the beginning of our first spring selling season in our new fiscal year have been nothing less than spectacular. Weather conditions have been favorable throughout our markets and early sales reports have been very good. We expect our first quarter report to be good reading for our shareholders when it is published in May,'' Davis said.

Sunbelt Nursery Group, Inc. is the dominant nursery enterprise in six of the 11 largest lawn and garden markets in the United States with 97 stores that feature nursery stock and lawn and garden supplies.

WEST PALM BEACH, FL (MARCH 15) BUSINESS WIRE - VHC Ltd. (NASDAQ:VHCL) of West Palm Beach, Thursday announced that its board of directors has entered into a letter of intent with Joseph F. Bradway Jr., president and chief executive officer of the company, whereby a company formed by Bradway would acquire all the outstanding common stock of the company other than stock held by Bradway for a net cash price of $5.75 per share.

All of the directors of the company and Director-Designee, L.K. Moore, who together own or control approximately 43 percent of the outstanding common stock, have agreed to sell their stock to Bradway and recommend to the VHC stockholders that the merger be approved.

The closing of the transactions and the obligation of the stockholders to sell their stock to Bradway are subject to a number of conditions, including the execution of definitive agreements, the availability of financing, and receipt of a satisfactory fairness opinion, all to be obtained prior to June 13, 1990.

Bradway and his family members currently own approximately 30 percent of the outstanding VHC stock.

VHC Ltd. is a holding company and parent of Maul Technology Co., which manufactures machinery for the production of glass containers, and A.K. Robins & Company Inc., which manufactures food processing machinery.

LITTLE ROCK, AR (MARCH 15) BUSINESS WIRE - TCBY Enterprises Inc. (NYSE:TBY) Thursday announced that net income for its first quarter ended Feb. 28, 1990 rose 13 percent to a record $3,238,000, or 12 cents a share, from $2,860,000, or 11 cents a share in the first quarter of 1989.

Sales and franchising revenues increased 25 percent to $30,652,000 from $24,471,000 in the first quarter of fiscal 1989. Total systemwide sales increased 20 percent to a record $55 million in the first quarter of fiscal 1990 from $46 million in the first quarter of fiscal 1989.

Frank D. Hickingbotham, chairman of the board and chief executive officer,

said the record results ''are primarily attributable to the increases in sales resulting from the greater number of franchised and company-owned stores open in fiscal 1990.

''We are very pleased with these results, especially understanding that during this quarter we experienced the initial start-up costs associated with the $12 million 90,000 square foot production expansion at our manufacturing facility, Americana, which became operational this quarter. Also the peak of the recent milk price increase that began this past fall was experienced.''

TCBY added 83 stores during the first quarter, a 28 percent increase in store openings from first quarter fiscal 1989, bringing the total stores open at Feb. 28, 1990 to 1,665, an increase of 425 from the 1,240 one year ago.

At Feb. 28, 1990, 148 stores were company-owned and 1,517 were franchised or licensed stores. The company said it expects to open over 400 stores in fiscal 1990.

Same store sales decreased 8 percent in the first quarter of fiscal 1990 from the first quarter of fiscal 1989. The decline in sales from existing stores for the first quarter of 1990, the company believes, is primarily attributable to the fact that the same store sales comparison figure for this quarter was made against strong sales reported in the first quarter of fiscal 1989, in which same store sales increased 16 percent.

Another factor adversely affecting sales in the first quarter of fiscal 1990 was the unseasonably cold weather experienced nationwide during December 1989. The company believes that same store sales will be positive for the fiscal year 1990.

TCBY is the largest franchisor and operator of retail stores specializing in soft-serve frozen yogurt products. Sales consist of sales by company-owned stores, sales of the company's frozen yogurt and sales of equipment and other products to franchised stores. Franchising revenues consist of franchise fees and royalty income.

#90074b0781 03/15/1990 ~Business Wire

ATLANTA (MARCH 15) BUSINESS WIRE - Recent reports downplaying the risks of asbestos in more than 733,000 U.S. facilities may threaten the health and safety of millions of Americans, concluded a panel of prominent asbestos

researchers recently assembled by the non-profit National Asbestos Council (NAC).

New Jersey-based specialists who advise thousands of local residents how best to manage asbestos without undue alarm will meet March 21, in Newark, N.J., to form the 15th chapter of the NAC. The new 100-member chapter meets at 6 p.m. at the Holiday Inn Newark Airport, 160 Holiday Plaza, Newark.

Founded in 1983, the non-profit NAC is a multi-disciplinary information association encompassing analysts, architects, physicians, building owners consultants, engineers, attorneys and other asbestos-concerned professionals.

''Published statements that asbestos removal is unwarranted, costly and ineffectively performed may lull the public into a 'false sense of security,''' the panel concluded. Condemning the wholesale removal of asbestos, the scientists reported that asbestos should continue to be identified and, only if necessary, abated.

''Managing asbestos in place is an advance in the knowledge of how to handle (the known carcinogen),'' said Warren Friedman, Ph.D., an industrial hygienist, General Services Administration, Washington. ''In previous years, when people knew less about in-place management, there was less confidence in doing so.''

The panel rejected findings painting high-school football, for example, as more dangerous than asbestos exposure, stating that ''studying 10 years of exposure and focusing merely on occupants, rather than including those who'll disturb asbestos routinely, is simply inappropriate,'' the panel concluded.

''Perhaps we could do an epidemiological study with a huge population and measure 30 years of effects. But then,'' said Dr. Richard Kronenberg, professor and chairman of medicine, University of Texas Health Center at Tyler, ''it may be too late to go back and protect those people.''

NAC President William B. Smith and NAC Executive Director Paul E. Skoglund will present the chapter charter to New Jersey Chapter President Marc Vink.

PHOENIX, AZ (MARCH 15) BUSINESS WIRE - Del Webb Corp. (NYSE:WBB) announced that its board of directors, at their meeting Thursday, voted to reinstate the payment of a regular quarterly cash dividend.

Initially, the dividend will be 5 cents per share and will be paid on April 20 to shareholders to record on March 30.

Dividend payments were last made in 1987 and were suspended while the company completed its restructuring to focus its operations on the development of active adult communities.

The restructuring was successful and resulted in 1989 net income of $7,597,000, or 62 cents per share on revenues of $189.5 million, compared with a loss of $14,949,000 in 1988.

Philip J. Dion, chairman of the board and chief executive officer, commented, ''The reinstatement of the quarterly dividend to shareholders is indicative of the strength of our business.

The dividend action is prudent at this time with our return to profitability, a strong first quarter just about to be concluded and the positive outlook for the entire fiscal year.''

Dion continued, ''The dividend payment will reward all of our loyal shareholders who stood by us during the difficulties of the past and make Del Webb shares more attractive for new investors.''

Del Webb's full board also reviewed board member James J. Cotter's stated intention to run his own slate of three directors at the May 16 annual meeting of shareholders. The board unanimously, with the exception of Cotter, agreed to vigorously oppose Cotter and his two nominees, fellow Craig Corp. directors.

In addition, Del Webb's board of directors voted to submit for shareholder ratification a management proposal at the May 16 annual meeting. The proposal would prohibit the company from paying greenmail or other special compensation to any shareholder.

The board also adopted a policy not to reimburse any costs or expenses incurred by a dissident shareholder in seeking to elect candidates to the board, except as required by law or approved by disinterested directors. Cotter has indicated he may seek reimbursement from Del Webb Corp. for his expenses related to his intent to elect three candidates for the board.

Del Webb Corp. is the leading developer of active adult communities in the United States.

CHICAGO (MARCH 15) BUSINESS WIRE - Wells-Gardner Electronics Corp., Thursday reported lower sales and earnings from continuing operations for the year and fourth quarter ended Dec. 31, 1989.

Sales from continuing operations in 1989 declined to $33,175,000, a five percent reduction from the previous year's $34,816,000. From continuing operations, the 1989 loss amounted to $387,000, or 10 cents a share, vs. a gain of $1,517,000, or 40 cents a share, in 1988.

The company recently announced plans to discontinue the marketing of switching power supplies and touch screen panel lines. These products, sold as components, contributed less than three percent to total corporate revenues each of the last three years.

The 1989 loss from discontinued operations totalled $813,000, or 22 cents a share, compared to a loss of $639,000, or 17 cents a share, during the prior year.

In 1989, the company also reserved for the anticipated costs of phasing out the two discontinued operations during 1990. The reserve amounts to $906,000, or 24 cents a share, and is reflected in the company's 1989 financial statements.

For 1989, the company had a net loss for both continuing and discontined operations of $2,106,000, or 56 cents per share, vs. net earnings of $878,000, or 23 cents a share, in 1988.

Fourth quarter sales from continuing operations declined to $8,576,000, a 13 percent reduction from $9,705,000 in the comparable quarter of 1988. The 1989 quarter's loss from continuing operations amounted to $88,000, or 2 cents a share, versus a gain of $92,000, or two cents a share earned in the last quarter of 1988.

Results for discontinued operations in the fourth quarter of 1989 showed a loss of $415,000, or 11 cents a share, compared to a loss of $165,000, or four cents a share, for the same period in 1988.

Wells-Gardner Electronics Corp. designs and manufactures electronic products which are marketed both domestically and internationally. Its major products are color video monitors and data display monitors. In addition the company assembles televisions for private label distribution through Majestic, Industries.

BOCA RATON, FL. (MARCH 15) BUSINESS WIRE - Teletimer International Inc. (NASDAQ:TLTMC) announced Thursday that it has suspended the effectiveness of its sale of four million shares of Teletimer's preferred stock to Nu-Age Technologies Inc.

On March 8 Teletimer announced that it had completed a transaction with Nu-Age in which, among other things, Nu-Age had paid Teletimer $325,000 in cash as the initial payment of the $2.8 million purchase price for four million shares of Teletimer's Series I Preferred Stock.

Payment was made by Nu-Age delivering a check to Teletimer. Nu-Age had tendered the check to Teletimer on the strength of a check which it had received from the trust account of the law firm representing the lender that was financing Nu-Age's purchase of the preferred stock.

The lender's attorney's check was dishonored on presentation. Teletimer and Nu-age have agreed to suspend the effectiveness of their agreement until Nu-Age's lender honors its commitments to Nu-Age, or unitl Nu-Age can make other arrangements to fund its purchase of Teletimer preferred stock.

NANUET, NY (MARCH 15) BUSINESS WIRE - Executive TeleCard Ltd.

(NASDAQ:EXTL; PHLX:XTL) announces the introduction of access to domestic 800 toll-free numbers for non-U.S. and U.S. citizens by its World Direct card holders.

All U.S. marketers who use any carrier's 800 toll-free number will have an opportunity to capture sales and service requests from overseas. The entire cost will be borne by the calling party and as a result there will be no increase in cost to the U.S. marketers.

The World Direct calling card developed by EXTL will enable the overseas caller to reach any domestic U.S. 800 toll-free number and charge the toll portion of the call to major credit cards.

The World Direct card is essentially a call home telephone card for either U.S. or non-U.S. travelers. A traveler receives the card from his travel agency or travel related company. The World Direct card lists a local access number for each of 45 countries which enables the holder to make a telephone call, assisted by an operator, from any telephone in the country to the U.S., within the U.S., and from the U.S. anywhere in the world.

Robert Roach, president of Executive TeleCard, said that, ''it has been difficult for U.S. business travelers, expatriates and military personnel stationed overseas to secure products and services from U.S. marketers who advertise on cable T.V. and publications listing only 800 toll-free numbers. Since no local number is advertised, both foreign and U.S. citizens overseas have a difficult, if not impossible task to call from international locations.''

AT&T using their USA Direct program recently introduced a similar service which will reach only the 800 toll-free numbers issued by AT&T. MCI, Sprint, Telcom USA, and other U.S. long distance carriers who sell 800 toll-free numbers have no current means of providing their domestic 800 customers with similar overseas access.

Stephen Fleming of Telcom USA said that ''now all issuers of 800 numbers will have the same opportunity to receive calls from overseas non-U.S. and U.S. citizens. Executive TeleCard deserves credit for being creative in serving a needed market and sharing the benefits with all U.S. marketers who use 800 numbers.

MARKHAM, ONTARIO (MARCH 15) BUSINESS WIRE - International Semi-Tech

Microelectronics Inc. (''Semi-Tech'') Thursday announced that it has completed its purchase of the Consumer Products and Sewing Machine divisions of European Home Products, PLC.

The company will be renamed Singer Europe and returns a major distribution channel to Singer's worldwide operations.

James Ting, president and chief executive officer of Semi-Tech said, ''We knew that to increase Singer's effectiveness we had to return to the fold the former distribution channels of SSMC Inc.

''Singer Europe's 12 country network does this, adding $480M of revenue directly to SSMC Inc. Even more important, it places us strategically to take advantage of the unfolding events in Eastern Europe.''

Ting also said, ''We are hosting the Singer Marketing Conference this year in Toronto in June. The theme is 'Together Again'. This transaction will give real meaning to all Singer employees.''

Singer Europe operates in 12 West European countries (except France) with 597 company-owned and operated stores and an additional 8,300+ direct/indirect distribution channels.

Its stores sell a wide range of consumer electronic and durable goods under the Singer brand name as well as consumer and industrial sewing machines.

International Semi-Tech Microelectronics Inc. is a Canadian public company headquartered in Markham, whose shares are listed on the Toronto Stock Exchange, trading under the symbol ISE.

Its Far East subsidiary, Semi-Tech Microelectronics (Far East) Limited is listed on the Hong Kong Stock Exchange, symbol 448.

SSMC Inc. is listed on the New York Stock Exchange, symbol SSM.

SEABROOK, NH (MARCH 15) BUSINESS WIRE - Calling it a ''major victory for New England consumers,'' New Hampshire Yankee President Edward A. Brown announced Thursday that Seabrook Station has received its full-power license.

The license was issued this afternoon to New Hampshire Yankee, the

operator of Seabrook Station, by the U.S. Nuclear Regulatory Commission's Office of Nuclear Reactor Regulation.

''This is a major victory for New England consumers, because a safe and efficient Seabrook Station will be providing clean, reliable electricity for more than one million homes, well into the next century,'' Brown said. ''Our 17-year licensing saga is over, and now the people of New Hampshire Yankee can finally fulfill their commitment to operate a safe Seabrook Station.''

Brown said the power ascension test program will begin following a technical review of the license by plant officials. He said the plant will generate electricity for the first time within a few weeks when the reactor reaches the 10 percent power level.

''Over the next two to three months, we will be bringing Seabrook Station up to 100 percent power through a safe, conservative power ascension test program,'' Brown said. ''During this period, we will test the reactor at different power levels and thoroughly evaluate how all our plant systems work together. Throughout our test program and throughout the commercial operation of Seabrook Station, safety will continue to be our number-one priority.''

Seabrook Station will be coming on-line ''at a critical time, as demands for electricity increase dramatically each year during the summer months '' Brown said. ''With Seabrook Station connected to the New England power grid, our region will be in a much better position to avoid power shortages and the emergency measures that have become all too common in recent years.''

Seabrook Station's full-power license was issued the day after the U.S. Circuit Court of Appeals in Washington, D.C., rejected motions filed by intervenors to block the license. In rejecting the intervenor motions, the court said, ''Petitioners have not demonstrated the requisite likelihood of success on the merits to warrant a stay.''

The full-power license was authorized by the NRC Commissioners March 1.

''While this day is historic and certainly gratifying to me personally, I want to recognize the sacrifices made by our New Hampshire Yankee team, and the challenges they've had to overcome,'' Brown said. ''No other power plant in the world has undergone the scrutiny, the inspections and the examinations Seabrook Station has. Our New Hampshire Yankee team has persisted and prevailed in the face of all these extraordinary challenges. Now, they're ready to do their jobs. I salute them.''

DALLAS (MARCH 15) BUSINESS WIRE - Southmark Corp. (NYSE:SM) Thursday reported results for the second fiscal quarter and six months ended Dec. 31, 1989.

For the three months ended Dec. 31, 1989, Southmark reported net loss of $92 million, versus net loss of $93 million in the comparable period of fiscal 1989. Revenues for the fiscal 1990 quarter totaled $256 milion, compared with $532 million during the same period a year earlier.

For the six months, the company reported net loss of $148 million, compared with net loss of $91 million for the six months ended Dec. 31, 1988. Revenues for the first half of fiscal 1990 were $523 million, versus $1.1 billion in the first six months a year earlier.

The loss in the second quarter of fiscal 1990 is attributable to a combination of factors, including greatly reduced real estate sales and additions to provision for losses related to the company's thrift operation.

Additionally, the company received reduced revenues from management fees and lease payments from rental properties, as well as reduced interest income. These revenue reductions were partially offset by reductions in general and administrative expenses due to further reductions in staff, as well as the benefit derived from the non-accrual of $67 million of interest on Southmark's unsecured indebtedness during its bankruptcy proceeding.

Southmark also incurred costs associated with its reorganization activities, including increased financial advisory, accounting and legal expenses arising out of the bankruptcy proceeding.

As previously reported, in mid-January Southmark filed a Plan of Reorganization with the United States Bankruptcy Court for the Northern District of Texas. The plan calls for the liquidation of most of the company's assets, except for its wholly owned thrift, San Jacinto Savings Association.

Southmark is currently in discussions with its creditors and other interested parties to explain the benefits of the Plan and to enlist support for rapid completion of the bankruptcy process.

Southmark, headquartered in Dallas, is a real estate and financial services company operating under Chapter 11 of the U.S. Bankruptcy Code.

FORT LAUDERDALE, FL (MARCH 15) BUSINESS WIRE - Encore Computer Corp. has been awarded a $1.22 million contract by CAE-Link Corp., Link Flight Simulation Division, Binghamton, N.Y.

The provisions of the contract call for the development of MIL-SPEC technical publications to support Encore computer systems in the U.S. Air Force FB-111A, F-111D, F-111E, and F-111F Mission Simulators and associated Software Support Centers.

The contract, awarded to Encore's Custom Documentation Products Department under the F-111 Block Update Program, is the latest in a succession of contracts awarded to Encore since its entry into the military/specialized documentation market in January 1984.

In-Process reviews with CAE-Link and the Air Force will be held in Fort Lauderdale at the 20-percent, 50-percent, and 80-percent development stages.

The contract also calls for Encore to perform on-site validation/verification of the technical publications with Government and Prime Contractor representatives at Binghamton, N.Y., Plattsburg Air Force Base NY, Cannon Air Force Base NM, and Royal Air Force Lakenheath in the U.K.

Encore recently completed the final stages of a $3.13 million documentation contract for Loral Defense Systems, Akron, Ohio to support the Air Force's F-15E Weapons Systems Trainers. This month, Encore will deliver a $418,000 contract to Loral for changes and revisions under the F-15 and F-15E update program.

Encore Computer Corp. is a Fort Lauderdale, Florida-based company that designs, manufactures, sells, and supports the CONCEPT family of real-time computer systems and the UNIX based Multimax family of parallel/multiprocessing systems and solutions for the commercial, technical and government markets worldwide.

BOSTON (MARCH 15) BUSINESS WIRE - BayBanks Inc., reported Thursday that, based on the rising level of nonperforming loans since year-end 1989, it expects to report an operating loss of approximately $14 million for the quarter ending March 31, 1990.

BayBanks earned $6.8 million in the fourth quarter of 1989 and $63.1 million for the full year 1989.

The company said that it estimates nonperforming assets will be about $245 million or 3.1 percent of total loans outstanding at March 31, up from $156 million at year-end 1989. Reserves at quarter-end are projected to equal $125 million or approximately 51 percent of nonperforming assets. Net loan losses for the quarter are estimated to be $25 million, roughly the same amount as recorded in the fourth quarter of 1989.

''The weakness of the real estate sector has led to some further deterioration in our loan portfolio,'' said William M. Crozier Jr., chairman and president of BayBanks Inc. ''Our projected additions to reserves are consistent with this current evaluation of BayBanks' credit quality. We are continually reviewing our portfolio as well as economic conditions. If the softness in business consitions continues, we will take whatever provisions and charge-offs appear necessary.''

Crozier noted that BayBanks' capital ratios are sound and well above regulatory guidelines. The projected quarter-end primary capital ratio is 6.8 percent, compared with the regulatory minimum guideline of 5.5 percent. Under the new risk-adjusted standards, the company's total capital ratio is expected to be 8.6 percent, compared with the regulatory minimum of 7.25 percent.

Crozier also noted that as a part of the regulatory examinations of the loan portfolios of major New England institutions, BayBanks' loan portfolio is presently under review by federal and state supervisory agencies. ''Our projections at this time are limited to our continuing assessment and in keeping with our normal practices. It is likely that we will not know the final conclusions of the regulatory review until sometime in April,'' Crozier said.

HOUSTON (MARCH 15) BUSINESS WIRE - The Monroe Auto Equipment Co., division of Tenneco Automotive, a unit of Tenneco Inc. (NYSE:TGT), has acquired Rancho Industries Inc., a leading supplier of high performance suspension systems and components for the light truck and sports utility vehicle aftermarket.

Rancho reported annual sales in excess of $20 million in 1989. Terms of the acquisition were not disclosed.

''The acquisition of Rancho supports our strategy to strengthen our core manufacturing businesses,'' said J.P. Reilly, Tenneco Automotive president and chief executive officer. ''This is the fifth acquisition related to last year's restructuring and divestiture of the retail division, and, like the previous acquisitions, will enhance our ability to compete in the marketplace.''

As a leader in the high performance market, Rancho will be instrumental in providing Monroe with access to the key specialty markets that offer significant opportunities for future growth, according to Ronald G. Foster Tenneco Automotive senior vice president and Monroe general manager.

''Rancho's investment in research and its reputation for high quality is an excellent fit with the standards Monroe has established for its products,'' Foster added. He stressed that there are no plans for immediate changes to Monroe or Rancho product lines, distribution channels or customer service procedures.

''The acquisition is a win-win situation,'' said Gene Shook, president of Rancho Industries. ''Rancho will immediately benefit from Monore's proven marketing expertise, and Monroe will profit from Rancho's solid position and know-how in the high performance niche markets.''

Monroe is the industry's leading producer of shock absorbers, struts and ride control components for vehicle manufacturers and for the replacement equipment market.

Monroe has established an international presence with administrative, manufacturing and distribution facilities in North and South America, Europe and Australia. Headquartered in Monroe, Mich., the company employs 7,500 people worldwide.

Tenneco Automotive is a leading manufacturer and marketer of automotive parts worldwide. Its Walker Manufacturing Co. division is the world's largest producer of automotive exhaust systems. Tenneco Automotive Brake is a manufacturer of non-asbestos brake friction products, and Brake-Pro Systems offers a complete line of brake products for the replacement market.

Tenneco Inc. is a Houston-based diversified industrial corporation with major business interests in natural gas pipelines, agriculture and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

CAMBRIDGE, MA. (MARCH 15) BUSINESS WIRE - Bolt Beranek and Newman Thursday said it has named Charles H. (Nick) Ide as president of the company's BBN Systems and Technologies Corp. subsidiary.

Ide, 52, joins BBN from General Electric Co. where he was general manager of GE's Aerospace Electronic Systems Department in Utica, N.Y. His 26-year career with GE included engineering and general management responsibilities in a variety of defense, aerospace, and simulation products businesses. Ide holds a BSEE from Cornell University and an MSEE from Syracuse University.

''Nick will be an important addition to BBN's management team,'' said

Stephen R. Levy, chairman and chief executive officer of BBN. ''He brings fresh insights to BBN Systems and Technologies' contract research and development activities, as well as an outstanding background in managing a major systems business.''

Levy said that David C. Walden, who had served as BBN Systems and Technologies' president, will join BBN's corporate staff as a senior vice president where he will play an important role in the development of BBN's rapidly expanding international business and in its quality programs.

Headquartered in Cambridge, Mass., Bolt Beranek and Newman is a diversified high technology corporation. Through its subsidiaries, BBN develops, manufactures, sells, and supports products including private wide-area communication networks, data analysis software, and time-critical computers; provides research and development services in the computer and physical sciences; and builds advanced simulation and sensor and surveillance systems.

For its fiscal year ended June 30, 1989, BBN had sales of $292 million.

CUPERTINO, CA (MARCH 15) BUSINESS WIRE - Apple Computer Inc. (NASDAQ:AAPL) announced Thursday that financial results for its second fiscal quarter, which will end March 30, will be better than previously expected.

According to the company, this revised outlook is due to higher-than-expected revenues and gross margins, in addition to close management of expenses.

''Apple's fundamentals continue to be sound,'' said John Sculley, chairman and chief executive officer. ''The current quarter's performance is due to the momentum of our Macintosh computer family of products. Compared to the second quarter a year ago, demand for our compact products has remained steady while our modular products continue to record significant growth.''

''We consider this to be good evidence of the importance of our modular Macintosh products to Apple's overall business proposition. Since early February, we have been advising analysts that marketplace acceptance of our modular products would be a key variable in the quarter's performance. This trend, combined with our focus on managing expense growth, has resulted in our increased expectations for the second quarter.''

In the first quarter of fiscal 1990, which ended Dec. 29, 1989, Apple Computer reported net sales of $1.493 billion and earnings of 96 cents per share. In the second quarter of fiscal 1989, which ended March 31, 1989, net sales were $1.247 billion and earnings were 44 cents per share.

NEW YORK (MARCH 15) BUSINESS WIRE - The trustees of MONY Real Estate Investors (MONYREI) declared a third fiscal quarter liquidating dividend of $2.00 per share pauable on April 16, 1990 to shareholders of record on March 30, 1990.

The trust's operating cash flow was 13 cents per share for the quarter ended Feb. 28, 1990 as compared to 21 cents per share for the preceding quarter.

Total cash flow for the current quarter, including gains from sales, was 55 cents per share as compared to 29 cents for the preceding quarter.

The following summarizes MONYREI's results of operations for the nine months and three months ended Feb. 28, 1990 as compared with the same periods of the prior year.

During the third quarter, MONYREI sold its largest property for a $4.6 million gain. Cumberland Center, a 164,500 square foot office building located near Chicago's O'Hare airport was sold for $20 million.

In addition to this sale, a $5 million mortgage matured and was paid-off. The Trust now has approximately $70 million of assets, excluding $49 million of short term investments, held in anticipation of retiring corporate liabilities and distributing dividend.

CHARLOTTE, NC (MARCH 15) BUSINESS WIRE - American City Business Journals Inc. (OTC: AMBJ) announced it had reached an agreement to acquire two local weekly business newspapers in Florida, the Tampa Bay Business Journal and the Orlando Business Journal.

The publications are being purchased from The Richard N. Hoerner Jr. Family Trust. The Tampa Bay Business Journal and the Orlando Business Journal were founded by the late Richard Hoerner Jr. in 1981 and 1984.

Ray Shaw, chairman of American City, said, ''These two markets have exceptional growth potential and nicely compliment American City's other

Florida properties.'' American City already owns weekly business newspapers in Miami and Jacksonville.

Purchase of the Tampa Bay and Orlando journals will bring to 25 the number of weekly business newspapers owned by American City.

MEMPHIS, TN (MARCH 15) BUSINESS WIRE - The following personnel changes were announced by First Tennessee (NASDAQ/NMS:FTEN).

Lee Welch, president and chief executive officer of Lebanon Bank, a subsidiary of First Tennessee National Corp. (FTNC), will move to the Tennessee banking group of First Tennessee Bank to act as special assistant to group executive Ken Glass.

Before moving to Lebanon bank in November 1988, Welch served in several capacities with FTNC including government relations, personnel and law. Welch was a member of the 10-person senior management team at First Tennessee Bank. At Lebanon Bank, he was executive vice president and chief operating officer before being named president and chief executive officer in December 1989.

Welch served six years as a member of the Tennessee Human Rights Commission, the last two as vice chairman. He received a BA degree with special honors from Missisippi State University and a JD degree from the University of Virginia School of Law. He attended graduate schools at Duke University and Memphis State University.

''Lee is very energetic and aggressive, and he has a welath of talent and experience he will bring to our Tennessee banking operation,'' said Glass.

''We've entered a decade that promises to be challenging for the banking industry, and Lee will help us compete in the fast-paced world of banking in the 1990s.''

Welch will be replaced as president and chief executive officer of Lebanon bank by Charlie Womble, who has been the president of First Tennessee -- Greeneville since 1978. Larry Estepp, vice president of commercial lending in Greeneville, will be the new president there.

Womble joined First Tennessee in 1967 as a management trainee. He worked in the retail credit division, advancing to vice president and special lending officer before moving to Greeneville to serve as president. He earned a BS degree in banking and finance from Mississippi State University. He also completed the Graduate School of Consumer Banking at the University of Virginia and First Tennessee's Executive Development program.

Estepp joined First Tennessee in 1973 as a bookkeeper and teller, and he advanced through the branch system before moving to commercial lending in 1983. He is a graduate of Walter State Community College and Tusculum College. He earned American Institute of Banking (AIP) diplomas in general banking and commercial lending, and he completed the Louisiana State University School of Banking.

BATON ROUGE, LA. (MARCH 15) BUSINESS WIRE - MMR Holding Corp. (NASDAQ:MMRH) announced Thursday that Robert G. Bening, its president and chief executive officer, had resigned, effective as of close of business on March 16, 1990, as an officer and a director of the corporation, for what he described as personal reasons.

Charles P. Farris, the president of the mechanincal group was elected senior vice president and chief operating officer of the corporation.

Farris will report directly to the board of directors which has undertaken to seek, as soon as possible, to recruit a new chief executive officer.

Bening was elected chief executive officer and a director of the corporation on March 7, 1990, following the resignation of James B. Rutland as chairman and chief executive officer on that date.

Rutland is continuing to serve as a director of the corporation. Since his resignation as chairman and chief executive officer, three corporate vice

presidents and two executives in the corporation's electrical and instrumentation services group have also resigned from the corporation.

The corporation also announced that Natcom Corp. N.V., an affiliate of the corporation's major shareholder, is today making a $5 million subordinated loan to the corporation. The loan, which is scheduled to mature on June 30, 1990, bears interest at a rate of 3 percent in excess of the prime rate.

Concurrently with such loan, another affiliate of Natcom was released by the corporation and its lender banks from a contingent obligation to purchase a new issued of securities from the corporation in certain circumstances on or after March 31, 1990.

In addition, the corporation has agreed with its lender banks that the maximum amount which the corporation may borrow under its revolving credit lines will be reduced from $40 million to $35 million, but that, through March 31, 1990, the banks will continue to maintain loans outstanding to the corporation at their current level of approximately $35 million and will waive any loan defaults.

As previously announced, in light of the corporation's continuing cash flow difficulties, Bening was reviewing the corporation, its operations and, in connection therewith, was exploring all options available to the corporation. Such review will continue to be undertaken by the corporation's management, together with its financial advisor, Rothschild Inc., bank lenders and bonding company.

MMR Holding Corp. is the nation's third largest mechanical contracting, third largest electrical contracting and thirty-sixth largest design/construction enterprises. The corporation provides construction and engineering service to industrial, commercial and governmental clients throughout the United States.

WASHINGTON (MARCH 15) COMTEX - The 8-K report filed at the SEC shows on March 5, 1990, General Energy Resources & Technology Corp.'s president, Terry Snowday, announced the resignation of the company's independent auditors of the firm of Gavigan Burkhart Freeman & Co.

The executive office of General Energy Resources & Technology is located at 862 East Eighth Steet, Traverse City, MI 49684, and its telephone number is (616) 946-1473.

-30- 606
#90074c0030 03/15/1990 ~Comtex
WASHINGTON (MARCH 15) COMTEX - The 8-K report filed at the SEC shows on March 1, 1990, American First Fiduciary Corp. 4, on behalf of holders of exchangeable passthrough certificates in America First Federally Guaranteed Mortgage Fund 2 (Fund,) and America First Feduciary Corp. 3 and America First Federally Guaranteed Mortgage Fund 2 LP (Partnership), on behalf of the holders of exchangeable units in the Partnership, granted their consent to the Fund's management for the Fund's liquidation.

That liquidation would allow the sale of all the Fund's assets, and is valid under the consent granted by those holders until Jan. 15, 1992.

The executive office of the Partnership is located at 1004 Farnam Street, Suite 400, Omaha, NE 68102, and its telephone number is (402) 444-1630.

#90074c0031 03/15/1990 ~Comtex

WASHINGTON (MARCH 15) COMTEX - The 8-K report filed at the SEC shows on March 2, 1990, Hayden Hill Gold Mining Co., a wholly owned subsidiary of U.S. Gold Corp., sold its remaining 32% interest in a joint venture concerning the Hayden Hill mining property to its partner in the venture, Lassen Gold Mining Inc. Lassen is a wholly owned subsidiary of Amax Gold Inc.

The Hayden Hill property, located in Lassen County, CA, was originally 40% owned by Hayden under a Mining Venture Agreement between itself and Lassen.

The sale is conditional upon Hayden's payment of $12.9 million in cash plus its payment of a note in the principal amoount of $1 million owed by it to Amax Gold. That note had been guaranteed by U.S. Gold Corp. Also conditional to the sale is the release of Hayden from certain other charges and obligations totaling approximately $788,000.

#90074c0032 03/15/1990 ~Comtex

WASHINGTON (MARCH 15) COMTEX - The 8-K report filed at the SEC shows on March 5, 1990, Cleopatra Kohlique Inc. replaced its independent public auditors of the firm of Laventhol & Horwath with those of Grant Thornton. That decision was made by Cleopatra's board of directors.

For the previous two years, audits performed by Lavethol & Horwath contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

For the fiscal year ended March 31, 1989, however, Lavethol & Horwath's audit report did contain certain explanatory paragraphs expressing qualified opinions as to the uncertainty of Cleopatra's continuation as a going concern.

WASHINGTON (MARCH 15) COMTEX - The 8-K report filed at the SEC shows on March 1, 1990, Franchiseit Corp. completed its agreement with Mr. Sign

Franchising Corp., dated Feb. 7, 1990. That agreement was between Franchiseit, Mr. Sign, Melvin H. Weinberg (Mr. Sign's president) and Mr. Weinberg's designees, including Mr. Sign's employees. The agreement provides for the alleviation of $1.1 million of Mr. Sign's debt.

-30- 568

#90074c0034 03/15/1990 ~Comtex

WASHINGTON (MARCH 15) COMTEX - The 8-K report filed at the SEC shows on Feb. 20, 1990, the board of Chemdesign declared a dividend distribution in the form of a preferred stock purchase right plan. Under the plan, each share of outstanding common stock entitles its holder to one purchase right for a Chemdesign-issued unit. Each unit consists of one one-hundreth of a share of series A junior participating cumulative preferred stock, at a cash exercise price of $56.00, subject to adjustment.

The rights will be exerciseable from the distribution date until Feb. 20, 2000. On that distribution date, at the close of the business day, each right will seperate from its stock. The physical rights will be mailed to shareholders as soon as possible thereafter.

#90074c0164 03/15/1990 ~Comtex
WASHINGTON (MARCH 15) COMTEX - The Securities Industry Association is calling for a series of congressional and regulatory steps to control "episodic bursts" of volatility in the stock market and renew individual investor confidence in the marketplace.

The five point plan includes appointing the Securities and Exchange Commission as sole regulator of stocks and stock futures products, giving the Federal Reserve Board responsibility to set margins in each market, and adopting a set of "circuit breakers" to provide "time outs" in trading when needed. In addition, the SIA is calling for unified clearance and settlement systems across markets to reduce financial risks to firms and the marketplace and restricting program trading when the Dow Jones Industrial Average is trading above or below a 50 point boundary.

The SIA, which is a trade association representing the securities industry, announced these conclusions following a three month study by an action committee formed to deal with investor concerns over program trading and market volatility.

A key proviso calls for a set of multiple market circuit breakers which set limits on declines in Standard & Poor's 500 stocks, index options and index futures. The circuit breakers would be implemented for pre-set periods following steep market drops and limit trading in these instruments to prices at or above last sale prices at the time of the decline.

The recommendation calls for a 15 minute time period during a 12 point drop in the S&P 500 index (equivalent to about a 100 point drop in the DJIA), to 2 hours when the S&P 500 index drops 50 points (about 400 points on the DJIA scale).

The panel did not propose rules for sharp increases in the DJIA or S&P averages because it concluded they are not as disruptive to the marketplace.

The study reiterates the SIA's call for SEC oversight of stock futures markets. SIA chairman Robert Downey recently told a Senate panel that "ending the split regulation between the equity and equity-related markets could be the single most positive step towards rebuilding confidence of individual investors."

The Commodity Futures Trading Commission presently has jurisdiction over stock index futures. Index futures allow investors to bet on the overall direction of the stock market as measured by a benchmark such as the S&P 500 index. They are controversial because they are part of some market-moving program trading strategies.

The trade association also renewed its call for the Federal Reserve Board to act as the sole regulator for setting margin requirements on all equity and equity-related products. Investors in the stock market are presently required to put up at least 50 percent of the cost of their purchases in cash while in the futures market, the margin is approximately 5 percent.

"Since equity and equity-related products are intertwined, margin rules in one market shouldn't provide an advantage over a sister marketplace," said Addison L. Piper, who headed the SIA action committee and is chief executive officer of Piper Jaffray & Hopwood Inc., a Minneapolis-based regional brokerage firm.

The SIA suggests modifying a proposed New York Stock Exchange rule which prohibits program trading "for the remainder of the day" when the DJIA average moves up or down 50 points or more. The SIA says the program trading restriction should only apply during the "duration of the time the DJIA continues to trade above or below the 50-point boundary."

#90074c0654 03/15/1990 ~Comtex
SCHEDULE 13D

SEC - AMENDMENT NUMBER: 5

ANNOUNCEMENT:

On Mar. 8, 1990, Riedman Corp. filed with the superintendent of insurance of the state of New York an application for approval of Riedman's proposal to solicit proxies or consents from stockholders of Niagara for the purpose of removing and/or electing replacement and/or additional directors for Niagara's board.

With the application, Riedman submitted a plan setting forth its

objectives.

The application was made after Niagara refused John Riedman's request to permit the nomination of two directors by Riedman Co. at Niagara's 1990 annual meeting and one nomination to be submitted at the 1991 meeting.

Riedman plans to amend Niagara's bylaws to increase the size of the board to 11 members and to nominate 6 individuals to fill the vacancies.

In addition, Riedman may remove the shareholder rights plan and adopt a precautionary resolution directing the board not to make payments to Niagara officers in the event of a change in control.

SINGAPORE (MARCH 15) - The government-controlled Jurong Shipyard Ltd. (JSL) has announced the clinching of two overseas contracts, from Greece and the United Sates, for conversion and repairs on containerships.

The first contract, amounting to 16.5 million Singapore dollars (8.8 million U.S.), was to lengthen three 15,450-tonne cellular container vessels owned by Costamare Shipping Company of Greece by 21.6 metres (71 feet) each.

The converted vessels will have an additional deadweight of 3,850 tonnes and an extra container carrying capacity of 223 TEU.

All three vessels will be delivered by the end of the year,JSL said.

JSL, a joint venture involving Singapore and Japanese interests, said Costamare Shipping Company, owned by Greek shipowner V.C. Constantacopoulos, was the largest containership operator in Greece.

The second contract, awarded by leading U.S. container carrier American President Lines (APL), called for drydocking and major repairs on four of its L9 class container vessels.

The work on the APL vessels - President Harding, President Arthur, President Garfield and President Buchanan - is scheduled to be completed by the middle of this year.

JSL recently clinched a 15 million dollar (8.1 million U.S.) contract from the U.S.-based Mobil Shipping and Transportation Company to repair and overhaul four tankers.

Jakarta (MARCH 15) - Indonesia's state-owned Garuda airline confirmed Thursday that the Soviet airline Aeroflot will resume its Moscow-Jakarta service in June.

A spokesman said an agreement to this effect had been signed by Garuda President Mohammad Soeparno and Aeroflot's top executive V.D. Samourokov in Moscow.

Aeroflot stopped serving the route in 1982 after allegations that its chief executive in Jakarta was a spy.

Garuda says it plans to lease Aeroflot aircraft to take this year's haj pilgrims to Saudi Arabia.

KUALA LUMPUR (MARCH 15) - Malaysia's total palm oil stocks rose 2.3 per cent to 1.03 million tons at the end of February from one million tonnes in January, the Palm Oil Registration and Licensing Authority (PORLA) said Thursday.

Crude palm oil stocks fell 2.2 percent to 733,668 tons from 750,027 tonnes at then end of January, PORLA said.

Malaysia produced 419,768 tons of crude palm oil in February, down 5.6 per cent from 444,594 tons in January.

Palm oil exports rose 15 percent to 392,707 tons from 464,541 tons.

BONN (MARCH 15) - West German wholesale prices fell 0.6 percent in February from the January level, the federal statistics office said Thursday.

The fall gave a year on year increase of 0.6 percent, down from a rise of 1.4 percent in January and 3.5 percent in December.

Fuel oil prices were down 19 percent in February, diesel fuel down 4.3 per cent, and petrol down 1.5 percent.

Non-ferrous metal prices fell 6.6 percent and those of fish were down 4.2 percent.

Price increases were essentially in fresh and imported produce.

MANILA (MARCH 15) - China has offered a 600,000-dollar contribution to the technical assistance special fund of the Asian Development Bank (ADB), the Manila-based institution said Thursday.

The ADB, which halted all lending to Beijing following the suppression of pro-democracy protests there last year, said in a statement that it had accepted the Chinese offer.

It said it was China's first contribution to the fund, which is used for the bank's technical assistance operations. The offer was made on an untied basis and will be available to all ADB member-countries.

ADB president Kimimasa Tarumizu said in an interview published here last month that lending to China would remain on hold until bank members agreed to resume lending.

An ADB spokesman told Agence France-Presse Thursday that although there has never been a formal ban, there have been "no new loan approvals" for China.

MANILA (MARCH 15) - Diamond Hotel Co. of Japan plans to build a 1.16 billion peso (51 million dollar) luxury hotel in the Philippine financial

district of Makati, Trade Department spokesmen said here Thursday.

The Trade Department has approved the construction of the 27-story, 472-room Philippine Diamond Hotel, granting it pioneer investment status which entitles it to several investment incentives, the spokesmen said.

Construction of the hotel, to be owned almost entirely by the Tokyo-based Diamond Hotel Co., will begin by the middle of this year and commercial operations are expected to start by late 1992, the spokesmen added.

Two other high-rise luxury hotels, one owned by the Kuok group of Singapore and the other by the Cheng Yu Tung family of Hong Kong, are scheduled to go up in the Makati district before 1992.

TOKYO (MARCH 15) - The Japan Automobile Manufacturers' Association said Thursday it would send 140 autoparts experts to the United States in early April to hold talks with their counterparts.

Shoichiro Toyoda, chairman of the association, told a press conference that the talks were aimed at enchancing imports from the United States to soothe trade friction in the auto industry.

Experts from 11 automakers, including Toyota Motor Corp., Nissan Motor Co. Ltd. and Honda Motor Co. Ltd., will meet with representatives from 50 U.S. autoparts makers in the state of Nevada.

Japan's imports of U.S. autoparts soared 56.6 percent from the previous year in fiscal 1988 to 4.98 billion dollars and were expected to reach 6.0 billion dollars in 1989.

The association sent a similar mission in 1986 and 1988 but it comprised only 30 experts.

#90074d7250 03/15/1990 ~French/German News Agency

NEW DELHI (MARCH 15) - The Indian government has decided to reject an application from the U.S. multinational Coca Cola to set up a plant in an export processing zone here, India's commerce minister said Thursday.

No reason was given for turning down the proposal, submitted in November 1988, in Minister Arun Nehru's announcement of the rejection in a written answer submitted to parliament's upper house.

The announcement appeared to put an end to what had been shaping up as a

battle royal between Coca Cola, the world's largest soft drink maker, and Pepsico to enter the Indian market.

Pepsico's application to set up a 30 million dollar food processing and soft drink plant in the northern state of Punjab was approved by the former government of Rajiv Gandhi and got a new seal of approval from the four-month-old V.P. Singh government Wednesday.

Coca Cola had hoped to make a return after a 12-year absence from India, sweetening its bid and hoping to dampen vehement opposition by local manufacturers by saying its unit would be mainly an export oriented concentrate plant.

However when it submitted its bid Pepsi joined the local opposition, charging that Coke would be operating under softer terms if its proposal was accepted.

#90074d7260 03/15/1990 ~French/German News Agency

MELBOURNE (MARCH 15) - Australia's largest retailer, Coles Myer Ltd., announced Thursday it had suffered a 5.9 percent net profit fall to 229 million Australian dollars (174 million U.S.) for the six months to January 28.

Chairman Brian Quinn blamed the drop from 243 million dollars (185 million U.S.) for the corresponding period of 1988-89 on depressed economic conditions and industrial disputes.

"The retail industry has been depressed throughout 1989 and many retailers were currently operating at a loss," he said.

During the six months, the company boosted revenue by 4.8 percent to 7.7 billion dollars (5.9 billion U.S.).

"The slow rate of sales growth and the decline in profits had been anticipated," Mr. Quinn said. "The company was implementing a comprehensive cost control program to protect future profitability."

The group operates department, discount and specialty stores in Australia and New Zealand.

TOKYO (MARCH 15) - Japan's Nomura Research Institute predicted Thursday that annual economic growth worldwide in the 1990's would average 3.2 percent.

The research arm of Japan's biggest securities house, Nomura Securities Co., said Japan would post an average 4.1 percent Gross National Product (GNP) growth in the first five years of the decade and 4.0 percent annual growth after 1995.

Nomura estimated that the GNP of the United States would account for 23 per cent of the world's overall GNP in the year 2000, down from 26 percent in 1990.

Japan's contribution to overall GNP is likely to grow to 16 percent by the end of the decade from the current 14 percent, while the European Economic Community's share of total output will increase to 22 percent from this year's estimated 21 percent, the institute said.

It also predicted that Japan's current account surplus would decline from 56.3 billion dollars in 1990 to 43 billion dollars in 1995 and 19.5 billion dollars in 2000.

#90074d8060 03/15/1990 ~French/German News Agency

LONDON (MARCH 15) - British oil company Enterprise Oil said Thursday its net profit rose 57 percent last year over the 1988 level to 115.6 million pounds (192.6 million dollars).

Turnover was up 75 percent at 337 million pounds (561.6 million dollars), boosted by the acquisition of interests of U.S. company Texas Eastern, which enabled Enterprise to increase daily production by 48 percent to 88,000 oil equivalent barrels.

Final dividend was fixed at 7.75 pence, giving a total for the year of 13 pence, up from 11 pence in 1988.

The results were at the low end of market forecasts of profit of between 115 million and 122 million pounds, and Enterprise shares rose three pence to 616 in midday trading in London.

Enterprise, in which Imperial Chemical Industries of Britain and Elf Aquitaine of France each hold a 25 percent stake, is to spend a record 120 million pounds on exploration this year, company chairman William Bell said.

Last year, the company's oil and gas reserves rose 37 percent to 924 million oil equivalent barrels, while investments doubled to 247 million pounds.

Lagos (MARCH 15) - The mandate of the working group on air transport of the Economic Community of West African States (Ecowas) has been revised to ensure the development of air transport services in the sub-region.

The revision, contained in the report of the first meeting of the working group, made available to the German Press Agency dpa on Thursday, would enable the group to monitor the development and maintenance of air navigation, radio communication and meteorological facilities to ensure the safety of airplanes.

Member states are now to grant mutual preferential treatment with regard to the utilisation of maintenance and overhaul services, both for aircraft and for group equipment and other facilities, the report said.

To achieve this, the mandate called for the promotion of co-operation in the area of maintenance and overhaul of aircraft.

The revised mandate also include the co-ordination of flights of Ecowas airlines operating in the sub-region, to ensure the rationalisation of air services.

The group will prepare and ensure the adoption by member states of a common aviation policy on a multilateral basis and examine the possibility of creating an Ecowas airline. dpa wo 151650 mrz 90

#90074d8220 03/15/1990 ~French/German News Agency

ABIDJAN (MARCH 15) - The Ivory Coast government Thursday said those earning more than 100,000 CFA francs (350 dollars) would have their salaries cut for three years, state radio announced.

But in a bid to ease the impact of a planned austerity drive that has brought Ivorians on to the streets in unprecendented anti-government protests, the authorities have also announced price reductions for some commodities.

The radio also reported shortly after a cabinet meeting here that President Felix Houphouet-Boigny had decided to bring forward a meeting of leaders of the ruling Ivory Coast Democratic Party (PDCI) from the final quarter of the year to May or June.

Mr. Houphouet-Boigny, who announced this week that PDCI leaders would choose his successor by the end of the year, said Thursday: "I only want to tell the truth. I am not king. I am not president-for-life. I cannot designate an heir apparent. I cannot cling to power."

On mass demonstrations broken up on March 2 by riot police with tear gas and truncheons, the 84-year-old president added in a national broadcast Thursday that "you can do nothing in this country with force. When there is order, changes are possible."

The salaries and allowances of ministers and state corporate heads are to be slashed by 40 percent and of their deputies by 25 percent.

Cuts on a scale ranging between eight and 17 percent have been imposed on civil servants and cadres earning from 100,000 CFA francs (350 dollars) to more than 500,000 CFA francs (1,740 dollars).

Finance Minister Moise Komoue Koffi also announced a forthcoming "solidarity tax" on private sector income of five to 10 percent.

He did not say when any of the reductions would take effect, but officials sources said they would start March 31.

The government last week announced price cuts of four to 33 percent on state-controlled goods and services including rice, sugar, cooking oil, local meat, frozen fish, medicines, soap, cement, school supplies, rent, electricity, water, fuel and custom duties.

Officials are presently discussing with representatives of the various professions the possibility of more price cuts to bring down the cost of living in the West African state.

Mr. Houphouet-Boigny first suggested the salary cuts on February 26 at a meeting with the private sector employers and union leaders. The issue was to be taken up further at meeting of party and government leaders.

The meeting of the national council, however, was postponed indefinitely due to public outcry against the salary cuts.

Meanwhile, officials have launched an information campaign to try to convince citizens that the proposed austerity measures were necessary to obtain fresh lines of credit from the International Monetary Fund (IMF), World Bank and other principal donors.

"If nothing is done, the government will not be able to pay its civil servants in four or five months. Our back is against the wall," the president said Thursday.

Abidjan was calm as anti-government tracts calling for a general strike went mostly unheeded. But police and soldiers were out in force around the Ivory Coast's economic capital.

Ivory Coast, the world's leading cocoa exporter, has been hit hard by a slump in world market prices.

#90074d8240 03/15/1990 ~French/German News Agency

GENEVA (MARCH 15) - Plans for a worldwide ban on chemical weapons would have virtually no chance of success in the volatile Gulf region unless a way is found to guarantee peace between Iran and Iraq, Iran's foreign minister said Thursday.

''The chances of (a ban's) success in our region would be somewhere near zero,'' Foreign Minister Ali Akbar Velayati told the United Nations Disarmament Conference at Geneva.

Because of the tense situation in which Iran and Iraq no longer faced each other in combat but were still technically at war with each other, a comprehensive security policy for the entire Gulf region was needed, Velayati said.

Without naming Iraq specifically, he charged one of Iran's direct neighbors with ''an extensive and ambitious program of development and stockpiling of chemical and biological weapons''.

Both Iraq and Iran are believed to have used chemical arms during almost eight years of Gulf War fighting before a United Nations-sponsored ceasefire took hold in 1988.

Velayati urged a formal Iran-Iraq peace agreement, security cooperation by states throughout the Gulf area and a forceful, binding chemical-weapons treaty as the best way to banish chemical arms from the region.

CAIRO (MARCH 15) - Egypt marked Thursday the first anniversary of Israel's return of the tiny Taba enclave on the Red Sea coast.

Prime Minister Atef Sidqi said Taba was an example of the correctness of Egypt's policies of solving problems by peaceful means.

''That is our method relating to other issues in the region, especially the Palestinian question. We prefer to regulate things in a logical and peaceful way,'' he said.

Following international arbitration, Egypt resumed sovereignty of the almost one-square-kilometer territory which Israel took along with the rest of Sinai in 1967.

A luxury hotel built by Israel at Taba is now being run by the Hilton chain and is still a popular holiday resort for Israeli tourists.

The Egyptians have built a good road over the Sinai to Taba and plan to extend a nearby airport in an effort to boost further the tourist trade.

LONDON (MARCH 15) - British Foreign Secretary Douglas Hurd will represent the government when Namibia becomes independent from South Africa next Wednesday, the Foreign Office announced here Thursday.

Mr. Hurd will pay a brief visit to South Africa for talks with President Frederik de Klerk and Foreign Minister Pik Botha before going to Windhoek on Tuesday and Wednesday, the statement said, but dates had yet to be fixed.

At the weekend, the foreign secretary is going to Oman for a meeting between the European Economic Community (EEC) and the Gulf Cooperation Council - Saudi Arabia, Kuwait, Bahrain, Qatar, the United Arab Emirates and Oman.

#90074d8570 03/15/1990 ~French/German News Agency

STRASBOURG (MARCH 15) - The European parliament on Thursday called for the abolition of production taxes on grain and milk, parliamentary sources said.

The parliament was echoing calls from France, the Netherlands, West Germany and Belgium that the tax should be partly or totally removed.

But the European Commissioner for Agriculture, Ray MacSharry of Ireland, has already warned that he would refuse to suppress the tax, equivalent to three per cent of the guaranteed price of grain.

The maintenance of the tax is all the more necessary, Mr. MacSharry has said, because the European Economic Community grain harvest this year is expected to total 170 million tons, 10 million tons more than the ceiling set by the EEC.

The proposals put forward by the European parliament Thursday would mean an extra two billion European Currency Units (ECU's) (2.4 billion dollars) for the EEC's eight million farmers.

In the face of the European Commission's opposition to the abolition of the

tax, only a unanimous decision by all 12 EEC member governments could force it to change its mind, and this is seen as unlikely.

The EEC agriculture ministers are due to resume talks on 1990-91 farm prices in Luxembourg on March 26 and 27.

The Commission is essentially proposing for the third year running a virtual freeze on guaranteed prices, with compensation in the form of direct aid to small farmers.

TURIN, Italy (MARCH 15) - Italian financial company IFIL on Thursday denied that it was holding talks with Peugeot on ceding its stake in Italian auto maker Fiat to the French group.

IFIL, part of the Agnelli group, denied "the existence of any negotiations whatever on ceding its stake in the Fiat auto group."

The denial followed press reports and stock market rumours that IFIL was negotiating to cede its majority stake in Fiat to Peugeot as part of current discussions between the Italian and French car makers.

IFIL said it regarded its stake in Fiat as "strategic and institutional."

The rumours have seen Fiat stock rise by some 10 percent on the Milan stock exchange in the past two weeks.

COLOGNE, West Germany (MARCH 15) - West German trade with the Eastern bloc, excluding East Germany and Yugoslavia, rose 22 percent last year over the 1988 level to 43.6 billion Deutsche marks (25.9 billion dollars), it was announced here Thursday.

Trade with Asian communist countries rose 13 percent to 10.7 billion Deutsche marks (6.3 billion dollars), the East Committee for the West German economy, an official body, said.

Eastern bloc trade, excluding East Germany, accounted for 4.7 percent of total foreign trade in 1989, up from 4.5 percent in 1988.

Trade with the Soviet Union rose 22.3 percent to 20 billion Deutsche marks (11.9 billion dollars).

Chinese exports to West Germany rose 33 percent last year to 5.8 billion

Deutsche marks (3.4 billion dollars), giving China a trade surplus with West Germany for the first time since 1965, as West German exports to Beijing fell six per cent to 4.6 billion Deutsche marks (2.7 billion dollars).

DHAKA (MARCH 15) - Rival Bangladesh groups clashed with homemade bombs and firearms at a voting center during local elections near Chittagong on Thursday, killing a woman and leaving more than 20 people injured, officials said.

Police sources in the port city said polling in nearby Lohagora was suspended for two hours.

A 40-year-old woman who was hit by a bullet died on way to hospital.

At another polling center in Lohagora, police fired in the air after armed activists tried to disrupt polling and set fire to a nearby house.

A crowd of several hundred forced the activists to take shelter in a nearby building and set ablaze three vehicles used by them, police said.

Additional security forces were sent to the site.

It was the first major reported violence since nationwide voting for chairmen of 426 of the country's 460 subdistricts began Wednesday.

Voting was suspended at 30 polling centers on Wednesday following clashes in which police used firearms.

The election was deferred indefinitely in two subdistricts, one where ballot papers were stolen from the local poll office, the other where police arrested the chief election officer on charges of polling irregularities.

KARACHI (MARCH 15) - Pakistani authorities have seized 36 tons of hashish from an abandoned vessel along the Mekran coast in what an official said was the country's largest drug seizure.

The maritime security agency and customs staff launched a combined operation after receiving reports that two vessels carrying 75 tons of hashish had left Pakistan's western Baluchistan province and were headed towards a mothership in the Arabian Sea.

The mothership was to carry the cargo to an unknown destination in the Gulf, the official said.

The 36-ton consignment, packed in 800 bags, was found in one of the abandoned vessels south of Karachi on Tuesday, the official said, adding that the haul was the largest ever made in Pakistan.

Seized documents revealed that the two ships maintained radio contact and the crew of the abandoned vessel are thought to have fled in the second vessel after sustaining damage.

Pakistan has over two million drug addicts, about half of them heroin addicts, according to officials.

The Pakistan Narcotics Control Board said annual domestic consumption of heroin was 50 metric tons.

During 1989, seizures of heroin were estimated at 8,541 kilograms (18,790 pounds), a 40 percent increase over the previous year.

PNCB sources said the area under poppy cultivation has declined from 11,590 hectares (28,975 acres) in 1988 to 5,850 hectares (14,625 acres) in 1989, bringing down opium production from 205 metric tons to 130 metric tons in 1989.

The government of Prime Minister Benazir Bhutto recently launched a large operation to dismantle refining laboratories in inaccessible mountain areas of the North West Frontier province and Baluchistan, bordering Afghanistan.

#90074d8730 03/15/1990 ~French/German News Agency
BEIJING (MARCH 15) - A close ally of China's ousted reformist Communist Party chief Zhao Ziyang was removed from his parliament posts Thursday for involvement in last year's democracy movement, it was reported here.

Hu Jiwei lost his posts on the National People's Congress (NPC) standing committee and as vice chairman of the Education, Science, Culture and Public Health Committee, New China News Agency (NCNA) said.

"According to NPC sources, Hu ... supported and participated in the political disturbances which occurred in Beijing" last year and "encroached on others' rights," the official agency said without elaborating.

Mr. Hu had been accused by NPC members after the pro-democracy protests last year of leading a signature campaign calling for an urgent meeting of the NPC standing committee at the height of the democracy movement in May.

The campaign was allegedly carried out by the Stone Co., a Chinese computer firm formerly headed by Wan Runnan, who fled China after the June 4 crackdown on the democracy movement and has since joined the Paris-based dissident Federation for Democracy in China.

The petition was signed by 57 NPC standing committee members after the May 20 martial law declaration in Beijing.

An investigation was called for in July by NPC chairman Wan Li, who presided over Thursday's NPC standing committee meeting where the decision to remove Mr. Hu was taken.

At the time, NPC members said that Mr. Hu's involvement in the campaign was inseparable from his support of Mr. Zhao, who was removed as party general secretary in late June for supporting the democracy movement.

Mr. Hu was the head of the party mouthpiece People's Daily in the late 1970s and early 1980s and was closely associated with Mr. Zhao.

He was also an ally of former party chief Hu Yaobang, known for his reform policies, whose death last April sparked the student-led democracy movement that eventually swept China.

#90074d8850 03/15/1990 ~French/German News Agency

ULAN BATOR (MARCH 15) - The new top leadership of Mongolia's ruling communist party Thursday renewed its commitment to democracy and free and fair elections expected later this year.

At its first press conference, the five-man politburo of the Mongolia People's Revolutionary Party (MPRP), admitted that the powerful political machine that has ruled Mongolia for 66 years, often in repressive fashion, had failed to keep up with swelling popular demand for reform.

But it promised to stick to the deal it struck in round-table talks with fledgling opposition groups to introducce multi-party politics and hold free elections later this year.

"The new political organization will take part in elections on an equal footing with the MPRP", said Gonbogavin Ochirbat, who succeeded President Jambyn Batmonh during a central committee plenum that ended Wednesday.

A grey-haired Mr. Ochirbat, a 61-year-old former teacher and labor leader who suffered disgrace during Mongolia's Stalinist years, only returned home last weekend after two years in Czechoslovakia working on a socialist theoretical journal.

Sanjaasuren Zorig, leader of the Mongolia Democratic Association (DMA), the leading opposition group, described the new politburo as a field of dark forces who have yet to produce fresh policies to better the lives of Mongolia's two million people.

"I don't know them thoroughly, but in the field of economics, there will be little change", Mr. Zorig -- an advocate of a market economy -- told reporters in his spartan office at Mongolia State University.

The MDA, founded only four months ago, has played a major role in peaceful demonstrations in Ulan Bator, calling for the resignation of the old ruling party politburo and quicker steps towards general elections.

Mr. Zorig said no fresh demonstrations were being planned by his group, which claims 500 full members, many of them urban intellectuals, and thousands more active supporters.

"The most important thing for the near future is more round table talks between the opposition and the ruling party", he said.

"We should also take pains to spread our views in the countryside" where three quarters of Mongolia's people live and the MPRP retains a strong presence, he said.

Other groups have continued to hold small spontaneous and peaceful protests around Ulan Bator, including a crowd outside the headquarters of the Mongolian Youth Union on Thursday, demanding the ouster of MPRP officials from its leadership.

Mr. Ochirbat, the MPRP general secretary, frankly admitted that such protests and a brief but dramatic hunger strike by pro-democracy activists last week, were a reflection of the ruling party's failure to change fast enough.

He told the packed press conference this had led to "some indignation

among a certain part of the population, and instability in the political situation began to take shape."

But he said it was necessary for the MPRP and the opposition to work hand in hand to build a democracy in Mongolia, the world's second-oldest communist state after the Soviet Union, and long under Moscow's influence.

"Democracy could not develop previously as the Stalinist model had deep roots in the political system of our country", he said.

Mr. Ochirbat did not rule out the possibility that he and his politburo could find themselves ousted at an extraordinary party congress to be held April 10 to elect a rejuvenated central committee.

He also said a proposal by President Batmonh and premier Dumaagiyn Sodnom to resign their government posts made at this week's plenum and made public Thursday would have to be resolved by the people's great hural (parliament) which meets here next week.

In a speech to the plenum that was published Thursday in the official newspaper Unen, Mr. Sodnom blamed himself and his colleagues on the old politburo for losing touch with the people and failing to speed up reforms.

MOSCOW (MARCH 15) - Anatoly Lukyanov defeated seven other candidates Thursday to be elected president of the Supreme Soviet replacing Mikhail Gorbachev, an AFP correspondent at the parliament said.

Mr. Lukyanov, 59, received 1,202 votes in the secret ballot by the Congress of People's Deputies, the full Soviet parliament.

The Supreme Soviet is the country's standing parliament which meets when the congress is not in session.

Mr. Lukyanov, a long-time friend of Mr. Gorbachev, was previously vice-president of the Supreme Soviet.

Mr. Gorbachev was elected to the new position of executive president of the Soviet Union.

LAGOS (MARCH 15) - Britain's Prince and Princess of Wales arrived here Thursday at the start of a four-day official visit to Nigeria, their first to the West African nation.

The royal couple were received at the airport by the nation's number two man in government, Vice Admiral Augustus Aikhomu, the minister of external affairs, Alhaji Rilwanu Lukman, the governor of Lagos state, Colonel Raji Rasaki, and officials from the British High Commission here.

After the airport ceremonies which include the British and Nigerian national anthems, a review of a military parade by Prince Charles and a 19-gun salute, the couple left for the state house where they were received by President Ibrahim Babangida and his wife, Maryam.

A state banquet in honour of the royal couple is scheduled for later Thursday.

Observers earlier noted that most roads in Lagos, especially the principal ones that the royal couple would pass, have either been refurbished or rendered neat by officials.

Walls by the roadsides have been white-washed or made as glittering as possible, they said.

"I cannot remember the last time that Lagos was rendered as clean as it looks now, not even during an official visit by a head of state," said one man who has lived in the city for 32 years.

#90074d9200 03/15/1990 ~French/German News Agency

WASHINGTON (MARCH 15) - The United States Thursday added its voice to the chorus of countries protesting Iraq's execution of an Iranian-born journalist.

State Department spokeswoman Margaret Tutwiler said ''we deplore'' the execution, particularly the ''undue haste'' with which it was carried out, allowing little time for reconsideration of the facts.

White House spokesman Marlin Fitzwater issued a more detached reaction to the incident, saying ''we regret'' that international clemency pleas for Farzad Bazoft were unheeded.

Fitzwater declined requests to issue a judgment on the fairness of Bazoft's trial, saying the administration lacked sufficient information on the case.

Tutwiler could not say what action the U.S. government might take in the aftermath of the incident, or if it had directed a plea for Bazoft's life to the Iraqi government before he was put to death.

The State Department had been asked for a comment on the Bazoft affair in

the days preceding the execution, but declined to make a statement.

#90074d9210 03/15/1990 ~French/German News Agency

JOHANNESBURG (MARCH 15) - Police in tiny Gazankulu homeland arrested "scores" of activists Thursday, a church spokesman said, on the second straight day of a crackdown on opponents of chief minister Hudson Ntsanwisi.

Mr. M. Mphaphuli, of the anti-apartheid South African Council of Churches, told the South African Press Association (SAPA) "things are very, very bad" in the self-governing territory in north-eastern Transvaal, where at least 28 people have been killed in riots in the last month.

Among those arrested, he said, was teacher Marlene Winberg, a member of the Giyani Youth Congress, which has spearheaded a campaign against Gazankulu official organizations since the release on February 11 of African National Congress (ANC) leader Nelson Mandela.

Police also raided the offices of the Messina Action Committee overnight Wednesday and arrested all nine members of the committee's executive in their homes, church sources said.

The committee has been organizing a consumer boycott and work stayaway at Messina, a town on South Africa's border with Zimbabwe which employs commuters from Gazankulu.

Whites in the town, which has been brought to a virtual standstill, have been mounting vigilante posses, the Reverend Lesiba Matsaung, a vicar in the local black township of Nancefield, told SAPA.

#90074p0027 03/15/1990 ~PR Newswire
WEST DES MOINES, IA (MARCH 15) PR NEWSWIRE - Commtron Corp. (AMEX: CMR) today reported results for the second quarter ended Feb. 28, 1990.

Net earnings rose 23 percent to $1.9 million or $0.18 per share compared to $1.5 million or $0.15 per share last year, with revenues of $117.8 million compared to $124.2 million for the year-ago quarter. Gross margin improved to 11.5 percent due to a better sales mix. Improved working capital management resulted in interest income increasing to $1.1 million. Operating expenses declined a half-million dollars due to increased efficiencies and lower bad debt expense.

Strong sell-through sales of Indiana Jones and the Last Crusade (Paramount) and Lethal Weapon 2 (Warner) contributed to an increase in unit volume of about 20 percent, and home video revenues of $89.9 million.

This compares to $94.1 million in the year-ago quarter, which included catalog sales from a wave of new store openings. Consumer electronics revenues of $26.8 million versus $29.8 million last year reflected lower sales of entertainment electronics, which were partly offset by growth in sales of personal computer equipment and communication products.

Gary Rockhold, president and chief executive officer, commented: "We are pleased with how our ongoing program of improving operating efficiencies and working capital management is contributing to profitability."

For the six months ended Feb. 28, 1990, net earnings rose 9 percent to $4.9 million or $0.48 per share compared to $4.5 million or $0.45 per share last year, with revenues of $292.3 million compared to $293.6 million for the year-ago period.

Commtron Corp. is the nation's largest distributor of prerecorded videocassettes and a national distributor of consumer electronics.

#90074p0028 03/15/1990 ~PR Newswire

CAMBRIDGE, MA (MARCH 15) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI), announced that Judge William G. Young of the U.S. District Court for the District of Massachusetts today granted the request of Genetics Institute and Chugai Pharmaceutical Co. Ltd. for permanent injunctions enjoining Amgen, Genetics Institute and their licensees from infringing the valid claims of each other's erythropoietin (EPO) patents.

Judge Young stayed these injunctions for 30 days to permit expedited appeals and emphasized that the overriding public interest dictated the need for "as many capable and qualified sources of EPO on the market as soon as possible."

Judge Young noted that the injunctions could be stayed beyond the initial 30-day period until further order of the court if certain conditions were met. These conditions require the parties to offer and exchange cross-licenses under their respective EPO patents for the period of the stay. These conditions also would require Amgen to contact appropriate administrative agencies (including the FDA) and withdraw all oppositions to the efforts of Genetics Institute's licensee, Chugai, to introduce its EPO product, Marogen, to the U.S. market.

Judge Young did not require Genetics Institute to waive any claims for damages that it may have against Amgen as the result of Amgen's past,

present or future manufacture or sale of EPO nor did he require a similar waiver from Amgen. He also dissolved the preliminary injunction entered against Genetics Institute one year ago. As a result, monies previously deposited by Genetics Institute in escrow with the court will be returned to Genetics Institute in 30 days.

In response to today's ruling, Gabriel Schmergel, president and chief executive officer of Genetics Institute, stated: "We are pleased with today's ruling because it recognizes Genetics Institute's valuable EPO patent rights. This ruling sustains our long-standing position that the public will best be served by the presence of Marogen in the marketplace."

Judge Young's decision today also validated a ruling on Dec. 11, 1989, by the U.S. District Court of Massachusetts. In this ruling, the court determined that certain claims of Genetics Institute's EPO patent are valid and infringed by Amgen's manufacture and sale of its EPO product in the U.S. The Court also had ruled that Genetics Institute's manufacture of EPO in the U.S. infringes the Amgen EPO patent but that Chugai does not infringe this Amgen patent by importing or selling EPO.

Background EPO is a protein which is useful in the treatment of anemia. Genetics Institute has licensed EPO to Chugai for sale in the U.S. Chugai's affiliate, Chugai-Upjohn, awaits FDA approval to market Marogen in the U.S. Genetics Institute's EPO has recently received market approval in Japan, where it will be marketed by Chugai as EPOGIN. Genetics Institute's EPO has also recently received a favorable recommendation for national approval under the "high tech/biotech" procedures of the European Committee for Proprietary Medicinal Products (CPMP). Genetics Institute's EPO product in Europe will be marketed as Recormon by the Company's partner, Boehringer Mannheim, GmbH.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and other technologies. The company has a diversified portfolio of licensed and proprietary pharmaceutical products.

#90074p0032 03/15/1990 ~PR Newswire

ATLANTA (MARCH 15) PR NEWSWIRE - National Healthcare Inc. today announced that it has completed a modification of its Amended and Restated Bank Credit Agreement.

The modification provides for, among other things: -- the company to retain three hospitals previously scheduled for disposal,

-- a reduction of approximately $20,200,000 in the principal amount of non-interest bearing bank notes,

-- a decrease in the amount of non-voting common stock to be issued to the banks from 20 percent to 13 percent,

-- an increase of $5 million in the principal amount of interest bearing bank notes and an increase of one-half of one percent in the interest rates on $84 million principal amount of such bank notes, and

-- a change to June 30, 1991 in the date on which the remaining amount of the non-interest bearing bank notes (approximately $18,700,000) is scheduled to be exchanged for the 13 percent of the common equity of the company.

In connection with the modification the company made prepayments totalling approximately $2 million on its bank notes.

In addition, the modification provides that the company must restructure its outstanding 14-1/2 percent Subordinated Debentures by April 24. The company expects to commence an exchange offer for such debentures as soon as practicable.

The company said that it expects to reduce certain reserves in connection with the modification resulting in a gain of approximately $2,850,000.

National Healthcare Inc. is an Atlanta-based corporation which provides healthcare services to communities through ownership or management of general acute care hospitals and related healthcare services.

ORANGE, CA (MARCH 15) PR NEWSWIRE - Bergen Brunswig Corp. (AMEX: BBC) today reported results for the second quarter ended Feb. 28, 1990.

Net sales and other revenues for the second quarter ended Feb. 28, 1990, increased 12 percent to $1.09 billion from $970 million for the comparable quarter last year. Net earnings were a record $15.4 million compared to $11.4 million, a 34 percent increase over the prior year quarter. Fully diluted earnings per share of $.43 were equal to the prior year on approximately 34 percent over average shares outstanding.

For the six months ended Feb. 28, 1990, net sales and other revenues were

$2.18 billion compared to $1.94 billion, an increase of 12 percent. Net earnings were $30.3 million, an increase of 29 percent compared to $23.4 million in 1989. Fully diluted earnings per share for the six months were $.86 compared to $.88 in the like period last year. There were 26 percent more average shares outstanding for the six month period this year.

Emil P. Martini Jr., chairman and chief executive officer, said, "Bergen Brunswig Drug Company continues to show strong sales and earnings growth. Commtron, the corporation's 80 percent-owned home entertainment distribution subsidiary, reported sales and operating earnings that were lower than the prior year periods."

Bergen Brunswig Corp. is one of the nation's largest distributors of prescription pharmaceuticals and other healthcare products and the largest national distributor of prerecorded video cassettes.

DAVIS, CA (MARCH 15) PR NEWSWIRE - Calgene Inc. (NASDAQ: CGNE) and Kirin Brewery Co. Ltd. of Japan today announced they have signed an agreement to form a potato business joint venture. Under the terms of the agreement, Kirin will pay Calgene $2.5 million to purchase 30 percent of Calgene's seed potato business which Calgene acquired through the acquisition of Plant Genetics Inc. in June 1989. Kirin's 30 percent interest and Calgene's 70 percent interest in the potato business will be contributed to the joint venture.

Plant Genetics currently produces and sells tubers, under the NU- SPUD(TM) trademark, directly to seed potato growers and to commercial producers through its own contract field production operation. Plant Genetics introduced its first proprietary variety PGI(TM) Shasta through its sales program in 1989.

Kirin also will fund a two-year $1.5 million research and development project at Calgene to produce potato seed resistant to economically important disease and insect pests. In addition, Kirin will contribute certain of its potato propagation technology to the joint venture.

The joint venture will focus on market opportunities for existing and new varieties under development. "This partnership with Kirin will allow us to accelerate the development of agronomically superior varieties and to become a leader in the U.S. potato industry," said Zachary Wochok, president and chief operating officer at Calgene. "In addition, Kirin's propagation technology could allow a significant reduction in the tuber production cycle and lower production costs."

For Kirin, the joint venture provides access for integration of its technology into Calgene's existing varieties and production system. Kirin has been actively developing potato propagation technology in Japan over the last several years. According to Yoshio Enomoto, general manager of Agribio Business Division of Kirin, "This partnership will also provide the foundation for future expansion into additional business opportunities in the multi-billion dollar worldwide potato industry."

Calgene is an agribusiness biotechnology company that is developing improved plant varieties and plant products for the seed, food and specialty chemical industries. The company has five operating subsidiaries serving these markets -- Plant Genetics Inc., Stoneville Pedigreed Seed Co., Calgene Chemical, Ameri-Can Pedigreed Seed Co. and NobleBear Inc.

Based in Tokyo, Kirin is the number one brewery company in Japan and has

been diversifying into new, bio-related business such as agribio business and pharmaceuticals. With broad R&D activities such as tissue culture, cell fusion and the r-DNA technology, Kirin is targeting business areas in vegetables, flowers, rice and potatoes. The company currently holds four subsidiaries both in and outside Japan in agribio business field.

PHILADELPHIA (MARCH 15) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) said today its electric sales in the first two months of 1990 have increased 2.3 percent over the first two months of 1989.

The company reported that electric sales in January and February 1990 totaled 5.80 billion kilowatt-hours (kwh), compared with 5.67 billion kwh for the same two months in 1989.

PE said residential and commercial sales in February 1990 totaled 2.64 billion kwh, down just 1.5 percent from sales of 2.68 billion kwh in February, 1989, despite the fact that February this year was 14 percent warmer, in a comparison of heating degree days, than February last year.

On a weather-corrected basis, PE said, electric sales were up 2.4 percent in February 1990 over February 1989, reflecting continuing economic development in its service territory.

That development, and its increasing demand for electricity, have continued to result in records for PE electric output for the last several years.

"Economic activity in Southeastern Pennsylvania remains strong," said Joseph F. Paquette Jr., PE chairman and chief executive officer, "and adequate, reliable electric service continues to be a driving force in our regional economy."

In 1989, PE's record output totaled 35 billion kwh, surpassing the previous record of 34.7 billion kwh, set in 1988, by 0.8 percent.

MACON, GA (MARCH 15) PR NEWSWIRE - Charter Medical Corp. announced today it has discovered and corrected inaccurate reporting of contractual allowances, bad debts and expense accruals.

William A. Fickling Jr., president and chairman of Charter, said that an internal investigation identified the discrepancies and an independent review confirmed them.

Fickling said corrective actions were taken, including restructured reporting relationships in Charter's Hospital Operations Division.

As a result of the reporting inaccuracies, Charter will reduce operating income (net revenue less operating expenses) by approximately $28 million and net loss will increase by approximately $13 million for the fiscal quarter ending March 31.

Fickling said the discrepancies had no relation to Charter's delivery of quality patient care. Charter operates 97 hospitals and some 230 outpatient centers in the United States and Europe.

The company had total revenues of $1.6 billion in the 12-month period ended Dec. 31, 1989.

NEW YORK (MARCH 15) PR NEWSWIRE - Hallmark Cards, Inc., announced today that it is extending the cash tender offers made through a wholly owned subsidiary for two series of debt securities of Univision Holdings, Inc., to 12:01 a.m. on Tuesday, March 20, 1990. Hallmark also said discussions with bondholders are continuing. No assurance can be given that any agreements or understandings with the bondholders will be reached.

The tender offers are for all Univision senior subordinated discount notes due 1998 for 45 percent of their principal amount (approximately 55 percent of their accreted value) and for all Univision 13-3/8 percent subordinated debentures due 1999 for 30 percent of their principal amount.

The tender offers were previously scheduled to expire at 12:01 a.m. on Thursday, March 15, 1990. As of midnight on Wednesday, March 14, 1990, $13.891 million principal amount, or approximately 8 percent, of the discount notes and $2.42 million principal amount, or approximately 2 percent, of the debentures had been tendered and not withdrawn.

Univision Holdings, Inc., is a privately held company, based in New York, which owns and operates a Spanish-language television network in the U.S. and a group of television stations.

BLOOMFIELD HILLS, MI (MARCH 15) PR NEWSWIRE - Stoneridge Resources, Inc. (NYSE: SRE) announced today that it intends to increase its holdings in Major Realty to 33 percent and Radice Corporation to 53 percent as part of the company's continued consolidation of its real estate interests.

Stoneridge has reached an agreement in principle to acquire 416,500 shares or 6 percent, of the common stock of Major Realty Corporation (NASDAQ: MAJR), the Florida-based real estate company with holdings in Orlando and Tampa. Stoneridge would own approximately 33 percent of Major Realty following the completion of this transaction. The company will acquire these shares from Patricia Investments, Inc., in exchange for newly issued shares of Stoneridge common stock to constitute approximately 5 percent of Stoneridge's outstanding shares. The purchase is conditioned on, among other matters, the execution of definitive agreements and approval by the New York Stock Exchange of Stoneridge's application to list the shares to be issued in the transaction.

Stoneridge has also acquired 2,430,000 shares of Radice Corporation (NYSE: RI) common stock, increasing its position in the Florida-based real estate

developer to 53 percent. Stoneridge purchased these shares for $1,665,000 in cash, warrants to purchase 490,000 shares of Stoneridge common stock, and the assumption of certain commitments to provide letters of credit to Radice. The nontransferable warrants carry a $8.75 exercise price and are generally exercisable for a one-year period beginning March 15, 1994. The issuance of warrants and the underlying shares will be submitted to Stoneridge's shareholders for approval. The shares were purchased from Samelson Development company, owned by Randon A. Samelson, chairman of the board of Stoneridge.

Shareholders of Acceptance Insurance Holdings Inc. (NASDAQ: ACPT), a Nebraska-based specialty property and casualty insurance company, are expected to vote on March 27, 1990, on a proposed merger in which Stoneridge would acquire 100 percent of the common stock of Acceptance. Stoneridge also owns over 50 percent of Florida-based Orange-co, Inc. (NYSE: OJ), a fully integrated citrus grower, processor and owner of 26,000 acres of Florida land.

ROYAL OAK, MI (MARCH 15) PR NEWSWIRE - Detroit's original "Bad Boy," Alice Cooper, will be inducted into the Detroit area's first and only "Rock & Roll Walk of Fame" at the Metropolitan Musicafe in Royal Oak, at 9 p.m. Friday, March 16.

Cooper will place his handprints and sign his name in a two-foot- square block of wet cement. The block will be placed in the sidewalk in front of the Musicafe at a later date. Other blocks will be added to the sidewalk as the list of inductees increases.

Sixteen lucky Cooper fans will then enjoy a superb dinner from the Metropolitan Musicafe with the rock star.

Cooper has had 10 Top 40 hits, produced 10 albums, of which eight have gone gold. He has been a guest on the Hollywood Squares game show and made cameo appearances in movies.

Other performers previously inducted into the Walk of Fame include Rush, Joe Walsh, Deborah Harry, Grace Jones, Billy Squier and Mitch Ryder.

Donations and a portion of the proceeds from the Metropolitan Musicafe during the induction go to "Music for MD" (muscular dystrophy) to aid continuing research programs.

The Metropolitan Musicafe is on the corner of Lafayette and Fourth streets

next door to the Royal Oak Music Theater in the Washington Square Plaza. It opens for lunch service at 11 a.m., with dinner service ending at 10 p.m. A disc jockey plays old and new rock classics until 2 a.m. every day.

#90074p0057 03/15/1990 ~PR Newswire

DODGEVILLE, WI (MARCH 15) PR NEWSWIRE - Lands' End, Inc. (NYSE: LE), today reported results for its fiscal year ended Jan. 31, 1990.

The national direct merchant of classic casual clothing for men, women and children said its net sales for the year totaled $545 million, compared with $456 million in the prior year, a 20 percent improvement.

Net income for the year was $29.1 million, down 10 percent from the $32.3 million the company earned a year earlier. Per share earnings equaled $1.45 compared with a record $1.61 per share the year before.

The company had previously (December 11) estimated year-end net sales would be about $540 million and net income about $28 million, or $1.39 per share.

Fourth quarter net sales were $201 million, up 7 percent from those of the final three months of the year before, when net sales totaled $189 million.

Net income in the final quarter of fiscal 1990 was $16.5 million, slightly above the $16.1 million earned in the period a year earlier. Per share earnings for the most recent quarter were 83 cents, compared with 80 cents a year ago.

In commenting on the results for the year, company president and chief executive officer Richard C. Anderson said, "I feel good about the 8.7 percent pretax return on sales we achieved in the face of softness in consumer spending, even though we did not reach our goal of a 10 percent return." Fiscal 1990 was the first year in the last four in which Lands' End failed to exceed its 10 percent pretax goal.

Anderson said that in response to customer spending falloff, the company had mailed about four million special mailers in an effort to keep sales and inventories in balance. This and other factors increased selling, general and administrative expenses, which were not completely offset by higher volume. This was the primary reason for the decline in profit, according to Anderson.

Inventory at year end totaled $86 million, up 28 percent from $67 million at the end of fiscal '89.

The company said the LIFO provision was $4.0 million for fiscal 1990, compared with $5.5 million for the year before.

Lands' End said it mailed about 91 million catalogs in fiscal 1990, about 15 million more than in the year before. "Because of this and our other marketing efforts, we succeeded in adding more new prospects and converting more of them to customers than ever before," said Anderson.

ANN ARBOR, MI (MARCH 15) PR NEWSWIRE - Partners in the National Science Foundation Network (NSFNET) today announced the establishment of a new high-speed data communications link between the United States and Europe.

For the first time, researchers will have high-speed access to distant supercomputers and other high-technology information resources on both sides of the Atlantic.

The NSFNET is the nation's largest research and education computer network. It is managed and operated by the Merit Computer Network in Ann

Arbor. Merit, which is the longest-running regional network in the country, is a consortium of Central Michigan University, Eastern Michigan University, Michigan State University, Michigan Technological University, Oakland University, the University of Michigan, Wayne State University and Western Michigan University. The State of Michigan's Strategic Fund also provides financial support for the project.

The NSFNET partnership -- the National Science Foundation, the Merit Computer Network, IBM Corporation, MCI Communications Corporation, and the State of Michigan -- made the U.S. announcement of the new link at the National Net '90 networking conference in Washington, D.C.

Merit and the State of Michigan have played a key role in the development and operation of the NSFNET. The project is credited with positioning Michigan at the vanguard of national computer networking and advancing the state's efforts to become a center for high technology. Michigan Gov. James J. Blanchard cites the state's participation as an excellent example of cooperation between government, higher education and the private sector to help regain America's competitive edge in world markets.

IBM, with support from MCI, is sponsoring the new trans-Atlantic service that will enable NSFNET to provide the largest and fastest data communications pipeline connecting researchers and educators on both continents. This new connection will speed the exchange of information in such critical areas as studying global change, mapping the human gene, analyzing particle physics, exploring space and predicting weather.

Using this new link, researchers will be able to exchange information at a rate equivalent to transmitting 50 single-spaced typed pages a second. U.S. and European researchers will be able to collaborate on projects more effectively than ever before. They will be able, for example, to share research data at rapid speeds and to see the same graphic images and text almost simultaneously.

SALT LAKE CITY (MARCH 15) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO) and San Diego Gas & Electric Co. (NYSE: SDO) today jointly announced the signing of a 30 year power purchase agreement for 50 megawatts. This contract culminates almost two years of extensive negotiations between the two parties. The project is located in Yuma, Ariz. and the power will be transmitted to San Diego.

Bonneville will build, own and operate the power plant. The natural gas supply will come from reserves held by Bonneville Fuels Corp., a wholly owned subsidiary of Bonneville Pacific.

"This project represents a significant milestone in the development of independent power in the Southwest," said Robert L. Wood, chairman and CEO of Bonneville Pacific. He further added, "We see substantial benefits to the residents of San Diego by the addition of this competitively priced power as well as year-round employment of 70 - 80 people in the Yuma area."

Bonneville Pacific has completed 28 projects totalling 186 MW of generation since 1980. Over 700 megawatts of additional power are under development or are under construction by Bonneville. The Yuma project is scheduled to come on line in January 1993.

#90074p0077 03/15/1990 ~PR Newswire

CAMBRIDGE, MA (MARCH 15) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI) said today that it has reached an agreement in principle with Boehringer Mannheim GmbH, its European licensee for erythropoietin (EPO), concerning the resolution of a previously announced contractual dispute.

The dispute with Boehringer related to the production process used by Genetics Institute to manufacture certain batches of EPO for Boehringer during 1989. The EPO material in dispute, valued at approximately $13 million, was included in the company's revenues for the year ended Nov. 30

1989. The company recorded a one-time earnings charge of $9 million in fiscal 1989 to reflect its uncertainty that it would be able to collect the full amount of the $13 million under dispute.

Under terms of the agreement in principle, Boehringer has agreed to accept a portion of the EPO bulk material that it had previously disputed. In addition, Genetics Institue has agreed to replace a portion of the disputed material through the manufacture of new material in fiscal 1990. The quality of the disputed material was never in question, only the process parameters under which it was manufactured.

As a result of this agreement in principle, the company expects that it will be able to meaningfully reduce in fiscal 1990 the $9 million reserve taken in 1989 with respect to the dispute. Such a reserve reduction would have a favorable effect on the company's financial results.

Genetics Institute's Japanese licensing partner, Chugai Pharmaceutical Co. Ltd., received approval last month in Japan to market its recombinant EPO product, EPOGIN, for end-stage renal failure. Chugai-Upjohn, the company's U.S. marketing partner, has applied for marketing approval of its recombinant EPO product, MAROGEN Sterile Powder, in the U.S.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and other technologies. The company has a diversified portfolio of licensed and proprietary pharmaceutical products.

NEW YORK (MARCH 15) PR NEWSWIRE - Ogden Corporation (NYSE: OG) announced today that Lawrence Associates Inc. (LAI), a Dayton, Ohio- based business

unit of Ogden's subsidiary, ERC Government Systems Co., Inc., has received a $45.5 million, three-year contract to conduct manufacturing technology special studies and analyses for the U.S. Air Force's Manufacturing Technology (MANTECH) Directorate, Wright Research and Development Center (WRDC), Aeronautical Systems Division (ASD), at the Wright-Patterson Air Force Base in Dayton.

MANTECH addresses the range of manufacturing problems that are confronting the industrial base which provides the Air Force with its defense hardware and software. MANTECH is the principal Air Force initiative that has been established to improve vital manufacturing technology processes and to raise the industrial base's level of competitiveness to be more closely in line with that of superior U.S. advanced technologies development.

The contract will focus on studies and analyses in the technical disciplines of electronics, metals and non-metals processing and fabrication; integrated manufacturing; concurrent engineering and information science. The studies and analyses will be conducted to assess problem areas and to define efforts and initiatives that address these problem areas. Another key objective will be to conduct early feasibility validations of manufacturing technologies to reduce risk in implementing the technologies. Finally, a portion of the contract effort will focus on technology transfer and information dissemination relative to manufacturing technologies developed under MANTECH sponsorship.

LAI operates as a unit of ERC Government System's W.J. Schafer Group for advanced technology services. LAI provides engineering and management assessments for advanced technologies in the areas of manufacturing, lethality, space systems, space materials, and structural materials. Its principal client is the U.S. Department of Defense. ERC Government Systems a Fairfax, Va.-based firm, serves government and commercial clients in the defense and space technologies, software and systems engineering, and engineering and support services markets worldwide.

CINCINNATI (MARCH 15) PR NEWSWIRE - The Ohio River Valley Water Sanitation Commission (ORSANCO) today announced that Ashland Oil Inc. (NYSE: ASH) of Ashland, Ky., will be the corporate sponsor for ORSANCO's 1990 Ohio River Sweep, a six-state volunteer river clean-up program scheduled for June 16.

As corporate sponsor, Ashland has pledged $50,000 to the program. The donation will be primarily used to buy materials to help outfit volunteers with clean-up equipment and to help pay for administrative expenses

associated with the program. In addition, the company will assist in promotion of the clean-up program and work to attract volunteers.

"Ashland's support for the Ohio River Sweep will be instrumental in our ability to hold one of the most ambitious multi-state conservation efforts ever attempted," said Alan Vicory, executive director of ORSANCO. "Ashland has worked with us on this project from its inception and we are confident that with its support and the support of others the 1990 Ohio River Sweep will be successful."

ORSANCO started the Ohio River Sweep program in 1989 when it targeted a 150-mile stretch of the Ohio River bordering Kentucky and Ohio for trash collection. The event attracted more than 1,200 volunteers at clean-up sites in nearly a dozen river communities. Interest in the program grew and ORSANCO decided to expand the program in 1990 to involve the entire 981-mile length of the river from Pittsburgh to Cairo, Ill.

ORSANCO is administering the Ohio River Sweep in cooperation with the Ohio Environmental Protection Agency, Ohio Department of Natural Resources, Kentucky Natural Resources and Environmental Protection Cabinet, West Virginia Department of Natural Resources, Pennsylvania Department of Environmental Resources, Indiana Department of Environmental Management and the Illinois Environmental Protection Agency. Each state agency is working with 72 county coordinators along the river to target volunteer clean-up efforts on June 16.

Based in Cincinnati, the Ohio River Valley Water Sanitation Commission is an interstate water pollution control commission for the Ohio River Valley.

Ashland Oil Inc. is engaged in petroleum refining, transportation and marketing; retail gasoline marketing; motor oil marketing; chemicals; coal; highway construction; and oil and gas exploration and production.

CONTACT: Roger Schrum of Ashland Oil, 606-329-4061, or Jeanne Ison of ORSANCO, 513-421-1151.

#90074p0084 03/15/1990 ~PR Newswire

NEW YORK (MARCH 15) PR NEWSWIRE - The management of Saks Fifth Avenue announced today that is has submitted an offer to purchase the 46-store retail chain from its London-based parent, B.A.T Industries. Management's partner in the bid is Tobu Department Store Co. Ltd.

As part of a global expansion program, Saks Fifth Avenue's management would operate stores in the United States and Tobu Department Store Company Ltd. would expand Saks in Asia.

Although terms were not disclosed, management said that its fully financed bid is consistent with the procedures established by B.A.T and its financial advisor, Shearson Lehman Hutton, for the sale of the company. B.A.T acquired Saks in 1973.

Makoto Nezu, executive vice president of Tobu commented, "Because we're aiming for excellence, we have long been interested in cooperation with a first-class retailer in the United States. As America's leading luxury store, Saks is in a class by itself, and for some time we have been discussing the possibility of working together outside the United States. It is in this spirit of cooperation that we have decided to accept the offer of Saks' management team to become a partner in their bid."

Saks Fifth Avenue, as part of their ongoing expansion plans, will open the Tower addition to the New York flagship store this March. The addition will result in increased selling space of about 30 percent. In addition, the company will open in two new markets, Denver, Colo., in August and Portland, Ore., in September. Completing their 1990 expansion plans will be a brand new store on Michigan Avenue in Chicago, replacing the existing unit which was opened in 1929. Other major current programs include renovations in 20 existing stores.

At the same time, Tobu is in the middle of a major expansion of its flagship store in Tokyo. If the joint bid is successful, Tobu will help develop the Saks name in Japan and the rest of Asia, introducing the American concept of luxury, quality and service to local consumers. When completed, Tobu's new flagship department store in the north of Tokyo will have a total sales area of 893,428 square feet, and a substantial portion has been set aside to give Saks the best possible entry to one of the world's richest markets.

New York-based Saks has fashion specialty stores and 12,000 employees located across 19 states. Its flagship store is in Manhattan at 611 Fifth Avenue between 49th and 50th Streets. Saks Fifth Avenue is part of BATUS Inc., a wholly owned subsidiary of London based B.A.T Industries.

DETROIT (MARCH 15) PR NEWSWIRE - Electricity sales to commercial customers set a record for February, but declining sales to the auto and steel industry contributed to a 1-percent overall reduction in Detroit Edison sales for the month compared with year-earlier figures.

A total of 3.3 billion kilowatthours (kWh) were sold in February. Record

commercial sales of 693 million kWh were 2.6 percent higher than February 1989 and the seventh consecutive year-to-year increase for sales in this class. Since February 1989, more than 3,300 commercial customers have been added to Detroit Edison's Southeastern Michigan service area.

Sales to residential customers were nearly 967 million kWh or 1.5 percent above February 1989. Some 20,500 residential customers were added to the utility's service area in the past year.

Declining auto and steel production brought February industrial sales down to 1.4 billion kWh or 3.3 percent below February 1989.

CINCINNATI (MARCH 15) PR NEWSWIRE - Provident Bancorp, Inc. (NASDAQ: PRBK) ("Provident"), a $2 billion bank holding company located in Cincinnati and Thrift Savings & Loan Company ("Thrift"), a $134 million savings & loan association located in Cincinnati, jointly announced today that a letter of intent has been executed to enter into a merger conversion transaction whereby Thrift will adopt a Plan of Conversion and Acquisition which will result in it becoming a wholly owned subsidiary of Provident. In conjunction with the transaction, Thrift depositors will be offered the opportunity to subscribe for stock of Provident in a Subscription Offering. The transaction is subject to execution of a definitive agreement, Thrift member approval and receipt of necessary regulatory approvals.

The Principal subsidiary of Provident is The Provident Bank, an Ohio banking corporation with 32 offices - 30 in the Greater Cincinnati area

and two in Cleveland. Thrift operates six offices in the Greater Cincinnati area.

Allen L. Davis, president of Provident stated, "We are excited about the prospect of working with Thrift and believe the acquisition will allow Provident to offer expanded opportunities for their employees as well as expanded services and convenience to customers."

Roy W. Franks, president of Thrift, stated that "the future of savings and loans has been dramatically changed by the recent FIRREA legislation which was passed in August 1989. The legislation severely restricts the continuing ability of savings and loans to maintain satisfactory profit levels.

"Thrift is a highly rated, well-managed and very strongly capitalized company. New opportunities and services will now be provided to our customers by becoming part of a locally owned and operated Bank.

"Our employees, management and directors will continue to participate in the excellent future which is being provided by this affiliation to offer complete banking financial services."

LOS ANGELES (MARCH 15) PR NEWSWIRE - Syncor International Corp. (NASDAQ: SCOR) today announced record sales and earnings for the first nine month period ended Feb. 28, 1990.

Sales in the third quarter of fiscal 1990 increased 13.8 percent to a record $32.3 million from $28.3 million in the third quarter a year ago. Net income was a record $649,000, or 7 cents per share, compared with $175,000, or 2 cents per share, last year. Income before an extraordinary item was $479,000, or 5 cents per share, compared with $106,000, or 1 cent per share, a year ago.

For the first nine months of fiscal 1990, sales increased to 13.5 percent to a record $94 million from $82.8 million. Net income was a record $2.8 million, or 28 cents per share, compared with $326,000, or 3 cents per share, last year. Income before an extraordinary item rose to $2.1 million, or 21 cents per share, versus $198,000, or 2 cents per share, for the first nine months of last year.

Commenting on the record sales and earnings, Gene McGrevin, Syncor's

president and chief executive officer, stated, "We are very encouraged with results for the third quarter, particularly since this is traditionally our weakest quarter. This represents our third consecutive record quarter for fiscal 1990, an indicator that performance has improved significantly over last year's results. We also are well ahead of expectations for this fiscal year. We continue to see both improvements in field operating efficiencies and increased market shares in both our Radiopharmacy and Home Care businesses. This is encouraging for our Radiopharmacy business because it represents increased market penetration due to the addition of new customers in competitive markets."

Syncor operates a nationwide network of 84 nuclear pharmacy service centers and 18 home care pharmacies. They prepare and deliver patient specific intravenous drugs and solutions for use in diagnostic imaging, and a complete range of products for home infusion therapy. Syncor services over 5,000 hospitals, clinics, physicians' offices, nursing facilities and home-based patients. Syncor is the only national pharmacy of its kind that provides this combination of diagnostic and therapy services to the hospital and alternate site markets.

#90074p0098 03/15/1990 ~PR Newswire

DALLAS (MARCH 15) PR NEWSWIRE - Oryx Energy Company (NYSE: ORX) today announced the test results of six new horizontal wells in the Austin Chalk formation that flowed at a combined initial rate of nearly 8,000 barrels of oil per day (BOPD) and three million cubic feet of natural gas per day (MMcf/D). The one discovery and five development wells bring Oryx Energy's total production from the Pearsall Field to approximately 10,000 BOPD and 5 MMcf/D.

The Frost National Bank No. 61 is a wildcat discovery located in Section 7 Railroad Survey A-232, Dimmit County. It produced 1,185 BOPD and 461 thousand cubic feet of natural gas (Mcf/D) through a 36/64-inch choke at a flowing tubing pressure of 300 pounds per square inch from the Upper and Lower Austin Chalk. The well was drilled to a measured depth of 9,790 feet with a horizontal displacement of 3,173 feet.

The E.B. Jones No. 2, in Zavala County, flowed 1,932 BOPD and 418 Mcf/D from a 3,113 foot horizontal displacement at a measured depth of 9,521 feet. The E.B. Jones "D" No. 3 was completed flowing 942 BOPD and 390 Mcf/D over a horizontal displacement of 2,981 feet at a measured depth of 9,434 feet.

Also in Zavala County, the M.L. Lasater No. 3 flowed 1,409 BOPD and 435 Mcf/D from a horizontal displacement of 3,079 feet at a measured depth of 9,711 feet. The M.L. Lasater No. 5 tested 1,616 BOPD and 944 Mcf/D at a measured depth of 9,484 feet from a horizontal displacement of 3,016 feet. The fifth development well, the J.R. Avant No. 2 in Frio County, initially produced 794 BOPD and 343 Mcf/D over a horizontal displacement of 2,526 feet at a measured depth of 9,360 feet. Flowing tubing pressures on the five development wells ranged from 180 to 980 pounds per square inch on various choke sizes.

The Frost National Bank No. 61 discovery and the five new development wells could qualify for a 1,312 BOPD production rate under the Texas Railroad Commission's special rules and allowables for horizontally drilled wells in the Pearsall Field.

Oryx Energy holds 100 percent working interest in all of its Austin Chalk wells. The company expects to have seven rigs drilling horizontal wells full time during April and plans to have drilled 85 horizontal wells in the Pearsall Field by the end of 1990.

In a related field activity, some 700 barrels per day of natural gas liquids are being produced from Oryx Energy's Big Wells Gas Plant. The plant processes the natural gas produced in association with the Austin Chalk oil from Oryx Energy's and other operators' producing wells located in the Pearsall Field. This plant was previously shut down because of lack of activity.

The Dallas-based Oryx Energy Company conducts its domestic operations through Sun Energy Partners, L.P. (NYSE: SLP). Oryx Energy, the managing general partner and 98-percent owner of the partnership, is the largest independent oil and gas company in the world with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels.

#90074p0101 03/15/1990 ~PR Newswire

CAMBRIDGE, MA (MARCH 15) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI) said today that it has reached an agreement in principle with Boehringer Mannheim GmbH, its European licensee for erythropoietin (EPO), concerning the resolution of a previously announced contractual dispute.

The dispute with Boehringer related to the production process used by Genetics Institute to manufacture certain batches of EPO for Boehringer during 1989. The EPO material in dispute, valued at approximately $13 million, was included in the company's revenues for the year ended Nov. 30

1989. The company recorded a one-time earnings charge of $9 million in fiscal 1989 to reflect its uncertainty that it would be able to collect the full amount of the $13 million under dispute.

Under terms of the agreement in principle, Boehringer has agreed to accept a portion of the EPO bulk material that it had previously disputed. In addition, Genetics Institue has agreed to replace a portion of the disputed material through the manufacture of new material in fiscal 1990. The quality of the disputed material was never in question, only the process parameters under which it was manufactured.

"This settlement reflects the strong collaborative spirit that has always existed between Genetics Institute and Boehringer Mannheim. The single most important objective of both parties is the successful commercialization of EPO throughout Europe," stated Gabriel Schmergel, president and chief executive officer of Genetics Institute.

As a result of this agreement in principle, the company expects that it will be able to meaningfully reduce in fiscal 1990 the $9 million reserve taken in 1989 with respect to the dispute. Such a reserve reduction would have a favorable effect on the company's financial results.

"The amount and timing of the reserve reduction will depend principally on how efficiently Genetics Institute is able to manufacture the EPO replacement material for Boehringer," said Garen Bohlin, executive vice president of Genetics Institute.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA and other technologies. The company has a diversified portfolio of licensed and proprietary pharmaceutical products.

#90074p0103 03/15/1990 ~PR Newswire

ANN ARBOR, MI (MARCH 15) PR NEWSWIRE - Daedalus Enterprises, Inc. (OTC) today announced earnings of $48,000, or $.07 per share, on revenues of $984,000 for the second quarter of the fiscal year ending July 31, 1990. This is compared to earnings of $205,000, $.36 per share, on revenues of $1,131,000 for the comparable period of the preceding fiscal year.

Earnings for the six months ended Jan. 31, 1990, were $302,000, $.51 per share, on revenues of $2,588,000 as compared to $645,000, $1.14 per share, on revenues of $2,743,000 for the comparable period of the preceding fiscal year. The reduction in net earnings is primarily attributable to

increases in research and development and the exhaustion of all tax loss and credit carryforwards which contributed approximately $40,000 and $190,000, respectively, to the net earnings of the second quarter and first six months of last fiscal year.

Backlog as of Jan. 31, 1990, was $3.3 million as compared to less than $3.1 million as of July 31, 1989, due to the capture of more than $2.8 million of new contracts during the six months ended Jan. 31, 1990. The great majority of the current backlog is expected to be recognized as sales in the current fiscal year, in addition to certain items currently under negotiation. Backlog additions will be made during the remainder of the current fiscal year as items currently under negotiation are finalized.

As was disclosed previously by the company, the record earnings of fiscal 1989 are not likely to be sustainable. Among the factors contributing to this are: the consumption of all tax benefit carryforwards in fiscal 1989 increased expenditures on internal research and development, and increased emphasis on marketing in order to facilitate company business growth.

Daedalus Enterprises, Inc. is a leading developer and manufacturer of remote sensing instruments used for environmental measurements and monitoring.

MONTREAL (MARCH 15) PR NEWSWIRE - Sand Technology Systems International (NASDAQ: SNDCF) today announced operating results, for the first half of fiscal 1990 to reflect continuing gains in revenue.

For the fiscal 1990 second quarter revenues were up to $11,168,906 from the $10,660,214 reported for the fiscal 1989 second quarter. The six month revenue figure rose to $22,137,112 from $19,884,973 reported for the first half of fiscal 1989. The revenue gains are a direct result of sales by Sand's affiliate HDS Canada.

The net income figure for the quarter reflects shipping and revenue recognition problems at HDS Canada and supply problems in the company's U.S. subsidiary Sand U.S. Booking orders remain high at HDS Canada and these delays should be resolved by March 31, 1990, HDS Canada's fiscal year-end.

Sand Technology Systems International markets complete large-scale IBM compatible computer systems in Canada and computer printers and sophisticated information systems products in the U.S.A. To date, Sand and its affiliates have installed equipment valued in excess of $350 million.

DEARBORN, MI (MARCH 15) PR NEWSWIRE - CMS Energy Corporation (NYSE: CMS) announced today that the Circuit Court in Ingham County, Mich., issued a temporary restraining order in response to a motion of the attorney general of Michigan restraining CMS and its subsidiaries, including Consumers Power Company, from transferring promissory notes of the Midland Cogeneration Venture Partnership (MCV) and other MCV property interests to CMS Energy subsidiaries in exchange for assets transferred by these subsidiaries to the MCV.

Ownership of the CMS Energy subsidiaries entitled to receive the MCV notes and other MCV property interests was previously transferred from Consumers Power to CMS Energy in exchange for an equivalent market value of debentures issued by CMS Energy to a subsidiary of Consumers Power.

In the opinion of counsel for CMS Energy, the Michigan Public Service Commission (MPSC) and the court lack jurisdiction over CMS Energy and the subsidiaries that hold the MCV notes and other MCV property interests and that the order is invalid. CMS Energy will contest the order, which was issued without a hearing or notice to CMS Energy.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth- largest combination utility.

KANSAS CITY, MO (MARCH 15) PR NEWSWIRE - As the new "owners" of corporate America, the nation's pension fund managers must develop innovative and thoughtful policies in the areas of corporate governance, community responsibility and investment policy, according to John Biggs, president and chief operating officer of TIAA-CREF.

"We institutional owners hold over 50 percent of the shares of corporate

America and are headed toward two-thirds ownership in the next decade," Biggs said. "As the managers of trillions of dollars of pension funds, we have great responsibilities and great opportunities."

Biggs, a native of Missouri and former president and CEO of Centerre Trust Company in St. Louis, made his remarks in an address today before the Annual Conference of Missouri Association of Public Employee Retirement Systems (MAPERS).

TIAA-CREF, with $82 billion in assets, is the nation's largest pension system, serving 4,300 educational institutions and over one million policyholders.

Biggs noted that appropriate corporate governance must focus on how American business as a whole can be made more successful and productive. "We are truly long-term investors and must play our role looking to five- and ten-year results for the entire corporate sector," Biggs said. "It avails us little if we succeed in forcing Company A to be sold to Company B if the profit on A is promptly lost in B's inability to improve A's operation."

Biggs stressed that while most American businesses are well run, "we as owners must resist inappropriate efforts" to shield those companies that are not. "We need to press all companies to take their cases to their shareholders -- a takeover defense that fundamentally changes the relationship between a company and its owners should be voted on by its owners."

He said his own company, TIAA-CREF, had created a special Trustee Committee on Corporate Governance and Social Responsibility, which reviews significant proxy issues and oversees an extensive research program on corporate governance and social responsibility. "We meet with managements who want to debate our conclusions or to ask us to withdraw proxy resolutions we have proposed. We often affect corporate policy in the process and we bend to reflect those changes."

Biggs also warned that if pension funds do not develop mechanisms to handle the complex issues involved, the result could be disastrous. "If a responsible framework of control between companies and institutional investors does not occur in the next five years, we can all be sure that Congress will deal with this matter. And we will all be losers if that happens."

#90074p0117 03/15/1990 ~PR Newswire

NEW YORK (MARCH 15) PR NEWSWIRE - Duff & Phelps Inc., the Chicago- based credit rating, investment research, money management and financial consulting firm today officially opened its office in Lower Manhattan at 17 State St.

Senior D&P executives attended a press conference at the new location in the heart of the world's financial capital to make brief presentations about the firm's plans and answer reporters' questions.

Duff & Phelps has been doing public credit ratings since 1979 and has been in business since 1932. In that time it has garnered a large share of the credit rating market.

The New York City location will give the company an extra edge it has not previously enjoyed in terms of the other major rating agencies and their presence just a few blocks away from D&P's new address.

Duff & Phelps, highly regarded for the thoroughness and depth of its credit rating research and analysis, comes to the Big Apple at a time when the financial world is in turmoil following huge stock market fluctuations trouble with junk bond financings and Wall Street layoffs.

The firm formed a High Yield research department last summer and has always been innovative in the credit rating field.

It was the first nationally recognized rating agency to: --Issue a "Watch List." --Evaluate bank loans and certificates of deposit. --Differentiate the broad commercial paper and bank CD ratings. --Rate commercial and residential real estate pools. Says company President Francis E. Jeffries: "Our future has never been stronger, our prospects never brighter."

Why the "beachhead" in New York? Executive Vice President Paul E. Gipson, vice chairman of the D&P Credit Rating Committee, explains: "We felt that to expand the business in the direction and at the pace we want, we need to have a physical presence right in the mainstream of the marketplace."

In charge of the new office is Group Vice President Richard P. Chenel. He was previously with Goldman Sachs in New York as vice president in the credit department, where he was responsible for credit maintenance and rating agency relations for clients in the telecommunications, utility, energy and finance industries.

CONTACT: Paul Gipson, 312-368-3150, or Ray Chapman 312-630-4697, both of Duff & Phelps.

MEDIA, PA (MARCH 15) PR NEWSWIRE - VWR Corp. (OTC: VWRX) and Oxford Laboratories of London, Ontario, Canada, have reached an agreement and signed a letter of intent whereby VWR would purchase all the outstanding stock of Oxford.

Oxford has been in the laboratory distribution business for more than 13 years and has concentrated on servicing industrial and educational customers in Ontario.

VWR recently expanded into the Canadian market via its pruchase of Sargent-Welch Scientific, and now has offices in Toronto and Montreal. Jerrold Harris, president of VWR, noted, "VWR has had a long working relationship with Oxford and its people and is very much looking forward to utilizing the talents of the entire Oxford organization in building our position in the Canadian marketplace."

The transaction is expected to close within 45 days. Terms of the agreement were not disclosed, but the transaction is valued at under $10 million.

VWR Corp., headquartered in Media, is the nation's second largest distributor of laboratory supplies and equipment, with annual sales in excess of $400 million.

OLD GREENWICH, CT (MARCH 15) PR NEWSWIRE - American Brands, Inc. (NYSE:

AMB) announced today an offering of $200 million Convertible Debentures, due 2005, in the international capital markets. The issue price will be 100 percent.

The company said the Debentures will bear interest at a rate of 5-3/4 percent per annum and will be convertible into the company's common stock at a conversion price of $79, which represents a premium of 21.8 percent over the market price of the company's common stock. The debenture holder will have a one time put on the fifth anniversary at a price expected to yield the equivalent of 8-1/4 percent on an annual basis. The holder will also have a one-time put during the first ten years upon certain other circumstances.

The issue is non-callable (except under limited circumstances) for the first five years and redeemable at par thereafter. Application will be made to list the debentures on the Luxembourg Stock Exchange.

The debentures are being offered through a syndicate headed by Morgan Stanley International, the company said.

The debentures have not been, and will not be, registered under the United States Securities Act of 1933 and may not be offered or sold in the United States or to United States persons as part of the distribution.

#90074p0126 03/15/1990 ~PR Newswire

NEW YORK (MARCH 15) PR NEWSWIRE - The General Electric Company will become the exclusive underwriter of Audubon Television Specials, which are aired on the Public Broadcasting Service and Turner Broadcasting System, the National Audubon Society announced today.

GE is making a three-year, $3 million grant to Audubon to underwrite the award-winning Audubon series, which is now in its fifth year on PBS and its sixth full year on TBS. GE's grant begins with the start of this summer's season of eight, hour-long Audubon Specials on PBS stations nationwide. Additionally, GE will be a sponsor of Audubon programs airing on Turner Broadcasting System starting this fall.

"GE has an outstanding history of supporting provocative public affairs programming of the highest quality on national television," said Audubon President Peter A.A. Berle. "We are honored that GE finds our Audubon Specials fit within that tradition of excellence."

"Audubon Specials reach millions of Americans with a message that the individual can make a difference in protecting and improving our

environmental quality-of-life," said GE Senior Vice President Frank P. Doyle. "GE's involvement in this effort is a natural outgrowth of both our existing support for environmental education and our broader commitment to corporate environmental responsibility."

GE has for several years been a major supporter of Audubon's classroom education program, Audubon Adventures. In addition, the GE Foundation has an ongoing program to match employee contributions to several non-profit environmental organizations.

Audubon Television Specials are a co-production of Audubon, Turner Broadcasting and WETA of Washington, D.C. Audubon Vice President for Television Christopher Palmer is executive producer of the series.

Audubon's goal is to create programs with a sense of adventure as well as a sense of values. Each special offers viewers a look at the natural world, with the focus on conservation efforts to save wildlife and Earth's natural resources. Audubon retains sole editorial control over the content of its television specials.

"GE's support reaffirms the all-important principle that has guided us through the production of all our specials: that Audubon, as a leading voice of environmental advocacy, can consistently make documentaries that are pro-environmental and fairly present all sides in environmental controversies," said Berle. "We have never and will never waiver from that commitment to fairness."

"The Audubon television specials continue a GE tradition of support for public television that goes back to 1970. It's important to bring to viewers knowledge and understanding of the major issues of our society," said Doyle.

The Audubon Specials series is endorsed by both the National Education Association and the American Federation of Teachers.

TAMPA, FL (MARCH 15) PR NEWSWIRE - TECO Energy, Inc. (NYSE: TE) today announced that Wayne W. Hopkins has been named director of corporate communications and vice president, corporate communications for Tampa Electric, the company's principal subsidiary. In that position, he will manage the company's communications functions and report to Timothy L. Guzzle, president and chief executive officer.

Hopkins replaces Thomas A. Ruddell who will continue to serve the company in a consulting capacity.

Hopkins joined TECO Energy in July 1989 as manager, corporate communications. Before that, he was director of public relations for The Signal Companies in LaJolla, Cal. Following that company's merger with Allied Corporation, he served as assistant to the president of Allied-Signal International, responsible for all communications and administration.

From 1979 to 1984, Hopkins held several management positions with Burlington Northern Inc. in Seattle, including assistant vice president, public affairs. Prior to that he was with Cargill Inc. in Minneapolis where he managed a wide range of communications activities.

Hopkins is a native of Atlanta and received his journalism degree from Georgia State University. He also attended the University of Georgia's Graduate School of Journalism.

CONTACT: Mike Mahoney of TECO Energy, 813-228-4271 (office), or 813-961-9456 (home).

#90074p0133 03/15/1990 ~PR Newswire

PARSIPPANY, NJ (MARCH 15) PR NEWSWIRE - Starting Saturday, AT&T will offer a free booklet to help children at home alone deal with emergencies.

As many as 13 million American children are regularly home alone, according to the Children's Defense Fund, and many more are occasionally by themselves or baby-sitting for younger children.

The booklet, which will be available at AT&T Phone Centers across the country, is designed to help children and their parents deal with possible emergencies as well as everyday problems that crop up while children are by themselves.

"What If I'm Home Alone?" contains tips, puzzles and games on topics such as calling for help in emergencies, dealing with fires and safety in the kitchen.

"More than 3,000 U.S. children die each year of injuries sustained in avoidable household accidents," said Bob Martin, AT&T Phone Center vice president. "This booklet can be used as a discussion tool for families to practice home safety techniques together.

"With just a little planning, you can make it easier for children to reach help over the telephone, even in the confusion of a crisis," Martin said.

"By putting emergency numbers near the phone, or programming the numbers into phones with memory dialing, you can save valuable time when minutes matter."

The booklet includes tips especially designed for children, such as how to respond to callers without telling them the child is home alone. It also contains suggestions for dealing with crank or obscene calls.

Some people, such as baby sitters, may not know the address or phone number where they are working. The booklet includes a page where all emergency information can be listed and posted near the telephone.

"What If I'm Home Alone?" also contains practical suggestions for having fun alone, such as starting a new hobby, or writing a story to tell parents later, and how to handle arguments with brothers and sisters.

The booklet will be available free -- as long as supplies last -- at AT&T Phone Centers or by calling toll-free 1-800-222-3111.

WEST HARTFORD, CT (MARCH 15) PR NEWSWIRE - Royalpar Industries, Inc. (NASDAQ: ROYL) today announced it has filed a form S-4 registration statement with the Securities and Exchange Commission for the proposed merger agreement with National TechTeam, Inc. (NASDAQ: TEAM). The agreement provides for a merger between National TechTeam and Royalpar Acquisition Corporation, which upon completion, would result in National TechTeam becoming a wholly owned subsidiary of Royalpar and then Royalpar would change its name to TechTeam International, Inc.

As a result of the merger, each 2.90 shares of TechTeam common stock outstanding immediately prior to the merger will be exchanged for one share of Royalpar common stock and each outstanding option to purchase TechTeam common stock will be converted into equivalent options for shares of common stock of Royalpar as adjusted for the 2.90 exchange ratio.

Currently Royalpar has 4,680,000 shares outstanding; TechTeam has 5,974,548 shares outstanding. As of March 14, 1990, Royalpar's stock closed at $1.81; TechTeam stock closed at $.63. The merger is subject to shareholder approval and other customary conditions.

Shareholders will also be asked to vote on an amendment to the certificate of incorporation of Royalpar to increase the total authorized capital stock of Royalpar from 10 million shares common stock, $.01 par value, to 30 million shares, $.01 par value. Albert E. Miller, chairman of Royalpar stated that this increase will enable Royalpar to continue to take advantage of opportunities which may arise to raise capital or acquire other companies which the board of directors deems desirable and in the best interests of Royalpar and its existing shareholders.

The principal executive officers of TechTeam International will be as follows: Albert E. Miller, chairman, president and chief executive and operating officer; William F. Coyro, vice chairman; Steven E. Boyers, executive vice president; and George P. Trahan, secretary.

Upon completion of the merger, TechTeam International will operate 18 regional offices in the United States with annual revenues in excess of $75 million and approximately 1,500 specialists at work for client companies. Royalpar Industries provides staffing of computer and technical personnel on a contract basis to major companies. In addition, the company operates Chase Adams, a national executive search and management consulting firm, specializing in the computer communications field. National TechTeam provides computer training and computer support services to major companies. Upon completion of the merger, the company intends to establish operating offices in Paris, London, and Sydney, Australia.

CONTACT: Albert E. Miller, chairman of Royalpar, 203-953-6315; Douglas

Howard of TechTeam, 313-277-2277; or Sam Witchel of Scharff, Witchel & Co. 212-983-1060, for Royalpar.

#90074p0143 03/15/1990 ~PR Newswire

MINNEAPOLIS (MARCH 15) PR NEWSWIRE - Moniterm Corporation (NASDAQ: MTRM) announced today that sales for the year ended Dec. 31, 1989, were $27.4 million, compared with $34.2 million for the year 1988, a decrease of 20 percent.

The company had earlier reported a loss for the first nine months of 1989 of $490,700; the loss for the full year 1989 was $1,062,200, compared with net earnings of $345,200 in 1988. The loss per share for the year 1989 was 23 cents, compared with earnings per share of 7 cents in 1988.

Sales for the fourth quarter ended Dec. 31, 1989, were $6.6 million, compared with $8.7 million in the fourth quarter of 1988. The company had a net loss for the quarter of $571,600, or 12 cents per share, compared with a net loss of $440,100, or 9 cents per share, in the fourth quarter of 1988.

The principal reasons for the sales decline in the fourth quarter were an unexpected reduction in the sale of Moniterm's Viking display systems due to a slump in the high resolution monitor market, and a loss of share in the Macintosh market due to Apple's entry into this market with its own monitor.

Earnings in the fourth quarter were impacted because fixed operating expenses could not be reduced fast enough to compensate for the $800,000 margin reduction in the quarter.

In response to lower-than-expected sales in 1989, the company realigned its sales and marketing functions, appointing two new vice presidents, Bruce E. Bailey and Dennis G. Pederson. In a move to cut expenses, the company, in January 1990, reduced its Minnetonka work force by 20 percent, and eliminated a number of other costs, reducing its 1989 expense structure by an estimated $2 million.

Moniterm plans to introduce two state-of-the-art monitors later this month. These products, along with new sales management and lower expenses should enable the company to report improved results in 1990. C. Paul Pesek, Moniterm's CEO, said: "Industry observers forecast that the market for our products will grow by 25 percent per year for the next several years. We fully expect to participate in this growth, and to report increased sales and earnings in 1990 and beyond."

Moniterm is a Minnesota-based designer and manufacturer of high resolution

monitors and display systems for the computer industry and its markets.

#90074p0149 03/15/1990 ~PR Newswire

CHICAGO (MARCH 15) PR NEWSWIRE - Continental Bank Corp.'s (NYSE: CBK) 1989 annual report illustrates the diversity of the company's customer base and business lines with four different versions of the cover. The report, released today, features impressions of Continental's accomplishments from four important constituencies -- customers, investors community leaders and employees.

"Our approach represents the diversity of solutions Continental structures for its customers," said Chairman Thomas C. Theobald. "Taken together, the customers and other participants featured in the report portray the scope of our capabilities and corporate performance."

The different covers are part of Continental's effort to target its marketing according to a customer's specific needs and to customize products to respond to unique financial challenges.

Theobald noted in the report's letter to Continental stockholders that the important issues facing the banking industry are strategic. "The United States banking industry is restructuring, and within a few years many venerable names will disappear. Those who survive -- and prosper -- must have an exceptionally clear customer focus, rigorous cost control, and product leadership that brings continuing competitive advantage. We know our customers individually, and we are dedicated to serving them better.

Theobald also told stockholders that credit quality in the loan portfolio became the critical issue in 1989 for many banks. However, he noted, Continental was pleased with its results: Excluding less-developed-country debt, nonperforming loans -- including real estate loans and financing for highly leveraged transactions -- were less than 2 percent of Continental's year-end portfolio. In addition, the corporation

cut medium- and long-term loans to LDCs by $900 million during the year through charge-offs, sales and swaps.

The letter to stockholders also discussed upcoming changes to the board of directors. At the annual meeting on April 23, Leonard H. Lavin, chairman and chief executive officer of Alberto-Culver Co., and William L. Weiss, chairman and chief executive officer of Ameritech, will not stand for re-election as directors of the corporation and Continental Bank N.A.

Continental Bank Corp. is a market-driven bank holding company devoted to serving corporations, institutional investors and individuals with complex financial requirements. Through its subsidiaries, the corporation arranges financing, makes markets, manages financial risk and processes cash and securities on behalf of its customers in key capital markets worldwide.

DENVER (MARCH 15) PR NEWSWIRE - Ahmed D. Kafadar, chairman and chief executive officer of OEA Inc. (AMEX: OEA), the Denver-based, high-technology manufacturer of aerospace and automotive products, announced record sales and earnings for the second quarter and six months ended Jan. 31, 1990.

Sales and net earnings for the second quarter were $16,966,400 and $2,162,100, respectively, compared to $12,534,700 and $1,599,500 for the prior-year second quarter. Net earnings for the six months were $4,325,700 on sales of $32,324,100, compared to net earnings of $3,380,700 on sales of $24,551,400 for the prior-year comparable period. Earnings per share for the quarter were 65 cents compared to 48 cents for the fiscal year 1989 second quarter, with six-month results of $1.29 per share compared to $1.01 for the fiscal year 1989 first six months. Kafadar

noted that the Parent Company and OEA's major subsidiary, ET Inc. were the primary contributors to both the 35 percent sales and net earnings increases during the quarter.

Net earnings and earnings per share for the prior fiscal year first quarter include a $266,000 (8 cents per share) effect of an accounting change adopted during the fourth quarter of fiscal year 1989.

Bookings of new engineering work and follow-on production in both the aerospace/defense and commercial segments exceeded $17 million during the second quarter. Backlog of unfilled orders at Jan. 31, 1990, was $90 million, up from $81 million a year earlier.

OEA is a leader in the field of propellant and explosive-actuated devices used in (1) the personnel escape systems of military aircraft, missiles, and for space application and (2) the automotive air bag. All new aircraft such as the F-4, F-111, F-14, F-15, F-16, F-18, B-1B, B-2, S-3A, and AH-64A, the Space Shuttle, and missles/launchers, such as the Harpoon, Trident, ALCM, Peacekeeper, ACM, Ariane, and SICBM, have OEA-developed and manufactured devices. Most domestic automobiles equipped with an air bag use an initiator manufactured by OEA's Automotive Products Division.

#90074p0160 03/15/1990 ~PR Newswire

EDISON, NJ (MARCH 15) PR NEWSWIRE - Engelhard Corporation (NYSE: EC) announced today that it has signed a letter of intent for the sale of its worldwide gold and silver businesses to Degussa AG, a West German manufacturer of precious metal, chemical and pharmaceutical specialties, for an undisclosed amount of cash. The proposed transaction is subject to various conditions, including the negotiation, by April 15, 1990, of a definitive agreement to be approved by the board of directors of each company.

It is anticipated that the sale will include the assets associated with certain Engelhard gold and silver product fabrication and refining and metal joining operations. Not included are Engelhard's silver nitrate business in the United States, certain gold and silver businesses in the United Kingdom, joint venture operations in Korea and Japan and the company's precious metals management business and associated offices.

In February, Engelhard announced that it intended to sell most of its gold and silver businesses as part of an overall reorganization plan. At that time, Orin R. Smith, president and chief executive officer, stated, "In total, these businesses are profitable and potentially very good

businesses to be in. We are selling them because we have made a strategic decision to focus on further strengthening our leadership positions in catalysts, pigments and additives, platinum group metal products and precious metal management services."

He further explained that Engelhard would seek buyers who, based on their own strategic directions, would be able to provide the focus and resources needed to ensure the long-term success of these businesses.

Degussa was founded in 1843 in Germany as a refiner of gold and silver. It has since grown into an international leader in the development and manufacture of precious metal, chemical and pharmaceutical specialties with worldwide sales approximating $8 billion. The company's worldwide metal group is engaged in the manufacturing of a broad range of technical and chemical products based on precious metals. Degussa also participates in the mining, refining and trading of precious metals. The company's U.S. operations are headquartered in Ridgefield Park, N.J.

Engelhard Corporation is a world-leading provider of specialty chemical products, engineered materials and precious metal management services.

#90074p0168 03/15/1990 ~PR Newswire

TULSA, OK (MARCH 15) PR NEWSWIRE - ZG Energy Corp. (NASDAQ: ZGEN) announced today that the stockholders' meeting to consider approval of the proposed acquisition of substantially all of the domestic U.S. oil and gas assets of Sceptre Resources Ltd. (AMEX: SRL) will be rescheduled for the latter half of April or early May. The meeting, originally set for late January, has been delayed primarily because of the need to include audited year-end financial statements in the proxy materials to be sent to stockholders.

S. Lee Crawley, president and CEO of ZG Energy, noted that the terms of the original transaction have been modified somewhat. The total consideration to be paid has been reduced from $12 million to $11.5 million, including $6.9 million of stock (valued for these purposes at $.35 per share, or $5.25 per share after a proposed one for 15 reverse stock split), and a cash payment of $4.6 million. The original agreement included stock valued at $9.0 million, $1.5 million in subordinated notes and $1.5 million in cash. No subordinated notes will be issued under the revised terms. Crawley stated, "While the revised terms will require a greater amount of bank borrowings by the company to complete the transaction, we believe that the lower total consideration and the lesser dilution of the ZG stockholders' ownership position are positive changes." Crawley also noted that the company has signed a commitment for a revolving credit line from a new lender in the amount of $10 million.

ZG Energy Corp. is a financially oriented, independent oil and gas company headquartered in Tulsa. Its primary business involves the acquisition, development and production of oil and gas. The company also manages properties for other companies and institutions.

Sceptre Resources Ltd. is a Canadian oil and gas company with assets of approximately $800 million (Canadian dollars). It is headquartered in Calgary, Alberta, and its common shares are listed on the Toronto, Montreal and American Stock Exchanges.

HOUSTON (MARCH 15) PR NEWSWIRE - Baker Hughes Incorporated (NYSE: BHI)

announced today that the U.S. District Court of the District of Columbia entered an opinion denying the U.S. Department of Justice's request to enjoin the sale by Baker Hughes of its EIMCO Secoma division to Oy Tampella, a Finnish company. Baker Hughes had previously sold the other divisions of its mining equipment group to Oy Tampella in July 1989, and EIMCO Secoma, based in Lyon, France, was the remaining division to be sold.

The district judge also refused to stay entering its decision pending appeal. The Department of Justice then requested a stay of the district judge's decision from the U.S. Court of Appeals for the District of Columbia, which also refused to grant such a stay. Baker Hughes closed the sale of EIMCO SECOMA in France Tuesday, March 13, 1990.

Baker Hughes is a leading provider of products and services for the oil, gas and process industries.

TULSA, OK (MARCH 15) PR NEWSWIRE - Lowrance Electronics, Inc. (NASDAQ/NMS: LEIX) today reported record second quarter sales of $21,642,000 for the three months ended Jan. 31, 1990, an increase over last year's sales for the same quarter of $14,780,000. Net income for the quarter was $1,321,000, or $.39 a share, compared to net income of $440,000, or $.13 a share during the same period last year.

Sales for the six months ended Jan. 31, 1990 were $29,330,000, up from $21,783,000 in sales during the same period last year. Net income for the six months was $329,000, or $.10 a share, compared to a net loss of $803,000, or minus $.23 a share last year.

Commenting on the record quarter, company President Darrell Lowrance said, "The single biggest factor in our success thus far in fiscal 1990 has been excellent market response to our new 1990 Eagle ULTRA models and the continuing demand for our Eagle FISH I.D. models. Our backlog of orders at the end of the second quarter exceeds $17 million, compared to a backlog of $11 million at the same time last year."

However, Lowrance cautioned that "the second quarter sales and profits were significantly in excess of budget because new products scheduled for shipment in the first quarter were delayed until the second quarter, which caused the second quarter to have disproportionately higher sales and earnings. Additionally, we anticipate more level sales in the company's third and fourth quarters this year over last year's second half when in fiscal 1989 the company's higher priced models were not available for shipment and the company was unable to catch up with demand for its lower

priced models until the second half of fiscal 1989."

In concluding his comments, Lowrance said, "Based on our company's exceptional marketplace momentum, our significant backlog of orders and our record sales through the second quarter, we remain optimistic that our company's results for fiscal 1990 will reflect significantly improved sales and profits."

Lowrance Electronics, Inc. manufactures sonar and navigational instruments and accessories for sportfishing and recreational boating markets under the brand names "Lowrance" and "Eagle."

CINCINNATI (MARCH 15) PR NEWSWIRE - Eagle-Picher Industries (NYSE: EPI) today announced sales for the first quarter ended Feb. 28, 1990 were $167.0 million compared with $192.2 million in the first quarter of 1989. Operating income was $9.4 million compared with $12.6 million. Net income was $5.6 million or 52 cents per share compared with $27.6 million or $2.58 per share the previous year. The combined sales for the first quarter of 1989 for three divisions sold during the fiscal year 1989 were $18.8 million with a very modest contribution to operating income. The level of net income and net income per share in 1989 included a gain of $17.9 million from the sale of two of these divisions in the first quarter the Chi-Vit Division and the Bearings Division.

During the first quarter of 1990, approximately 5,100 new asbestos claims were received compared with 7,000 and 4,500 in the first quarters of 1989 and 1988 respectively. During the quarter, approximately 4,200 were disposed of compared with 3,700 and 1,900 in the first quarters of 1989 and 1988 respectively, at an average cost, excluding legal expense, of $5,700 compared with $6,200 and $7,000. Total settlement, legal and adminstrative costs for the quarter were $31 million. As of Feb. 28, 1990, there were outstanding agreements to settle approximately 9,500 claims for approximately $58 million with scheduled payments in 1990 and beyond.

DALLAS (MARCH 15) PR NEWSWIRE - BeautiControl Cosmetics, Inc. (NASDAQ-NMS: BUTI), a Dallas-based direct sales marketer and manufacturer of cosmetics and related products, reported a 25 percent increase in profits and a 15 percent increase in sales for the first fiscal quarter ended Feb. 28, 1990. Sales were $9,884,132 and earnings were $991,279 compared to sales of $8,569,450 and earnings of $795,818 for the same period in the prior year. Earnings per share increased from $.16 per share to $.19 per share.

Richard W. Heath, president and chief executive officer, stated, "Our introduction of two new lines of products -- Nailogics, a calcium-enriched nail care system, and Sunlogics, a sun care system -- in January was very successful especially when compared to the tremendous success of 22 skin care products launched in January of 1989. The consultant career plan enhancements, also introduced this January and detailed in our 1989 annual report, have received enthusiastic response from our entire field sales organization. We intend to maximize the effects of the momentum generated by these enhancements with a special recruiting promotion in our second quarter. We believe the results of this promotion will exceed the recruiting levels attained by similar promotions in the last two years and will support the achievement of the 20 percent annual growth that we have targeted for 1990."

Historically, the company's sales and profits have been lower in the first fiscal quarter, which includes the December holiday season, than during other quarters of the fiscal year. The company expects this seasonal fluctuation to continue.

The board of directors approved a $.05 per share quarterly cash dividend for the first fiscal quarter ended Feb. 28, 1990. The cash dividend is

payable to shareholders of record as of March 26, 1990, and the distribution date for the dividend is April 9, 1990.

DALLAS (MARCH 15) PR NEWSWIRE - Super Club Retail Entertainment (SCRE), a subsidiary of Super Club North America Corporation (SCNA), has signed a definitive agreement to acquire approximately 40 of Vestron's video retail outlets which operate under the name "The Video Store," in Ohio and Indiana. With this acquisition, the number of Super Club retail outlets will reach nearly 400.

Darrell Baldwin, president and CEO of SCNA, commented that, "Since Super Club's inception, it has been our goal to become strong regional players in carefully selected areas of North America. The Video Store acquisition will provide solid expansion in cities such as Akron, Dayton, Cincinnati, Cleveland, and Indianapolis -- where they have successfully established a presence in the marketplace. These stores will operate as part of our Video Towne Entertainment group, which is headquartered in Dayton, Ohio."

Super Club Retail Entertainment also owns Alfalfa/Movietime, Best Video, Record Bar/Tracks, Turtle's, Video Towne Entertainment, Rhythm and Views, and Automated Video, Inc., which operate in 25 southeastern and mid-Atlantic states.

NEW YORK (MARCH 15) PR NEWSWIRE - Amoco Oil Company and more than 200 of its service station dealers today announced plans to award at least 50 $1,000 scholarships to college-bound minority high school students from metropolitan New York and Connecticut.

Applications for the scholarships are being distributed to 53 high schools in metro New York, including Suffolk, Nassau, and Westchester counties, and to nine high schools in the Bridgeport and New Haven areas in Connecticut. The applications are available from each school's college guidance department and from ASPIRA of New York, Inc. (212-292-2690), a local community group that is administering the program. The completed applications must be submitted to ASPIRA by April 16.

The scholarships will be awarded from the Amoco dealers minority scholarship fund, which has been created to encourage black, Hispanic, and

Asian youth to continue their education. Amoco Oil and its participating dealers will support this effort by donating a share of their profit from a special sunglass sales promotion that will start June 24 in cooperation with the New York Mets baseball club. In addition, The Amoco Foundation will contribute $25,000 for the scholarships.

The selection of the scholarship winners will be based on grades, financial need, extracurricular activities, and career goals. Also, the student applicants will answer several essay questions such as "Why should you receive this award and how will it help you achieve your educational goals?" and "How do you believe your community can best encourage/motivate students to pursue higher education?"

The answers to these questions will be reviewed and the final selection of scholarship recipients will be made by a committee of Amoco dealers and representatives of Amoco Oil and ASPIRA of New York.

CHICAGO (MARCH 15) PR NEWSWIRE - Amoco Corporation (NYSE: AN) enters the 1990s with "considerable confidence" in its ability to increase earnings and continue to add to shareholder value, the company said in its 1989 annual report issued today.

In a letter to shareholders co-signed by Chairman Richard M. Morrow and President H. Laurance Fuller, the company said that Amoco's worldwide oil and natural gas production continued to increase last year while the company remained the largest private holder of natural gas reserves in North America.

Amoco reported on progress in its exploration and production operations to reduce costs, improve profitability, and focus resources on those assets with greatest potential by divesting under-performing and high-cost producing properties. The company divested more than $500 million in

non-strategic oil properties in the U.S. and Canada last year.

In addition to expanding its exploration efforts internationally, Amoco also is focusing on adding value to its sizable natural gas resources with new marketing efforts.

"We anticipate that natural gas will be the fuel of the 1990s, as the marketplace recognizes its availability and clean-burning characteristics, and prices it accordingly," the executives said.

Amoco's net worldwide oil and gas reserves, although down slightly from 1988 on an oil-equivalent basis, "were still higher than in any other year since 1977," the report said.

Amoco's refining, marketing, and transportation earnings were the second-best on record for the company. According to the annual report, Amoco's refining system improved efficiency and maintained high product yields.

Amoco increased its U.S. sales of refined products last year by 5 percent and continued to be a leading gasoline marketer in the 30-state area where its branded products are sold.

Amoco Chemical Company also had its second-best earnings year in 1989. The company established a record-high sales year in purified terephthalic acid, the premier raw material for manufacturing polyester, at 3.6 billion pounds. Amoco also maintained strong sales volume in industrial intermediates, styrene, olefins, polymers, fabrics and fibers, and foam products.

Sales of carbon fibers and advanced composites continued their strong growth, with volume increasing 9 percent to record levels last year.

VIENNA, VA (MARCH 15) PR NEWSWIRE - LEGENT Corp. (NASDAQ: LGNT) today announced that Glen F. Chatfield has resigned from the company.

Chatfield, who informed the company he would remain a member of LEGENT's board of directors, had resigned as chief executive office in November 1989.

Chairman and Chief Executive Joe M. Henson said, "The board and employees of LEGENT are grateful to Glen for the contributions he has made to this

new company's development, and we wish him every success in the future."

The chairman pointed out that Mario M. Morino, who with Chatfield co-founded LEGENT by merging Morino Inc., Vienna, Va., with Pittsburgh's Duquesne Systems Inc. in March 1989, continues to remain active with the company, as does Neal M. Pollon, Duquesne's former president who is now vice chairman of LEGENT.

LEGENT Corp. is one of the largest independent developers and marketers of system software, with more than 40 products in the important operational areas of information systems (I/S) management, performance, networking, optimization and management support. With principle offices in Pittsburgh and Vienna, Va., LEGENT services its customers from 12 locations throughout the United States and Canada and in some 30 countries.

HARRISBURG, PA. (MARCH 15) PR NEWSWIRE - In a presentation today at the Prudential Bache Technology Conference in New York, AMP Inc. (NYSE: AMP) President and Chief Operating Officer James E. Marley, commented on the first quarter and full year 1990 outlook.

First quarter sales are expected to be in the $750-$770 million range, compared to $680 million in the fourth quarter of 1989 and $713 million in the first quarter of 1989. The fourth quarter 1989 sales of $680 million as reported were after exclusion of $40 million for a change from December 31 to November 30 of the fiscal year of several Asia/Pacific subsidiaries. First quarter orders are expected to be in a $770-$780 million range. The increase in sales and orders over the fourth quarter is in both U.S. and international operations. Only a mild seasonal improvement has been seen in the U.S. In contrast, international business has been slightly stronger than expected, and has also benefitted from changes in the value of the U.S. dollar in recent months.

First quarter earnings are expected to be higher than the $.72 of the year-earlier period, and the $.65 in the fourth quarter of 1989. For the full year, the company continues to not take exception to analyst estimates of up to 10 percent sales growth and earnings in a $2.90-$3.10/share range.

Second quarter sales are expected to set a new high, given present trends and the first quarter order level. Assuming this sales growth, second quarter earnings should improve further.

Officials stated AMP is now in the strongest position in its history, and

expressed confidence that, given favorable economic conditions, AMP can return during the 1990's to its long-term performance of 14-15 percent growth in sales, earnings and dividends; profit margins of 18-20 percent pre-tax and 10-12 percent after-tax; and return on shareholders' equity of 20 percent or better.

Harrisburg-based AMP Inc. is the world's leading producer of electrical/electronic connection devices. It has 24,400 employees in nearly 160 facilities in the U.S. and 26 other countries. AMP stock is listed on the New York, Pacific and other regional stock exchanges.

PHILADELPHIA (MARCH 15) PR NEWSWIRE - Midway Airlines today began service from its Philadelphia International Airport hub to Savannah International Airport, providing the only non-stop flights between those two cities.

Midway offers three daily round-trips between the two destinations. Travelers bound from Savannah to the Northeast can conveniently connect in Philadelphia with Midway flights to several business centers.

Introductory one-way fares between Philadelphia and Savannah available through April 15 are $99 non-refundable coach, $139 unrestricted coach and $159 unrestricted first class.

"Midway has had a long-standing interest in serving the city of Savannah," said John P. Tague, vice president of marketing and planning. "Savannah is a very popular leisure and group-travel destination and the airline gateway to the prestigious Hilton Head Island resort area. Tourism is a fast-growing industry in this hospitable and historic city, and Midway Airlines is committed to enhancing tourism here by providing high-quality, personalized airline service."

Midway will increase its non-stop service to Savannah May 1 with the inauguration of two daily round-trips between the airline's Midway Airport hub in Chicago and Savannah International.

Introductory one-way fares between Chicago and Savannah, effective May 1-May 31, are $99 non-refundable coach, $149 unrestricted coach and $169 unrestricted first class.

Other cities Midway serves from Philadelphia are Albany, Boston, Buffalo, Chicago, Ft. Lauderdale, Ft. Myers, Hartford/Springfield, Jacksonville, Miami, Montreal, Orlando, Providence, Rochester, Sarasota, Tampa, Toronto and West Palm Beach.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve more than 60 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

NEWPORT, MI (MARCH 15) PR NEWSWIRE - Detroit Edison (NYSE: DTE) "made an overall improvement in the management and operation" of Fermi 2 in 1989, according to a report released today by the Nuclear Regulatory Commission (NRC).

In its annual Systematic Assessment of Licensee Performance (SALP), the NRC said Fermi 2 earned top ratings in three of seven functional areas, received good marks in three other areas and improved in one remaining area. In the latter, according to the NRC, performance was only minimally satisfactory, although safety requirements were met.

"This report confirms that we are headed in the right direction to becoming one of the top nuclear plants in the country," said B. Ralph Sylvia, Detroit Edison senior vice president, Nuclear Generation.

The NRC's SALP review evaluates performance at all U.S. nuclear power

plants and uses the results as a basis to determine whether increased attention is needed in functional areas at the plants. A Category 1 rating -- superior performance -- indicates reduced NRC attention may be appropriate. Category 2 -- good performance -- indicates NRC attention may be maintained at normal levels. Category 3 -- minimally satisfactory performance -- indicates areas where NRC attention should be increased above normal levels.

Fermi 2 received top marks for Radiological Controls, Emergency Preparedness (RERP) and Security. Security and RERP have consistently been top performers, but this is the first year Radiological Controls received a Category 1 rating.

"This recognizes the excellent job we have done in minimizing radiation exposure to our workers," said Sylvia.

The NRC report also noted significant improvement in Engineering/Technical Support, which improved to a Category 2 rating to join Plant Operations and Safety Assessment/Quality Verification. The NRC cited several improvements in the Engineering/Technical Support area including the appointment of individuals to key engineering positions and the doubling of the system engineering staff.

Although the Maintenance/Surveillance area received a Category 3 rating, the NRC noted an improving trend. NRC Regional Administrator A. Bert Davis said the NRC's in-depth assessment found several strengths including improved maintenance procedures and increased management involvement. Weaknesses were cited in planning for the refueling outage, training for system engineers and supervision of safety-related maintenance activities.

The NRC will hold a public meeting at 2 p.m. March 27 at the plant's Nuclear Operations Center cafeteria to discuss the SALP report.

#90074p0212 03/15/1990 ~PR Newswire

RIDGEFIELD, CT (MARCH 15) PR NEWSWIRE - Duty Free International, Inc. (NASDAQ-NMS: DFII) today reported record fourth quarter and fiscal year 1990 sales and earnings.

Net sales for the quarter ended Jan. 31, 1990 were $18,876,000, up 58 percent from $11,983,000 for the quarter a year ago. Net earnings for the quarter were $2,002,000, or $.20 per share, a 242 percent increase from $586,000, or $.08 per share, in the year earlier period. Per share amounts give effect to the two-for-one split of the company's common stock which

was distributed on Oct. 20, 1989.

For the fiscal year ended Jan. 31, 1990, net sales totaled $85,655,000, up 55 percent from $55,204,000 for the fiscal year ended Jan. 31, 1989. Net earnings for the fiscal year ended Jan. 31, 1989. Net earnings for the fiscal year ended Jan. 31, 1990 were $10,020,000, or $1.11 per share, up 108 percent from $4,816,000, or $.68 per share, for the prior year on a post-split basis.

John A. Couri, president and chief executive officer of Duty Free International, Inc., attributed the record sales and earnings to high performance levels in all three of the company's divisions.

Sales of the Border Division in the quarter were $7,461,000, and for the fiscal year were $42,499,000, up 41 percent and 34 percent, respectively, from the year earlier periods.

Airport Division sales for the quarter and fiscal year were $4,957,000 and $22,990,000, showing increases of 198 percent and 248 percent, respectively. Of these increases, $3,315,000 and $16,671,000 for the quarter and fiscal year ended Jan. 31, 1990, respectively, came from the airport operations at John F. Kennedy International Airport in New York, which were acquired Feb. 1, 1989. After giving effect in net sales of the Airport Division was 5 percent and 12 percent for the quarter and fiscal year ended Jan. 31, 1990, respectively.

Duty Free International is the leading operator of duty free stores along the United States/Canadian border, one of the leading operators of duty free and retail stores in U.S. international airports, the largest supplier of duty free merchandise to foreign diplomats in the United States, and the largest supplier of duty free merchandise to ships engaged in international travel and trade in the northeast United States.

The company sells quality brand-name merchandise such as liquor, tobacco products, perfume and luxury items at savings of 20 to 60 percent off retail prices in the countries of its customers' destinations, and to foreign diplomats serving in the United States.

#90074p0217 03/15/1990 ~PR Newswire

NEW YORK (MARCH 15) PR NEWSWIRE - Unity Healthcare Holding Company, Inc. (NASDAQ: UNTY) released today the following statement of recent

developments on the company:

Last year was a most aggressive and successful year in the emergence of Unity Healthcare Holding Company, Inc. as a significant force in the health care services marketplace.

Several events of major importance have occurred since announcing in November 1989 the company's intent to raise capital through a private placement of convertible redeemable preferred stock.

These are Unity's accomplishments in recent months as well as some imminent developments:

-- The company has completed the first closing on the private placement offering of preferred stock for aggregate proceeds of $5,050,000. The net proceeds of the first closing will be used for the further expansion of the company which the company expects to accomplish through the opening of additional offices, expansion of current offices and acquisitions, and to fund specialty treatment programs for AIDS and lymphedema.

-- The company is currently making available, through arrangements with private practitioners at a state-of-the-art office in New York City, treatment of patients suffering from AIDS and various AIDS-related conditions. Unity is proceeding with plans to file an application with the FDA to obtain approval to conduct trials for the use of the patented immune stimulation treatment method using typhoid vaccine which has been licensed to the company.

-- Unity's lymphedema program, under the direction of Robert Lerner, M.D., is ready to start operations in the next quarter. In April, Unity will sponsor a two-week course of study for certified physiotherapists, utilizing specialized techniques of physiotherapy, to be taught by eminent professionals from Europe and the U.S. The graduates will begin working at the company's first lymphedema center which Unity anticipates will open in New York in May.

-- In February, the company closed on the purchase of American Health Care of Florida, a Medicare-certified home health agency. American's annual sales for the period ended Dec. 31, 1988 were approximately $3.5 million. This acquisition allows Unity to enter the Medicare home health market in south Florida, one of the fastest growing areas of the country.

-- Unity has closed on the purchase of the Hope Nursing Agency in London, a supplemental staffing agency, which will become the hub of Unity's international operations for European expansion. Hope's sales through Nov. 30, 1989 were approximately US$2 million.

The acquisitions already completed as of March 14, 1990 should result in

over a 60 percent increase in Unity's 1990 revenues from 1989. These developments, together with the additional programs Unity is currently undertaking afford an exceedingly bright outlook for Unity in the '90s.

Unity primarily engages in providing temporary and permanent healthcare personnel to health care institutions in the United States and the U.K. through its offices in New York, New Jersey, Florida, California and London. Unity also provides home care patients with temporary healthcare personnel and medical supplies and equipment.

DALLAS (MARCH 15) PR NEWSWIRE - Dresser Industries, Inc. (NYSE: DI) today announced that prior to its annual meeting of shareholders the board of directors approved a 10 percent quarterly dividend increase on common stock to $0.275 per share, payable June 20, 1990 to shareholders of record June 1, 1990. The new dividend rate amounts to $1.10 per share on an annual basis and represents 44 percent of the previous year's earnings. Since early 1988, the Dresser dividend rate has been increased six times, reflecting the company's improved operating results and financial strength as well as favorable market trends.

At the annual meeting, the shareholders elected a 10-member board of directors and the defeated two proposals related to South African operations.

Elected to the board of directors were:

Samuel B. Casey, Jr., chairman of the board, Dixon Ticonderoga Company, Vero Beach, Fla.;

Lillian Edwards, retired vice president-corporate counsel, Dresser Industries, Inc., Dallas;

Rawles Fulgham, senior advisor, Merrill Lynch Capital/Consumer Markets, Dallas;

The Honorable John Gavin, president Univisa Satellite Communications, Los Angeles, and former U.S. Ambassador to Mexico;

Ray L. Hunt, chairman of the board, chief executive officer, and president Hunt Consolidated, Inc., Dallas;

John J. Murphy, chairman of the board, president, and chief executive officer, Dresser Industries, Inc., Dallas;

W. George Nancarrow, retired chairman of the board and chief executive officer, D&M Holding Inc., Dallas;

Lionel H. Olmer, partner, Paul, Weiss, Rifkind, Wharton & Garrison, Washington, D.C.;

Bill D. St. John, executive vice president-administration, Dresser Industries, Inc., Dallas;

Richard W. Vieser, retired chairman of the board, chief executive officer, and president, FL Industries, Inc., Livingston, N.J.

John J. Murphy, chairman and president, told shareholders at the annual meeting that global energy demand "is approaching the limits of current producibility. This new reality will require a significant step-up in energy spending to satisfy the oil, gas, and coal needs of the future."

Headquartered in Dallas, Dresser in a major supplier of highly engineered products and services primarily utilized in energy-related activities throughout the world.

MEMPHIS, TN (MARCH 15) PR NEWSWIRE - The Promus Companies Incorporated today announced Frederick W. Burford has been elected vice president and controller and Charles A. Ledsinger, Jr. has been elected vice president and treasurer.

In his new position, Burford will be responsible for internal and external financial reporting, long-range planning and financial analysis. Ledsinger will oversee all financing and treasury functions and continue to guide asset disposition.

Burford joined the company in 1977 as a financial analyst for the Holiday Inn Hotel Division. In his 13-year tenure, he has held several management positions at the division and corporate level, including most recently, vice president and treasurer.

Burford was honored as a 1989 Promus Corporate Excellence Award winner for his key role in securing the financing for a number of large transactions.

He holds a bachelor's degree from the University of Mississippi and is a

certified public accountant.

Ledsinger has held various management positions in finance since he joined the company in 1978, both at corporate and the Embassy Suites Hotel Division. In his former position of vice president, project finance, he was responsible for asset dispositions and real estate finance, financing both debt and equity of some $1.1 billion. He also led the effort in opening a new market in hotel sales to Japanese investors.

Ledsinger earned a bachelor's degree in English from the University of Virginia and a master of business administration from Memphis State University. Promus is the public parent company of these leading hospitality brands: Harrah's casino/hotels, and Embassy Suites, Hampton Inn and Homewood Suites hotels.

PHILADELPHIA (MARCH 15) PR NEWSWIRE - In the settlement between Philadelphia Electric Co. (NYSE: PE) and the staff of the Pennsylvania Public Utility Commission (PUC) announced today, PE has agreed to complete a number of improvements in its purchasing practices, to credit its customers' bills by $13 million over a period of 24 months, and to make a total payment of $2 million to the low-income energy funds in the six Pennsylvania counties served by PE.

The agreement was reached after a comprehensive, two-year review by PE and PUC auditors of PE's purchasing practices prior to 1989, and is subject to final approval by the PUC.

The agreement concludes that the settlement is "in the public interest," since the results of litigation would be uncertain, time consuming and prohibitively expensive, and it "will avoid further expensive administrative proceedings and the need for formal investigation. It will enable PECO's new management team to focus its energies on continuing the improvement of its operations instead of a defense of past practices."

PE said the settlement, if approved by the Commission, will result in credits of about 13 cents per month for 24 months for a typical residential electric customer using 500 kilowatt-hours a month and an average of 14 cents per month for 24 months for a typical residential gas customer using 117 thousand cubic feet a year.

The events leading up to the agreement began in late 1987 when PE independently initiated an internal audit of some of its purchasing practices.

In early 1988, the PUC received an anonymous letter alleging improprieties in prior years' bidding of annual service contracts by a PE buyer. The PUC's Bureau of Audits informed PE of the contents of the letter.

Immediately following notification by the PUC, the new PE management aggressively intensified its review, retained an outside firm to conduct an independent investigation, and pledged complete cooperation with the PUC.

PE completed its purchasing investigation in late 1988 and the results were given to the PUC Bureau of Audits. In early 1989, PE turned over its information to federal authorities for their review.

Additionally, PE indicated to the PUC that the company was in the process of making substantive changes in its purchasing practices involving the bidding and approval of sole source contracts and contracts for professional services.

PE also pledged at that time to accelerate the rebidding of annual service contracts, to increase top management involvement in the awarding of contracts, and to rotate buyers more frequently.

HOUSTON (MARCH 15) PR NEWSWIRE - Continental Airlines today announced a major expansion of its schedule to begin on May 1, which will increase its activity by some 100 daily flights.

Among the changes is the inauguration of service to four domestic and three international cities, and the addition of a series of late-night departures from the Houston hub.

"We are very pleased that our improved traffic results allow us to expand our service to meet the increased demand in these important communities," said Continental Chairman Frank Lorenzo. "Travelers who choose Continental will enjoy the benefits of our dramatic improvements in service and operational performance."

-- Newark Hub On May 1, Continental's Newark hub will expand with the inauguration of service to Columbia, S.C., Greensboro, N.C., Norfolk, Va., and Antigua, West Indies. Selected flights from Newark to Manchester, N.H., and Worcester, Mass., will convert to jet service on May 1, and selected flights from Newark to Bangor, Maine, will convert to jet service on June 15.

Continental will add capacity on 14 other routes from Newark, including widebody A-300 service and a second daily flight to Bermuda, a doubling of flights to Jamaica and the Dominican Republic, and reinstating daily nonstop service to Mexico City.

On April 1, Continental Express inaugurates nonstop service from Newark to Washington/Dulles.

These changes raise Continental's total activity at Newark from 281 to 291 daily departures, including 103 Continental Express flights.

-- Cleveland hub Continental's newest and fastest growing hub, Cleveland, will inaugurate three daily nonstop flights to Louisville, Ky., Norfolk, Va., and Providence, R.I., on May 1. Other new nonstop service from Cleveland includes two daily flights to Dallas/Fort Worth and one daily flight to Seattle/Tacoma, which provides convenient on-line service to Tokyo.

Continental will add jet service on selected flights from Cleveland to Buffalo, Columbus and Rochester. Additional capacity will be added on six other routes from Cleveland, including an increase to 16 daily nonstops to

the New York area.

Following this expansion, Continental will offer 152 daily departures from Cleveland, including 80 Continental Express flights, a 46 percent increase from the same time last year.

-- Houston hub Continental's gateway to Central America, the Houston hub, continues to build by inaugurating service to Panama City, Panama, and San Jose, Costa Rica, on May 15. With this increase, Continental serves more Central American destinations than any other U.S. airline.

Continental will also begin two daily nonstops to Ontario, Calif., and single daily nonstops to Pittsburgh and Hartford/Springfield on May 1. Selected flights to Mobile, Ala., will be converted to jet service on May 1.

Ten new flights will depart late at night for destinations west of Houston giving travelers from the East more transcontinental travel options. And Continental's new 6:30 a.m. departure to Newark allows Houstonians to have a business lunch in the New York area.

A nonstop flight from Houston to Seattle/Tacoma will be upgraded to Airbus widebody service.

Houston jet departures will rise to 220. Continental Express on March 1 inaugurated service to San Angelo, and with other summer schedule adjustments, it will offer a total 73 daily departures from Houston.

#90074p0240 03/15/1990 ~PR Newswire

MONTREAL (MARCH 15) PR NEWSWIRE - The Seagram Company Ltd. (NYSE: VO) today reported record net income, sales and operating income for the twelve months and the fourth quarter ended Jan. 31, 1990.

Net income for the twelve months advanced 20.5 percent to $710,578,000 from $589,460,000. Earnings per share were $7.37, an improvement of 20.4 percent over the $6.12 for last year.

Revenues from beverage operations for the twelve months rose to $5,581,779,000 from $5,055,671,000 last year, a gain of 10.4 percent. Operating income for the twelve months grew 34.8 percent to $573,541,000 from $425,370,000 in the 1989 fiscal year.

Edgar Bronfman, Jr., president and chief operating officer, said, "Three factors are primarily responsible for these outstanding results. All

beverage operations reported marked increases, with total sales of spirits and wine improving 5.8 percent to $4.5 billion, and sales from fruit juices and soft drinks advancing 35.8 percent to $1.1 billion. Second, the results of Martell and Tropicana, both acquired in April 1988, were included for the full twelve-month reporting period." Bronfman said, "Finally, Du Pont's strong profits contributed significantly to our performance."

For the twelve months, dividend income from Du Pont was $238,122,000, an increase of 17.6 percent from $202,541,000 the year before. Equity in unremitted Du Pont earnings rose to $329,536,000 from $284,416,000, a gain of 15.9 percent. At Jan. 31, 1990, Seagram owned a 24 percent interest in Du Pont.

For the fourth quarter ended Jan. 31, net income grew 22.9 percent to $146,237,000 from $119,009,000 in the comparable period last year. Earnings per share advanced to $1.53, an improvement of 26.4 percent from $1.21. Total fourth quarter revenues rose 7.8 percent to $1,688,953,000 from $1,566,111,000 last year. Operating income for the three months was $143,622,000, a rise of 28.9 percent from last year's $111,392,000.

The Seagram Company Ltd. is a leading worldwide producer and marketer of distilled spirits, wines, coolers, fruit juices and soft drinks, and sells its brands in more than 150 countries. Operating through subsidiaries and affiliates in 28 countries, Seagram has the largest distribution system in the spirits and wine industry. Major Seagram brands include Chivas Regal and The Glenlivet Scotch Whiskies, Crown Royal and Seagram's V.O. Canadian Whiskies, Seagram's 7 Crown Blended Whiskey, Seagram's Extra Dry Gin, Martell Cognac, Mumm and Perrier-Jouet Champagnes, Sandeman Ports and Sherries, Sterling Vineyards Wines, Seagram's Coolers, Tropicana Pure Premium Orange Juice, Tropicana Twisters and Soho Natural Sodas.

MEMPHIS, TN (MARCH 15) PR NEWSWIRE - The Promus Companies Incorporated today announced Frederick W. Burford has been elected vice president and controller and Charles A. Ledsinger, Jr. has been elected vice president and treasurer.

In his new position, Burford will be responsible for internal and external financial reporting, long-range planning and financial analysis. Ledsinger will oversee all financing and treasury functions and continue to guide asset disposition.

Burford joined the company in 1977 as a financial analyst for the Holiday Inn Hotel Division. In his 13-year tenure, he has held several management positions at the division and corporate level, including most recently, vice president and treasurer. Burford was honored as a 1989 Promus Corporate Excellence Award winner for his key role in securing the financing for a number of large transactions.

Ledsinger has held various management positions in finance since he joined the company in 1978, both at corporate and the Embassy Suites Hotel Division. In his former position of vice president, project finance, he was responsible for asset dispositions and real estate finance, financing both debt and equity of some $1.1 billion. He also led the effort in opening a new market in hotel sales to Japanese investors.

Promus is the public parent company of these leading hospitality brands: Harrah's casino/hotels, and Embassy Suites, Hampton Inn, and Homewood Suites hotels.

RESTON, VA (MARCH 15) PR NEWSWIRE - Lucas Aerospace has been awarded a $1.1 million follow-on contract by Learjet Corp., Wichita, Kan., to supply 400 ampere starter-generator electrical systems for the company's Models 31, 35 and 55C business jets.

Deliveries begin mid-1990. The starter-generator systems are designed and manufactured by Lucas Aerospace power Equipment Corp., Maple Heights, Ohio.

Lucas Aerospace Power Equipment Corp. designs and manufactures AC electrical power systems, DC generator and starter-generator systems, and electromechanical servo and actuation systems. Lucas Avitron, Stamford, Conn., is the international sales and marketing representative for Lucas Aerospace Power Equipment Corp.

The DC starter-generator systems selected by Learjet are used to start the engines and provide continuous power to the aircraft.

With annual sales of $400 million, Lucas Aerospace's North American presence now involves more than 4,300 employees based in 15 operating locations in the United States and Canada. Lucas Aerospace Ltd., with 12,000 employees and sales of $1 billion, has operations in North America, the United Kingdom and France, and marketing facilities in many other countries. Parent company Lucas Industries plc, with more than 56,000 employees and revenues of more than $3.5 billion, has international interests in aerospace, automotive and industrial markets throughout the world.

#90074p0255 03/15/1990 ~PR Newswire

GREENWICH, CT (MARCH 15) PR NEWSWIRE - Rolls-Royce plc, now enlarged by the merger with NEI, reported today an increase in pre-tax profits of 39 percent to 233 million pounds sterling (1988: 168 million pounds). This includes a 37 million pounds profit contribution from NEI for the seven and a half months following the merger.

Turnover for the group grew to 2,962 million pounds (1988: 1,973 million pounds) of which NEI contributed 602 million pounds. Civil engine group sales grew by 33 percent while military engine group sales declined slightly. Turnover was held back by the strike at Hillington, near Glasgow, which reduced profit by an estimated 20 million pounds and adversely affected cash flow by about 40 million pounds.

Operating profit increased to 383 million pounds (1988: 333 million pounds) in spite of a deterioration in the exchange rate compared with 1988 (which cost about 33 million pounds), the continuing competitive nature of the civil engine market and relatively lower margins on NEI business.

In addition, the higher margin spares business currently represents a smaller proportion of aero gas turbine turnover than previously because of the high rate at which new engines are being supplied.

Net R&D expenditure increased to 161 million pounds (1988: 149 million pounds). Net interest income increased slightly to 15 million pounds (1988: 13 million pounds) after netting off interest payable on NEI net borrowings of 66 million pounds. Net cash balances at the year end were 203 million pounds (1988: 180 million pounds), a good performance considering the adverse effects of the NEI borrowings absorbed and the strike.

The aero engine operations had a very successful year. The new Trent engine, which will operate up to the highest thrust levels, won its first orders to power the new Airbus A330 and the McDonnell Douglas MD-11. The Trent program is on schedule for certification in 1992.

The group has now developed a range of engines for almost every sector of the civil engine market.

The EJ200 engine program for the new European Fighter Aircraft ran well ahead of schedule in 1989.

The NEI merger was completed in May 1989 and Terry Harrison and Dr. Robert Hawley joined the Rolls-Royce board. The NEI acquisition represents the first major diversification for Rolls-Royce and in a full-year approximately 35 percent of turnover is now expected to get in non-aero products.

NEI is already beginning to benefit from Rolls-Royce's unrivalled experience in high-technology manufacturing and extensive research investment. In addition, the strong balance sheet, financing expertise and wide range of international connections are becoming increasingly valuable.

In accordance with acquisition accounting practices, a stringent review of NEI asset values, contract costs, accounting conventions and rationalization opportunities has been carried out. This has resulted in fair value provisions of 64 million pounds being set up.

Commenting on future prospects, the chairman of Rolls-Royce, Lord Tombs, said: "The prospects for our enlarged group are encouraging. Rolls-Royce has a strong order book in aero gas turbines and the prospect of future large orders in a buoyant aircraft market. NEI plans to be a major beneficiary of the changes in the structure of the U.K. power industry and its need for further capacity."

The order book stood at 4.5 billion pounds for the existing Rolls- Royce business at the end of 1989, and NEI orders outstanding approached 900 million pounds, an overall total of approximately 5.4 billions pounds.

Dividend The directors recommend a final dividend of 4.7p per share (1988

4.2p per share) making a total dividend for 1989 of 7.0p per share. The dividend is covered 2.9 times.

NEWTON, IA (MARCH 15) PR NEWSWIRE - Leonard A. Hadley, executive vice president of Maytag Corporation (NYSE: MYG) and president of its appliance group, has been named to the newly-created position of executive vice president and chief operating officer, according to an announcement today by Daniel J. Krumm, Maytag's chairman and chief executive officer.

"By creating this position, we are strengthening our management structure for the future," Krumm said. "Len's appointment to his new post is a reflection of not only his considerable achievements, but of the confidence we have in him as Maytag moves into the decade of the '90s."

Hadley oversaw the development of the new Maytag brand refrigerator, which was introduced last year, and he has played a key role in helping the corporation realize synergies created by the acquisitions of Hardwick, Jenn-Air, Magic Chef and Hoover.

In his new position, Hadley will continue to oversee the corporation's North American major appliance operations and he will assume responsibilities for Maytag's Dixie-Narco group.

Dixie-Narco specializes in soft drink vending equipment and is a leading supplier to major syrup companies in the United States, Europe and other parts of the world. The Dixie-Narco group is headquartered in Williston, S.C. and is developing production facilities there in addition to its existing plants in Ranson, W. Va. and Eastlake, Ohio.

Maytag Corporation's major appliance brands include Maytag, Magic Chef, Jenn-Air, Admiral, Hardwick and Norge. Maycor, the firm's appliance parts and service company, also reports to Hadley. Maytag Corporation's Hoover group continues to be headed by Frank E. Vaughn, an executive vice president who reports to Krumm.

Hadley, 55, joined Maytag Company as a cost accountant in 1959 and held a number of financial positions before becoming assistant controller in 1975. He was named vice president of corporate planning in 1979 and became president of Maytag Company in 1986. He has been a member of Maytag's board of directors since 1985 and was promoted to executive vice president of the corporation in February, 1989. In June, 1989, he was named head of the appliance group.

RICHMOND, VA. (MARCH 15) PR NEWSWIRE - Crestar Financial Corporation (NASDAQ: CRFC) and Perpetual Savings Bank, F.S.B. today announced an agreement for Crestar to purchase Perpetual's retail banking office located at 750 Independence Boulevard in Virginia Beach, Va. The purchase is subject to approval by federal and state regulatory authorities.

The Perpetual office has total deposits of approximately $11 million. The office's four employees will be offered positions with Crestar.

Last November, Crestar and Perpetual announced Crestar's purchase of two Perpetual offices: the Coliseum Crossing office at 2155 Coliseum Crossing in Hampton, Va., and the Shore Drive office at 2260 Sunstates Court in Virginia Beach. Pending regulatory approval, Crestar expects to finalize conversion of the three Perpetual offices on June 30, 1990.

"The addition of the Perpetual offices and their resources and staff will enhance Crestar's presence in the important Hampton Roads market," Samuel P. Cardwell, vice chairman of Crestar.

In mid-1989, Perpetual, the largest thrift in Virginia, Maryland and Washington, announced its intention to concentrate its resources in the Washington area market and sell its Hampton Roads branches. "We are pleased that Crestar and Perpetual are again working together. This transaction supports Perpetual's strategic plan to focus on the market we know best and to operate most efficiently," said Joseph W. Barr, executive vice president for community banking at Perpetual. Crestar is an $11 billion bank with $8.4 billion in deposits, serving Virginia, Washington and suburban Maryland. Crestar has 254 retail banking offices and 167 ATMs, and of these totals, 57 offices and 32 ATMs are located in the Hampton Roads area.

Perpetual, which has assets totaling $6 billion, has 75 retail branches and 171 ATMs.

ROY, UTAH (MARCH 15) PR NEWSWIRE - Iomega Corp. (NASDAQ: IOMG) announced

today that it will offer to purchase all of the outstanding shares of its Series A Convertible Preferred Stock at a price of $2 per share in cash.

Iomega is making this offer in order to eliminate or reduce the administrative costs and dividend requirements associated with the outstanding shares. Iomega believes that no established trading market for stock exists and this offer will provide stockholders an opportunity to sell their shares of Series A Convertible Preferred Stock. This offer will expire on April 27, 1990, unless extended by the company.

Stockholders of record as of March 12, 1990 will receive a dividend of 25 cents per share of Series A Convertible Preferred Stock regardless of acceptance of this offer. Checks will be mailed on or prior to March 31, 1990.

Iomega, develops, manufactures and sells high-performance removable mass storage products for desktop computers. Iomega's patented Bernoulli Technology provides unlimited data storage capability by combining the removability of floppy drives with the high capacity and performance of rigid drives. Iomega's stock is listed on the NASDAQ National Market System under the symbol IOMG.

ARLINGTON HEIGHTS, IL (MARCH 15) PR NEWSWIRE - Motorola, Inc.'s radio-telephone systems group announced today that it has been selected by Comvik AB as the supplier of the GSM digital cellular system for Sweden.

Comvik, a private common carrier company fully owned by the Kinnevik Group was granted in 1988 the license to operate a GSM, or pan-European digital cellular network, in Sweden. Today it operates a nationwide analog cellular system in Sweden, covering 90 percent of the population, and several international cellular systems. Motorola has supplied Comvik with cellular system equipment for the Philippines and Sri Lanka.

"Motorola has been selected after a thorough evaluation of several leading cellular suppliers' proposals. We are happy to announce this decision and feel that Motorola's cellular experience and capabilities will allow us to implement competitively the GSM digital cellular network in Sweden during 1991," said Peter Kuhne, president of Comvik.

Motorola has already supplied GSM validation systems to the four Scandinavian countries, Spain, the United Kingdom and West Germany; has been awarded pre-operational systems for Spain and the United Kingdom, and has been selected to provide the first phase operational system in the

United Kingdom.

"We are very pleased with this further vote of confidence from Comvik. It confirms Motorola's commitment to make GSM a reality in Europe, particularly in Sweden, which employs the highest density of cellular subscribers in the world," stated Bernard R. Smedley, senior vice president of Motorola, Inc. (NYSE: MOT) and general manager of the radio-telephone systems group.

Motorola is the world's leading designer, manufacturer and supplier of cellular systems, infrastructure equipment and subscriber products.

STAMFORD, CT (MARCH 15) PR NEWSWIRE - Lone Star Industries, Inc. (NYSE: LCE), today reported that, as expected, fourth quarter and year-end results were sharply lower than in 1988 primarily because of restructuring charges announced Nov. 27, 1989.

The charges, totaling $257.6 million, or $15.58 per share, provide for the effect of adjusting discontinued assets to an estimated realizable value, anticipated losses through their expected date of sale, and other costs related to the restructuring program. The charge also includes a provision for taxes relating to the repatriation of earnings and capital from South America.

Sales in the quarter were $82.0 million vs. $92.1 million in the same quarter a year earlier. The net loss in the fourth quarter of 1989 was $262.8 million, or $15.95 per share, compared to earnings of $41.6 million or $2.44 per share, the previous year.

For the year ended Dec. 31, 1989, sales were $337.5 million and the net loss was $270.7 million, or $16.68 per share. Sales in the year earlier were $371.3 million and earnings were $36.7 million, or $1.91 per share.

Lone Star Industries and its affiliates are leading producers of cement and a major source of ready-mixed concrete, sand and gravel, crushed stone and other construction materials.

MELVILLE, NY (MARCH 15) PR NEWSWIRE - Greenstone Rabasca Roberts, Inc. (NASDAQ: GRRI) today reported revenues from commissions and fees for the first quarter ended Jan. 31, 1990, of $1,644,973. The company had a net loss of $63,698 for the three months. Loss per share was $.01 based on a weighted average number of common shares outstanding and common equivalent shares of 10,645,572.

Comparative figures are not provided because the company became a corporate tax-paying entity as a result of going public on Feb. 10, 1989, whereby its "S Corporation" status was terminated.

"Several of the company's clients were slow to begin planned advertising and promotional programs during our first quarter. However, we have begun to experience acceleration in client spending and we hope to return to our profitable levels during the second and subsequent quarters," said company President Ronald Greenstone.

Greenstone Rabasca Roberts, Inc., a full-service advertising agency headquartered in Melville, is the parent company to GRR/Weston Ganoff Marini, Coconut Creek, Fla.; Greenstone Rabasca Roberts South, Melbourne, Fla.; and GRR/Sommer, Englewood, N.J. Additionally, the company has public relations and recruitment advertising divisions.

MIAMI, FL (MARCH 15) PR NEWSWIRE - Columbia Laboratories, Inc. (AMEX: COB) today reported that revenues more than tripled to $6,131,752 in the year ended Dec. 31, 1989, compared with revenues in fiscal 1988 of $1,903,436. The net loss for the year was $5,100,852, or 56 cents per share, compared with a net loss of $1,405,091, or 18 cents per share, the prior year.

"We're extremely pleased by both our strong financial performance during the year, as well as major advances in the growth of the company," said Norman M. Meier, Colombia president and chief executive officer. "First, we maintained the marketing momentum of our line of traditional OTC products, including Legatrin(R) for night leg cramps and Diasorb(R), a pediatric anti-diarrheal.

"Second we launched our first patented bioadhesive technology product, Replens(tm), a vaginal moisturizer. Initial reception to Replens from pharmacists and gynecologists in the fourth quarter was very encouraging. Third, we invested in the furture of the company by spending according to plan on national promotion of Replens, the ongoing marketing support of

our OTC line, and continued research and development of the company's portfolio of bioadhesive products," Meier stated.

For the fourth quarter 1989, Columbia Laboratories, Inc. reported revenues of $2,279,100, compared with $560,548 in the comparable 1988 period. The net loss for the quarter was $2,895,934, or 32 cents per share, compared with $616,540, or 6 cents per share, in the fourth quarter 1988.

Columbia Laboratories, Inc. is a pharmaceutical company established in 1987 to develop and commercialize proprietary products based on patented drug delivery technology. The company's first technology- based product, Replens(tm), was formally introduced to consumers on March 6, 1990, following professional and trade promotion in 1989.

#90074p0301 03/15/1990 ~PR Newswire

ATLANTA (MARCH 15) PR NEWSWIRE - Graphic Industries Inc. (NASDAQ: GRPH), a leading full-service printing and graphic communications company, today reported record sales and improved earnings for the fourth quarter.

The quarterly year-to-year growth in earnings of 3.0 percent reversed the trend of the first three quarters, which suffered from the effects of the sluggish national economy.

Record sales for the year increased 15 percent, exceeding the $300 million mark for the first time in the company's history.

"Despite the continued adverse market conditions, in the fourth quarter our efforts resulted in an improved earnings comparison over a year ago, and we are optimistic that this trend will continue this year," said Mark C. Pope III, chairman and chief executive officer.

For the three months ended Jan. 31, sales reached a record $81,912,000 with net income of $1,635,000 or $.17 per share of common stock, fully diluted, compared with sales of $71,670,000 and net income of $1,588,000 or $.16 per share, fully diluted, for the fourth quarter last year.

For the 12 months, sales advanced to a record $310,330,000 with net income of $4,916,000 or $.51 per share of common stock, fully diluted, compared with sales of $270,212,000 and net income of $9,004,000 or $.90 per share fully diluted, last year.

Graphic now ranks among the top 25 commercial printing companies nationally, based on sales volume.

The Graphic operating companies include IPD Printing & Distributing, Inc., Williams Printing Co., Stein Printing Co., Atlanta Blue Print Co., Ryco Inc., General Color Inc. and Finish-It Inc., all based in Atlanta; Edwards and Broughton Co., Raleigh, N.C., Craftsman Printing Co. and Carolina Mailing Service, Charlotte, N.C., and A&E Reprographics, Jacksonville, Fla.; W.E. SEATTLE, (MARCH 15) PR NEWSWIRE - The Boeing Co. (NYSE: BA) has completed a review of relocation assistance for recently hired employees facing layoff.

Assistance will be considered on a case-by-case basis depending on the relocation provisions each employee received for the move to Boeing. Essentially, Boeing will provide eligible employees with the same relocation assistance they received to make their move here. In order to address the many variations on individual circumstances, Boeing personnel representatives will be contacting employees directly to discuss the assistance.

Employees who are laid off and have been on the payroll six months or less already receive the same relocation benefits they received when they hired with Boeing. The same assistance is now being offered to employees who are laid off within 14 months of their most recent date of hire. Intially this will affect employees hired since Jan. 1, 1989.

Boeing estimates that approximately 200-300 employees could receive the additional assistance, but the exact number cannot be determined at present because of continuing employee placement activity.

NEW YORK (MARCH 15) PR NEWSWIRE - Handy & Harman (NYSE: HNH) today reported results for both the full year and fourth quarter ended Dec. 31, 1989.

For the year, Handy & Harman reported earnings of $7,766,000, or 56 cents per share, compared with $9,699,000, or 70 cents per share, in the prior year. Sales in 1989 were $645,586,000 vs. $658,138,000 during 1988.

In the last quarter of 1989, Handy & Harman had net income of $120,000, or 1 cent per share, compared to $2,207,000, or 16 cents per share, in the comparable quarter of 1988. Fourth-quarter 1989 sales were $145.7 million, compared to $166,474,000 in the same quarter of 1988.

Included in the results for the fourth quarter and for the full year ended Dec. 31, 1989, were profits from the reduction of LIFO inventories amounting to $2,536,000, or 18 cents per share. In 1988, there were similar profits amounting to $3,180,000, or 23 cents per share, for the

fourth quarter, and $3,877,000, or 28 cents per share, for the full year 1988.

In 1989, the effective income tax rate was 38 percent as compared to 28 percent in the prior year. The increased rate was primarily due to foreign tax credits and state income taxes.

Reflecting on fourth-quarter results, Richard N. Daniel, chairman and chief executive officer, commented, "While we were disappointed by our consolidated earnings, it should be noted that results were negatively affected by significant cutbacks in the automotive (OEM) segment and start-up difficulties at the company's new platinum group metals (PGM) refinery, which was brought on stream last March."

Daniel added, "Throughout our various business segments, our achievements in 1989 were significant, our strategies remain intact, and we continue to work on meaningful opportunities for earnings improvement."

Handy & Harman, a leading fabricator, processor and refiner of precious metals, also produces a variety of specialty metal products for industrial uses through more than 30 subsidiaries here and abroad. Founded in 1867, Handy & Harman is headquartered in New York.

NEW YORK, (MARCH 15) PR NEWSWIRE - Jack Clark, chairman of the board of Stage II Apparel Corp., announced that the corporation's board of directors had voted yesterday to declare a dividend of 3 cents per share, payable on April 16, 1990, to all stockholders of record as of March 30, 1990.

Clark also announced that the board had agreed to buy up to 100,000 shares of its common stock, or about 2 percent of its total outstanding shares in the open market from time to time.

The new authorization to repurchase 100,000 shares is in addition to a previous 50,000 share repurchase authorization, which has been completed.

The company has 4,253,825 of its shares outstanding as of today.

"We believe that our future prospects are favorable and that the purchase of Stage II shares will enhance their value to our shareholders," said Clark.

#90074p0322 03/15/1990 ~PR Newswire
SAN DIEGO (MARCH 15) PR NEWSWIRE - NeoRx Corporation (NASDAQ: NERX) presented today results of three phase I safety studies with its novel anti-cancer drugs consisting of antibodies tagged with the radioisotope, rhenium-186. The antibodies are designed to attach themselves specifically to cancer cells, thereby delivering the tissue-destroying radioisotope directly to the tumor. The results of the studies show that very high dose levels can be safely administered to patients and that tumor regressions are achievable.

"Several important advantages of the rhenium-labeled antibodies have now been demonstrated," according to Dr. Paul Abrams, NeoRx's medical director. "First, we have shown that the rhenium is bound very stably to the antibody; this has not yet been demonstrated with iodine or yttrium labeled antibodies, and thus represents a unique achievement. If radioisotopes come off of antibodies, they can damage other organs and result in decreased dose to the tumor".

"Secondly, although this is only a phase I, single dose study to determine toxicity, and thus not designed to achieve therapeutic efficacy, anti-tumor responses lasting up to six months have been seen in several patients with ovarian and colon cancer who have failed standard treatment. Not all patients have yet been assessed for anti- tumor response," said Abrams.

None of the usual side effects associated with chemotherapy (nausea, vomiting, hair loss, appetite loss) or with biologicals (fever, chills, loss of energy) have been observed. The second organ expected to show

toxicity - either bowel or kidney - appears to be able to tolerate substantially higher doses than bone marrow, suggesting that considerably higher levels of antibody-targeted radiation may be administered.

The company is now in a position, unique in the industry, to proceed with trials designed to assess the therapeutic efficacy of these products. Future plans involve the administration of several doses per patient and even higher doses in conjunction with bone marrow support.

NeoRx Corporation, Seattle, Wash., incorporated in May 1984, is developing monoclonal antibody-based pharmaceutical products for in vivo detection and treatment of certain types of cancer. The company has five cancer clinical trials in progress and has filed for marketing approval with the FDA for two OncoTrac(R) imaging products to detect metastatic melanoma and small cell lung cancer.

DENVER (MARCH 15) PR NEWSWIRE - Western Capital Investment Corp. (WCIC) (NASDAQ: WECA) and its principal subsidiary, Bank Western, have named Robert J. Malone chief executive officer of both organizations.

Malone, 45, was made president of WCIC and vice chairman of Bank Western pending his election, at the next board meeting, as director and chairman of the boards of these two Colorado-based financial institutions.

Malone has served as president and chief executive officer of First Interstate Bank of Denver since 1984. He succeeds J. F. Baxter, 66, who retires this month from the chairmanship and CEO posts at WCIC and Bank Western after 40 years.

"Our search committee spent a number of months interviewing potential candiates and Mr. Malone was without question the best qualified individual," said Baxter. "I am personally pleased to have him join the company and I have every confidence in his ability to lead this organization into the next century," he added.

Malone assumes the top management responsibilities of Bank Western as the organization begins its 100th year of operation in Colorado. The bank, with assets of $3.3 billion, operates 37 branch offices throughout the state.

Prior to heading First Interstate Bank of Denver, Malone was chairman,

president and CEO of First Interstate Bank of Idaho from 1981 to 1984. Before joining First Interstate, he was with the Bank of America in California for 12 years, becoming the bank's youngest senior vice president at age 34.

During the past six years in Denver, Malone has involved himself in many civic activities, including directorships in Metro Denver Boys Club, the Denver Art Museum, the National Jewish Center of Immunology and Respiratory Medicine, The Denver Club, the Colorado Alliance of Business and the Colorado Business Committee for the Arts. He presently serves as Trustee for Regis College, the Denver Area Boy Scout Council and The Denver Foundation.

WCIC, Bank Western's parent holding company, also owns Teton National Insurance Co. of Wyoming, Western Insurance Service, a general insurance agency in Colorado, Field Real Estate Co. and Institutional Investors Corp.

#90074p0326 03/15/1990 ~PR Newswire

WASHINGTON (MARCH 15) PR NEWSWIRE - Edward L. Hennessy Jr., chairman and CEO of Allied-Signal Inc. (NYSE: ALD), warned today that frustrated corporate executives and government policy makers must not yield to calls for national health insurance, or to demands that the private sector shoulder the entire cost of health care for the uninsured.

"Faced with such a complex and intractable problem, some people simply want to hand the 'hot potato' to somebody else," Hennessy said. "But we can bring health care costs under control if business, government and the medical profession work together to implement creative and long-term solutions."

Speaking at a conference sponsored by the National Association of Manufacturers here, Hennessy said that a successful national health policy must address simultaneously the three issues of access, cost and quality. "With health care costs rising at three times the rate of inflation, the pressure is on to do something," he said. "We need a balanced approach, one that is not totally public and not totally private, but some combination of the two."

Hennessy praised the bipartisan Pepper Commission's recent report on national health care for its diligence and urgency, but noted that the failure to address funding makes its recommendations incomplete. "Critics say the report was dead on arrival," he said. "The phrase may be harsh, but I'm afraid the diagnosis is accurate."

Allied-Signal's nationwide managed health care plan, the first of its kind in the United States, reduced costs by $750 per employee in its first 18 months, 23 percent below what costs would have been under a traditional indemnity program.

Allied-Signal's plan uses a health care network established by CIGNA, which for a three-year period has guaranteed to the company a single-digit fixed rate of increase. The plan is similar to a Health Maintenance Organization but also offers employees the option of using an out-of-network doctor at any time.

Allied-Signal Inc. is an advanced technology company with businesses in aerospace, automotive products and engineered materials.

WHITE PLAINS, NY (MARCH 15) PR NEWSWIRE - The board of directors of NYNEX Corporation (NYSE: NYN) today approved an increase in the quarterly dividend to $1.14 per share from $1.09 per share, payable on May 1 to holders of record at the close of business on March 30.

"This dividend increase is somewhat below our previous increases," said William C. Ferguson, NYNEX chairman. "Softness in the Northeast economy, capital required to continue modernization of our network, and the need to reprice our telephone services in New York are impacting cash flow. We view these as short-term circumstances. We are confident that the aggressive actions we are taking are putting in place all the elements necessary to return to our historical earnings growth path."

The increase marks the sixth consecutive year that the company's cash dividend has been raised.

The number of NYNEX common shares outstanding is approximately 197 million.

LANGHORNE, PA (MARCH 15) PR NEWSWIRE - Ecogen Inc. (NASDAQ: EECN) today announced that David Blech, a New York City investor, has invested $1.5 million in Ecogen through a private purchase of the company's common stock. As part of the agreement, Blech will be offered a seat on Ecogen's board of directors.

Under the agreement, Blech purchased from Ecogen $1.5 million of unregistered common stock at $2.25 per share -- the closing market price on the date an agreement in principle was reached. In addition, Blech received a warrant to purchase 500,000 additional shares at $4.50 per share. At Ecogen's option, an identical transaction may be completed on or before July 21, 1990.

The warrant is exercisable for three years beginning one year after the signing of this agreement. Hence, if Ecogen is acquired within one year the warrant is not exercisable.

Blech said, "This investment reflects my opinion that Ecogen is a premier agricultural biotechnology company. I have great confidence in their technological strength, as evidenced by their plans to commercialize three new biopesticides this year."

Commenting on the investment by Blech, Ecogen Chairman and Chief Executive Officer John E. Davies said, "We are very pleased to have David Blech as an investor in Ecogen. The investment provides additional capital to continue current operations and offers the company flexibility regarding future strategic business options."

In February, Ecogen announced it had retained Piper, Jaffray & Hopwood Incorporated, Minneapolis, to advise management on strategic business options. Davies said the Piper Jaffray engagement is proceeding on schedule.

Ecogen Inc. is an agricultural biotechnology company, specializing in biological pest control. Ecogen's products include Cutlass(A) vegetable bioinsecticide, Condor(A) forestry bioinsecticide, Dagger(A) G cotton biofungicide and Collego(A) rice bioherbicide. The company is also developing biopesticides for cotton, corn, potatoes and other vegetables, and home and garden use.

#90074p0335 03/15/1990 ~PR Newswire

NORCROSS, GA (MARCH 15) PR NEWSWIRE - CytRx(R) Corporation (NASDAQ: CYTR) announced today that the Office of Orphan Development of the United States Food and Drug Administration has designated RheothRx(R) copolymer as an orphan drug for the treatment of severe burns.

Following a severe burn, tissue loss occurs through two mechanisms. First,

tissue is destroyed directly by heat. Secondly, there is damage resulting from the lack of blood flow in injured, but still viable areas surrounding the tissue destroyed directly by heat. In this tissue, blockage of blood vessels by blood clots and inflammation causes further tissue damage. Experimental studies suggest that treatment with RheothRx will limit the effects of vascular blockage inflammation, thus limiting the extension of tissue damage after a severe burn.

Jack J. Luchese, president and chief executive officer of CytRx said, "We are very pleased our application has been granted. Orphan status offers seven years of market exclusivity to the company, in addition to our patent protection during that time. It means if the drug is approved for use in burns, the FDA will not approve another company's application for the same drug for the same use for seven years." Special tax credits are available for the research and development expense of the drug, and the FDA offers certain grant monies for additional clinical trials for orphan products. Also, the FDA has said orphan products will receive "high priority review."

RheothRx copolymer has successfully completed Phase I clinical trials evaluating safety in humans, as required by the U.S. Food and Drug Administration. Clinical trials for testing the effectiveness of the compound in another vascular occlusive disorder (crisis of sickle cell disease) are expected to begin in the next two months.

CytRx Corporation is a development stage pharmaceutical company engaged in the research and development of therapeutics incorporating copolymers. The company's products are intended for use in the treatment of cardiovascular and other vascular diseases, immune system diseases and infectious diseases.

CONTACT: Fred E. Bass of CytRx Corporation, 404-368-9500; or Susan Noonan or Dr. Anthony J. Russo, both of Noonan/Russo Communications, 212-979-9180, for CytRx Corporation.

#90074p0336 03/15/1990 ~PR Newswire

WASHINGTON (MARCH 15) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) today announced that company health care costs for employees enrolled in its new employee managed health care program were lowered by 23 percent during the first 18 months of operation.

Called the Health Care Connection, the program has reduced the cost for each participant by about $750. Per capita health care costs for these employees was $2,450, compared with $3,200 per year if they had remained in a fee-for-service plan.

Nationally, health care costs in company-funded programs have been increasing at a rate of 29 percent per year, according to a survey by the National Association of Manufacturers.

Allied-Signal introduced the Health Care Connection in March 1988 in an effort to control rising health care costs. The first nationwide program of its kind, it covers nearly 43,000 Allied-Signal employees in the U.S. and 70,000 of their dependents. The program combines features similar to Health Maintenance Organizations (HMOs) and those of traditional indemnity plans.

In 1987, rapidly escalating company health care costs prompted Allied-Signal Chairman and CEO Edward L. Hennessy, Jr. to challenge the company to come up with an innovative new program.

"The time had come for a totally new approach to employee health care costs," Hennessy said. "We didn't expect to reverse the trend of rising costs, we just wanted to slow the rate of increase. The results of our program show that it's possible for companies to do just that and to continue to participate in this country's health care program at a cost they can live with."

The Health Care Connection uses CIGNA's nationwide network of medical and dental providers, who have contracted with CIGNA to deliver cost effective quality care. As medical care is needed, employees may choose between CIGNA's network of providers or providers outside the network. Employees are given financial incentives to use the network providers.

If they choose the CIGNA network, employees pay virtually no deductibles or out-of-pocket expenses for either individual or family coverage. The cost of most medical services is paid in full with a low co-payment. When choosing health care providers outside the network, employees receive reimbursement under the non-network indemnity plan, which includes co-payment and significant deductibles.

In addition, CIGNA guaranteed Allied-Signal a single-digit fixed rate of increase for the three-year term of the program, allowing the company to accurately predict and plan for its health care costs.

Allied-Signal is an advanced technology company with businesses in aerospace, automotive products and engineered materials.

CIGNA Employee Benefits Companies are subsidiary companies of CIGNA Corporation (NYSE: CI), a leading provider of insurance and related financial services around the world with assets of $58 billion.

SAN JOSE, CA (MARCH 15) PR NEWSWIRE - Solectron Corp. (NASDAQ: SLTN), one of that nation's three largest independent providers of advanced manufacturing services to electronic original equipment manufacturers (OEMs), announced record sales and earnings for the three- and six-month periods ended Feb. 28, 1990.

Solectron Corp. reported net sales of $44.4 million for the second quarter of fiscal year 1990 ended Feb. 28, 1990. This represented an increase of 43 percent when compared with net sales of $31 million for the comparable quarter of fiscal 1989. On a year-to-date basis, net sales of $86.7 million represented a 45 percent increase when compared with $59.9 million of net sales for the comparable period a year ago.

Income before income taxes for the three-month period ended Feb. 28, 1990, also increased 104 percent to $2.9 million from $1.4 million for the comparable quarter of fiscal 1989. To date, income before income taxes of $5.5 million increased 72 percent from the comparable period a year ago.

Net income for the second quarter was $1.6 million, an increase of 102 percent from last year's second quarter net income of $0.8 million. Net income for the six-month period was $3.1 million, an increase of 70 percent when compared with $1.8 million of net income for fiscal year 1989's first half.

Earnings per share for the second quarter ended Feb. 28, 1990, were $0.26, an increase of 53 percent from $0.17 for the comparable quarter one year

ago. The fully weighted impact of Solectron's initial public offering which occurred on Nov. 14, 1989, was reflected for the first time in the second quarter. On a year-to-date-basis, earnings per share of $0.57 increased 50 percent when compared with $0.38 for last year's comparable period.

The company's year-to-date operating margin is 6.6 percent and its return on equity stands at 23 percent, consistently outperforming industry averages.

Dr. Winston H. Chen, president and chief executive officer, pleased with the company's results, commented that "Solectron's commitment to continuous improvement goes beyond world-class manufacturing. The evidence can be readily seen in its financial results. Asset management and profitability are the key financial objectives of the company."

CHICAGO (MARCH 15) PR NEWSWIRE - United Airlines announced today that it has asked the U.S. Department of Transportation (DOT) for authority to begin daily nonstop flights between Chicago's O'Hare International Airport and Milan with service continuing to Rome.

United also requested authorization to operate daily nonstop flights between Washington's Dulles International Airport and Milan/Rome.

United simultaneously petitioned the DOT to revoke American's exemption in the Chicago Milan/Rome markets.

"United is seeking to add routes to Italy from its hubs in Chicago and Washington Dulles as part of its major international expansion plan linking Europe to United's already extensive U.S. and Asian route system," said Stephen M. Wolf, chairman and president.

United will launch European service this spring with nonstop flights to Frankfurt from Chicago and Washington (Dulles) beginning May 15, and to Paris from Chicago beginning Aug. 1, 1990.

United said that it would operate the proposed flights with Boeing 767-300 aircraft reconfigured for three-class service and equipped for overwater international operation.

In a separate filing, United petitioned the DOT to reconsider its award to American Airlines. The DOT had granted a temporary exemption to American to operate this service prior to the February 1990 Air Transport Agreement

between the United States and Italy.

In its petition to the DOT, United maintained that American's authority to Italy should be withdrawn because it is inconsistent with the Department's general policy of awarding international route rights to U.S. carriers only after the rights are obtained from the foreign government.

HOUSTON (MARCH 15) PR NEWSWIRE - Mobil Natural Gas Inc., an affiliate of Mobil Corporation (NYSE: MOB), and Transco Energy Company (NYSE: E) today announced that Mobil plans to acquire an interest in Transco's Mobile Bay pipeline facilities.

Mobil and Transcontinental Gas Pipe Line Corporation (TGPL), a Transco subsidiary, have agreed to form a partnership to purchase the pipeline facilities. Mobil and TGPL will each have a 50 percent interest in the partnership and TGPL will be the operator of the line.

The 123-mile pipeline extends from Mobil's natural gas treatment facility near Coden, Ala., to an interconnection with Transco's mainline near Butler, Ala. Mobil received an option to participate in the pipeline under a 1986 agreement between Mobil and TGPL.

TGPL has filed an application with the Federal Energy Regulatory Commission (FERC) requesting authority to operate the pipeline facilities pursuant to Section 7(c) of the Natural Gas Act. The partnership plans to file an amendment to this application within 60 days, requesting authorization of the acquisition and operation of the pipeline under a blanket certificate for open access transportation.

Mobil Natural Gas Inc. General Manager W. L. Luthy noted that the Mobile Bay area is expected to become one of the leading natural gas producing regions in the country within the next few years. He stated, "Mobil has invested or committed about $850 million in the exploration and development of its Mobile Bay area natural gas reserves, and numerous other producers have also made significant investments in the region. Mobil and other producers will be bringing on new production in this area which will help offset continuing domestic gas production declines in older fields. Timely installation and further regulatory authorization of transportation facilities are important to deliver gas to Alabama customers and interstate markets."

Transco Energy Company President and Chief Executive Officer George S.

Slocum said, "The Mobile Bay pipeline provides a cost-effective means for transporting the natural gas from the Mobile Bay region to both intrastate and interstate markets. The 30-inch line, which is currently transporting 40 million cubic feet per day, can be economically expanded by adding compression facilities. The line crosses several other major pipelines and terminates at an interconnection with Transco's mainline, which provides shippers with direct access to markets along the Eastern Seaboard and the Northeast, and to most other natural gas markets in the United States by way of backhaul and exchange through other pipeline systems."

NEW YORK (MARCH 15) PR NEWSWIRE - The board of directors of AmBase Corporation (NYSE: ABC) today elected Geo. T. Scharffenberger as president and chief executive officer. He will retain his title as chairman of the board.

The board also elected James J. Meenaghan as chairman of The Home Insurance Company. Meenaghan continues to serve as president and chief executive officer of The Home.

The board also announced that Marshall Manley had relinquished his positions as president and chief executive officer of AmBase, and as chairman of The Home Insurance Company. He will remain a director of AmBase.

Scharffenberger noted that the board expressed its regret and cited Manley for his role in improving the performance of AmBase and its subsidiaries. "I have known Mr. Manley since 1967 and have nothing but the highest regard for him. I speak for every member of the board in expressing appreciation and admiration for the job he has done," said Scharffenberger.

In announcing the management changes, which are effective immediately, the board also reaffirmed its decision to offer for sale the company's three insurance subsidiaries, The Home Insurance Company, US International Re, and Commonwealth Insurance Company. On Feb. 20, 1990, AmBase announced its intention to sell its insurance operations to repay the company's outstanding debt and to pay a special dividend to its stockholders.

AmBase Corporation is an insurance, banking and investment services organization. Its principal subsidiaries include The Home Insurance Company, US International Re, Carteret Bancorp, Gruntal Financial Corp., Home Capital Services and Sterling Forest Corporation.

BOSTON (MARCH 15) PR NEWSWIRE - Eaton Vance Corp. (NASDAQ: EAVN), a Boston-based investment management firm, reports unaudited earnings of $4,371,000, or $1.16 per share, for the three months ended Jan. 31, 1990. This compares with earnings of $2,546,000, or 69 cents per share, for the same three-month period in 1989.

In the most recent quarter, the $1.16 per share includes 35 cents of realized and unrealized gains from investments held in two precious metal mining limited partnerships. The 69 cents per share in 1989 included 8 cents of similar gains.

Eaton Vance's profit from investment management operations rose primarily

because of higher advisory and administrative fees received from higher assets under management. The increase in assets from $4.9 billion to $7.0 billion included $1.7 billion of Eaton Vance Prime Rate Reserves fund sold in the last half of the 1989 calendar year.

Three months ended January 31:	1990	1989
Net income	$4,371,000	$2,546,000
Average shares outstanding	3,770,000	3,706,000
Net income per share	$1.16	69 cents

#90074p0351 03/15/1990 ~PR Newswire

CHICAGO (MARCH 15) PR NEWSWIRE - Virginia Gov. L. Douglas Wilder and the commonwealth of Virginia's entire congressional delegation have announced their support of United Airlines' efforts to begin service between Washington Dulles, Chicago O'Hare and Tokyo's Narita airport.

The delegation's letter to Transportation Secretary Samuel Skinner is signed by Virginia's two U.S. senators, Charles S. Robb and John Warner, and U.S. Reps. Herbert H. Bateman, Thomas J. Bliley Jr., Rick Boucher, Jim Olin, Stan Parris, Lewis F. Payne Jr., Owen B. Pickett, D. French Slaughter Jr., Norman Sisisky and Frank R. Wolf.

"The support of Gov. Wilder and the entire Virginia congressional delegation is a vote of confidence in United and the proposal we have made to the Department of Transportation," said Stephen M. Wolf, chairman and president of United Airlines. "The more than 70,000 employees of United, including the nearly 4,500 employees based in Virginia, greatly appreciate these leaders' support and confidence in us and what we are trying to achieve."

Wolf emphasized that because of its hub operations at Washington Dulles, Chicago O'Hare and Tokyo, United is in a unique position to offer travelers and cargo shippers in the eastern half of the United States direct service to Japan and on to other points in Asia through a non-stop Chicago-Tokyo route.

"United has made a significant investment to develop a hub at Dulles and has also developed a significant route structure beyond Japan to points throughout Asia," Gov. Wilder pointed out in his letter to Department of Transportation (DOT) Administrative Law Judge Daniel M. Head.

Three Virginia parties are participating in the DOT's 1990 U.S. Japan Gateways Proceeding and supporting United -- the commonwealth of Virginia's department of aviation, Metropolitan Washington Airports

Authority, and Washington Airports Task Force. Their consolidated direct exhibits to the proceeding state that, "The Washington Parties support United's application because of the substantial public benefits that its hub-to-hub service will provide."

In its letter to Secretary Skinner, members of the Virginia delegation stated, "We endorse the selection of the United Airlines service proposal between Washington Dulles International Airport and Tokyo via their Chicago gateway .... The addition of United's proposed Tokyo service would be of substantial value to this region and its tourism industry."

The delegation also noted that the only direct, single-plane service now provided between Washington Dulles and Tokyo is operated by a foreign airline. "Certainly, there should be competitive U.S. carrier service available between these major world capitals," the delegation wrote. "The direct, through-plane service proposed will increase competition and cargo capability on the route and provide the mid- Atlantic region with the choice of a fast and efficient method to reach Japan on a U.S. carrier for the first time."

The endorsement of United from Virginia's governor and congressional delegation follows similar bipartisan support for United's Tokyo bid from Illinois Gov. James R. Thompson, Chicago Mayor Richard M. Daley, and the entire Illinois congressional delegation.

ANCHORAGE, AK (MARCH 15) PR NEWSWIRE - Exxon Corporation (NYSE: XON) President Lee R. Raymond today announced a 1990 General Plan for continuing cleanup of the Exxon Valdez oil spill. The March planning document, when approved by the Federal On Scene Coordinator, will serve, along with a joint shoreline survey scheduled for later this month, as the basis for a final plan for 1990 cleanup.

He said, "Our objective for 1990 is to complete the appropriate cleanup work in a way that provides a further net benefit to the environment, minimizes negative impacts on the wildlife, doesn't interfere with fishing and enhances the natural recovery that has already begun."

Raymond, who was here and visited Prince William Sound shorelines a week and a half ago, said, "I saw many places that are showing dramatic improvement. But I also saw some that are not as clean as we would like and will require additional work. We're here to do it. We're here to get on with the task of finishing the job."

Raymond observed that "the improved shoreline conditions resulting from last summer's cleaning have allowed natural forces to effectively continue the cleaning process over the winter. We have spent more than $2 billion on the cleanup to date."

Otto Harrison, Alaska operations manager, reviewed the planning document, which is the result of this winter's shoreline observations, scientific studies and planning conducted by his staff of more than 700 Exxon and contract people, and input from government agencies.

In a letter to Coast Guard Admiral David E. Ciancaglini transmitting the planning document, Harrison said, "A generalized organization/ operations plan which includes those treatment techniques which are likely to be effective and result in a net environmental gain is described. The primary focus is on small, highly mobile work units and techniques which will allow the widely spread work to be performed in the least intrusive manner possible while recognizing all resource sensitivities and constraints."

While the document doesn't specify numbers of shoreline segments to be cleaned or how many people and boats will be needed, Harrison indicated the levels would be "substantially below 1989 levels since the shoreline conditions, while not yet entirely satisfactory, are vastly improved."

Harrison said Exxon will begin cleanup once a final plan is approved and the weather permits -- probably around May 1.

CLEVELAND (MARCH 15) PR NEWSWIRE - Banner Industries, Inc. (NYSE: BNR) today announced it is considering the sale of its Envirex unit and has retained the investment banking firm of Salomon Brothers Inc. to handle the solicitation of bids.

Envirex, with sales of approximately $100 million, is a leading designer, manufacturer and supplier of water and wastewater treatment equipment and services to municipalities and industrial companies. Envirex, headquartered in Waukesha, Wisconsin, is the world's leading supplier of process equipment to the municipal wastewater industry.

Banner reported that in addition to new installations, Envirex derives substantial sales from replacement parts. Envirex also includes General Filter Company of Ames, Iowa.

Jeffrey Steiner, Banner chairman and chief executive officer, said that Envirex has strong growth potential, reflecting its ranking international market position and the focus on environmental concerns. He said, however, that divestiture would enable Banner to further concentrate on its core businesses, aerospace and aviation products and communications products and services.

SAN DIEGO (MARCH 15) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced that it has discontinued its X-ray film distribution business located in Butler, N.J. In conjunction with this move, IRT has sold the inventory and miscellaneous assets to the Test Equipment Distributors division of X-Ray Industries Inc., of Troy, Mich.

"This business of distributing film and supplies has proven to be a distraction from our strategy of worldwide leadership in industrial real-time X-ray systems," said John W. Battin, IRT president and chief operating officer. "The discontinuation of this business will have no material effect on IRT's profitability."

IRT continues to aggressively operate its core business as a leading supplier of industrial real-time X-ray systems with computerized defect-recognition capability.

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect-recognition capability. The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace and defense applications. IRT also operates a commercial radiation processing facility, which provides high-energy electron-beam processing for a number of commercial applications. Company headquarters are in San Diego.

UPPER SADDLE RIVER, NJ (MARCH 15) PR NEWSWIRE - Western Union Corporation (NYSE: WU) reported today that its net loss for 1989 was $32.3 million. This compares with a net loss of $1,082 million in 1988, which resulted principally from asset write-offs and other restructuring charges.

For the fourth quarter of 1989, Western Union had a net loss of $14.1 million. This compares with a net loss of $244.2 million in the fourth quarter of 1988, when $215 million of restructuring charges were recorded.

After giving effect to undeclared dividends on preferred shares, the 1989 net loss amounted to $1.53 per common share, compared with a net loss of $28.30 per share in the year-earlier period. For the fourth quarter, the net loss per common share was 42 cents, compared with a net loss of $6.38 per share in the fourth quarter of 1988.

Total revenues were $155 million for the fourth quarter of 1989 and $629 million for the full year. This compares with 1988 revenue levels of $186 million and $876 million, respectively. However, the 1988 revenue totals included revenues associated with network services and services formerly provided or to be discontinued, which are not included in 1989 revenues. Excluding these revenues, comparable 1988 fourth- quarter and full-year revenues would have been $166 million and $705 million, respectively.

DENVER (MARCH 15) PR NEWSWIRE - James J. Curran, chairman of the board, president and chief executive officer of First Interstate Bank of Idaho, has been named chairman of the board and chief executive officer of First Interstate Bank of Denver.

Gary DeFrange, president and CEO of First Interstate Bank of Englewood, has been named president of First Interstate Bank of Denver.

Robert J. Malone, who has served as president, and CEO of First Interstate Bank of Denver since 1984, is leaving the bank and has been named president and CEO of Western Capital Investment Corp.

The changes in management were announced today by First Interstate Bank's board of directors and are effective immediately.

"First Interstate Bank of Denver is a strong bank with excellent prospects for the future. They have a good group of people and I look forward to joining them," said Curran.

Curran, 50, has served as chairman and CEO at the Idaho bank since 1984. From 1977 to 1984 he worked at First Interstate Bank of Washington as senior vice president and then executive vice president for bank administration. From 1965 to 1977 Curran held various positions leading to vice president and manager of the Seattle Branch of the Federal Reserve Bank of San Francisco.

DeFrange said his appointment to president offers "an exciting opportunity" to utilize experience gained in the positions he has held with First Interstate in the Denver metro area.

DeFrange, 42, has held his position as president and CEO of the Englewood bank since 1986. In August 1989 he assumed additional responsibilities as executive vice president of FIDN for metro Denver retail banking and marketing.

DeFrange started his banking career in 1970 as a management trainee at the First National Bank of Denver, the predecessor to First Interstate Bank of Denver. In 1981 he was named manager and vice president of bank services. In 1984 he was named senior vice president and manager of retail, where he served until his appointment at the Englewood bank in 1986.

HOUSTON (MARCH 15) PR NEWSWIRE - The Monroe Auto Equipment Co., division of Tenneco Automotive, a unit of Tenneco Inc. (NYSE: TGT), has acquired Rancho Industries Inc., a leading supplier of high performance suspension systems and components for the light truck and sports utility vehicle aftermarket. Rancho reported annual sales in excess of $20 million in 1989. Terms of the acquisition were not disclosed.

"The acquisition of Rancho supports our strategy to strengthen our core manufacturing businesses," said J.P. Reilly, Tenneco Automotive president and chief executive officer. "This is the fifth acquisition related to last year's restructuring and divestiture of the retail division, and, like the previous acquisitions, will enhance our ability to compete in the marketplace."

As a leader in the high performance market, Rancho will be instrumental in providing Monroe with access to the key specialty markets that offer significant opportunities for future growth, according to Ronald G. Foster Tenneco Automotive senior vice president and Monroe general manager. "Rancho's investment in research and its reputation for high quality is an excellent fit with the standards Monroe has established for its products," Foster added. He stressed that there are no plans for immediate changes to Monroe or Rancho product lines, distribution channels or customer service procedures.

Monroe is the industry's leading producer of shock absorbers, struts and ride control components for vehicle manufacturers and for the replacement equipment market. Monroe has established an international presence with administrative, manufacturing and distribution facilities in North and South America, Europe and Australia. Headquartered in Monroe, Mich., the company employs 7,500 people worldwide.

Tenneco Automotive is a leading manufacturer and marketer of automotive parts worldwide. Its Walker Manufacturing Co. division is the world's largest producer of automotive exhaust systems. Tenneco Automotive Brake is a manufacturer of non-asbestos brake friction products, and Brake-Pro Systems offers a complete line of brake products for the replacement market.

Tenneco Inc. is a Houston-based diversified industrial corporation with major business interests in natural gas pipelines, agriculture and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

NEW YORK (MARCH 15) PR NEWSWIRE - Negotiations between Davidoff International, the premier international tobacconist, and Cubatabaco (the Cuban government agency for the tobacco industry) which had been started again on Oct. 19, 1989, has been terminated by Davidoff.

On March 7, 1990, Davidoff confirmed this decision in a telex to Cubatabaco which prohibits Cubatabaco from continuing to manufacture and distribute cigars under the Davidoff name.

Davidoff had to make this decision in the interest of its customers, as it appeared that Cubatabaco was not capable or not willing to meet Davidoff's requirements.

The general manager of the Cuban monopoly (Cubatabaco) commented on Davidoff's major requirement, absolute top quality, as follows:

"Capitalistic marketing is not our forte. In addition, such a policy would make us suspect with the governments of the buying countries. Cuba simply remains Cuba. We can keep our partners, says customers, in line just as well by monopolizing our merchandise. Those who do not like our conditions will have to look for another supplier of Havana cigars, and I believe they will do so without success."

For whatever reason, quality problems in Cuba are getting worse. Davidoff cannot tolerate such a situation and had to react accordingly.

MENLO PARK, CA (MARCH 15) PR NEWSWIRE - MEDIAGENIC (NASDAQ: MGNC) today announced that the U.S. District Court for the Northern District of California has rendered a decision on damages in the patent infringement suit brought by The Magnavox Company against MEDIAGENIC (then Activision) in 1982. In 1986, the court issued a judgment stating that the patent in question was valid and that 11 Activision video game cartridges had infringed it. This judgment was affirmed on appeal in 1988 and a trial on the issue of damages was held in November 1989.

The court awarded damages of approximately $3.5 million to Magnavox, based on the determination that MEDIAGENIC should pay a 5 percent royalty on $70 million of infringing video cartridge sales. The court found that sales of the infringing cartridges after March 1986 constituted willful infringement of the patent and awarded additional damages of approximately $380,000 relating to such sales, and attorneys fees to be determined. Prejudgment interest was awarded, based on the 52-week U.S. Treasury Bill rates, as applied to the infringing sales, and accrued for the period from 1980 to the date of judgment. The company estimates that this interest will be in the range of $2.3 to $2.5 million.

"Although the court awarded damages far less than Magnavox had requested, we are extremely disappointed with the court's conclusion that the more than 50 standard licenses granted by Magnavox during the life of the patent at a 3 percent volume royalty, including domestic licenses, did not give rise to an established rate that should be applied in our case. The 5 percent rate is much higher than is warranted," said Bruce L. Davis, chairman and CEO of MEDIAGENIC. Davis went on to say that the company will consult with its attorneys concerning possible settlement or appeal

of the decision and continue certain actions already underway to finance the debt, in the event that neither of these alternative courses of action is successful.

As a result of the decision, MEDIAGENIC anticipates a loss for its fourth quarter and for the 1990 fiscal year, ending March 31, 1990.

MEDIAGENIC is a diversified international publisher of floppy-disk, cartridge and optical disc-based entertainment software, headquartered in Menlo Park, Calif.

ATLANTA (MARCH 15) PR NEWSWIRE - Chick-fil-A Inc. has issued a cease and desist letter accusing Wendy's International of false and misleading claims in Wendy's television advertising for its chicken sandwiches.

"The Wendy's campaign, which bills their chicken sandwiches as the 'best chicken sandwiches in the business,' misleads the public to conclude that their sandwiches are the best. That's simply not true," said Steve Robinson, vice president of marketing, Chick-fil-A Inc. "We issued the letter to Wendy's because we are concerned that this television campaign confuses consumers, while damaging the reputation of Chick-fil-A.

"Chick-fil-A pioneered the boneless breast of chicken sandwich nearly 30 years ago. In eight years of consecutive third-party market research, the Chick-fil-A(R) Chicken Sandwich has been confirmed by consumers as number one in taste and overall quality," said Robinson.

Survey results compiled by Marketing and Research Counselors Inc. (MARC) in February, 1990, again show consumers give the Chick-fil-A sandwich higher ratings (4.0) over Wendy's (3.6) and all other major fast-food chains' chicken sandwich alternatives. On a five (excellent) to one (poor) scale rating taste and overall quality, Chick-fil-A maintains an eight-year consecutive No. 1 ranking. Chick-fil-A's Chargrilled Chicken Sandwich(R), introduced in August, 1989, received a 4.1 rating in last month's MARC survey.

"Specifically refuting the Wendy's claim, the MARC semi-annual national survey asked fast-food customers who has the best chicken sandwich. The response was overwhelmingly in our favor," said Robinson.

When asked the specific question, "In your opinion, which one (list of major brands ever eaten) of these restaurants offers the best chicken sandwich?," 42.4 percent of all respondents said Chick-fil-A was the best. Wendy's received 14.4 percent, followed by the rest.

Chick-fil-A's consumer preference was recently reinforced when it was selected the top chicken chain by the American public in the 10th annual "America's Choice in Chains Consumer Satisfaction Survey" by Restaurants & Institutions magazine (Feb. 7, 1990.)

Atlanta-based Chick-fil-A is the country's fourth largest chicken chain, currently operating 413 locations in 31 states and reported 1989 sales of $263.8 million.

HOUSTON (MARCH 15) PR NEWSWIRE - Transco Energy Co. (NYSE: E) and Mobil Natural Gas Inc. (Mobil), an affiliate of Mobil Corp. (NYSE: MOB), today announced that Mobil plans to acquire an interest in Transco's Mobile Bay pipeline facilities.

Mobil and Transcontinental Gas Pipe Line Corp. (TGPL), a Transco subsidiary, have agreed to form a partnership to purchase the pipeline facilities. Mobil and TGPL will each have a 50 percent interest in the partnership and TGPL will be the operator on the line.

The 123-mile pipeline extends from Mobil's natural gas treatment facility near Coden, Ala., to an interconnection with Transco's mainline near Butler, Ala. Mobil received an option to participate in the pipeline under a 1986 agreement between Mobil and TGPL.

TGPL has filed an application with the Federal Energy Regulatory Commission (FERC) requesting authority to operate the pipeline facilities pursuant to Section 7(c) of the Natural Gas Act. The partnership plans to file an amendment to this application within 60 days requesting authorization of the acquisition and operation of the pipeline under a blanket certificate for open access transportation.

Mobil Natural Gas Inc. General Manager W.L. Luthy noted that the Mobile Bay area is expected to become one of the leading natural gas producing regions in the country within the next few years. He stated, "Mobil has invested or committed about $850 million in the exploration and development of its Mobile Bay area natural gas reserves, and numerous other producers have also made significant investments in the region. Mobil and other producers will be bringing on new production in this area

which will help offset continuing domestic gas production declines in older fields. Timely installation and further regulatory authorization of transportation facilities are important to deliver gas to Alabama customers and interstate markets."

Transco Energy Co. President and Chief Executive Officer George S. Slocum said, "The Mobile Bay pipeline provides a cost-effective means for transporting the natural gas from the Mobile Bay region to both intrastate and interstate markets.

The 30-inch line, which is currently transporting 40 million cubic feet per day, can be economically expanded by adding compression facilities. The line crosses several other major pipelines and terminates at an interconnection with Transco's mainline, which provides shippers with direct access to markets along the Eastern Seaboard and the Northeast, and to most other natural gas markets in the United States by way of backhaul and exchange through other pipeline systems."

WASHINGTON (MARCH 15) PR NEWSWIRE - James Madison Limited (AMEX: JML) (NASDAQ-NMS: JMLC), a $930 million bank holding company, announced today that the Office of the Comptroller of the Currency (OCC) is in the process of completing its examinations of the three James Madison Limited subsidiary national banks (Madison National Bank located in Washington, Madison National Bank of Virginia and United National Bank of Washington).

In connection with that process, the company has been advised that the OCC may recommend an addition to the allowance for loan and lease losses at Madison National Bank as of Dec. 31, 1989. It is James Madison Limited's understanding that the OCC will criticize portions of the bank's real estate portfolio given recent trends in the metropolitan Washington and Northeastern United States real estate markets.

The additional allocation to the reserve will reduce the profitability of the holding company in 1989 from that announced in its previous earnings release. However, James Madison Limited anticipates that it will show modest earnings on a consolidated basis for the full year in 1989.

James Madison Limited is a registered bank holding company located in Washington.

TULSA, OK (MARCH 15) PR NEWSWIRE - Samson Energy Co. Limited Partnership (AMEX: SAM) today announced its financial results for calendar year 1989 and the quarter ended Dec. 31, 1989. It also announced oil and gas reserve estimates as of Dec. 31, 1989.

1989 RESULTS Revenues for 1989 increased by 8.6 percent to $15,501,000 compared to $14,274,000 in 1988. Net cash flow from operating activities totaled $14,241,000 ($3.39 per unit), a dollar increase of 15 percent compared to $12,375,000 ($3.51 per unit) for 1988. In both years, cash flow benefitted from purchaser payments in excess of gas sales. Net income for the year ended Dec. 31, 1989 was $1,603,000 (38 cents income per unit), compared to a net loss of $388,000 (11 cents loss per unit) for 1988.

Natural gas production for 1989 totaled 6.1 billion cubic feet of gas compared to 7.0 billion cubic feet of gas in 1988. Oil production in 1989 totaled 206,000 barrels of oil compared to 1988 production of 189,000 barrels.

The increase in revenues, cash flow and net income in 1989 is attributable to higher average prices for natural gas and oil and non-recurring payments in connection with certain gas contracts Net income also benefitted from lower interest costs due to the proceeds from the sale of units in a public offering being used to reduce outstanding bank debt in April 1989. The 1989 decline in natural gas production was due to a decision to shut-in certain production during some months in 1989 when natural gas prices on the spot market were low.

For 1989, cash distributions equaled $6,616,000 or $1.60 per unit, with the remaining net cash flow from operations of $7,624,000 invested in oil and gas reserve replacement and expansion.

Revenues for the fourth quarter of 1989 were $4,140,000, compared with $3,892,000 for the like period in 1988. Net cash flow from operating activities increased to $4,427,000 (99 cents per unit), compared with $3,174,000 (90 cents per unit) for the three months ended Dec. 31, 1988. 1989 fourth quarter net income was $1,412,000 (32 cents income per unit), compared to a net loss of $8,000 in the fourth quarter 1988. Increases in 1989 fourth quarter revenues, cash flow and income primarily resulted from non- recurring payments in connection with certain gas contracts.

Samson Energy Co. is a publicly traded master limited partnership whose principal business activities include the development and operation of oil and gas properties and the acquisition of producing properties.

ATLANTA (MARCH 15) PR NEWSWIRE - Georgia Gulf Corp. (NYSE: GGC) announced today that its board of directors has amended the company's plan of recapitalization.

Under the plan as amended, the company said each holder of a share of its common stock will receive, upon approval of the plan by the company's stockholders, $30 in cash, $8.50 principal amount of a new issue of 15 percent senior subordinated notes maturing in the year 2000 and one newly issued share of common stock.

In connection with the plan of recapitalization, the company also said each stockholder can make the election, with respect of up to 30 percent of its common shares, to receive for each share, 5.5 shares of a new issue of common stock. This election is in lieu of being paid cash and securities as to those shares with respect to which the election is made. Also, a maximum of 2.75 million shares are subject to the election, and in the event the election is made as to a number of shares exceeding the maximum, a proration will be required.

Georgia Gulf said, it is estimated that the consideration payable in respect to each share of common stock in the recapitalization will have a total value of up to approximately $49.50 per share. The value will depend upon market conditions and the number of shares as to which the election is made to receive only common stock, the company added.

All financing necessary to effect the plan of recapitalization, as amended has been arranged. The company said it has accepted a written commmitment from The Chase Manahattan Bank (National Association), Security Pacific National Bank, Bankers Trust Company, Citibank, N.A. and General Electric Capital Corp. whereby such lenders have committed to finance the amounts necessary to effect the plan of recapitalization.

Each senior subordinated note to be issued to stockholders as part of the plan of recapitalization in respect of a share of common stock will be in the principal amount of $8.50 and mature in the year 2000. Interest on the notes will be payable semi-annually in cash at the per annum rate of 15 percent. Up to approximately $200 million principal amount of the senior subordinated notes will be issued. The company said the total amount of senior subordinated notes to be distributed will depend upon the number of shares submitted by stockholders under the 30 percent stock election. The notes will be unsecured obligations, subordinated to all existing and future senior debt of the company, including the senior bank

financing.

Georgia Gulf, headquartered in Atlanta and listed on the NYSE (GGC), is a major manufacturer of several highly integrated lines of commodity chemicals and polymers including aromatic, natural gas and electrochemical products as well as thermoplastic and thermosetting resins.

SAUSALITO, CA (MARCH 15) PR NEWSWIRE - Phoenix Network Inc. (NASDAQ: PHXN), a long-distance network management company based here, today announced it has completed an agreement with Office Club Inc., of Concord, Calif., to market long distance services in their stores.

The services will be marketed under the name "Office Club Communications" a DBA of Phoenix Network. The program between the two companies will be offered as part of Office Club's new Business Service Centers in each store. Bag stuffers and direct mail will be used to advertise the new service. Business Service Centers currently offer printing, copying, fax service, custom stamps and engraving to Office Club members. Office Club currently operates 35 stores in the Western United States, and will be opening 17 additional stores in the next year. Marketing activities are expected to start within two weeks at the Concord Office Club store.

Commenting on the agreement, Sand y Markus, Office Club vice president said, "We are pleased to offer this new long distance service to our Office Club members. We are confident our members will find that this long distance service will save them significantly on one or more aspects of operating their business."

Phoenix Network Executive Vice President Eric Mustad commented, "We are very enthusiastic about working with Office Club and feel this program will be a significant benefit to their members in addition to the profit potential it holds for both companies involved."

Phoenix Network trades over the counter on NASDAQ under the symbol PHXN.

HOUSTON (MARCH 15) PR NEWSWIRE - Rowan Companies Inc. (NYSE: RDC) reported audited financial results for the year ended Dec. 31, 1989. Subsequent to the Jan. 16 unaudited earnings release, additional

information made available to Rowan required a revision of the reserve provided for workers' compensation claims by approximately $4 million. As a result, the audited financial results for 1989 reflect a net loss amounting to $37,777,000 compared to a net loss of $31,601,000 in 1988. The loss per share was 52 cents vs. 44 cents in the year earlier. The fourth quarter net loss amounted to $16,413,000 or 23 cents per share compared to net earnings of $10,460,000 or 14 cents per share in the like period of 1988. Excluding a gain of $24,371,000 or 34 cents per share arising from the physical loss of a drilling rig in Dec. 1988, financial results for 1989 were significantly better than the previous year.

Rowan Companies Inc. serves the petroleum industry as a contract driller, onshore and offshore in domestic and international areas, and operates a fleet of charter helicopters and fixed wing aircraft.

HOUSTON (MARCH 15) PR NEWSWIRE - Synercom Technology Inc. (NASDAQ: SYNR) has announced a technology alliance with Oracle Corp. (NASDAQ: ORCL) of Belmont, Calif. that allows Synercom to integrate the ORACLE relational database management system (RDBMS) tools into INFORMAP. As a value-added relicensor (VAR), Synercom will be able to relicense the ORACLE RDBMS tools within the INFORMAP environment and to market the package worldwide.

According to Robert W. Forsyth, president and chief executive officer of Synercom, "The coupling of INFORMAP with the ORACLE RDBMS tools enhances the functionality of INFORMAP. The spatial database increases in value when it can be integrated with other information systems in an organization, made available throughout an organization-wide information network, and accessed through the Structured Query Language (SQL) capabilities inherent in the ORACLE RDBMS tools."

A traditional strength of INFORMAP is its demonstrated abilitiy to manage large volumes of spatially related data in an integrated multi-vendor hardware and software environment. Integrating the ORACLE RDBMS tools with INFORMAP offers organizations even greater flexibility to build comprehensive software solutions, which tie specific applications into an organization-wide computing computing environment. Functionality is improved through industry-standard, user-defined indexes to both graphic and nongraphic data. The standard SQL-based user interface available through the ORACLE RDBMS tools increases usability and simplifies access to the spatial database from other information systems.

The agreement calls for a technology alliance between Synercom and Oracle for the next five years. Although Synercom will continue to develop and support its existing line of geo-relational software products, Synercom will be able to relicense Oracle products within the INFORMAP environment as a result of the alliance. Synercom and Oracle will also work jointly on

developing industry-specific applications that integrate spatial information systems with other information systems, such as work order management systems. The technology alliance between Synercom and Oracle indicates Synercom's commitment to improve database access through the integration of technologies.

Synercom customers include utilities, telecommunications companies, and governmental agencies that manage a multitude of geographically dispersed assets and the activities affecting these assets. Synercom's extensive mix of software products, support services, and systems integration services increases the efficiency and accuracy with which customers record, track, analyze, and manage their assets. Because Synercom solutions simplify the task of managing spatial information, large organizations are turning to spatial databases and Synercom solutions as key components of organization-wide information networks.

NEW YORK (MARCH 15) PR NEWSWIRE - Kidder, Peabody & Co. Inc. today announced that it had named Stanley Trotman and Stephen M. Winningham as managing directors. Trotman will co-head Kidder's Health Care Group with Tamara Baum. Winningham will head Kidder's Telecommunications Group.

Scott Newquist, Kidder, Peabody managing director and head of investment banking, said, "We are delighted to have both Stanley Trotman and Stephen Winningham join the Kidder team. They are two outstanding individuals who bring to Kidder not only their professional expertise but also the respect of their clients."

Trotman, 46 years old, a 21-year employee of Drexel Burnham Lambert, had been managing director of that company's Health Care Department. Trotman received a master of business administration from Columbia University Business School and earned a bachelor of arts at Yale University. He is a director of Charter Medical, T2 Medical, and Salick Healthcare.

Winningham, 40 years old, had been a managing director of Drexel Burnham Lambert's Telecommunication Finance Department. Prior to joining Drexel in 1981, Winningham was an assistant vice president at Citibank. Winningham received an master of business administration from Columbia University and a bachelor of arts degree from Colgate University.

Kidder, Peabody is a leading global investment banking and brokerage concern. GE Financial Services holds an 80 percent interest in the 125-year-old company.

MINNEAPOLIS, (MARCH 15) PR NEWSWIRE - Michael Foods Inc. (NASDAQ: MIKL) today responded to a Food and Drug Administration (FDA) announcement regarding a ban on the use of sulfites in fresh potatoes. The company is currently evaluating what effect the FDA announcement will have on its refrigerated potato products business. As the Michael Foods potato companies use small amounts of sulfites to extend the shelf life and enhance the color of refrigerated potato products, some of the company's sales may be affected by the FDA announcement. The company noted that only a portion of its refrigerated potato business would potentially be affected; it also presently sells refrigerated potato products without sulfites. Additionally, the company noted that there will be no effect on its frozen potato products business, which represents approximately 70 percent of total potato sales.

Michael Foods is a diversified food processor and distributor, with particular interests in eggs and egg products, refrigerated case products, frozen and refrigerated potato products, and dairy products, including ultrapas'%orized ice milk mix, milk and specialty products. Subsidiaries and affiliates include Crystal Foods Inc.; Northern Star Co.; Kohler Mix Specialties Inc.; the Milton G. Waldbaum Co.; Morning Glory Eggs Inc.; Wisco Farm Cooperative; Farm Fresh Foods Inc.; Drallos Potato Co. Inc.; Country Queen Inc.; and Reddi Egg America Inc.

#90074p0481 03/15/1990 ~PR Newswire

MINNEAPOLIS, (MARCH 15) PR NEWSWIRE - North Star Universal Inc. (NASDAQ: NSRU), today announced results for the fourth quarter and fiscal year ended Dec. 31, 1989. Fourth-quarter and fiscal-1989 results include income and estimated costs associated with the anticipated sale of certain manufacturing and graphics companies that are expected to be sold during 1990.

Fiscal-1989 revenues from continuing operations increased 44 percent to $343,105,000 from $237,870,000 in 1988. Income from continuing operations declined to $1,419,000, or 11 cents per share, from $4,179,000, or 39 cents per share, in 1988. Including the loss from discontinued operations of $3,773,000, or 39 cents per share, the company recorded a net loss of $2,354,000, or 28 cents per share, compared to net income of $4,622,000, or 44 cents per share, in the prior year.

Fourth-quarter 1989 revenues increased 50 percent to $101,239,000 from $67,364,000 in the previous year. Fourth-quarter earnings from continuing operations were $460,000, or 4 cents per share, versus $1,568,000, or 15 cents per share, in the prior year period. The fourth-quarter net loss was $1,521,000, or 17 cents per share, including a loss on discontinued operations of $1,981,000, versus income of $791,000, or 7 cents per share, for last year's comparable period.

In commenting on the 1989 results, President and Chief Executive Officer Miles E. Efron said, "Consistent with our objective to build long-term shareholder value, we have made substantial investments in our strategic businesses. These investments resulted in a 44-percent growth in revenues during 1989. In addition, we have identified certain companies which we plan to sell. While these companies are headed by strong management teams and are profitable, they no longer fit our long-term strategy."

Efron went on to say that "earnings continued to be impacted by higher costs to sustain our growth and build long-term value. In addition, results were impacted by lower earnings at Michael Foods due to the effects of the drought of 1988 on the potato products business and losses associated with the introduction of Easy Eggs(TM)."

The fourth-quarter and fiscal-1989 loss from discontinued operations includes the operating and disposition losses associated with the divestiture of Super Cycle, sold in May 1989 and estimated costs associated with the expected sale of Graphics Unlimited, Universal Press & Label, Diesel Cast Welding and Industrial Gasket Co.

The company also reported that Michael Foods, its majority-owned food processor and distributor, has entered into an agreement to acquire the remaining 50 percent of the Milton G. Waldbaum Co. it does not already own. Michael Foods expects to complete the transaction in the next 60 days.

In addition, the company reported a correction in the accounting for its minority interest portion of Michael Foods' 1988 public offering of common stock. The adjustment resulted in a $6,108,000 reduction in paid-in capital and a corresponding increase in minority interest as of Dec. 31, 1988. This adjustment had no effect on the company's consolidated results of operation as presented for 1988.

North Star Universal Inc., owns and supervises the management of businesses engaged in computer cabling and related services, health care services, graphics and other industries. As a parent company, North Star Universal provides resources for the companies' development and growth. North Star Universal also owns a 53.9 percent majority interest in Michael Foods, Inc. (NASDAQ: MIKL). North Star Universal Inc.

SAN DIEGO (MARCH 15) PR NEWSWIRE - A versatile new aerial reconnaissance and surveillance system to provide support for diverse operations ranging from battlefields to drug enforcement to search and rescue was demonstrated by TRW (NYSE: TRW) today at Palomar Airport in San Diego.

The system combines off-the-shelf components to provide reliability and low cost while maintaining high performance.

"This is an outgrowth of work TRW has done for many years, and we foresee its future use by the military and government agencies," said Robert Kohler, vice president and general manager of TRW's Avionics and Surveillance group based in San Diego.

The system flies aboard a Speed Canard aircraft, which can be flown remotely without a pilot if the threat environment so dictates. Speed Canard is a German airplane modified by Dornier Luftfahrt GmbH for this mission.

The system is flexible so it can be focused to pinpoint a few square kilometers, or expanded to cover a broad area of more than 10,000 square kilometers. The mission can remain airborne for up to six hours.

The Light Aircraft Surveillance System (LASS) developed by TRW gathers its information through a variety of electronic sensors. Information can be transmitted to the ground for real-time decisions, or stored in the aircraft when it is important to remain undetected.

Technology for LASS was developed by ESL, Inc., a TRW subsidiary located in Sunnyvale, Calif. ESL is part of the Avionics and Surveillance Group, which established headquarters in San Diego last January.

CONTACT: Tom Sprague of Mike Sund Public Relations, 619-592-3164 or 619-459-9065, for TRW.

SEATTLE (MARCH 16) PR NEWSWIRE - Australian Airlines accepted its first Boeing 737-400 Wednesday from Boeing Commercial Airplane Group and said it has converted two options to firm orders.

Managing Director and Chief Executive Officer John W. Schaap, who announced the conversions at the delivery, said the airline now has ordered 11 of the -400s and holds options for three more.

Boeing has delivered 16 737-300s to Australian between 1986 and 1989. Altogether, the airline has received 35 jetliners from Boeing in the last 27 years.

For its 737-400 operations, Australian uses a basic configuration of 135 seats. Sixteen of these are first class seats with the remainder allocated between business and economy class depending on demand for individual flights.

Schaap said the 737-400s will give Australian one of the youngest and most versatile jet fleets in the world.

The airplane was technically delivered Feb. 26, but airline-specified modifications to increase the aircraft's fuel capacity for transcontinental service delayed its acceptance and flyaway until Wednesday.

These two new orders bring total 737-400s ordered to 222, with total 737 orders reaching 2,773. In 1990, Boeing has announced 91 jetliner orders valued at about $7.4 billion.

SUNNYVALE, CA (MARCH 16) PR NEWSWIRE - Sola/Barnes-Hind, one of the country's leading manufacturers of contact lenses and lens care products, announced today that it will open a new lens care product production facility in Phoenix, Ariz., in early 1991.

At the same time, the company said it will close its 35-year-old Sunnyvale solutions plant, with production there to be phased out by the end of 1990.

The move will enable the company to expand its U.S. manufacturing base for contact lens care solutions and other ophthalmic products to meet increased production commitments in the fast-growing eyecare products market.

The step is another in a series of strategic expansions by Sola/Barnes-Hind. Last year, the company opened a new ophthalmic research center in Sunnyvale, where earlier it had moved into its new North American headquarters and administration building. In San Diego, a major expansion program has made the company's contact lens manufacturing facility the largest of its kind in the United States.

The new Sterile Products manufacturing plant will be located in a facility the company owns at 1100 Bell Road in northeast Phoenix. Built in 1982, the FDA-approved facility features a modern infrastructure capable of accommodating the state-of-the-art solutions manufacturing and packaging equipment which Sola/Barnes-Hind will install.

The company manufactures and markets throughout North America lens care products for all contact lenses as well as other ophthalmic products under the SOFT MATE and Barnes-Hind brand names.

Its two newest products -- SOFT MATE(R) Enzyme Plus(TM) Cleaner, a weekly intensive cleaner that combines an enzyme and a surfactant in one tablet, and the SOFT MATE CONSEPT(R) Cleaning and Disinfection System for soft contact lenses -- have had unprecedented market gains since their introduction.

Company officials said the Sunnyvale plant, built in 1955, has since been expanded a number of times. They said the plant, located at 895 Kifer

Road, could not be renovated to handle the high volume bulk production requirements for Sola/Barnes-Hind's new and fast-growing lens care products.

SANTA CLARA, CA. (MARCH 15) PR NEWSWIRE - Solitec (NASDAQ: SOLI) announced today that a registration statement on Form S-1 registering an aggregate of 2,372,530 shares of common stock in a secondary offering was declared effective on March 8, 1990. The prospectus contained in the registration statement also updated a registration statement declared effective Nov. 19, 1988 covering 2,684,452 shares of common stock, the company's Class A and Class B warrants, and the shares underlying the warrants and certain other convertible securities. No underwriter is involved in the offering.

According to Joseph J. McDowell, president, many of the shares were being registered to satisfy the company's commitment to give the "piggyback" registration rights to investors in previous private placements and to shareholders who had recently exchanged debt for equity. He said that the company is not selling any shares in the offering, but would issue shares to selling shareholders upon their exercise of the Class A and Class B Warrants registered in the offering.

Solitec Inc. is a manufacturer of equipment used in the production of semiconductor integrated circuits, headquartered in Santa Clara. Its stock is traded on NASDAQ under the symbol SOLI.

CHATSWORTH, CA (MARCH 16) PR NEWSWIRE - Diodes Inc. (AMEX: DIO) announced today that it has completed a sale of 1,000,000 shares of its common stock in a private placement to Silitek Corp., a public Taiwan corporation, at $1-7/8 per share for a cash purchase price of $1,875,000. As part of this same transaction, Diodes also granted Silitek a two-year option to purchase an additional 1,000,000 shares at the same price. All of the shares purchased are legend bearing "restricted" stock.

Silitek previously announced the purchase of 945,800 shares of Diodes unregistered common stock from Microsemi Corp. in a private sale. Following issuance by Diodes of the initial 1,000,000 shares, Silitek will own 42 percent of the issued and oustanding stock of Diodes, excluding treasury shares. Should Silitek exercise the option, its percentage holding of Diodes stock will increase to 52 percent.

CONTACT: Dr. Alan B. Lees, VP of Diodes, 818-882-4920.

GUATEMALA CITY (MARCH 15) UPI - A former government official charged with attempting to smuggle cocaine through Guatemala said he is being framed for exposing the alleged involvement of high ranking officials in drug dealing, Guatemalan news reports said Wednesday.

Fernando Minera Navas, 27, a former official of the Department of Administrative Control, said his family has received threats and that his son narrowly escaped a kidnap attempt Monday.

Minera Navas accused top officials of the G-2 military intelligence unit of being deeply involved in trafficking cocaine from Colombia to the United States, the Guatemalan daily newspaper Prensa Libre reported.

Minera Navas, who headed his department's watchdog operations at the capital's Aurora International Airport, was arrested by police last September and charged with handing a suitcase containing cocaine to an Aviateca (Guatemalan airlines) cargo attendant.

In comments to reporters following a hearing Tuesday at the 5th district court in Guatemala City, Minera Navas said he saw cargo manager Brigido Javier Fuentes Orozco hand over the suitcase.

Minera Navas said Aviateca personnel opened the suitcase and found 25 kilograms of cocaine inside at the time of his arrest.

''I find it strange that the G-2 and the National Police only sent 21 kilos to the court,'' Prensa Libre quoted Minera Navas as saying. Police records show that 22 kilos of cocaine were seized during the arrest.

Minera Navas said he had reported ''irregularities'' at the airport to his supervisor, Col. Hugo Francisco Moran Carranza, but was warned to keep quiet because ''it would hurt the image of the government and the army,'' Prensa Libre reported.

Minera Navas said Moran Carranza told him a high-ranking military official had offered him money to accuse Minera Navas of being an international drug dealer, and that to set accounts straight in the public eye, Minera Navas should spend at least a year in prison, Prensa Libre reported.

The U.S. government revoked Moran Carranza's visa last year without giving an official reason for the action.

Cargo loader Rene Estanislao Lopez, named earlier by Minera Navas as a witness in the case, was kidnapped and his tortured body found by police the next day in San Cristobal, 53 miles north of the capital, Prensa Libre reported.

Minera Navas said Lopez was also an eyewitness to other unusual transactions at the airport involving public figures important in the political arena.

#90074u0153 03/15/1990 ~United Press International

TEGUCIGALPA, HONDURAS (MARCH 15) UPI - Honduran President Rafael Leonardo Callejas called on Nicaraguan Contra rebels Wednesday to lay down their weapons and go back to Nicaragua.

''To the irregular forces of the Nicaraguan counterrevolution (Contras), I want to convey a clear message: the war in Central America is over,'' Callejas told a crowd of some 5,000 supporters of his National Party who had marched to the presidential palace.

''This homeland and its soil opened their doors to them, under whatever circumstances they may have been. Today they must leave Honduras and integrate in Nicaragua. That is what we Hondurans want,'' Callejas said.

Some 10,000 to 12,000 armed Contra rebels are living in camps near the Honduran border with Nicaragua. The Contras are included in a general amnesty passed into law Saturday by the Sandinista-dominated Nicaraguan

legislature.

''It's not that we are turning them out ... but if the violent process in Nicaragua is over, and there is a government elected by the people ... then please put down your weapons and go to your own country and contribute to the building of your own destiny,'' Callejas said.

Callejas was referring to the Feb. 25 election victory by Nicaraguan President-elect Violeta Chamorro, who defeated Nicaraguan President Daniel Ortega with 55 percent of the vote and is scheduled to take office April 25.

A delegation sent to Tegucigalpa last week by Chamorro began preliminary talks with Contra leaders who have said they will not disarm until Chamorro takes office.

On arrival earlier Wednesday from Chile where he attended Sunday's inauguration of Chilean President Patricio Aylwin, Callejas said the Contras should disarm before Chamorro takes over.

''We must make every effort (toward the demobilization). We are going to contribute with all our willpower and determination to achieve that objective,'' Callejas said.

He said the Honduran government's position was ''clearly established'' during informal talks with Vice President Dan Quayle, who also attended Alywin's inauguration.

Callejas said a reduction in the size of the Sandinista Popular Army, demanded by the Contras, is Nicaragua's own affair.

''In our judgement, there should be no oversized military structures like the Sandinista army on the road to peace, but that is an internal Nicaraguan matter and we will respect Nicaragua's decision within the framework of its own laws,'' Callejas told reporters.

In Washington, Joseph Sullivan, a deputy assistant secretary for Inter-American Affairs, told a House Foreign Affairs subcommittee that the administration wants to spend $32 million on transportation, agricultural supplies, food, and other basics to return the Contras to Nicaragua.

He said each of the 15,000 guerrillas has an average of three dependents, for a total of 60,000 individuals. The cost for the $32 million project breaks down to about $533 per individual.

Some of the Contras are living in the hills of northern Nicaragua.

(MARCH 15) UPI - In New York, a spokesman for the Libyan mission at the United Nations says he has NO information about a reported fire at the Libyan plant south of Tripoli suspected of making chemical weapons. Says the spokesman- ''We tried to get through to Libya but we could NOT.'' The Bush administration also has NOT been able to confirm the report. However, a news report says the United States has NO satellite capability over Libya right now... so confirming what exactly happened, if anything, would be that much harder.

South Africa's state-run radio says gunmen killed a senior police officer involved in peace talks in strife-torn Natal province Wednesday. The officer's body was found in his car along the highway leading to the Indian Ocean city of Durban. As many as three-thousand blacks have died in Natal since 1987 in a war for political control between supporters of the African National Congress and a moderate Zulu tribal movement.

West Virginia's governor is quoted as saying he'll fire teachers taking part in the first statewide school walkout unless they return to the classrooms next week. Gaston Caperton's comments followed a speech by Caperton aired statewide Wednesday night. In the speech, he expressed sympathy with striking educators, but said there was NO money for pay raises. Earlier in the day, the union rejected Caperton's plan for ending the weeklong strike.

A New Jersey couple was charged Wednesday in an attempt to gyp the government out of more than 300-thousand dollars. The couple allegedly filed 41 separate federal and state income-tax returns under various aliases... claiming 305-thousand dollars in refunds. They face sentences of up to five years in prison if convicted.

#90074u0239 03/15/1990 ~United Press International
LOS ANGELES (MARCH 15) UPI - Janet Jackson and the British group Soul II Soul each won three awards, and veteran producer Quincy Jones was honored for his long career at the fourth annual Soul Train Music Awards Wednesday night.

Jackson, currently on tour, took top honors for her album, ''Rhythm Nation 1814,'' which was named best rhythm and blues album and whose hit single, ''Miss You Much,'' was named best R&B female single. Her music video for the title song from her ''Rhythm Nation 1814,'' took best R&B video at the awards, which showcase and honor black musical talent.

Soul II Soul, shut out in last month's American Music Awards, was named best R&B group; won for best R&B album by a group for ''Keep on Movin''' and the album's title cut was named R&B song of the year.

Jones received a standing ovation from the sell-out crowd of 5,000 at the Shrine Auditorium when he was presented the Heritage Award for outstanding career achievement. Jones produced several of the best-selling albums in music history, including three by Michael Jackson.

His ''Back on the Block'' was named best jazz album Wednesday night, and a performance of its hit single ''Secret Garden'' - by Barry White, El DeBarge, James Ingram and Al B. Sure! - brought down the house.

Jones, who celebrated his 57th birthday Wednesday, said ''After 40 years in this business, God is on my side. I feel like I'm back on the block.''

Soul II Soul's debut album ''Keep On Movin'' has gone platinum, but the group has not fared well in recent awards ceremonies.

The group topped the list of most American Music Awards nominations but came away from the February ceremony empty-handed.

Late-night talk show host Arsenio Hall was named Entertainer of the Year - named after Sammy Davis, Jr. The honor was instituted last year as a tribute to Davis's career. Michael Jackson won the first award.

Hugging presenter Patti LaBelle during his acceptance speech, Hall said, ''I've got a lot way to go to deserve anything with Sammy's name on it.''

Hall said he hoped his success would serve as a role model for black youths, and took the opportunity backstage to encourage kids to stay off drugs.

''We're going to kill ourselves from the inside. We don't need to be attacked by a foreign country,'' he said of the drug problem among black youth.

Luther Vandross won best R&B single by a male for ''Here and Now,'' while Baby Face's ''Tender Lover,'' was named top male R&B album.

The rap group, Heavy D. & The Boyz, was honored for best rap album for ''Big Tyme,'' and David Peaston beat out Soul II Soul and Young M.C. for best new artist.

In the gospel category, Ce Ce and Be Be Winan beat out competition that included their quartet of brothers, The Winans, for best album.

In all, 48 nominess in 12 categories vied for honors in rhythm and blues gospel and rap. Winners took home a 10-inch high wood-based statue of bronze and marble called the Vanguard Trophy.

LaBelle, Vandross and Dionne Warwick hosted the two-hour ceremony, which was broadcast on Fox TV.

The awards are produced by Don Cornelius, who has hosted the syndicated dance program ''Soul Train'' since it premiered 20 years ago on a small Chicago station.

A year later, it went into national syndication and gave exposure to such budding talents as the Jackson 5 and Stevie Wonder.

''Soul Train'' is known for its outrageously creative attire, and Wednesday's awards show ran true to form. Performers and winners wore everything from mink mini-skirts to tailored men's lace suits, satin tuxedos and leopard skin jackets.

Winners and nominees were selected by a group of record executives, radio stations and established recording artists nationwide. In all, 1,200 ballots were cast.

Top vote-getters made the list of the four top nominees and the artist or song receiving the most first-place votes were the winners.

#90074u0296 03/15/1990 ~United Press International
(MARCH 15) UPI - Freshman DeRon Hayes hit two baskets late in the game Wednesday, breaking a tie and leading Penn State to a 57-54 victory over Marquette in a first-round National Invitation Tournament game in University Park, Pa.

With the score tied 52-52, Hayes sank a 15-foot jump shot and then scored on a layup to give the Nittany Lions the lead for good.

Trailing 51-45, Penn State tied the score on two Ed Fogell layups and a 3-pointer by James Barnes, who led the Lions with 15 points. Marquette had taken the lead on the strength of a 9-2 run midway through the second half.

Marquette used a 22-6 first-half spree to build a 28-17 lead. But the Lions were able to battle back to within 32-31 at halftime.

Tony Smith had 23 points to lead Marquette, which finished at 15-14. Fogell had 13 points and 8 rebounds for Penn State, which won its 15th straight home game.

Penn State, 22-8, along with other opening-round winners, will have to wait until all first-round games are completed before learning which teams they willplay in the second round next Monday or Tuesday.

-- AROUND THE NCAA --

Other first-round games Thursday include: Southern at Fordham, Massachusetts at Maryland, Baylor at Mississippi State, Louisiana Tech at Vanderbilt, Tulsa at Oklahoma State, Wisconsin-Green Bay at Southern Illinois and Stanford at Hawaii.

In other first-round games Wednesday, New Orleans defeated James Madison

78-74 and Tennessee held off Memphis State 73-71.

At Harrisonburg, Va., Willie Richardson and Tony Harris sank three foul shots in the final 44 seconds, helping New Orleans over James Madison.

Tank Collins led New Orleans, 20-10, with 18 points. Steve Hood led James Madison with 19 points.

A Harris dunk with 1:45 left gave New Orleans a 74-70 lead. Hood's layup with 1:27 remaining brought the Dukes, 20-11, to within 74-72. Richardson sank the front end of one-and-one free-throw situation to give the Privateers a 75-72 lead. After Barry Brown made two free throws for James Madison, Harris hit two free throws to give New Orleans a 77-74 lead.

New Orleans raced out to a 38-22 lead by hitting 18 of its first 22 shots.

At Memphis, Tenn., Freshman Allan Houston scored 20 points to lead Tennessee to the victory over Memphis State. Houston helped the Volunteers coached by his father, Wade, avenge a 91-72 loss to the Tigers earlier in the season. In that game Tennessee committed 39 turnovers.

The Volunteers, 16-13, showed much more poise Wednesday night, building a 10-point lead early in the second half and then holding off the Tigers.

Besides Houston, Ronnie Reese added 14 points and Greg Bell had 11 for Tennessee. Elliot Perry led Memphis State, 18-12, with 18 points, while Cheyenne Gibson had 15. The loss was only the second at home for the Tigers in 17 games this season.

-30- 3078

#90074u0343 03/15/1990 ~United Press International

(MARCH 15) UPI - Glenn Anderson was not satisfied despite scoring the goal that lifted the Edmonton Oilers to a 3-3 tie with the Canadiens in Montreal Wednesday night. He thought his team should have won the game.

''With all that pressure we were putting on (Montreal goalie Patrick) Roy, we could have won this hockey game,'' Anderson said.

The Oilers unleashed a barrage at Roy, but the goaltender was up to the challenge, making 39 saves.

Anderson scored the tying goal while Montreal was a man short at 8:08 of the third period. The Edmonton right winger broke in from the blue line and skated in front of the Montreal net. He drew Roy to one side and then put the puck into the far corner for his 31st goal of the season.

''It is fine to get a win in Quebec on Tuesday and a tie here, but on this

overall road trip we are still under .500 (1-2-1),'' Anderson said.

The tie allowed second-place Edmonton to move within three points of first-place Calgary in the Smythe Division.

''I think that was one of toughtest tests I have had all year,'' Roy said. ''I'd like to get that tying goal by Anderson back again. I would play it differently.

''The Oilers are fast. This is the type of game I need to get ready for the playoffs.''

If Anderson and the Oilers were disappointed with the draw, the Canadiens saw it differently.

''It was a big point for us,'' said Shayne Corson of Montreal, who scored the game-winning goal against the Islanders Tuesday. ''We took three points in back-to-back games with our win over the Islanders on Tuesday. Now we have four games without a loss.'' Corson broke a 2-2 tie at 8:16 of the second period, getting his 30th goal of the season on a rebound.

Claude Lemieux made the score 1-0 at 8:05 of the first period. A power-play goal at 10:35 by Mats Naslund gave Montreal a 2-0 lead. It was Naslund's 20th goal of the season.

Jarri Kurri collected his 32nd goal, a 55-foot blast that eluded Roy, at 18:20 to cut Edmonton's deficit to 2-1.

The Oilers tied the score 2-2 at 6:30 of the middle session. Craig Simpson took a pass at the side of the net from Esa Tikkanen and deflected it into the Montreal goal.

''My goal in the second period is a hard one to defend against,'' Simpson said. ''The goalie is over to one side and Tikkanen made the perfect pass to me and I just steered it in.''

-- AROUND THE NHL --

Elsewhere in the NHL, New York overpowered Toronto Maple 8-2 and Los Angeles edged Buffalo 6-5 in overtime.

RANGERS 8, MAPLE LEAFS 2

At Toronto, Brian Mullen and John Ogrodnick each scored two goals to lead the Rangers. The victory was costly for the Rangers, who lost defenseman Brian Leetch for the rest of the season with a broken ankle. Daniel Marois and Ed Olczyk scored Toronto's only goals.

KINGS 6, SABRES 5 OT

At Buffalo, N.Y., Bob Kudelski lifted in a rebound at 1:25 of overtime to lead Los Angeles. Doug Bodger put Buffalo ahead at 3:05 of the third period, but seven minutes later Marty McSorley tied the score off a pass from Wayne Gretsky.

-30- 3276

#90074u0345 03/15/1990 ~United Press International

BUENOS AIRES, ARGENTINA (MARCH 15) UPI - Vice President Dan Quayle ruled out meeting Cuban President Fidel Castro Thursday when their paths cross in Brazil, but Quayle has asked other world leaders to urge Castro to stop arming leftist rebels in El Salvador.

Quayle, at a news conference Wednesday, said he would not meet with Castro when the two attend the presidential inauguration in Brasilia Thursday of Fernando Collor de Mello.

''We're not going to meet with Castro,'' Quayle told reporters at the U.S. ambassador's residence in Buenos Aires. ''Castro remains isolated. Castro must change. Sooner or later change will come to Cuba,'' one of a handful of nations that has resisted democratic reforms sweeping other communist nations.

Spanish Prime Minister Felipe Gonzalez and Argentine President Carlos Menem said Quayle has asked them to speak to Castro about arms the United States says Cuba is sending to leftist rebels fighting the U.S.-backed government of Salvadoran President Alfredo Cristiani.

The Buenos Aires newspaper Clarin said Quayle asked Menem to ''pressure'' Castro to stop the shipments because Cuba is now ''the only point of support for insurrection in the hemisphere.''

Discussing the newspaper report at a news conference with Gonzalez in the Spanish Embassy, Menem said Quayle ''has asked me, and I suppose he asked other presidents he met in Chile and in other stops in Latin American, that we talk to Castro.''

He said he was not asked to ''pressure'' Castro.

Gonzalez said he also was approached by Quayle and asked to serve as an intermediary to Castro.

''We will talk to Castro,'' Gonzalez said. ''I never use the word 'pressure' with anybody. If there is an occasion, and I believe there will be an occasion, we will talk.''

Gonzalez said he met three times with Quayle in Caracas, the first stop in the vice president's six-nation Western Hemisphere tour, and once in Santiago, Chile, where they attended the inauguration Sunday of President Patricio Aylwin.

Quayle said he was convinced, after meeting with Menem, that the Argentine leader was committed to economic reforms that would enable his nation to eventually qualify for aid under the Brady Plan for reduction of foreign debt.

The plan, named for Treasury Secretary Nicholas Brady, calls for private banks to forgive a portion of their debts with qualifying Third World countries in exchange for guarantees the remainder will be paid off. So far, it has been applied to Mexico and the Philippines.

Asked if the United States was considering a bridge loan to Argentina of $400 million, Quayle said such a loan would depend on the outcome of Argentina's negotiations with the International Monetary Fund.

Quayle said Argentina was close to reaching an agreement with the IMF, whose seal of approval on a given nation's economic program often leads to new international credits.

(MARCH 15) UPI - NO confirmation yet of reports that a fire has struck a Libyan plant 40 miles south of Tripoli suspected by the United States of producing chemical weapons. The White House says it hopes U-S intelligence operations will have definitive word on the situation Thursday. The United States recently urged the international community to make ''vigorous efforts to stop the operation.'' But White House spokesman Marlin Fitzwater denies the United States had anything to do with a fire.

NO surprises are expected when the results are announced Thursday from Wednesday night's Soviet Parliament vote on who will be the nation's new executive president. Earlier Wednesday, supporters of Mikhail Gorbachev narrowly beat back a bid to hold nationwide elections to fill the office. Two other politicians nominated to run withdrew from the race. Lawmakers then voted to enter Gorbachev as the sole candidate.

The owners of a 150-Million-dollar communications satellite stranded in a useless orbit are looking at the options to salvage the relay station. Among them- a shuttle rescue flight, although NASA had NO immediate comment on that possibility. The satellite was carried into space by a Titan-3 rocket Wednesday morning... but later had trouble separating from the second stage.

Police in Anchorage, Alaska, say they caught the Girl Scout bookkeeper with her hand in the cookie jar. 34-year-old Mary Helm was arraigned in state court Wednesday on charges that she embezzled 667-thousand dollars during the last six of her 15 years with the Susitna Girl Scout Council. Helm... who was fired in November when bookkeeping irregularities were discovered... faces 20 years in prison if convicted.

(MARCH 15) UPI - A New York police bomb squad was called to Mickey Mantle's Restaurant and Sports Bar in Manhattan Wednesday after the eatery received a bomb threat followed by the delivery of a ''suspicious-looking'' package. The former baseball star's business partner says the whole thing turned out to be a ''false alarm.''

Rocky Balboa is returning to the Philadelphia Art Museum. The Fairmount Park Commission voted Wednesday to ship the controversial eight-and-a-half-foot statue of Sylvester Stallone's movie character ''Rocky'' back to the museum's steps- at least for now. Two weeks ago, the likeness was moved to the Spectrum Sports Arena, where critics said it belonged. Others, including Mayor Wilson Goode, say Rocky's place is at the museum. It is now up to the Philadelphia Art Commission to decide on a permanent home for the statue.

#90074u0349 03/15/1990 ~United Press International

WASHINGTON (MARCH 15) UPI - A federal appeals court has upheld the Nuclear Regulatory Commission's decision to grant a full-power operating license for the controversial Seabrook nuclear power plant in New Hampshire.

Wednesday's court ruling, which is subject to further legal appeals, came as opponents of the plant attacked the NRC at a House subcommittee hearing that focused on the agency's March 1 decision to allow full-scale operations at the $6 billion electric generating plant.

The Court of Appeals for the District of Columbia rejected a motion by Seabrook opponents, led by Attorney General James Shannon of Massachusetts and two environmental groups, seeking a stay of the NRC's decision. It did not issue an opinion. The effective date of the NRC order is Thursday.

''We lost,'' Shannon's press secretary Mary Breslauer said. She added, ''The apeal goes forward, though. We still have a substantive appeal that we'll go forward with.''

Brendan DuBois, spokesman for Seabrook's owner-operator, New Hampshire Yankee, said, ''We're very pleased that the court decided there is no

basis to delay the startup of Seabrook.''

''We received this license because we deserved it,'' DuBois said.

But Shannon said the NRC had ignored the issue of the plant's safety and the adequacy of Seabrook's evacuation plans.

''Our concern has always been the safety and protection of the thousands of citizens of our state who live near that plant,'' said Shannon. ''We believe that their right to live safely in their community has not been adequately protected by the NRC, and we're going to proceed with our appeal on those issues the court has not yet considered.''

Appearing before the House Interior and Insular Affairs investigations subcommittee, NRC Chairman Kenneth Carr protested the timing of the meeting, citing the pending appeals court action.

''Your formal request that we appear before you has potentially serious and adverse consequences for the parties to the Seabrook proceeding,'' Carr told the lawmakers. ''To protect the due process rights of the parties, we cannot today respond to questions about contested issues relating to licensing of Seabrook.''

One of the key issues is the utility's emergency evacuation plan for New Hampshire and nearby Massachusetts communities within 10 miles of the plant. The commission ruled it is adequate, while opponents believe people could not be evacuated properly or in time.

''This is a rogue agency,'' Sen. Edward Kennedy, D-Mass., said. ''Over the years, the NRC has taken a series of actions on Seabrook (that) paint a portrait of an agency that has subordinated its primary mission of public health and safety to the preservation of the nuclear energy option.''

Subcommittee Chairman Rep. Peter Kostmayer, D-Pa., said, ''Much as Dr. Frankenstein gave up his own humanity to breathe life into his monster, so the NRC has compromised its duty to protect the safety of the citizens around the Seabrook facility and around our nation.''

For example, he said that in 1984, when Seabrook could not meet the NRC's requirement for a preliminary showing of the adequacy of an emergency plan ''the NRC simply changed its rule to accommodate Seabrook.''

Massachusetts Gov. Michael Dukakis said, ''Neither the public health and safety of the people of Massachusetts nor the people of New Hampshire are being protected by the Nuclear Regulatory Commission.''

#90074u0379 03/15/1990 ~United Press International

NOME, ALASKA (MARCH 15) UPI - Susan Butcher, who won sled dog racing's richest event for a record-tying fourth time, says she may give up the grueling Iditarod to raise a family, but won't retire from the sport.

Butcher mushed into Nome Wednesday in record time, breaking the mark she set in 1987 by nearly 12 minutes. She won $50,000 for beating 70 other mushers - most of them men - over the 1,161-mile Iditarod Trail from Anchorage to Nome.

Butcher said she would like to win the event one more time, then consider retiring from the marathon to raise a family.

''I wouldn't retire from sled dog racing, just maybe from the Iditarod for a few years, maybe forever,'' she said. ''I'm definitely not retiring from dog mushing, but I'm sure beat after this race.''

Butcher's time of 11 days, 1 hour, 53 minutes and 23 seconds easily beat her closest challengers, defending champion Joe Runyan and Lavon Barve, who had been chasing her along the Bering Sea coast.

Stragglers raced to beat blizzards forecast for the last stretch of the Iditarod Trail.

Butcher, 35, of Manley, Alaska, drove her 11-dog team under the gnarled burlwood arch that marks the Front Street finish line at 10:53 a.m. local time to the cheers of onlookers in sunny but 13-below-zero weather.

Butcher tied the record of four Iditarod victories held by Rick Swenson of Two Rivers, Alaska. Swenson was leading early in the race, but lost

valuable time 450 miles out of Anchorage when an angry moose on the trail spooked his dogs, badly injuring one of them. He was running sixth when Butcher crossed the finish line.

Runyan, 41, of Nenana, Alaska, ran the race an hour faster than when he won last year, but it was only good for second place. Runyan finished 2 1/2 hours after Butcher, picking up the $35,000 second prize. Runyan had four more dogs in the final stretch than Butcher but still could not catch his old rival.

Barve, 44, was third, 5 1/2 hours after Butcher, winning $27,500. Unlike the two mushers who beat him, Barve is not a full-time professional dog driver, or musher. He runs a print shop in Wasilla north of Anchorage.

Barve reached the halfway point first, winning $3,000 in silver, but he faded to third in the last 229 miles. Tim Osmar, 23, and Dee Dee Jonrowe, 37, were expected in Nome fourth and fifth.

The $250,000 purse, sled dog racing's richest, is divided among the top 20 finishers, but for the first time this year, every musher who reaches Nome earns $1,000 just for completing the punishing trek across the wilderness.

Of the 70 teams that left Anchorage March 3, eight had dropped out by Wednesday. The struggle for those still on the trail became even more dangerous when the National Weather Service forecast blizzards.

By the time Barve reached Nome late Wednesday afternoon the temperature had crept up to minus 2 degrees, but 25-mph winds created a 44-below wind chill.

Despite her victory, Butcher said she was hampered by having no race-seasoned lead dogs in what she called an ''untested team.'' She said she started with veteran huskies, but injuries and illness forced her to leave them behind at some of the 25 checkpoints.

''It's too bad not have them here with me, because they are such good friends'', she said.

Butcher was embraced by her husband, lawyer-turned-musher Dave Monson, then she hugged each of her 11 huskies, whom she called her best friends.

''I have always picked dogs who I like the best,'' she said. ''It's very easily true they are my best friends and not my best dogs.''

Butcher won the Iditarod in 1986 in record time, and then beat her own record in 1987. She won again in 1988 and last year placed second to Runyan.

Butcher's victory establishes her as the best long-distance musher in the world. This year she also won Minnesota's 500-mile John Beargrease Sled Dog Marathon.

Women have won the Iditarod five out of the past six years in one of the few sports in the world where men and women compete against each other on even terms.

Butcher and Runyan both live in sparsely populated areas of interior Alaska, raising huskies.

BEIJING (MARCH 15) UPI - The Foreign Ministry Thursday dismissed as ''sheer fabrication'' a report that China placed the United States at the top of a secret enemies list, saying Beijing hopes its disputes with Washington can be solved ''as soon as possible.''

CBS-TV reported from Beijing this week that China had placed the United States atop a secret list of its enemies, and that senior leader Deng Xiaoping had warned officials to expect further U.S. pressure on human rights.

The warning was contained in an internal document distributed to Communist Party officials in China, CBS said.

Although there has been no confirmation of the report, the Chinese security authorities are known to have kept a secret list in recent years of nations or groups of people, such as dissidents, considered threats to political stability in China.

But Foreign Ministry spokesman Li Zhaoxing, when asked about the report at a news briefing, said, ''The news you received is sheer fabrication.''

''We express our regret over the irresponsible remarks made by some news agencies,'' Li added.

Relations between Washington and Beijing have been poor since the China's violent crackdown last June on the pro-democracy movement and the nationwide campaign of repression that followed.

Li, however, was relatively conciliatory when asked further about the state of Sino-U.S. relations, saying, ''We hope the disputes of the past year will come to an end as soon as possible.''

He said relations had developed ''smoothly for quite some years'' after their normalization in 1979, but in recent years there have been ''some

difficulties we do not like to see.''

Li added, however, that China ''should not be held responsible for these difficulties.''

Beijing has branded last year's unrest an anti-government rebellion and has repeatedly assailed economic sanctions imposed by the United States in its aftermath.

China was most recently angered by the release of the annual State Department human rights report. The U.S. report's lengthy China section cited widespread and persistent violations of human rights, including repression in Tibet.

(MARCH 15) UPI - Harsh rain, violent wind gusts and flooding Thursday kept the Midwest reeling as residents cleaned up from extensive tornado damage, and a wave of unseasonable heat and humidity showed no signs of letting up in the East.

Showers moved into Illinois early Thursday, threatening to send many of the state's already burgeoning rivers spilling over their banks. Rain was reported in northern and central Illinois and in a band from Joliet to Champaign.

The National Weather Service issued flash flood watches for parts of Illinois where, showers were moving in from Iowa and Missouri.

Dennis Hervey, a state Transportation Department official, said the Des Plaines and Fox rivers were both a half-foot or more above flood stage.

''The bank is full in a lot of points. Any big rainfall could cause problems,'' Hervey said.

Businesses and homeowners in central Missouri cleaned up Thursday after a tornado apparently touched down east of Columbia in Boone County, causing an estimated $100,000 in damage, authorities said.

A violent cloudburst touched down shortly before 6:05 p.m. Wednesday some 5 miles east of Columbia on Interstate 70, damaging a shop that sells animal trailers and a nearby automobile auction.

Initial reports of damage approached $100,000, said Carl Antimi, a police dispatcher.

Showers and thunderstorms that soaked Texas moved into Arkansas Wednesday

night, spawning a tornado in Fordyce that injured five people and caused property damage, officials said.

''It tore up some houses and several trailers, downed some power lines,'' said Deputy Pat Bowers of the Dallas County Sheriff's Office.

Two men were hospitalized at Jefferson Regional Medical Center in Pine Bluff, Ark., and three children were treated for minor injuries, Bowers said.

A line of thunderstorms moved through east and south Texas early Thursday, producing marble-sized hail near Corpus Christi and heavy rain along the upper Texas and Louisiana Gulf Coast.

A powerful low-pressure system pushed into the South, causing thundershowers in Mississippi as fog shrouded portions of north and central Florida. Temperatures dipped somewhat from the record highs earlier in the week, but remained in the 70s and 80s.

New Englanders experienced more unseasonable heat and humidity, and nearly every city in the region reported morning fog or haze. Forcasters said the second wave of record heat this week would burn off the fog.

Pennsylvania saw partly cloudy skies in the west, while the eastern half of the state was clear. Clear skies were reported in southern New Jersey, where lows were also in the 40s and 50s. Maryland saw fair skies and lows in the 50s.

In the West, a strong storm in the central Pacific pumped warm air into rainy Oregon while a a weak warm frontal system moved northward into Washington, bringing the chance of showers.

Rain over northern California tapered off late Wednesday and a high-pressure system building over the area brought gradual clearing and warmer weather.

Snow fell in the higher elevations of northern Utah. By late Wednesday, Provo had acquired an inch of snow, and other locations along the Wasatch Front reported light snow or light rain.

(MARCH 15) UPI - Around the world, around the clock, the latest news from U-P-I...

Results announced in Moscow today show that Mikhail Gorbachev was picked as president of the Soviet Union in parliamentary elections in which he ran UNopposed. The results show that more than one-quarter of the legislators who participated in yesterday's secret balloting voted against the Soviet leader.

Pleas for clemency from around the world fell on deaf ears in Iraq. The Iraqi News Agency says an Iranian-born British journalist convicted of spying was executed today. Farzad Bazoft was sentenced to death by a military court Saturday. Bazoft was on assignment for the London weekly Observer newspaper.

The White House is hoping to have a more definitive word today on reports of a fire at a Libyan plant suspected of making chemical weapons. The Libyan mission at the United Nations and the Bush administration could NOT independently confirm the reports of a blaze at the plant south of Tripoli.

John Poindexter's trial will resume in Washington today with testimony from a lawyer who helped draft a secret presidential order authorizing the sale of arms to Iran. The former national security adviser faces charges of lying to Congress and obstructing its investigation of the Iran-Contra affair.

Vice President Quayle says he has NO intention of meeting Fidel Castro when their paths cross today. But other world leaders say the vice president asked them to urge the Cuban president to stop arming leftist rebels in El Salvador. Quayle and Castro are both attending a presidential inauguration in Brazil.

#90074u0552 03/15/1990 ~United Press International

DOBANDAY, Afghanistan (MARCH 15) UPI - The leader of last week's coup attempt against the pro-Moscow regime denied the government crushed the revolt and appealed to his supporters and Moslem guerrillas to unite and overthrow President Najibullah.

''My supporters are still fighting Najibullah,'' former defense minister Gen. Shah Nawaz Tanai told about 30 journalists Wednesday at a Moslem guerrilla base near Dobanday, about 40 miles southeast of Kabul.

Tanai also repeated charges that the initial coup attempt March 6 failed because Soviet planes bombed his headquarters at Bagram air base, 30 miles north of Kabul.

The news conference was held in a huge cave in a mountainside. An Afghan government warplane bombed the convoy bringing the journalists to the site wounding three guerrillas.

The base of the Hezbe-Islami resistance group of Gulbuddin Hekmatyar was guarded by about 50 guerrillas dressed in battle fatigues who sat on the snow-capped mountains armed with anti-aircraft guns and U.S.-supplied shoulder-fired stinger missiles.

Tanai addressed the journalists along with three other coup leaders, ex-air force chief Abdul Qadir Aqa, former army communications chief Brig. Gen. Ghulam Hazarat and former Politburo member Niaz Mohammad Mohmand. The three officers wore their Afghan military uniforms.

Najibullah says Tanai led last week's coup with backing from Hekmatyar. Rebel military units bombed Kabul, including the presidential palace, and fought street battles with forces loyal to Najibullah in the most serious threat to his regime since the withdrawal 13 months ago of Soviet troops supporting the government.

Official and Western diplomatic sources in Islamabad, Pakistan, have said Tanai and about 20 other generals fled to Pakistan March 7 when it became clear the coup had failed.

Tanai Wednesday denied crossing the border, saying he had remained near Kabul since the coup attempt began. He did say his family had sought refuge in Pakistan. However, guerrillas at the base said they had seen Tanai being driven from the Pakistan to Dobanday Tuesday.

Tanai, a short man in his 40s with a thick mustache, conceded he had lost contact with some of his supporters, but said, ''I am trying to reestablish communications and mobilize my people against the regime.''

He said some fighting was continuing between his rebel troops and forces loyal to Najibullah northwest and northeast of Kabul. He did not elaborate.

''I appeal to all the Mujahideen (guerrillas), my soldiers and all my supporters to join hands and defeat Najibullah,'' he said.

He reiterated his claim first made in a statement released Sunday that he and his fellow coup leaders were not seeking political power but had hoped to end the war and hold elections within six months of taking power.

''The Moslem nation of Afghanistan expected that peace will return after the withdrawal of Soviet troops,'' he said. ''But this hope was not fulfilled largely due to the power-hungry Najibullah. The biggest hurdle to peace in Afghanistan now is Najibullah.

''The Afghans and the armed forces of which I was defense minister wanted an end to the war. But we thought that instead of allowing others to impose a government on us, the country should make its own choice.''

Tanai said, elements of the Afghan army and air force were involved in the rebellion.

''We delivered crushing blows from our bases in the defense ministry headquarters in Kabul and from Bagram air base,'' he said. ''But we were

handicapped when planes from a foreign country bombed our positions in Bagram and we were hit by 'Scud' missiles.''

He later said the ''foreign planes'' were Soviet. Hekmatyar last week also accused the Soviets of bombing Bagram, and U.S. Assistant Secretary of Defense John Kelly has told a congressional committee in Washington that there were unconfirmed reports of Soviet aircraft intervening at the base.

Tanai condemned ''Soviet interference'' in Afghan affairs. He said he said had no previous contact with the Hezbe-Islami guerrillas, ''except on an individual basis.'' But he said he had offered his expertise and experience to the guerrillas to help them defeat Najibullah.

Tanai was a professional soldier and a hero of the 1978 communist revolution who rose through the ranks to become army chief of staff. He was appointed defense minister by Najibullah in 1987.

The Soviets invaded in December 1979 to support the first of a series of Marxist rulers against anti-communist Moslem rebels. Najibullah came to power in 1986.

The Soviet Union withdrew its more than 100,000 troops last year and Najibullah's Marxist administration defied predictions it would fall to the U.S.-backed rebels within months of the pullout.

#90074u0554 03/15/1990 ~United Press International

(MARCH 15) UPI - Engineers are busy at Cape Canaveral, working through the night to prepare the shuttle Discovery for the slow crawl to the launch pad this morning. Discovery is scheduled to take off April 12th on a flight to put the one-and-a-half-BILLION-dollar Hubble Space Telescope in orbit.

In other space news, the U-S Space Command in Colorado is tracking the second stage of a Titan-3 rocket, which apparently is in an UNstable orbit. The rocket failed after carrying a 150-Million-dollar satellite into space yesterday. Officials are now considering ways of salvaging the relay station.

California's attorney general says a controversial French-made abortion pill should be made available to American women if tests prove it to be safe. John Van de Kamp says the decision on the abortion-inducing drug R-U 486 should be made on medical, NOT political grounds.

A federal study concludes that the United States has fallen behind other industrial nations when it comes to child-care. Government researchers are calling for a complete overhaul of the nation's child-care system, saying

among other things, federal standards should be set for day-care centers.

Susan Butcher easily beat her closest challengers into Nome, Alaska, yesterday, winning the grueling Iditarod sled dog race. Butcher won the race for a record-tying fourth time, taking 11 days, one-hour, 53 minutes and 23 seconds to travel from Anchorage to Nome.

#90074u0573 03/15/1990 ~United Press International

ANGELS CAMP, CA (MARCH 15) UPI - Africa's Goliath frogs, 10-pound monsters capable of soaring a whopping 40 feet, are welcome at the Calaveras County Jumping Frog Jubilee if they can leapfrog state import regulations, organizers said.

''If they can sit on the (jumping) pad, let 'em come,'' Ike Moore, senior member of the Calaveras County Fair Board, said during a two-hour meeting Wednesday over whether the huge foreigners should be allowed to compete in the annual contest.

The nine-member board voted unanimously to allow the Goliath frogs despite fears that they might ruin the 64-year-old competition, which was inspired by a Mark Twain short story of 1865, by eating other amphibians and possibly injuring spectators.

Chairman Will Fullaway promptly telephoned importer Andy Koffman of Seattle to inform him of the decision. Koffman still must gain permission from state authorities, who are worried about the possible impact on the environment if any of the 3-foot frogs escape.

Koffman had visited Angels Camp in California's historic Mother Lode gold rush country earlier this month and liked what he saw. He promised to return with 20 or 30 giant frogs for the May 17-20 competition, depending on possible state import restrictions.

''You will see me at Calaveras,'' he promised. ''I'm quite sure of that.''

The board voted to allow the Goliath frogs after Lew Davis, chief biologist for the state Food and Agriculture Commission discussed at length what was known about the big hoppers.

The frogs have no teeth and are not toxic, Davis said. But they are big and fast and include fish in their diet. However, it is not likely that they would pose a serious environmental hazard if some escaped into California's waterways.

But, ''We came to the same conclusion, that there was no danger from the hyacinth. Boy, were we wrong,'' Davis said of the plant, a variety of

which clogs waterways.

Contest promoters are optimistic and local business people formed the group Let Every Amphibian Participate - or LEAP - to support Koffman's bid.

''I think they have no choice but to allow the frogs,'' the jubilee's publicist Jewel Lucken said Wednesday. ''They have no rule except a minimum size of 4 inches. There is no maximum size.

''Mr. Koffman was here and he feels that he has some of his smaller frogs that will fit on the 8-inch pad. If this is true, we have no choice but to let him jump those frogs.''

The contest is to see which frog covers the greatest distance in three jumps from a launch pad in the center of a circle. The African frogs would have a huge advantage since they are nearly three times the size of common bullfrogs, who have established the current record at 19 feet.

The Jumping Frog Jubilee began in 1926, inspired by Twain's ''The Celebrated Jumping Frog of Calaveras County.''

''Mark Twain would have just loved this whole thing,'' said Fullaway.

#90074u0660 03/15/1990 ~United Press International

(MARCH 15) UPI - Mikhail Gorbachev is sworn in as Soviet president... a journalist is executed in Iraq... reports of a fire at a Libyan chemical plant... and the space shuttle Discovery moves to the launch pad. Those stories and more, next from U-P-I.

Mikhail Gorbachev once again has been elected president of the Soviet Union under a greatly revamped presidency with broader powers.

After taking the oath of office, Gorbachev vowed to use his strengthened powers to squash the bureaucrats blocking his reform drive.

Gorbachev, who ran UNopposed... was elected in secret balloting late last night by the Congress of People's Deputies. The results... which were announced early today... show that one-thousand-329 lawmakers voted for Gorbachev... and 495 voted against him.

Soviet Premier Nikolai Ryzhkov and Interior Minister Vadim Bakatin also were nominated for president... but they withdrew from the balloting.

The new Soviet presidency was created at the extraordinary session of Congress convened by Gorbachev. It gives him broad new powers, which he says are necessary to save his reform drive known as ''perestroika.''

The new powers will allow the Soviet president to declare states of emergency and veto laws... but restrict him to two five-year terms. The Congress also has the power to impeach him.

The decision for a parliamentary election for president ran against the wishes of the Soviet people. A nationwide poll on Soviet television said 84 percent of the people wanted the post filled by a general election.

#90074u0673 03/15/1990 ~United Press International

(MARCH 15) UPI - Barriers were erected around the Iraqi Embassy in London today... following word that Iraq had executed an Iranian-born British journalist.

Britain's ambassador says he's ''horrified'' by today's execution of Farzad Bazoft, saying his last-minute appeals for mercy were ignored. Harold Walker says relations between London and Baghdad will be severely restrained.

In London, Observer newspaper editor Donald Trelford expressed outrage, asking what kind of- in his words- ''monsterous regime'' could ''kill a reporter for being a reporter?'' Bazoft was on assignment for the Observer when he was arrested last September.

Farzad Bazoft was sentenced to die by a military court Saturday following his conviction on espionage charges. Bazoft was tried along with a British nurse, who was sentenced to 15 years of hard labor.

Both were accused of driving to an unauthorized military complex north of Baghdad where an earlier explosion allegedly killed hundreds of people.

The Iraqi News Agency is NOT saying how Farzad Bazoft was executed, but punishment for such crimes is usually carried out by firing squad.

Bazoft's execution had been scheduled for Saturday. There was NO immediate word on why the execution was moved up.

The White House says foreign states have informed Washington that a fire of unknown origin and severity hit a suspected chemical weapons plant in Libya.

Neither the Libyan mission at the United Nations NOR the Bush administration could independently confirm reports of fire at the Rabta plant, which is about 40 miles south of the Libyan capital of Tripoli.

Network news reports say the plant burned to the ground.

The Bush administration has accused Libya of using the plant to produce mustard and nerve gasses. A Kuwaiti newspaper said yesterday the United States was preparing to bomb the plant... but offered NO substantiation. The White House denied that the United States had anything to do with the fire.

The White House says it's hoping that U-S intelligence operations would have definitive word on the situation later today.

Diplomatic sources say Libya had closed its borders... which indicates Libyan authorities do NOT want people entering or leaving the country.

-30- 2442

#90074u0684 03/15/1990 ~United Press International

(MARCH 15) UPI - Engineers are working through the night to prepare the space shuttle Discovery for its six-hour trip to launch pad 39-B in preparation for an April 12th lift-off.

Discovery's mission is one of the most important of the shuttle era. Its payload is the one-point-five-BILLION-dollar Hubble Space Telescope.

The Hubble telescope is NOT yet in Discovery's cargo bay. It's scheduled to be moved to the launch pad next Monday for installation.

The Hubble telescope will allow astronomers to look deeper into the cosmos than ever before and with greater clarity because it will NOT have to contend with Earth's atmosphere.

The telescope is expected to help scientists learn more about the conditions that existed in the universe shortly after the big bang explosion believed to have given birth to the cosmos some 15-BILLION years ago. Scientists say it also may be able to find direct evidence of planets circling other stars.

Things are NOT going as well for the owners of a 150-Million-dollar communications satellite that was launched yesterday from Cape Canaveral. Officials say Intelsat-6 is stranded in a useless orbit. Officials are considering a variety of options to salvage the relay station... including the feasibility of a shuttle rescue flight.

Dan Quayle says he woN'T meet Fidel Castro when their path cross today in Brazil. But the vice president does have a message for the Cuban president.

Spanish Prime Minister Felipe Gonzalez and Argentine President Carlos Menem say Quayle asked them to speak to Castro. Both say they were asked to urge Castro to stop sending weapons to leftist rebels in El Salvador.

Quayle... talking at a news conference in Buenos Aires... said ''Sooner or later change will come to Cuba.''

Quayle, Castro and other leaders are in Brazil for today's presidential inauguration of Fernando Collor de Mello.

But Collor de Mello will NOT be enjoying any sort of a honeymoon following his swearing in as president of South America's largest nation.

Collor de Mello is expected to announce his program to confront Brazil's hyper-inflation immediately after the ceremony. The plan is expected to include government cost-cutting measures and tax increase.

#90074u0689 03/15/1990 ~United Press International

(MARCH 15) UPI - Oliver North wrapped up four days of testimony yesterday in John Poindexter's Iran-Contra trial in Washington.

The former Marine conceded that Poindexter, his former White House boss, was heavily involved in the worst scandal of the Reagan presidency.

Prosecutor Dan Webb questioned North in trying to counter defense claims that North often acted behind Poindexter's back in selling arms to Iran and providing weapons and money to Nicaraguan rebels.

North told Webb that Poindexter knew about the secret plan to help the Contras, and that he was involved in trying to conceal the Iran-Contra affair.

Poindexter, Reagan's former national security adviser, is charged with lying to Congress and obstructing its investigation of the scandal.

The trial will continue today with U-S District Judge Stanley Sporkin taking the stand. Sporkin is a former lawyer for the C-I-A who helped draft a secret presidential order authorizing the sale of arms to Iran.

#90074u0730 03/15/1990 ~United Press International

WEST PALM BEACH, FL (MARCH 15) UPI - Turtle life begins as soon as an egg is laid, a judicial panel said in rejecting an egg poachers' defense that laws protecting ''marine life'' did not apply until the turtle eggs hatched.

James A. Bivens was the first person in Florida to be fined under an obscure state law allowing a penalty of $100 ''per unit of marine life.''

Palm Beach County Circuit Judge James Carlisle upheld a $109,300 fine against Bivins Wednesday - $500 plus $100 per egg for stealing 1,088 sea turtle eggs from John D. MacArthur Beach State Park. Bivens also was sentenced to 60 days in jail.

Bivens was convicted a year ago in county court. He appealed the case to circuit court, arguing that ''marine life'' begins only when the eggs hatch. Prosecutors disagreed.

Carlisle and two other circuit court judges considered the case, expounding at great length on Florida's bygone tradition of cooking with turtle eggs and other practices that contributed to the endangered status of sea turtles.

''The reputation turtle eggs have as an aphrodisiac also contributes to their peril, causing men to risk fine and imprisonment to harvest the eggs '' Carlisle noted.

Utlimately, the judges ruled that eggs had to be what legislators had in mind when they chose the phrase ''unit of marine life.''

''Turtle dandruff, if such there be, is no more a unit of turtle life than a discarded snake skin is a python,'' Carlisle wrote. ''We conclude that marine turtle eggs are units of marine life.''

Bivins's lawyer, Louis Carres, said he had not decided whether to appeal further.

#90074u0787 03/15/1990 ~United Press International

WASHINGTON (MARCH 15) UPI - The number of initial claims for state unemployment insurance benefits declined by 3,000 to 343,000 for the week ending March 3, the Labor Department reported Thursday.

The revised figure for the previous week held steady at 346,000 initial claims, the department's Employment and Training Administration announced.

The government also reported that during the week of Feb. 24 the unadjusted rate of insured unemployment remained unchanged at 2.8 percent, with 2,945,100 workers claiming state benefits, a small increase of 19,100.

#90074u0819 03/15/1990 ~United Press International

(MARCH 15) UPI - Prices on the Tokyo Stock Exchange rebounded sharply Thursday on buying by investment trusts of domestic demand-related issues,

but most investors stayed on the sidelines concerned over the Japanese yen and an expected hike in interest rates.

The blue-chip Nikkei Stock Average of 225 selected issues, which fell 268.44 points Wednesday to its lowest level in a year, rebounded 319.51 points to 32,671.64. The broader-based Tokyo Stock Exchange Price Index of all major listed stocks rose 6.94 points to 2,427.64 yen after tumbling 36.40 points Wednesday.

Trading continued light, with an estimated 470 million shares changing hands, compared with 487 million Wednesday. Advances outpaced declines 518 to 408, with 199 issues unchanged.

Traders said investment trusts and some individual bargain hunters swooped in on domestic demand-related issues which were among the biggest losers in three straight sessions of plunging prices in which the Nikkei Average had lost 1,600-points, or about five percent of its value.

But trading again was dampened by uncertainly over the Japanese yen and expectations that a long-awaited hike in Japan's key interest rate could occur by Friday. The dollar rose against the yen on the Tokyo Foreign Exchange, closing at 152.47 yen, up 0.27 from Wednesday.

"Many people had expected the market to turn lower today because it was the last trading day for trust accounts to close their books for the year. But it didn't happen," said a trader for Nomura Securities.

"The selling pressure was outweighed by buying spearheaded by investment trusts which went after domestic demand-related issues," he said. But he added, "Individual investors, financial institutions and corporations largely did not participate in the buying."

On the trading floor, Japan Metals and Chemicals paced the actives, followed by Nippon Steel, Nippon Mining, Iseki, and Sato Kogyo.

Constructions, real estates and transporations closed higher along with nonferrous metals and machineries, On the losing end were high-priced, high-tech issues, such as Fanuc and Kyocera, paper pulps, chemicals and precision instruments.

Elsewhere in Asia, stock prices closed higher in moderate trading on the Hong Kong Stock Exchange, boosted in part by speculative buying in secondary issues.

The key Hang Seng Index, which lost 6.39 points Wednesday, gained 11.58 points to 2892.81.

The utilities sector recorded the largest gains, climbing 49.58 points

while properties rose 3.06, industrials rose 6.83 and financials closed down 5.88 points. Volume amounted to 1.26 billion shares, up from 1.15 billion shares traded Wednesday.

Brokers said that although the index had gone through the psychologically important 2900-point barrier in early trading, there was selling resistance at the higher level.

Prices closed slightly higher in light trading on the Singapore Stock Exchange as bargain hunters pushed prices higher.

The Straits Time Industrial Index, which eased 0.87 points Wednesday, rose 4.23 points to 1569.04. The narrower All Singapore Index rose 1.41 points to 429.45.

Turnover amounted to 76.7 million shares, up slightly from the 74 million shares traded Wednesday.

Analysts said stronger performance in Tokyo and Malaysia helped boost investor confidence in the market.

Brokers said investors drew some reassurance from Tokyo's rebound and on news that the backlog of uncleared shares on the Kuala Lumpur Stock Exchange has been reduced.

Singapore Land warrants paced the advancing issues, followed by Magnum Corp., Seaview Hotel, Shangri-la Hotel and Sembawang Shipyard.

Singapore Airlines (foreign shares) led the declining issues, followed by ASEAN Fund (U.S.), Wearne Brothers and Metro Holdings.

In Australia, stock prices closed higher in moderate trading on the Sydney Sharemarket boosted by some bargin hunting in the blue-chip sector.

The All Ordinaries Index, which eased 1.9 points Wednesday, rebounded 14.2 points to 1572.7.

Turnover amounted to a strong 168.1 million shares, more than double the 82 million shares traded Wednesday.

Analysts said bargain hunting in the blue-chip stocks boosted prices, with rises occurring across the the board.

On the trading floor, BTR Nylex gained ten cents to $6.02, ANZ Bank gained ten cents to $5.26, Westpac Bank added six cents to $5.22 and National Bank gained eight cents to $6.26.

Brambles gained five cents to $13.05, Pacific Dunlop gained five cents to

$4.91, BHP Mining gained eight cents to $9.64 and Renison Gold added eight cents to $9.80.

#90074u0855 03/15/1990 ~United Press International

LONDON (MARCH 15) UPI - Stock prices were slightly higher in light trading Thursday on the London International stock exchange.

The Financial Times 100-stock index, which added 1.6 points Wednesday, was up 9.0 points to 2,235.1. The narrower top 30 industrial average was ahead 8.4 points to 1,767.0.

Volume amounted to around 193 million shares, compared with 201 million shares traded during the same period Wednesday.

Analysts said a string of favorable earnings reports helped to boost prices but noted volume remained sluggish as many large institutional investors chose to step to the sidelines ahead of next week's release of Britian's fiscal 1991 budget.

On the corporate front, Glaxo Holdings, a major pharmaceuticals group, reported its latest six-month earnings climbed 27 percent due in part to strong growth in the United States of its ulcer drug, Zantac, which showed a 35 percent rise in sales. Glaxo gained 23 cents to $11.99 on the news in active trading.

Rolls-Royce PLC, the jet and turbine engine maker, reported earnings were up 39 percent in 1989 and said its order book stands at a record $8.7 billion, indicating strong demand for its products. Rolls-Royce shares gained four cents to $2.92 on the news.

Elsewhere, United Biscuits added eight cents to $5.12 after reporting its earnings climbed 11 percent in 1989.

#90074u0868 03/15/1990 ~United Press International

(MARCH 15) UPI - Mikhail Gorbachev received a standing ovation today before taking the oath of office as president of the Soviet Union. The election results were announced today after the opening of the Congress of People's Deputies in Moscow. Even though he had NO opposition, more than one-fourth of the lawmakers voted against Gorbachev in the secret balloting held late yesterday.

Britain's ambassador to Iraq says he does NOT know what his nation's response will be to today's execution of a journalist convicted of spying. But the diplomat says relations between Baghdad and London will be severely strained. British Foreign Secretary Douglas Hurd is expected to make a statement later today on the execution of Iranian-born British reporter Farzad Bazoft.

The White House says it has heard reports of a fire at a Libyan plant suspected of making chemical weapons. But spokesman Marlin Fitzwater says the administration is NOT prepared to speculate on the cause of the reported blaze at the Rabta plant about 40 miles south of the Libyan

capital of Tripoli. Fitzwater said he hopes to have more information on the situation later today.

Oliver North ended four days of testimony in John Poindexter's Iran-Contra trial yesterday in Washington. North backed up claims by prosecutors that Poindexter was heavily involved in the affair that proved to be the Reagan administration's worst scandal. The former national security adviser is charged with lying to Congress and trying to hinder its investigation.

#90074u0879 03/15/1990 ~United Press International

(MARCH 15) UPI - China is dismissing as ''sheer fabrication'' a report that it put the United States at the top of a secret enemies list. In fact the Foreign Ministry in Beijing says it hopes to solve disputes with Washington ''as soon as possible.'' Today's word follows a network report that China named the United States as an ememy in a document to Communist Party officials.

Transportation Secretary Skinner says he's hoping to see a quick resolution to the nationwide Greyhound strike. Skinner describes as a ''good sign'' that both sides are willing to take part in federally-mediated talks. Greyhound UNexpectedly decided to continue contract talks to end the bitter and sometimes violent walkout by nine-thousand workers.

The Nuclear Regulatory Commission's granting of a full operating license to the Seabrook plant in New Hamphsire takes effect today. But opponents of the plant say they will pursue further appeals, despite yesterday's upholding of the N-R-C decision by a federal appeals court. But in the words of Seabrook's owner-operator ''We received this license because we deserved it.''

A California State University researcher says she is concerned about people using questions instead of condoms in trying to protect against AIDS. Susan Cochran says a survey of college students found that people often lie about their histories to potential sexual partners. Cochran says one third of the men and 10 percent of the women questioned said they told a lie to get sex.

#90074u0880 03/15/1990 ~United Press International

MIAMI (MARCH 15) UPI - Shareholders have filed three class actions suits against General Development Corp., alleging that fraud and mismanagement by the land company's officers has cost them as much as $64 million in four months. GDC was trading at $11 a share in December. It closed Wednesday at $3.125.

The lawsuits, filed Wednesday, could be consolidated into a single suit in U.S. District Court in Miami, said Michael Donovan, a partner in the Philadelphia law firm Greenfield & Chimicles, which filed one of the suits. The other two were filed by Berger & Montague, also of Philadelphia, and Goodkind, Wechsler, Labaton & Rudoff, of New York.

The suits charge that General Development misled investors by continuing to issue rosy pronouncements while it really was suffering "a massive liquidity crisis."

GDC had no immediate response. Its interim chairman, Charles Simons, has been trying to talk lenders into helping the company weather a cash crunch The Miami Herald reported.

Donovan said that even if GDC collapses, the plaintiffs could collect from the company's liability insurer and from the individual officers named in the complaint.

Nine current and former officers and the company itself are targets of a federal fraud and racketeering investigation that has focused on General Development's pricing and disclosure policies. GDC disclosed in February that the company and its officers may face criminal charges as the result of the probe.

The company, which is building nine residential communities in Florida, has been dogged in recent years by a number of lawsuits filed by homeowners who allege GDC made false representations to induce them to buy property at inflated prices.

Earlier this week, General Development said it was suffering severe financial problems as a result of the investigation. In two unrelated class actions, GDC has been in settlement negotiations for weeks with attorneys for tens of thousands of homesite buyers. In late January the company settled 105 suits filed by owners of GDC homes. The settlements totaled an estimated $3 million.

#90074u0890 03/15/1990 ~United Press International

NASHVILLE, TN (MARCH 15) UPI - The police chief promised a speedy investigation Thursday into whether a white patrolman was justified in killing a mentally impaired black woman by shooting her four times from his squad car.

Police Chief Robert Kirchner met with NAACP leaders in an attempt to calm racial tensions after Tuesday night's shooting and pledged that investigators will turn over evidence to a grand jury as early as next

week.

''We want to get to the bottom of it and we want to get to the bottom of it very quickly,'' Kirchner said. ''I ask that all who question be patient.''

Police officer Bill Sneed, a six-year veteran of the force, went to the mostly black Bordeaux neighborhood to answer a call for a domestic disturbance at the home of Jacques Brooks, 26.

As he pulled up to her home in his squad car, she approached with a 5-inch kitchen knife, police said. Sneed called for her to stop, then fired his 9mm semi-automatic pistol five times through his open car window, hitting her four times, police said.

''People are upset, not just black people and not just white people but the whole community,'' said Joseph Scales, president of the NAACP's Nashville chapter.

Deputy Police Chief John Ross said Sneed, who was suspended with pay, told investigators he felt his life was in danger.

Police said they could not explain why Sneed did not roll up his car window and drive away, but Ross said, ''We understand that he retreated as far as he could in the car. He couldn't get any farther away. He was virtually defenseless.''

Neighbors and friends said Brooks, who had been mentally impaired since suffering a diabetic coma four years ago, phoned police because her uncle had been drinking and teasing her as she cooked dinner.

Sneed told investigators that Brooks met him in the street and made a threatening gesture with the knife. But Brooks's sister, Tequila, said, ''She kept the knife down by her side the whole time.''

''She said she was going to kill him, talking about my uncle. He said, 'No you're not.' And she said she was,'' Tequila Brooks said. She said Sneed then opened fire.

Barbara Harris, the principal of an elementary school in the neighborhood, called the shooting ''an assault on people's sensibilities. Certainly most of our neighbors are feeling a kind of outrage that the shooting was absolutely senseless.''

Mayor Bill Boner said the grand jury investigation ''will certainly ensure that there will be no coverup of anything that took place.''

PARIS (MARCH 15) UPI - The hood revolution that has seized the Paris fall-winter ready-to-wear fashion shows burst out Thursday in a new form - miniature hoods in the Commes des Garcons parade for media and buyers.

Japanese designer Rei Kawa Kubo, in her ninth year of showing her unique styles in Paris, made grapefruit-sized hoods that bobbed on the backs of long white tunics over long slim black skirts.

Another little hood decorated one baggy top over transparent black bloomers.

For the second season the artistic designer buried her black-and-white classics with colors as unusual as her styles. Chestnut brown, misty blue and pale apricot were used for short velveteen dresses or little skirts.

Some outfits with sheer jackets combined three hazy colors.

Clumps of pleated ruffles clustered on the fronts or backs of long dresses.

For most of her angular, uneven creations, she used mainly unwoven fabrics such as a bonded, synthetic-like packing material for loose short dresses. An exception was a real velvet shimmering in delicate stripes for long dresses with long, multi-colored scarves wrapped around the neck or waist.

Ecological fake furs, another trend in the shows of 92 designers, swung down the runway of Angelo Tarlazzi. Long bathrobe coats in black, burgundy or toast were breathtaking.

He also put false black fur on short and snug red suits.

Stretch fabrics are still another trend in the 10-day style parades, most of them under tents in the Louvre Museum courtyard.

Tarlazzi hugged every cell of the body with black stretch, micro-mini dresses and shirred skirts. Long black dresses with long-sleeves embroidered with glitter-like rows of bracelets were applauded. Gold leather embroidery sparkled on navy blue stretch suits.

But most of the bare, short-evening dresses would have looked right at home hanging around corner street lights.

Giant colored hearts were sewn on the side, front and even rear-end of tiny black mini-dresses.

TOKYO (MARCH 15) UPI - Commerce Secretary Robert Mosbacher met with Japanese Prime Minister Toshiki Kaifu Thursday and said Japan has finally caught on to the depth of U.S. concern over trade issues and appears ready to act.

''I feel that we have definitely gotten their attention,'' Mosbacher told United Press International after a 25-minute meeting with Kaifu.

''They now know the president and his Cabinet and the Congress and the American people consider this a high profile, high-on-the-agenda problem '' Mosbacher said.

The United States has been pressuring Japan to open its markets to specific American goods - including satellites, supercomputers, lumber products and computer chips - and to change basic Japanese economic

practices that contributed to the nearly $50 billion annual U.S. trade deficit with Japan.

President Bush dispatched Mosbacher to Tokyo 10 days after Bush and Kaifu met in Palm Springs, Calif., in a summit that focused on the festering trade issues.

Kaifu pledged to Bush to make opening Japan's markets a top priority of his administration, but was criticized in Congress for not providing any specific proposals.

Sen. John Danforth, R-Mo., who is in Japan to discuss the trade imbalance, warned Japanese leaders not to anger Congress by delaying a solution to the trade issue.

''It would be a mistake to underestimate the seriousness with which Congress addresses the trade difficulties we have,'' Danforth said at a news conference at the U.S. Embassy.

The recent flurry of American pressure on Japan has forced Kaifu to hasten preparation of a proposal for action.

Kaifu held an emergency meeting with his three top Cabinet ministers late Wednesday night to draw up a detailed package of measures to remove Japan's trade barriers, Japanese officials said.

Kaifu reportedly told the ministers he wants the package ready by this weekend.

But ministry officials said the early deadline would be difficult to meet.

''We are still a long way off from fashioning any clear idea on what the draft (proposal) will be,'' said Yukiharu Kodama, the vice minister for trade.

Mosbacher praised Kaifu's efforts but said he has not seen the proposals.

''They are obviously working on it,'' he said. ''It is too early to tell (if it will be acceptable).''

''I hope at least on an interim basis they will come up with enough to make a show of sincerity and substance,'' Mosbacher said. ''We are going to have to wait and see.''

U.S.-Japanese relations have reached a crisis stage over trade issues, according to statements Wednesday by Foreign Minister Taro Nakayama and Chief Cabinet Secretary Misoji Sakamoto.

Mosbacher said the trade talks are aimed at avoiding a crisis.

''When you lay out the problem and you take it out from under the covers and air it out, it is an opportunity to improve relations,'' Mosbacher said. ''If it had stayed smoldering underneath, we would have really been in trouble.''

Mosbacher said he senses a broad willingness to change that was absent the last time he visited Tokyo in September.

''In my visits with the political side and government and the private sector, there is just no comparison to the last time,'' he said.

#90074u0957 03/15/1990 ~United Press International

WARSAW, POLAND (MARCH 15) UPI - Poland hailed as a ''great victory'' the decision allowing it to participate in talks on the reunification of Germany and said Thursday it marked the true end of the post-World War II pact that chained the East European country to the Soviet yoke.

Poland had demanded a seat at the negotiating table with the four World War II allies - the United States, Britain, France and the Soviet Union and the two Germanys - to ensure that a new, reunified Germany would guarantee the current border between East German and Polish territory.

In a statement issued on the first day of the talks Wednesday in Bonn, West Germany, the four allied powers said Poland will be invited to join the talks ''as soon as questions which particularly concern its borders are discussed.''

''It is the first great victory of independent Polish diplomacy,'' the government spokeswoman, Malgorzata Niezabitowska, said in an interview with United Press International in reaction to the decision in Bonn. Poland favors German reunification.

''It is the real end of Yalta,'' she said of the 1945 allied agreement in which Poland and other East European countries were put under Soviet domination.

''The four powers decided (about Poland's fate) at Yalta without us and now they confirmed that, as regards matters vital to us, we should take the responsibility into our own hands,'' the spokeswoman said.

The Yalta pact agreed to Soviet domination of Poland even though the country, which had been overrun by Nazi Germany at the opening of the war in 1939, was allied with Britain, the United States and the Soviet Union. About 6 million Poles died during the war and Poland sustained extensive war damage.

Polish troops fought alongside the Allies and took part, with the Red Army in the battle of Berlin.

The April 1945 Yalta agreement, which was followed in July that year by the Potsdam accord, fixed the Polish border on the Oder and Neisse rivers, incorporating into Poland a big chunk of German land. The area was lost by lost Poland over 600 years because of German expansion eastward.

Poland also lost its eastern territories, which were taken over by the Soviet Union.

Poland's Solidarity-led government, in power since August, is the first non-communist government in the Soviet East bloc in 40 years. It has pledged to remain in the Warsaw Pact military alliance - NATO's eastern counterpart - but demands equal rights as a partner in the alliance with the Soviet Union.

Niezabitowska said the vague stance taken by West German Chancellor Helmut Kohl about the final status of Poland's western border prompted Warsaw to demand a seat at the negotiating table and to ask for a treaty between the two German states and Poland before reunification.

''We want the treaty to be initialed before the unification because only in this way can our interests can be secured,'' she said.

Niezabitowska said the decision made by four allied powers Wednesday was of major significance for Poland.

''The four powers took a right decision, and it is very important for us '' she said.

A rejection of Poland as a participant would have been ''not only a disappointment, but also an indication that the four powers would not have understood the new situation (in Europe),'' the government spokeswoman said.

#90074u1000 03/15/1990 ~United Press International

VATICAN CITY (MARCH 15) UPI - The Vatican and the Soviet Union have decided to set up permanent diplomatic contacts just short of full diplomatic relations, the Vatican and the Soviets announced Thursday.

It said the Holy See - in effect, Pope John Paul II - and the Soviet government - in effect, President Mikhail Gorbachev - will exchange official representatives of ambassador rank ''at a personal level.''

''This does not mean full diplomatic relations,'' chief Vatican spokesman Joaquin Navarro Valls told reporters. ''But it is an exchange of official representatives at a personal level.''

In Moscow, the official Soviet news agency Tass said in a brief announcement that the Kremlin and the Holy See have agreed to exchange official representatives, initially without permament residences.

The setting up of ''permanent diplomatic contacts'' between the Vatican and the Soviet Union follows the Holy See's re-establishment of full diplomatic relations with Poland and Hungary. Full relations with Czechoslovakia and Romania are expected to be established soon.

The Vatican announced its representative in Moscow will be Archbishop Francesco Colasuonno, until now the Vatican's roving ambassador with special responsibility for Eastern Europe.

Colasuonno will have the personal rank of apostolic nuncio, or papal ambassador, and the Soviet representative - still to be named - will have the personal rank of ambassador extraordinary, the Vatican said.

A brief formal statement issued by the Vatican press office recalled the pope and Gorbachev, during their historic meeting in the Vatican Dec. 1, ''agreed to give an official character to the contacts between the Holy See and the Soviet Union.''

It said the purpose was ''to facilitate a permanent dialogue on matters of common interest and to contribute to a useful cooperation in the international field.''

The arrangement with the Soviet Union would be similar to that between the United States and the Vatican before they re-established full diplomatic relations Jan. 10, 1984, for the first time in 117 years.

Starting with President Roosevelt shortly before World War II, most American presidents sent ''personal representatives'' to the Holy See, although they did not have ambassadorial rank.

It also was similar to the arrangement with the pope's nativa Poland before it re-established full relations with the Holy See in July. Warsaw kept an official in its Rome embassy who maintained ''permanent working contacts'' with the Vatican.

After Gorbachev's Dec. 1 meeting with the pope, the Vatican indicated why it would be premature to establish full diplomatic relations with the Soviet Union.

It said the pope expressed ''the hope that a new Soviet law on matters of religious freedom effectively guarantees all believers the possibility to practice their faith.''

In his speech to the pope during the audience, Gorbachev said a ''law on freedom of conscience'' was under study by the Soviet Union and pledged that members of all religions would ''have a right to satisfy their spiritual needs.

#90074u1039 03/15/1990 ~United Press International

BATON ROUGE, La. (MARCH 15) UPI - Louisiana State officials have refused to comment on reports that basketball star Chris Jackson told his teammates he is turning pro after the current season.

WBRZ television reported Wednesday Jackson told teammates of his decision Sunday. LSU is in Knoxville, Tenn., to face Villanova in the first round of the NCAA Tournament Thursday night.

''My response would be very simple,'' said Coach Dale Brown of the report. ''First of all, (center) Stanley (Roberts) is going to Europe, Chris is going pro and San Antonio is drafting (forward) Shaquille (O'Neal).

''And I'm becoming a trappist monk.''

Despite those statements, Brown did not deny that the 6-foot guard was turning pro.

''You don't know. Somebody can say they're staying and they're going anyway,'' Brown said.

The station said the sophomore reached the decision after talking to Brown his mother and Bert Jenkins, his former high school coach.

''I haven't talked to Chris in two months,'' Jenkins said. ''If there is any report that I was involved in this, that is absolutely false.''

Should he turn pro, Jackson is projected as first-round draft choice who could land an NBA contract worth up to $10 million, according to some sports agents.

Jackson burst onto the scene last year, setting an NCAA freshman scoring record, averaging 30.2 points per game. He also became the first freshman ever named a UPI All American.

The Gulfport, Miss., native had an erratic season this year, but still managed to average 28.7 points per game to lead the Southeastern Conference. He was named a second-team All American this week.

#90074u1050 03/15/1990 ~United Press International

CHARLESTON, WV (MARCH 15) UPI - The West Virginia Board of Education agreed Thursday to seek a court ruling to force striking teachers to return to the classroom.

The move came a day after Superintendent Hank Marockie ordered schools closed Thursday and Friday, in hopes of letting tempers cool.

The board also agreed Thursday to consider other options should the strike continue, including allowing volunteers to man chalkboards and increasing the size of classes.

The board also voted to recommend that local school officials begin notifying striking teachers, who are county employees, that they must return to work or face disciplinary actions. Marockie said local school boards have three options should the educators continue their walkout: fire them, suspend them, or reprimand them.

The board meeting was called after the West Virginia Education Association rejected Gov. Gaston Caperton's seven-point plan for ending the illegal walkout, which began March 7 over higher pay and improvements in retirement and insurance benefits.

On Wednesday night, the governor made a televised address on the strike in which he expressed sympathy with needs of the striking teachers but did not hint at what action he might take.

After the address, Caperton told The Charleston Gazette the teachers would face losing their jobs if they do not return to work Monday.

''We've offered a very fair program, and it's time for them to go back into the classroom. If they don't, under the laws of the state, they aren't going to have jobs.

''The law is very clear about what it instructs county (school) superintendents to do,'' Caperton told the Gazette. ''I encourage them to follow the law, which says if they are not in the classroom, they don't have a job.''

David Haney, the WVEA's assistant executive director, called Caperton's threat to fire strikers ''a shame.''

''You can't get teachers to come into the state the way it is,'' Haney said. ''We're losing teachers daily. If he gets rid of all of them, who are you going to replace them with?''

Earlier Wednesday, about 8,000 teachers rallied on the state Capitol steps.

''The governor's offer ... is inappropriate and insulting,'' said WVEA

President Kayetta Meadows. ''We won't take it. ... His offer ignores even the basic needs of teachers and all school employees of West Virginia.''

Caperton offered the plan late Tuesday after two days of private talks with the two unions.

Caperton went on statewide television Wednesday night, saying he sympathized with the teachers but that there was no money for raises. ''It is very easy to say that the teachers need an additional pay raise, but the difficult part is finding out whose taxes are going to be raised,'' he said.

Only 7,001 of the state's 21,653 public school teachers were listed as having reported to work Wednesday morning, but the state said that figure did not include any who may have reported in counties where the schools were closed.

Caperton, a Democrat, had offered Tuesday to set aside up to $23 million to address teacher pay equity problems and to hold an ''education summit.''

He said he would call a special legislative session this summer to consider across-the-board pay raises, but only if West Virginia ended the fiscal year on June 30 with a budget surplus.

The unions have accused Caperton of reneging on a previous plan to provide $35 million for a 5 percent pay raise, an extra $6.5 million for health insurance and $27 million in new taxes on coal operators to help pay for the package.

#90074u1069 03/15/1990 ~United Press International

TOKYO (MARCH 15) UPI - Bank of Japan Governor Yasushi Mieno disappointed world financial markets on his return from Europe Thursday by giving no indication he would raise Japan's key interest rate.

Many viewed the move as months overdue and central to halting the dollar's rampage against the yen and despite the lack of a firm indication from Mieno expected a rate hike to be announced either Friday or Monday.

Within minutes of his equivocating statements at an evening news conference, the dollar breached the 153-yen level in London and Tokyo

dealers said they expected the greenback to make further gains in trading Friday.

At his news conference, Mieno said only, "I'm not happy about the present rate. We have no choice but continuing the strong intervention in cooperation with other western nations, including the United States. I can't say anything else."

The Bank of Japan's failure to raise its interest rate - described by one U.S. analyst as "the most anticipated discount rate hike of all time" - has virtually paralyzed Japanese stock and currency markets in recent weeks.

It is blamed not only for the dollar's advance against the yen, but also as a major factor behind the recent collapse on the Tokyo Stock Exchange where the key indicator fell this week to its lowest level in a year.

Economists, analysts and traders agree that Japan's monetary policy now appears without a rudder, and that the Bank of Japan and Finance Ministry are fighting for the helm of a leaking ship.

"It is not an overstatement to say markets are looking for a sign of coherence in policy," said Robert Alan Feldman, an economist for Salomon Bros. Asia.

"The finance ministry has been arguing for a discount rate hike and the BOJ believes continued yen-supporting intervention is enough to curb the dollar's rise. "Mommy and daddy are fighting and it's the children who are getting upset," Feldman said.

The public squabbling began shortly after Mieno took over as BOJ governor on Dec. 17 when he leaked plans of a discount rate hike to the news media without first informing Finance Minister Ryutaro Hashimoto of the move.

Hashimoto lashed out at the BOJ, declaring "I will force them to restrain." The finance minister soon gave up the fight, however, and a discount rate hike of 0.5 points to 4.25 percent was announced on Christmas Day.

"There has been some bad blood between Hashimoto and Mieno since then," said one analyst, adding that "99.9 percent of Finance and BOJ personnel get along very well."

Other market watchers say the real feuding is between Mieno and Makoto Utsumi, the vice minister of finance for international affairs. According to one published report, Utsumi is a confidant of U.S. Secretary of State James Baker.

"Both Utsumi and Mieno are very strong-willed and shrewd. Utsumi once gave me a small calligraphy with the motto, 'Persevere regardless of others,"'

said one financial analyst.

Despite Mieno's hedging Thursday, many in Japan's financial community speculated that the official discount rate could be raised as early as Friday by between 0.75 percent and one percent. "If the central bank doesn't act Friday or Monday, it could push the dollar to 155 or even worse," Feldman said.

Salomon Bros.'s weekly equity report said the stock market, which has already discounted the expected hike, would need another increase of one to two percent in the discount rate in April to shore up confidence in the yen.

#90074u1098 03/15/1990 ~United Press International

AUCKLAND, NEW ZEALAND (MARCH 15) UPI - A doctor who tracked his 7-year-old daughter to New Zealand in an international custody fight with his former wife left for Washington Thursday after visiting with the girl this week.

Dr. Eric Foretich, an oral surgeon from Falls Church, Va., told reporters he was returning to the United States because he had patients waiting for him and could not afford to stay in New Zealand.

Foretich arrived in the island nation east of Australia Feb. 27 and met with his daughter Hilary.

The New Zealand courts are considering whether Hilary should be sent back to the United States, where a District of Columbia court has jurisdiction of the case, or allowed to stay in New Zealand.

Foretich declined to discuss any legal aspects of the custody battle.

His former wife, Dr. Elizabeth Morgan, a Washington plastic surgeon, spent 25 months in a Washington, D.C., jail for contempt of court after refusing to disclose the whereabouts of Hilary. She was released last September only after Congress passed a law written for her limiting such contempt of court jailings in Washington, D.C.

Morgan arrived in New Zealand last week after the District of Columbia Court of Appeals returned her passport, which had been held since she was first found in contempt of court 3 1/2 years ago.

Morgan claims Foretich sexually assaulted Hilary, a contention he has repeatedly denied.

Foretich contends Morgan is mentally ill.

The two were legally separated before Hilary's birth, and have been in court for years debating custody and visitation issues.

Hilary surfaced a month ago in Christchurch, New Zealand, where she had been living since 1988 with her maternal grandparents, William and Antonia Morgan.

Foretich met with his daughter Tuesday for the first time in 2 1/2 years.

There was no official explanation of his visit.

Television film showed Hilary skipping happily as she came out of the building with her grandmother the day she saw her father, casting doubt on Morgan's claims that seeing her father would be traumatic for Hilary.

Foretich Thursday refused to talk about his meeting with Hilary.

''All I can say is that was so much elation inside me,'' Foretich said. ''It was a private meeting with my daughter and I want to keep it that way.

''I will not rest until she is safely returned and we know she is going to be OK,'' he said. ''I love my daughter; that's why I came here.''

Foretich, who has long been publicly vilified despite a failure of any court to accept the sexual abuse allegations, said he believed public opinion was turning his way. Recent news reports in Washington have cast doubt on some of Morgan's allegations against Foretich.

''A lot of people are looking at the facts of the case and a lot of facts that didn't come out earlier are coming out now,'' he said. ''A lot will depend on what happens in the next few weeks.''

Elaine Mittleman, an attorney for Foretich in Washington, said his flight was scheduled to land at Washington National Airport at 9:50 a.m. Friday.

WASHINGTON (MARCH 15) UPI - The U.S. Export-Import Bank undertook a ground-breaking guarantee Wednesday to help Mexico finance purchases of U.S. exports in a move that could help other highly indebted countries finance purchases of goods and services from the United States. The Eximbank decision will also allow U.S. banks to return to the business of export financing for developing countries.

Eximbank signed a guarantee of a $80.75 million medium-term credit facility from First Interstate Bancorp, based in Los Angeles, for the Mexican government's Banco Nacional de Comercio Exterior SNC. The facility will

finance up to $95 million in exports of U.S. capital goods and services.

Bancomext will draw on the credit line from First Interstate to finance individual Mexican importers' purchases on an interim basis. Once the drawings reach a sufficient total value they will be "bundled" into Eximbank-guaranteed notes to obtain financing in U.S. capital markets.

Eximbank noted that bundling brings economies of scale to the financing of small trade transactions and eases access to funds in securities markets, not traditionally sources of trade financing.

Bundling is "an innovative financing technique that will help Mexico conserve foreign exchange and purchase additional U.S. imports needed for economic growth," said Eximbank Chairman and President John D. Macomber. "I hope that this is the first of a new series of bundling transactions for Mexico and other reform-oriented developing countries."

Eximbank indicated other countries whose access to new credit is hampered by high external debt, such as Brazil, Chile, Venezuela, and the Philippines, could benefit from bundling of their import financing.
